

Guidely SBI PO Mock 2, August 11, 2026

English Language

Q. 1

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

What is the primary aim of India Post Payments Bank (IPPB)?

- A) To provide loans and credit cards to rural customers 
- B) To ensure all citizens, particularly those in rural communities, have access to comprehensive financial services. 
- C) To compete with private sector banks in urban areas 
- D) To replace the existing post office network in India 
- E) To collect taxes on behalf of the Government of India 

Answer: B

- The opening sentence of the passage directly states: 'IPPB was launched...with the aim of providing financial services to every citizen, especially those living in rural and remote areas.' Option (b) is a direct match.

Explanation:**Why other options are incorrect:**

(a) is wrong because the passage states IPPB cannot issue loans.

(c) and (e) are never mentioned as goals.

(d) is incorrect because IPPB uses the post office network rather than replacing it.

Q. 2

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

Which of the following departments does IPPB operate under?A) Ministry of Finance B) Reserve Bank of India C) Department of Posts D) Ministry of Electronics and Information Technology E) National Payments Corporation of India 

Answer: C

The passage clearly states: 'Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen.' This is a direct fact stated in the passage.

Why other options are incorrect:**Explanation:**

- (a) Incorrect — Ministry of Finance is not mentioned as IPPB's parent body.
- (b) Incorrect — RBI regulates banks but is not IPPB's operating department.
- (d) Incorrect — MEITY is not mentioned.
- (e) Incorrect — NPCI manages UPI/NEFT infrastructure but does not operate IPPB.

Q. 3

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

What does the term 'financial inclusion' mean as used in the passage?**A) Bringing people without bank accounts into the formal financial system** **B) Providing high-interest loans to businesses** **C) Increasing the number of ATMs in urban areas** **D) Reducing the number of post offices in rural India** **E) Offering credit cards to senior citizens** 

Answer: A

- (Paragraph 2): The passage explicitly defines financial inclusion: '...bringing people who have never had a bank account into the formal financial system.'
- This directly supports the option **(a)** in this question.

Explanation:**Why other options are incorrect:**

- (b) Incorrect — High-interest loans are not part of the definition given.
- (c) Incorrect — ATMs in urban areas are not mentioned.
- (d) Incorrect — Reducing post offices contradicts the passage entirely.
- (e) Incorrect — Credit cards are specifically what IPPB cannot offer.

Q. 4

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

How does IPPB open accounts for customers in remote villages?

- A) Customers must visit the nearest commercial bank branch 
- B) Customers need to fill lengthy paper forms at post offices 
- C) A postman opens the account on the spot using a mobile device linked to Aadhaar 
- D) Customers apply online through a dedicated IPPB website 
- E) Grameen Dak Sevaks collect forms and submit them to the head post office 

Explanation:**Answer: C**

- (Paragraph 3): The passage explains the process: "Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device."
- It further mentions accounts are linked to Aadhaar.

Why other options are incorrect:

- (a) and (b) are contradicted by the "doorstep" and "minimal paperwork" claims.
- (d) and (e) are not the primary methods described for remote village access.

Q. 5

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

Which of the following services does IPPB NOT offer according to the passage?

- A) Savings accounts 
- B) Money transfers 
- C) Direct benefit transfers 
- D) Loans and credit cards 
- E) Bill payments 

Answer: D

- (Paragraph 4): The passage explicitly says: 'It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money.'
- All other options (savings accounts, money transfers, DBT, bill payments) are listed as services IPPB does offer.

Explanation:**Why other options are incorrect:**

- (a) Incorrect — Savings accounts ARE offered.
- (b) Incorrect — Money transfers ARE offered.
- (c) Incorrect — DBT IS offered.
- (e) Incorrect — Bill payments ARE offered. Only (d) is explicitly prohibited.

Q. 6

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

What is the maximum deposit allowed per customer in an IPPB account?

A) ₹50,000

B) ₹1 lakh

C) ₹2 lakh

D) ₹5 lakh

E) No upper limit is mentioned in the passage

Answer: C

- (Paragraph 4): The passage states: 'It can accept deposits of up to ₹2 lakh per customer.'
- This is a direct factual question with a specific number given in the passage.

Explanation:

Why other options are incorrect:

- (a) ₹50,000 — Incorrect figure; not mentioned.
- (b) ₹1 lakh — Incorrect; the passage clearly says ₹2 lakh.
- (d) ₹5 lakh — Incorrect; exceeds the stated limit. (e) Incorrect — An upper limit is clearly mentioned: ₹2 lakh.

Q. 7

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

Which of the following is an appropriate title for the passage?

- A) The Rise of Private Banks in Rural India 
- B) UPI and NEFT: India's Digital Payment Revolution 
- C) How Aadhaar Replaced Traditional Banking 
- D) India Post Payments Bank: Banking at Your Doorstep 
- E) The Decline of Post Offices in Modern India 

Answer: D

- The entire passage discusses IPPB — its aim, reach, services, limitations, and impact.
- The phrase 'Banking at Your Doorstep' perfectly captures the doorstep banking model described throughout.
- A good title must cover the full scope of the passage.

Explanation:**Why other options are incorrect:**

- (a) Incorrect — The passage is about IPPB, not private banks.
- (b) Incorrect — UPI and NEFT are minor supporting details, not the main topic.
- (c) Incorrect — The passage does not say Aadhaar replaced traditional banking.
- (e) Incorrect — Post offices are not declining; they are being used more through IPPB.

Q. 8

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

According to the passage, which group of people has benefited the most from IPPB's doorstep banking model?

A) Urban salaried employees and business owners

B) Foreign tourists visiting India

C) Exporters seeking foreign exchange services

D) Students applying for educational loans

E) Women, senior citizens, and daily wage workers

Answer: E**Explanation:**

- (Paragraph 5): The passage states: 'Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model.'
- The word 'particularly' directly points to these groups.

Why other options are incorrect:

(a), (b), (c), and (d) refer to groups that generally already have access to traditional banking or have different financial needs not highlighted in this specific text.

Q. 9

Read the following passage carefully and answer the questions given below it.

India Post Payments Bank (IPPB) was launched by the Government of India with the aim of providing financial services to every citizen, especially those living in rural and remote areas. Operating under the Department of Posts, IPPB uses the vast network of post offices and postmen to deliver banking services directly to customers' doorsteps. It offers services such as savings accounts, money transfers, direct benefit transfers (DBT), and bill payments.

One of the biggest advantages of IPPB is its reach. With over 1.5 lakh post office access points and more than 3 lakh Grameen Dak Sevaks (rural postal workers) equipped with smartphones and biometric devices, IPPB can serve customers even in villages that have no traditional bank branch. This makes it an important tool for financial inclusion, which means bringing people who have never had a bank account into the formal financial system.

IPPB accounts are linked to the customer's Aadhaar number, making it easy to open an account with minimal paperwork. Customers do not need to visit a bank branch — a postman can open an account on the spot using a mobile device. The bank also supports interoperability, meaning customers can transfer money to and from accounts in other banks through the Unified Payments Interface (UPI) and the National Electronic Funds Transfer (NEFT) system.

However, IPPB faces some challenges. It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money. It can accept deposits of up to ₹2 lakh per customer but cannot use those deposits to give out loans, unlike a full-service commercial bank. Critics argue that this limits IPPB's ability to fully meet the financial needs of rural customers who may also require credit for agriculture or small businesses.

Despite these limitations, IPPB has made a significant impact on financial inclusion in India. Millions of customers, particularly women, senior citizens, and daily wage workers, have benefited from its doorstep banking model. The government sees IPPB as a key pillar in its broader goal of building a Digital India — a country where every citizen, regardless of location or income, has access to digital financial services.

Which of the following statements is FALSE according to the passage?

- A) IPPB accounts are linked to the customer's Aadhaar number 
- B) IPPB supports interoperability through UPI and NEFT 
- C) IPPB can issue loans to rural customers for agricultural purposes 
- D) IPPB has over 1.5 lakh post office access points 
- E) IPPB is seen as a key pillar in the Digital India initiative 

Answer: C

- This is FALSE. The passage (Paragraph 4) explicitly states: 'It cannot issue loans or credit cards because, as a payments bank, it is not permitted to lend money.'
- All other options are TRUE as per the passage.

