

Exam Review – 2nd Shift (12th September)

Mathematics

The mathematics section maintained a similar structure to the 1st shift, but the overall difficulty was slightly easier.

- **Question Distribution:** Almost the same as the 1st shift, with standard topics such as Time & Work, Pipes & Cisterns, Partnership, Mixture–Alligation, Simplification, and Arithmetic dominating.
- **Level of Difficulty:**
 - 2–3 questions were of good/high level, but such questions are expected in every shift.
 - Most of the remaining questions were straightforward and solvable within time.

Overall Observation: Arithmetic continued to hold major weightage. The shift was slightly easier than 1st shift, making the maths section more doable.

English

The English section followed a pattern very similar to Shift 1.

- **Passage:** Present (instead of Cloze Test, which was not asked).
- **PYQ (Previous Year Questions):** Many were repeated or closely based on the 1st shift.
- **Topics Covered:**
 - Passage-based questions (doable without full reading, as in 1st shift)
 - Vocabulary (synonyms, antonyms, spelling errors, one-word substitution, homonyms)
 - Grammar (error spotting, direct–indirect, active–passive, para jumbles)

Overall Observation: The English section was **moderate but predictable**. Candidates familiar with PYQs could score easily.

Reasoning

Reasoning in the 2nd shift was very easy, even easier than in 1st shift.

- **Topics Covered:**
 - Letter Coding, Number Series, Blood Relation, Sitting Arrangement, Direction/Point-based questions, Address-based puzzles.
- **Level of Difficulty:**

- Questions were very straightforward (**halwa level**).
- Those who had practiced PYQs could solve the entire section comfortably.

Overall Observation: This was the easiest section in Shift 2. A near full score was achievable for well-prepared candidates.

General Studies (GS/GA)

The GS/GA section leaned more on **theoretical and knowledge-based questions** compared to Shift 1.

- **Focus:**
 - Questions required deeper conceptual understanding.
 - Several questions were from **General Awareness (2022–23)**, especially current events of that period.
 - **Topics Covered:**
 - Polity, Articles, (similar pattern to Shift 1)
 - History/Heritage, Cultural aspects
 - Sports, Policies, and Current Affairs (more emphasis on static + factual knowledge)
 - Science (Physics/Biology basics as in Shift 1)
-

Final Analysis – Shift 2

- Compared to Shift 1, the **2nd shift paper was easier overall**.
- **Mathematics:** Slightly easier, with only 2–3 tough questions.
- **English:** Based heavily on PYQs, no cloze test, easier with practice.
- **Reasoning:** Very easy – almost all questions solvable with PYQ practice.
- **GS/GA:** More conceptual and theory-based, focusing on 2022–23 awareness.

👉 **Overall Difficulty Level: Easy to Moderate**

👉 **Good Attempt Range: 85+ with accuracy**