Why other options are incorrect:

Explanation:

- (a) TRUE — 'IPPB accounts are linked to the customer's Aadhaar number' — stated in Para 3.
- (b) TRUE — 'The bank also supports interoperability...through UPI and NEFT' — Para 3.
- (d) TRUE — 'With over 1.5 lakh post office access points' — Para 2.
- (e) TRUE — 'IPPB as a key pillar in its broader goal of building a Digital India' — Para 5.

Q. 10

In each of the following questions, a sentence is divided into four parts; (A),(B),(C) and (D). There may be an error in one part that makes the sentence grammatically or contextually incorrect. Choose the option with the part containing the error. If there is no error, mark your answer as 'e'.

The rapid proliferation of digital payment (A)/ platforms have significantly transformed (B)/ the way small businesses manage (C)/ their daily cash flows and transactions. (D)

- A) A 
- B) B 
- C) C 
- D) D 
- E) No error 

Answer: B

- This is a Subject-Verb Agreement error.
- The true subject of the sentence is "The rapid proliferation" (singular), not "platforms."
- Therefore, the auxiliary verb should be singular (has) instead of plural (have).

Explanation:

Part (A) correctly describes the noun phrase.

Parts (C) and (D) correctly use the plural possessive "their" to refer back to the plural "small businesses."

Final Correct Sentence: The rapid proliferation of digital payment platforms has significantly transformed the way small businesses manage their daily cash flows and transactions.

Q. 11	In each of the following questions, a sentence is divided into four parts; (A),(B),(C) and (D).There may be an error in one part that makes the sentence grammatically or contextually incorrect. Choose the option with the part containing the error. If there is no error, mark your answer as 'e'. Had the central bank (A)/ acted more proactively in (B)/ regulating the fintech sector, (C)/ the recent liquidity crisis could be avoided. (D) A) A  B) B  C) C  D) D  E) No error 
Explanation:	Answer: D • This sentence uses the Third Conditional (expressing a past regret or hypothetical situation). • When the "if-clause" is in the past perfect ("Had the bank acted..."), the "main clause" must use would/could/might + have + past participle. • Therefore, "could be avoided" must be changed to "could have been avoided." (A) uses a correct inverted conditional structure. (B) and (C) are grammatically sound and provide the necessary context. Final Correct Sentence: Had the central bank acted more proactively in regulating the fintech sector, the recent liquidity crisis could have been avoided.

Q. 12

In each of the following questions, a sentence is divided into four parts; (A),(B),(C) and (D). There may be an error in one part that makes the sentence grammatically or contextually incorrect. Choose the option with the part containing the error. If there is no error, mark your answer as 'e'.

The HR manager emphasized that (A)/ the new recruits must be (B)/ punctual, disciplined, and (C)/ show a high level of professional. (D)

- A) A 
- B) B 
- C) C 
- D) D 
- E) No error 

Explanation:**Answer: D**

- This is an error of Parallelism.
- The manager is listing three qualities.
- The first two are adjectives ("punctual," "disciplined").
- The third part of the list should also maintain grammatical consistency. "Professional" is an adjective; to complete the phrase "high level of...", we need the noun form, which is professionalism.

(A) correctly uses the past tense for the reporting verb.

(B) and (C) correctly set up the list of requirements for the recruits.

Final Correct Sentence: The HR manager emphasized that the new recruits must be punctual, disciplined, and show a high level of professionalism.

Q. 13	In each of the following questions, a sentence is divided into four parts; (A),(B),(C) and (D).There may be an error in one part that makes the sentence grammatically or contextually incorrect. Choose the option with the part containing the error. If there is no error, mark your answer as 'e'. The committee, which members (A)/ were handpicked by the CEO, (B)/ is expected to submit its (C)/ final report by the end of this month. (D) A) A  B) B  C) C  D) D  E) No error 
Explanation:	Answer: A • This is an error in the use of Relative Pronouns. • "Which" is used to refer to things, but when we want to show possession (the members of the committee), we must use whose. (B) correctly uses the passive voice. (C) and (D) correctly use the singular verb "is" and the singular possessive "its" because "committee" is a collective noun acting as a single unit here. Final Correct Sentence: The committee, whose members were handpicked by the CEO, is expected to submit its final report by the end of this month.

Q. 14	In each of the following questions, a sentence is divided into four parts; (A),(B),(C) and (D).There may be an error in one part that makes the sentence grammatically or contextually incorrect. Choose the option with the part containing the error. If there is no error, mark your answer as 'e'. Scarcely had the news (A)/ of the merger been announced (B)/ when the company's stock prices (C)/ plummeted by nearly fifteen percent. (D) A) A  B) B  C) C  D) D  E) No error 
Explanation:	Answer: E “Scarcely... when” is the correct idiomatic structure in English. “Scarcely had [something] happened when [something else happened].” (A) “Scarcely had the news” – correct. (B) “of the merger been announced” – correct. (C) “when the company's stock prices” – correct. (D) “plummeted by nearly fifteen percent” – correct. Everything is grammatically and contextually correct.

Q. 15

In the following passage there are blanks, each numbered. For each blank, five options are provided. Choose the word that best fits the context of the passage.

India's banking sector has undergone remarkable transformation over the past decade. The government's push towards a _____(15)_____ economy has encouraged both citizens and businesses to adopt digital modes of payment. Banks have invested heavily in technology to improve customer experience and reduce dependence on cash transactions.

Today, mobile banking apps allow users to transfer funds, pay bills, and check balances with ease. This has made financial services more _____(16)_____ to people living in smaller towns and rural areas, helping bridge the gap between urban and rural banking.

The Reserve Bank of India (RBI) plays a _____(17)_____ role in maintaining the stability of the country's financial system. It regulates commercial banks, sets interest rates, and manages the supply of currency in the economy.

The RBI's monetary policy decisions directly impact inflation, loan rates, and the overall pace of economic growth. By carefully monitoring economic indicators, the RBI tries to ensure that prices remain stable and that credit remains available at _____(18)_____ rates for businesses and individuals alike.

Non-Banking Financial Companies (NBFCs) have emerged as important contributors to India's credit ecosystem. They serve customers who are often unable to _____(19)_____ loans from traditional banks due to a lack of credit history or collateral.

NBFCs offer products such as vehicle loans, personal loans, and microfinance to individuals and small businesses. Their flexible approach and wider reach in semi-urban and rural areas have made them a _____(20)_____ part of India's financial inclusion story, complementing the services provided by scheduled commercial banks.

As digital payments become the norm, the need for robust cybersecurity measures and consumer protection laws has also grown. Regulators and financial institutions must work hand in hand to ensure that India's digital financial ecosystem remains safe, transparent, and accessible to everyone.

Which of the following words will fit in the given blank (15)?

A) cashless 

B) barter 

C) corrupt 

D) stagnant 

E) isolated 

Answer: A

- 'Cashless economy' is a well-known policy term in India referring to reducing physical cash transactions in favour of digital payments.
- The surrounding context — 'digital modes of payment', 'reduce dependence on cash transactions' — confirms that 'cashless' is the only appropriate word.

Explanation:**Why other options are incorrect:**

(b) barter — Barter means exchanging goods directly; it is primitive, not modern.

(c) corrupt — A corrupt economy is a negative phrase unrelated to digital payments.

(d) stagnant — Means no growth; contradicts 'push towards' (positive action).

(e) isolated — Means cut off from others; irrelevant to payment systems.

Q. 16

In the following passage there are blanks, each numbered. For each blank, five options are provided. Choose the word that best fits the context of the passage.

India's banking sector has undergone remarkable transformation over the past decade. The government's push towards a _____(15)_____ economy has encouraged both citizens and businesses to adopt digital modes of payment. Banks have invested heavily in technology to improve customer experience and reduce dependence on cash transactions.

Today, mobile banking apps allow users to transfer funds, pay bills, and check balances with ease. This has made financial services more _____(16)_____ to people living in smaller towns and rural areas, helping bridge the gap between urban and rural banking.

The Reserve Bank of India (RBI) plays a _____(17)_____ role in maintaining the stability of the country's financial system. It regulates commercial banks, sets interest rates, and manages the supply of currency in the economy.

The RBI's monetary policy decisions directly impact inflation, loan rates, and the overall pace of economic growth. By carefully monitoring economic indicators, the RBI tries to ensure that prices remain stable and that credit remains available at _____(18)_____ rates for businesses and individuals alike.

Non-Banking Financial Companies (NBFCs) have emerged as important contributors to India's credit ecosystem. They serve customers who are often unable to _____(19)_____ loans from traditional banks due to a lack of credit history or collateral.

NBFCs offer products such as vehicle loans, personal loans, and microfinance to individuals and small businesses. Their flexible approach and wider reach in semi-urban and rural areas have made them a _____(20)_____ part of India's financial inclusion story, complementing the services provided by scheduled commercial banks.

As digital payments become the norm, the need for robust cybersecurity measures and consumer protection laws has also grown. Regulators and financial institutions must work hand in hand to ensure that India's digital financial ecosystem remains safe, transparent, and accessible to everyone.

Which of the following words will fit in the given blank (16)?

A) restricted

B) inaccessible

C) accessible

D) irrelevant

E) burdensome

Answer: C

- 'Accessible' means easy to reach or obtain.
- The sentence talks about bridging the gap between urban and rural banking — making services reachable to those previously excluded.
- 'Accessible' perfectly fits both the meaning and positive tone.

Explanation:**Why other options are incorrect:**

- (a) restricted — Means limited; the sentence is about expanding reach, not limiting it.
- (b) inaccessible — The opposite of what is needed; would mean services are harder to get.
- (d) irrelevant — Means not important; contradicts the purpose of mobile banking.
- (e) burdensome — Means causing hardship; opposite of the intended positive impact.

Q. 17

In the following passage there are blanks, each numbered. For each blank, five options are provided. Choose the word that best fits the context of the passage.

India's banking sector has undergone remarkable transformation over the past decade. The government's push towards a _____(15)_____ economy has encouraged both citizens and businesses to adopt digital modes of payment. Banks have invested heavily in technology to improve customer experience and reduce dependence on cash transactions.

Today, mobile banking apps allow users to transfer funds, pay bills, and check balances with ease. This has made financial services more _____(16)_____ to people living in smaller towns and rural areas, helping bridge the gap between urban and rural banking.

The Reserve Bank of India (RBI) plays a _____(17)_____ role in maintaining the stability of the country's financial system. It regulates commercial banks, sets interest rates, and manages the supply of currency in the economy.

The RBI's monetary policy decisions directly impact inflation, loan rates, and the overall pace of economic growth. By carefully monitoring economic indicators, the RBI tries to ensure that prices remain stable and that credit remains available at _____(18)_____ rates for businesses and individuals alike.

Non-Banking Financial Companies (NBFCs) have emerged as important contributors to India's credit ecosystem. They serve customers who are often unable to _____(19)_____ loans from traditional banks due to a lack of credit history or collateral.

NBFCs offer products such as vehicle loans, personal loans, and microfinance to individuals and small businesses. Their flexible approach and wider reach in semi-urban and rural areas have made them a _____(20)_____ part of India's financial inclusion story, complementing the services provided by scheduled commercial banks.

As digital payments become the norm, the need for robust cybersecurity measures and consumer protection laws has also grown. Regulators and financial institutions must work hand in hand to ensure that India's digital financial ecosystem remains safe, transparent, and accessible to everyone.

Which of the following words will fit in the given blank (17)?

A) minor 

B) pivotal 

C) negligible 

D) decorative 

E) ambiguous 

Answer: B

- 'Pivotal' means critically important or central.
- The RBI regulates banks, sets interest rates, and manages currency — all of which are core functions.
- 'Pivotal' perfectly describes a role that everything else depends on.

Explanation:**Why other options are incorrect:**

(a) minor — Means small or unimportant; the RBI's role is the opposite.

(c) negligible — Means too small to matter; strongly contradicts the RBI's central importance.

(d) decorative — Means ornamental with no real function; nonsensical in this context.

(e) ambiguous — Means unclear; the RBI's role is well-defined, not ambiguous.

Q. 18

In the following passage there are blanks, each numbered. For each blank, five options are provided. Choose the word that best fits the context of the passage.

India's banking sector has undergone remarkable transformation over the past decade. The government's push towards a _____(15)_____ economy has encouraged both citizens and businesses to adopt digital modes of payment. Banks have invested heavily in technology to improve customer experience and reduce dependence on cash transactions.

Today, mobile banking apps allow users to transfer funds, pay bills, and check balances with ease. This has made financial services more _____(16)_____ to people living in smaller towns and rural areas, helping bridge the gap between urban and rural banking.

The Reserve Bank of India (RBI) plays a _____(17)_____ role in maintaining the stability of the country's financial system. It regulates commercial banks, sets interest rates, and manages the supply of currency in the economy.

The RBI's monetary policy decisions directly impact inflation, loan rates, and the overall pace of economic growth. By carefully monitoring economic indicators, the RBI tries to ensure that prices remain stable and that credit remains available at _____(18)_____ rates for businesses and individuals alike.

Non-Banking Financial Companies (NBFCs) have emerged as important contributors to India's credit ecosystem. They serve customers who are often unable to _____(19)_____ loans from traditional banks due to a lack of credit history or collateral.

NBFCs offer products such as vehicle loans, personal loans, and microfinance to individuals and small businesses. Their flexible approach and wider reach in semi-urban and rural areas have made them a _____(20)_____ part of India's financial inclusion story, complementing the services provided by scheduled commercial banks.

As digital payments become the norm, the need for robust cybersecurity measures and consumer protection laws has also grown. Regulators and financial institutions must work hand in hand to ensure that India's digital financial ecosystem remains safe, transparent, and accessible to everyone.

Which of the following words will fit in the given blank (18)?

A) excessive

B) unaffordable

C) prohibitive

D) reasonable

E) unpredictable

Answer: D

- 'Reasonable' means fair, affordable, and justified.
- The RBI monitors economic indicators to keep prices stable and ensure credit is available — the goal is fair rates that businesses and individuals can afford.

Why other options are incorrect:**Explanation:**

(a) excessive — Means too high; the RBI's goal is to prevent excessive rates, not set them.

(b) unaffordable — Directly contradicts the RBI's objective of keeping credit accessible.

(c) prohibitive — Means so expensive it prevents use; opposite of what the RBI aims for.

(e) unpredictable — Means erratic; stable monetary policy aims for the opposite of unpredictability.

Q. 19

In the following passage there are blanks, each numbered. For each blank, five options are provided. Choose the word that best fits the context of the passage.

India's banking sector has undergone remarkable transformation over the past decade. The government's push towards a _____(15)_____ economy has encouraged both citizens and businesses to adopt digital modes of payment. Banks have invested heavily in technology to improve customer experience and reduce dependence on cash transactions.

Today, mobile banking apps allow users to transfer funds, pay bills, and check balances with ease. This has made financial services more _____(16)_____ to people living in smaller towns and rural areas, helping bridge the gap between urban and rural banking.

The Reserve Bank of India (RBI) plays a _____(17)_____ role in maintaining the stability of the country's financial system. It regulates commercial banks, sets interest rates, and manages the supply of currency in the economy.

The RBI's monetary policy decisions directly impact inflation, loan rates, and the overall pace of economic growth. By carefully monitoring economic indicators, the RBI tries to ensure that prices remain stable and that credit remains available at _____(18)_____ rates for businesses and individuals alike.

Non-Banking Financial Companies (NBFCs) have emerged as important contributors to India's credit ecosystem. They serve customers who are often unable to _____(19)_____ loans from traditional banks due to a lack of credit history or collateral.

NBFCs offer products such as vehicle loans, personal loans, and microfinance to individuals and small businesses. Their flexible approach and wider reach in semi-urban and rural areas have made them a _____(20)_____ part of India's financial inclusion story, complementing the services provided by scheduled commercial banks.

As digital payments become the norm, the need for robust cybersecurity measures and consumer protection laws has also grown. Regulators and financial institutions must work hand in hand to ensure that India's digital financial ecosystem remains safe, transparent, and accessible to everyone.

Which of the following words will fit in the given blank (19)?

- A) deny 
- B) reject 
- C) forfeit 
- D) ignore 
- E) secure 

Answer: E

- 'Secure a loan' means to successfully obtain or get a loan.
- This is standard financial language.
- The sentence describes customers who cannot get loans from banks due to lack of credit history — 'secure' fits the context perfectly.

Why other options are incorrect:**Explanation:**

(a) deny — Means to refuse; grammatically it would mean customers deny the banks, not the other way around.

(b) reject — Same problem as 'deny'; the customers are not rejecting loans, they are unable to obtain them.

(c) forfeit — Means to give up something you already have; these customers never had the loan to begin with.

(d) ignore — Means to pay no attention to; implies a choice, not an inability.

Q. 20

In the following passage there are blanks, each numbered. For each blank, five options are provided. Choose the word that best fits the context of the passage.

India's banking sector has undergone remarkable transformation over the past decade. The government's push towards a _____(15)_____ economy has encouraged both citizens and businesses to adopt digital modes of payment. Banks have invested heavily in technology to improve customer experience and reduce dependence on cash transactions.

Today, mobile banking apps allow users to transfer funds, pay bills, and check balances with ease. This has made financial services more _____(16)_____ to people living in smaller towns and rural areas, helping bridge the gap between urban and rural banking.

The Reserve Bank of India (RBI) plays a _____(17)_____ role in maintaining the stability of the country's financial system. It regulates commercial banks, sets interest rates, and manages the supply of currency in the economy.

The RBI's monetary policy decisions directly impact inflation, loan rates, and the overall pace of economic growth. By carefully monitoring economic indicators, the RBI tries to ensure that prices remain stable and that credit remains available at _____(18)_____ rates for businesses and individuals alike.

Non-Banking Financial Companies (NBFCs) have emerged as important contributors to India's credit ecosystem. They serve customers who are often unable to _____(19)_____ loans from traditional banks due to a lack of credit history or collateral.

NBFCs offer products such as vehicle loans, personal loans, and microfinance to individuals and small businesses. Their flexible approach and wider reach in semi-urban and rural areas have made them a _____(20)_____ part of India's financial inclusion story, complementing the services provided by scheduled commercial banks.

As digital payments become the norm, the need for robust cybersecurity measures and consumer protection laws has also grown. Regulators and financial institutions must work hand in hand to ensure that India's digital financial ecosystem remains safe, transparent, and accessible to everyone.

Which of the following words will fit in the given blank (20)?

A) trivial 

B) vital 

C) redundant 

D) harmful 

E) temporary 

Answer: B

- 'Vital' means absolutely necessary and extremely important.
- The sentence celebrates NBFCs as major contributors to financial inclusion, complementing scheduled banks.
- 'Vital' captures that they are essential, not optional.

Why other options are incorrect:

Explanation:

- (a) trivial — Means unimportant; contradicts the sentence's praise for NBFCs.
- (c) redundant — Means unnecessary and repetitive; the sentence says NBFCs complement banks, meaning they fill gaps, not duplicate them.
- (d) harmful — Means causing damage; the opposite of the positive role described.
- (e) temporary — Implies NBFCs are short-lived; the sentence presents them as ongoing contributors.

Q. 21

In each of the following questions four words are given in bold. Some of them need to be interchanged to make the sentence grammatically and contextually correct. Choose the correct option. If no interchange is required, select option (e).

Developing a strong (A) work ethic greater (B) in life can lead to early (C) opportunities and long-term success (D) in any career.

A) A-B 

B) B-C 

C) A-D, B-C 

D) C-D 

E) No replacement required 

Answer: B

“work ethic greater in life”

- Incorrect. It should describe **when** the work ethic is developed. Correct word: **“early”**

Explanation:

“early opportunities”

- Incorrect in this context. “Early” should modify **developing the work ethic**, not opportunities. Correct word: **“greater”**

Correct Sentence: Developing a strong work ethic EARLY in life can lead to GREATER opportunities and long-term success in any career.

Q. 22	In each of the following questions four words are given in bold. Some of them need to be interchanged to make the sentence grammatically and contextually correct. Choose the correct option. If no interchange is required, select option (e). Creating a consistent (A) daily routine helps (B) students follow a study plan effectively (C) and build better (D) habits. A) A-D  B) A-C  C) B-C  D) C-D  E) No replacement required 
Explanation:	Answer: E • “Creating a consistent” → This is correct because it correctly describes the action of making a routine consistent. • “helps” → Correct verb; it matches the singular subject “Creating a routine.” • “students follow a study plan effectively” → Correct; “helps” is followed by the base form of the verb “follow,” which is correct grammar. • “build better habits” → Correct; “and” joins two verbs in the same structure: “follow” and “build.” Nothing needs changing because all parts are grammatically and contextually correct.

Q. 23	In each of the following questions four words are given in bold. Some of them need to be interchanged to make the sentence grammatically and contextually correct. Choose the correct option. If no interchange is required, select option (e). Understanding the explain (A) of physics can help principles (B) why objects move and how energy is transferred (C) between different systems (D). A) A-B ✓ B) B-C ✗ C) A-B, C-D ✗ D) C-D ✗ E) No replacement required ✗
Explanation:	Answer: A • “Principles” replaces “explain” (A), because we study the principles of physics. • “Explain” replaces “principles” (B), because the verb “help” is followed by an action. So swap A and B. Correct Sentence: Understanding the PRINCIPLES of physics can help EXPLAIN why objects move and how energy is transferred between different systems.

Q. 24	In each of the following questions four words are given in bold. Some of them need to be interchanged to make the sentence grammatically and contextually correct. Choose the correct option. If no interchange is required, select option (e). Reading books regularly helps (A) to increase (B) knowledge and develop (C) the habit of learning (D) new ideas. A) A-B  B) B-C  C) C-D  D) A-D  E) No replacement required 
Explanation:	Answer: E • The sentence is grammatically correct and logically meaningful as it stands. • 'Helps to increase knowledge' and 'develop the habit of learning new ideas' are both correct collocations. • All four bold words — helps, increase, develop, learning — are in their correct positions.

Q. 25

In the following questions six sentences are given. You must rearrange these sentences to make a contextually meaningful paragraph. Later, answer the following questions.

- (A) They help students understand difficult topics more clearly.
- (B) Teachers play an important role in shaping the future of students.
- (C) A good teacher also motivates students to achieve their goals.
- (D) Education is the foundation of a successful life.
- (E) Their guidance helps students develop confidence and knowledge.
- (F) Therefore, students should always respect and value their teachers.

Which is the **SECOND** sentence after rearrangement?

- A) A 
- B) E 
- C) C 
- D) D 
- E) B 

Explanation:

The Correct Logical Sequence is: **D – B – A – E – C – F**

1. **(D) The Introduction:** Starts with the broad importance of education.
2. **(B) The Key Agent:** Introduces teachers as the ones who facilitate that education.
3. **(A) Specific Method:** Explains what teachers do first—help students understand difficult topics (clear action).
4. **(E) General Impact:** Shows the result of that help—students gain confidence and knowledge.
5. **(C) Additional Support:** Uses “also” to add another role of teachers (motivation).
6. **(F) The Conclusion:** Uses “Therefore” to conclude how students should respond.

Answer: E

- Sentence D introduces the concept of education.
- Sentence B naturally follows by identifying the people (teachers) who play the most important role in that educational process.

Q. 26

In the following questions six sentences are given. You must rearrange these sentences to make a contextually meaningful paragraph. Later, answer the following questions.

- (A) They help students understand difficult topics more clearly.
 (B) Teachers play an important role in shaping the future of students.
 (C) A good teacher also motivates students to achieve their goals.
 (D) Education is the foundation of a successful life.
 (E) Their guidance helps students develop confidence and knowledge.
 (F) Therefore, students should always respect and value their teachers.

Which is the LAST sentence after rearrangement?

- A) A 
 B) B 
 C) C 
 D) F 
 E) E 

Explanation:

The Correct Logical Sequence is: **D – B – A – E – C – F**

1. **(D) The Introduction:** Starts with the broad importance of education.
2. **(B) The Key Agent:** Introduces teachers as the ones who facilitate that education.
3. **(A) Specific Method:** Explains what teachers do first—help students understand difficult topics (clear action).
4. **(E) General Impact:** Shows the result of that help—students gain confidence and knowledge.
5. **(C) Additional Support:** Uses “also” to add another role of teachers (motivation).
6. **(F) The Conclusion:** Uses “Therefore” to conclude how students should respond.

Answer: D

The Correct Logical Sequence is: **D – B – A – E – C – F**

- Sentence F begins with the transition word “Therefore,” which indicates a logical conclusion or a final piece of advice based on all the points previously mentioned.

Q. 27

In the following questions six sentences are given. You must rearrange these sentences to make a contextually meaningful paragraph. Later, answer the following questions.

- (A) They help students understand difficult topics more clearly.
 (B) Teachers play an important role in shaping the future of students.
 (C) A good teacher also motivates students to achieve their goals.
 (D) Education is the foundation of a successful life.
 (E) Their guidance helps students develop confidence and knowledge.
 (F) Therefore, students should always respect and value their teachers.

Which is the **FIRST** sentence after rearrangement?

A) D 

B) B 

C) C 

D) F 

E) E 

Explanation:

The Correct Logical Sequence is: **D – B – A – E – C – F**

1. **(D) The Introduction:** Starts with the broad importance of education.
2. **(B) The Key Agent:** Introduces teachers as the ones who facilitate that education.
3. **(A) Specific Method:** Explains what teachers do first—help students understand difficult topics (clear action).
4. **(E) General Impact:** Shows the result of that help—students gain confidence and knowledge.
5. **(C) Additional Support:** Uses “also” to add another role of teachers (motivation).
6. **(F) The Conclusion:** Uses “Therefore” to conclude how students should respond.

Answer: A

The Correct Logical Sequence is: **D – B – A – E – C – F**

- Sentence D is the most independent and broad statement.
- It sets the stage for the entire paragraph by defining the value of education.

Q. 28

In the following questions six sentences are given. You must rearrange these sentences to make a contextually meaningful paragraph. Later, answer the following questions.

- (A) They help students understand difficult topics more clearly.
- (B) Teachers play an important role in shaping the future of students.
- (C) A good teacher also motivates students to achieve their goals.
- (D) Education is the foundation of a successful life.
- (E) Their guidance helps students develop confidence and knowledge.
- (F) Therefore, students should always respect and value their teachers.

Which is the **FOURTH** sentence after rearrangement?

- A) F 
- B) E 
- C) C 
- D) D 
- E) A 

Explanation:

The Correct Logical Sequence is: **D – B – A – E – C – F**

1. **(D) The Introduction:** Starts with the broad importance of education.
2. **(B) The Key Agent:** Introduces teachers as the ones who facilitate that education.
3. **(A) Specific Method:** Explains what teachers do first—help students understand difficult topics (clear action).
4. **(E) General Impact:** Shows the result of that help—students gain confidence and knowledge.
5. **(C) Additional Support:** Uses “also” to add another role of teachers (motivation).
6. **(F) The Conclusion:** Uses “Therefore” to conclude how students should respond.

Answer: B

Q. 29

In the following questions six sentences are given. You must rearrange these sentences to make a contextually meaningful paragraph. Later, answer the following questions.

- (A) They help students understand difficult topics more clearly.
 (B) Teachers play an important role in shaping the future of students.
 (C) A good teacher also motivates students to achieve their goals.
 (D) Education is the foundation of a successful life.
 (E) Their guidance helps students develop confidence and knowledge.
 (F) Therefore, students should always respect and value their teachers.

Which is the FIFTH sentence after rearrangement?

- A) A 
 B) B 
 C) D 
 D) C 
 E) E 

Explanation:

The Correct Logical Sequence is: **D – B – A – E – C – F**

1. **(D) The Introduction:** Starts with the broad importance of education.
2. **(B) The Key Agent:** Introduces teachers as the ones who facilitate that education.
3. **(A) Specific Method:** Explains what teachers do first—help students understand difficult topics (clear action).
4. **(E) General Impact:** Shows the result of that help—students gain confidence and knowledge.
5. **(C) Additional Support:** Uses “also” to add another role of teachers (motivation).
6. **(F) The Conclusion:** Uses “Therefore” to conclude how students should respond.

Answer: D

The Correct Logical Sequence is: **D – B – A – E – C – F**

- Sentence C uses the word “also,” which indicates it is adding a final point to the list of a teacher's responsibilities (motivation) before the paragraph concludes.

Q. 30

The following questions have two blanks, each blank indicating that something has been omitted. Choose the set of words for each blank that best fits the context of the sentence.

Regular reading helps students _____ their vocabulary and become more _____ in communication.

A) destroy, careful 

B) break, silent 

C) increase, confident 

D) stop, active 

E) hide, nervous 

Answer: C

- 'Increase vocabulary' is the standard, natural collocation — you increase, build, or expand vocabulary.
- 'Confident in communication' is also the standard pairing — reading improves fluency which leads to confidence.
- Both blanks fit perfectly.

Why other options are incorrect:

Explanation:

- (a) destroy, careful — 'Destroy vocabulary' is the opposite of what reading does.
- (b) break, silent — 'Break vocabulary' is not a collocation; 'silent in communication' contradicts the purpose of communication skills.
- (d) stop, active — 'Stop vocabulary' is meaningless.
- (e) hide, nervous — 'Hide vocabulary' makes no sense; 'nervous' is the opposite of the expected outcome.

Correct Sentence: Regular reading helps students **increase** their vocabulary and become more **confident** in communication.

Q. 31	The following questions have two blanks, each blank indicating that something has been omitted. Choose the set of words for each blank that best fits the context of the sentence. Good time management allows employees to _____ their tasks efficiently and remain _____ during busy schedules. A) delay, confused  B) forget, careless  C) ignore, weak  D) manage, productive  E) waste, unhappy 
Explanation:	Answer: D • 'Manage tasks efficiently' is the core purpose of time management — a perfect collocation. • 'Remain productive during busy schedules' is exactly what good time management achieves. • Both words are contextually and grammatically ideal. Why other options are incorrect: (a) delay, confused — Delaying tasks is the opposite of good time management. (b) forget, careless — Both words indicate a failure of time management, not a benefit. (c) ignore, weak — 'Ignore tasks' defeats the purpose; 'weak' is a negative trait. (e) waste, unhappy — 'Waste tasks' is not standard English; 'unhappy' is a negative outcome. Correct Sentence: Good time management allows employees to manage their tasks efficiently and remain productive during busy schedules.

Q. 32	The following questions have two blanks, each blank indicating that something has been omitted. Choose the set of words for each blank that best fits the context of the sentence. Physical exercise helps people _____ their health and stay _____ throughout the day. A) forget, weak  B) damage, lazy  C) reduce, tired  D) improve, energetic  E) ignore, sick 
Explanation:	Answer: D 'Improve health' is the most direct and common collocation — exercise improves health. 'Stay energetic throughout the day' is the well-known benefit of regular exercise. - Both words are positive, contextually accurate, and grammatically correct. Why other options are incorrect: (a) forget, weak — 'Forget health' is meaningless; 'weak' is the opposite of the physical benefit of exercise. (b) damage, lazy — Both are negative outcomes; exercise does the opposite. (c) reduce, tired — 'Reduce health' is not standard; 'tired' contradicts what exercise achieves. (e) ignore, sick — 'Ignore health' means neglecting it; 'sick' is the opposite of the intended result. Correct Sentence: Physical exercise helps people improve their health and stay energetic throughout the day.

Q. 33	The following questions have two blanks, each blank indicating that something has been omitted. Choose the set of words for each blank that best fits the context of the sentence. Online learning platforms help students _____ new concepts easily and become more _____ in their studies. A) understand, confident ✓ B) forget, careless ✗ C) avoid, weak ✗ D) break, confused ✗ E) ignore, lazy ✗
Explanation:	Answer: A 'Understand new concepts' is the primary purpose of any learning platform — a natural, direct collocation. 'Become more confident in their studies' is the logical positive outcome of understanding material well. - Both words fit grammatically and contextually. Why other options are incorrect: (b) forget, careless — 'Forget concepts' and 'become careless' are both negative outcomes that contradict the purpose of learning platforms. (c) avoid, weak — 'Avoid concepts' means deliberately skipping them; 'weak' is a negative outcome. (d) break, confused — 'Break concepts' is not standard English; 'confused' is the opposite of the intended result. (e) ignore, lazy — Both indicate a failure to engage with learning; contradicts the sentence's positive framing. Correct Sentence: Online learning platforms help students understand new concepts easily and become more confident in their studies.

Q. 34

In the following questions, a phrase is highlighted. Choose the option that can replace the highlighted phrase to make the sentence grammatically and contextually correct. If no replacement is required, select the option (e).

The children love visiting the library because it has a reading corner which offered a wide variety of storybooks and comic books for all age groups.

A) which has offered ✗

B) that offers ✓

C) which is offered ✗

D) that had offered ✗

E) No replacement required ✗

Answer: B

- Main clause: The children love visiting the library because it has... → **present tense**
- This tells us the action or situation is **currently true**.
- Highlighted phrase: which offered → **past tense**
- Problem: The reading corner **still exists** and **still offers books**, so past tense is **incorrect**.

Let's look at the options:

(a) which has offered → Present perfect.

- Suggests it offered books in the past, may or may not now.
- Not suitable because the corner **still offers** books.

(b) that offers → Present tense, defining relative clause.

- Correct. Matches the ongoing situation.

(c) which is offered → Present passive.

- Changes the meaning: sounds like "the books are offered" rather than describing the reading corner.

(d) that had offered → Past perfect.

- Refers to something completed in the past before another past event.
- Tense mismatch with present clause.

Correct sentence: The children love visiting the library because it has a reading corner **that offers** a wide variety of storybooks and comic books for all age groups.

Explanation:

Q. 35

In the following questions, a phrase is highlighted. Choose the option that can replace the highlighted phrase to make the sentence grammatically and contextually correct. If no replacement is required, select the option (e).

Every morning, Ravi goes for a walk, reads the newspaper, and is having a healthy breakfast before leaving for his office.

- A) and are having 
- B) and to have 
- C) and has 
- D) and had 
- E) No replacement required 

Answer: C

Main clause verbs:

- goes → present tense
- reads → present tense
- is having → present continuous tense

Problem:

- The first two actions (goes and reads) are **habitual actions** in the present tense.
- "is having" is **present continuous**, which suggests an ongoing action **at this very moment**, not a habitual routine.
- To maintain **parallel structure**, all actions describing Ravi's morning routine should be in **simple present tense**.

Explanation:

Let's look at the options:

- **(a) and are having** → Present continuous plural.
 - Incorrect because the subject is singular (Ravi) and routine actions need simple present.
- **(b) and to have** → Infinitive form.
 - Incorrect; it does not fit the verb pattern in the sentence.
- **(c) and has** → Simple present tense.
 - Correct. Maintains parallelism with goes and reads.
- **(d) and had** → Past tense.
 - Tense mismatch with present tense verbs.

Correct Sentence: Every morning, Ravi goes for a walk, reads the newspaper, **and has** a healthy breakfast before leaving for his office.

Q. 36

In the following questions, a phrase is highlighted. Choose the option that can replace the highlighted phrase to make the sentence grammatically and contextually correct. If no replacement is required, select the option (e).

The new shopping mall is located at the opposite of the railway station and can be reached easily by bus or auto-rickshaw.

- A) at the opposite to ✗
- B) in the opposite for ✗
- C) opposite to ✓
- D) on opposite of ✗
- E) No replacement required ✗

Answer: C

- The phrase "**at the opposite of**" is **grammatically incorrect**.
- The correct expression to indicate location across from something is "**opposite to**".

Let's look at the options:

- **(a) at the opposite to** → Incorrect; "at" is unnecessary.
- **(b) in the opposite for** → Incorrect; "in ... for" is wrong in this context.
- **(c) opposite to** → Correct; standard expression for location across from something.
- **(d) on opposite of** → Incorrect; "on ... of" is wrong.

Correct Sentence: The new shopping mall is located **opposite to** the railway station and can be reached easily by bus or auto-rickshaw.

Q. 37	In the following questions, a phrase is highlighted. Choose the option that can replace the highlighted phrase to make the sentence grammatically and contextually correct. If no replacement is required, select the option (e). Walking through the park, the autumn leaves fell gently on the quiet benches and winding paths. A) While walking through the park ✗ B) As we walked through the park ✓ C) To walk through the park ✗ D) Having walked through the park ✗ E) No replacement required ✗
Explanation:	Answer: B - The phrase “Walking through the park” is a dangling participle. - Grammatically, it incorrectly suggests the autumn leaves were walking through the park, which is illogical. Let's look at the options: (a) While walking through the park → Present participial phrase, but still no subject; unclear who is walking. (b) As we walked through the park → Correct. Now the subject “we” is clear, matching the action. (c) To walk through the park → Infinitive phrase; changes the meaning and is ungrammatical here. (d) Having walked through the park → Past perfect participial phrase; suggests the walking is already finished, which doesn't fit the ongoing scene. Correct Sentence: As we walked through the park, the autumn leaves fell gently on the quiet benches and winding paths.

Q. 38

The given sentences when properly sequenced forms a coherent paragraph. Each letter is labeled with a letter. Choose the most logical order of the sentences from among the five choices to construct a coherent paragraph.

- A. many English writers find
- B. a new creative project
- C. minimalism helps them clear
- D. that a specific philosophy of
- E. their minds before starting

A) ACDBE

B) AEBDC

C) CEADB

D) ADCEB

E) No arrangement required

**Explanation:****Answer: D**

A ("many English writers find") is the subject and verb. It requires an object—specifically, what they find.

D ("that a specific philosophy of") acts as the conjunction "that" to introduce a clause, followed by "philosophy of," which needs a noun to complete the phrase.

C ("minimalism helps them clear") provides that noun ("minimalism") and a new verb ("helps").

E ("their minds before starting") completes the thought of what is being cleared.

B ("a new creative project") serves as the object of the preposition "starting" at the end of segment E.

After arrangement: Many English writers find that a specific philosophy of minimalism helps them clear their minds before starting a new creative project.

Q. 39

The given sentences when properly sequenced forms a coherent paragraph. Each letter is labeled with a letter. Choose the most logical order of the sentences from among the five choices to construct a coherent paragraph.

- A. you decide to start
- B. a new walking or running
- C. buying comfortable shoes
- D. is the first step when
- E. routine for your fitness

A) CDABE

B) ABDEC

C) DAECB

D) BEDAC

E) No arrangement required

**Answer: A**

C ("buying comfortable shoes") serves as the primary subject (a gerund phrase).

D ("is the first step when") provides the linking verb ("is") and introduces the condition for that step.

A ("you decide to start") follows "when" to define the actor and the action.

B ("a new walking or running") acts as the object of the verb "start."

E ("routine for your fitness") completes the description of the activity and its purpose.

After arrangement: Buying comfortable shoes is the first step when you decide to start a new walking or running routine for your fitness.

Explanation:

Q. 40

The given sentences when properly sequenced forms a coherent paragraph. Each letter is labeled with a letter. Choose the most logical order of the sentences from among the five choices to construct a coherent paragraph.

- A. you can save a lot of
 B. money by planning your
 C. weekly meals before you
 D. go to the busy supermarket
 E. for your shopping

A) DEABC

B) CABED

C) BEADC

D) ABCED

E) No arrangement required

**Answer: E**

A ("you can save a lot of") starts the sentence with a subject and a modal verb phrase, needing an object.

B ("money by planning your") provides that object ("money") and introduces the method ("by planning").

C ("weekly meals before you") completes the object of "planning" and sets up a time-based condition.

D ("go to the busy supermarket") follows the subject "you" to describe the action.

E ("for your shopping") provides the concluding prepositional phrase explaining the purpose of going to the supermarket.

Hence option (e) is the correct answer.

Explanation:

Quantitative Aptitude

Q. 41

Study the following information carefully and answer the following questions.

The given table shows the quantity of sugar and salt sold in five different shops namely A, B, C, D and E respectively and also the quantity of sugar and salt unsold in kg in these five shops.

Shop	The quantity of sugar and salt sold in kg	The quantity of sugar and salt unsold in kg
A	240	120
B	180	150
C	220	250
D	150	300
E	280	90

In shop C, the ratio of the quantity of sugar sold to unsold is 3:4 and the ratio of the quantity of salt sold to unsold is 7:5. Find the difference between the quantity of sugar unsold and the number of salt sold.

- A) 180 
- B) 210 
- C) 150 
- D) 190 
- E) 130 

Answer: E

Let, the ratio of the quantity of sugar sold and sugar unsold is $3x$ and $4x$ in shop C respectively.

Let, the ratio of the quantity of salt sold and salt unsold is $7y$ and $5y$ in shop C respectively.

$$3x + 7y = 220 \text{ -----} \rightarrow (1)$$

$$4x + 5y = 250 \text{ -----} \rightarrow (2)$$

Multiplying equation (1) * 4 and (2) * 3, we get

$$12x + 28y = 880 \text{ -----} \rightarrow (3)$$

$$12x + 15y = 750 \text{ -----} \rightarrow (4)$$

By solving equation (3) and (4), we get

$$13y = 130$$

$$y = 10 \text{ and } x = 50$$

$$\text{The quantity of sugar unsold in shop C} = 4 * 50 = 200$$

$$\text{The quantity of salt sold in shop C} = 7 * 10 = 70$$

$$\text{Required difference} = (200 - 70) = 130$$

Hence, the correct answer is option E

Explanation:

Q. 42

Study the following information carefully and answer the following questions.

The given table shows the quantity of sugar and salt sold in five different shops namely A, B, C, D and E respectively and also the quantity of sugar and salt unsold in kg in these five shops.

Shop	The quantity of sugar and salt sold in kg	The quantity of sugar and salt unsold in kg
A	240	120
B	180	150
C	220	250
D	150	300
E	280	90

The quantity of sugar and salt sold in shop F is $\frac{1}{7}$ more than that in shop E and the ratio of the quantity of sugar to salt sold in shop F is 5:3. If the quantity of salt unsold is 80 kg less than that of sold and the quantity of sugar and salt unsold in shop F is the same as shop E, then find the total quantity of sugar before sales in shop F.

- A) 245 
- B) 180 
- C) 120 
- D) 250 
- E) 160 

Explanation:

Answer: D

The quantity of sugar and salt sold in shop F = $(280 + \frac{280}{7}) = 320$

The quantity of sugar sold in shop F = $320 \times \frac{5}{8} = 200$

The quantity of salt sold in shop F = $320 \times \frac{3}{8} = 120$

The quantity of salt unsold in shop F = $120 - 80 = 40$

The quantity of sugar unsold in shop F = $(90 - 40) = 50$

The total quantity of sugar in shop F before sales = $(200 + 50) = 250$

Hence, the correct answer is option D

Q. 43

Study the following information carefully and answer the following questions.

The given table shows the quantity of sugar and salt sold in five different shops namely A, B, C, D and E respectively and also the quantity of sugar and salt unsold in kg in these five shops.

Shop	The quantity of sugar and salt sold in kg	The quantity of sugar and salt unsold in kg
A	240	120
B	180	150
C	220	250
D	150	300
E	280	90

Find the difference between the quantity of sugar and salt unsold in shops B and C together and the quantity of sugar and salt sold in shop D.

- A) 210 
- B) 170 
- C) 250 
- D) 140 
- E) 200 

Explanation:

Answer: C

The sum of the quantity of sugar and salt unsold in shop B and C together = $(150 + 250) = 400$

The quantity of sugar and salt sold in shop D = 150

Required difference = $(400 - 150) = 250$

Hence, the correct answer is option C

Q. 44

Study the following information carefully and answer the following questions.

The given table shows the quantity of sugar and salt sold in five different shops namely A, B, C, D and E respectively and also the quantity of sugar and salt unsold in kg in these five shops.

Shop	The quantity of sugar and salt sold in kg	The quantity of sugar and salt unsold in kg
A	240	120
B	180	150
C	220	250
D	150	300
E	280	90

In shop D, the ratio of the quantity of the sugar to salt sold is 2:1 and the sugar and salt are sold at Rs. 40 per kg and Rs. 20 per kg. Find the overall revenue generated in shop D.

- A) Rs. 4800 
- B) Rs. 5000 
- C) Rs. 3880 
- D) Rs. 4200 
- E) Rs. 3600 

Explanation:

Answer: B

The quantity of sugar sold in shop D = $150 \times \frac{2}{3} = 100$

The quantity of salt sold in shop D = $150 \times \frac{1}{3} = 50$

The overall revenue generated in shop D = $(100 \times 40 + 50 \times 20) = (4000 + 1000) = \text{Rs. } 5000$

Hence, the correct answer is option B.

Q. 45

Study the following information carefully and answer the following questions.

The given table shows the quantity of sugar and salt sold in five different shops namely A, B, C, D and E respectively and also the quantity of sugar and salt unsold in kg in these five shops.

Shop	The quantity of sugar and salt sold in kg	The quantity of sugar and salt unsold in kg
A	240	120
B	180	150
C	220	250
D	150	300
E	280	90

Find the ratio between the quantity of sugar and salt unsold in shop E to the quantity of sugar and salt sold in shop B.

- A) 2:1 
- B) 3:4 
- C) 1:2 
- D) 1:1 
- E) 6:7 

Explanation:**Answer: C**

The quantity of sugar and salt unsold in shop E = 90

The quantity of sugar and salt sold in shop B = 180

Required ratio = 90: 180 = 1: 2

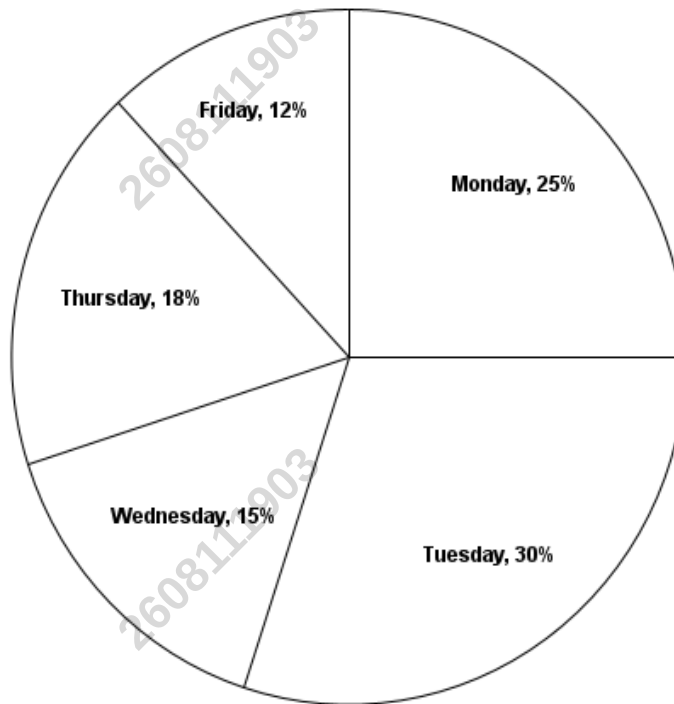

Hence, the correct answer is option C.

Q. 46

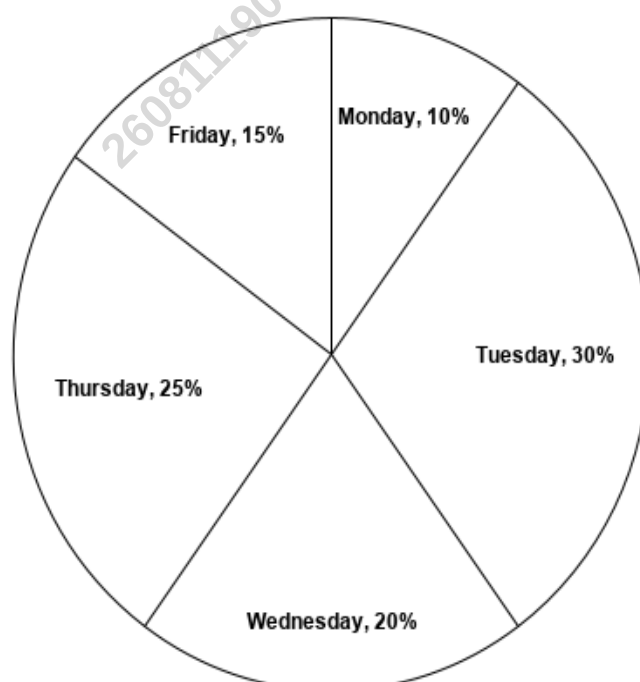

Study the following information carefully and answer the following questions.

The given pie chart shows the percentage distribution of the total number of people booked (Flight + Train) tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

Note: The total number of people who booked tickets on all days together is 8000, out of which 60% of the people booked tickets are train tickets.

The given pie chart shows the percentage distribution of the number of people booked flight tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

On Tuesday, out of the total number of people who booked tickets, 42% of the tickets booked are males and the rest of them are females. If the number of males who booked train tickets is 880, then find the number of females who booked flight tickets.

A) 832 

B) 775 

C) 980 

D) 425 

E) 728 

On Monday:

The total number of people booked tickets = $8000 * 25/100 = 2000$

The number of people booked flight tickets = $3200 * 10/100 = 320$

The number of people booked train tickets = $(2000 - 320) = 1680$

On Tuesday:

The total number of people booked tickets = $8000 * 30/100 = 2400$

The number of people booked flight tickets = $3200 * 30/100 = 960$

The number of people booked train tickets = $(2400 - 960) = 1440$

On Wednesday:

The total number of people booked tickets = $8000 * 15/100 = 1200$

The number of people booked flight tickets = $3200 * 20/100 = 640$

The number of people booked train tickets = $(1200 - 640) = 560$

On Thursday:

The total number of people booked tickets = $8000 * 18/100 = 1440$

The number of people booked flight tickets = $3200 * 25/100 = 800$

The number of people booked train tickets = $(1440 - 800) = 640$

On Friday:

The total number of people booked tickets = $8000 * 12/100 = 960$

The number of people booked flight tickets = $3200 * 15/100 = 480$

The number of people booked train tickets = $(960 - 480) = 480$

Explanation:

Days	The total number of tickets booked	The number of flight tickets booked	The number of train tickets booked
Monday	2000	320	1680
Tuesday	2400	960	1440
Wednesday	1200	640	560
Thursday	1440	800	640
Friday	960	480	480

Answer: A

The total number of males who booked tickets on Tuesday = $2400 * 42/100 = 1008$

The total number of females who booked tickets on Tuesday = $2400 * 58/100 = 1392$

The number of males who booked flight tickets on Tuesday = $(1008 - 880) = 128$

The number of females who booked flight tickets on Tuesday = $(960 - 128) = 832$

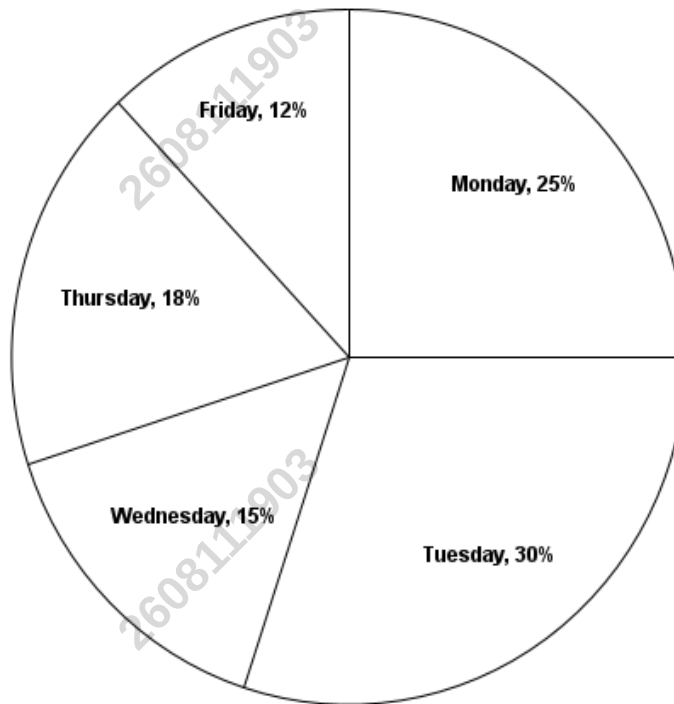

Hence, the correct answer is option A

Q. 47

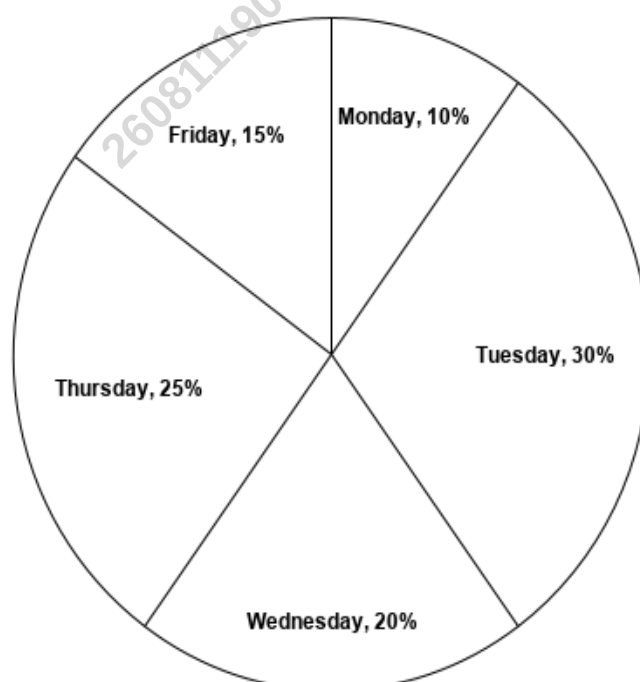

Study the following information carefully and answer the following questions.

The given pie chart shows the percentage distribution of the total number of people booked (Flight + Train) tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

Note: The total number of people who booked tickets on all days together is 8000, out of which 60% of the people booked tickets are train tickets.

The given pie chart shows the percentage distribution of the number of people booked flight tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

The ratio of the number of people who booked flight tickets on Friday to that on Saturday is 12:11 and the number of people who booked train tickets on Saturday is 180 more than that of flight tickets. Find the total number of tickets booked on Saturday.

- A) 900 
- B) 1060 
- C) 1250 
- D) 800 
- E) 760 

On Monday:

The total number of people booked tickets = $8000 * 25/100 = 2000$

The number of people booked flight tickets = $3200 * 10/100 = 320$

The number of people booked train tickets = $(2000 - 320) = 1680$

On Tuesday:

The total number of people booked tickets = $8000 * 30/100 = 2400$

The number of people booked flight tickets = $3200 * 30/100 = 960$

The number of people booked train tickets = $(2400 - 960) = 1440$

On Wednesday:

The total number of people booked tickets = $8000 * 15/100 = 1200$

The number of people booked flight tickets = $3200 * 20/100 = 640$

The number of people booked train tickets = $(1200 - 640) = 560$

On Thursday:

The total number of people booked tickets = $8000 * 18/100 = 1440$

The number of people booked flight tickets = $3200 * 25/100 = 800$

The number of people booked train tickets = $(1440 - 800) = 640$

Explanation:**On Friday:**

The total number of people booked tickets = $8000 * 12/100 = 960$

The number of people booked flight tickets = $3200 * 15/100 = 480$

The number of people booked train tickets = $(960 - 480) = 480$

Days	The total number of tickets booked	The number of flight tickets booked	The number of train tickets booked
Monday	2000	320	1680
Tuesday	2400	960	1440
Wednesday	1200	640	560
Thursday	1440	800	640
Friday	960	480	480

Answer: B

The number of people who booked flight tickets on Saturday = $480 * 11/12 = 440$

The number of people who booked train tickets on Saturday = $(440 + 180) = 620$

The total number of people who booked tickets on Saturday = $(620 + 440) = 1060$

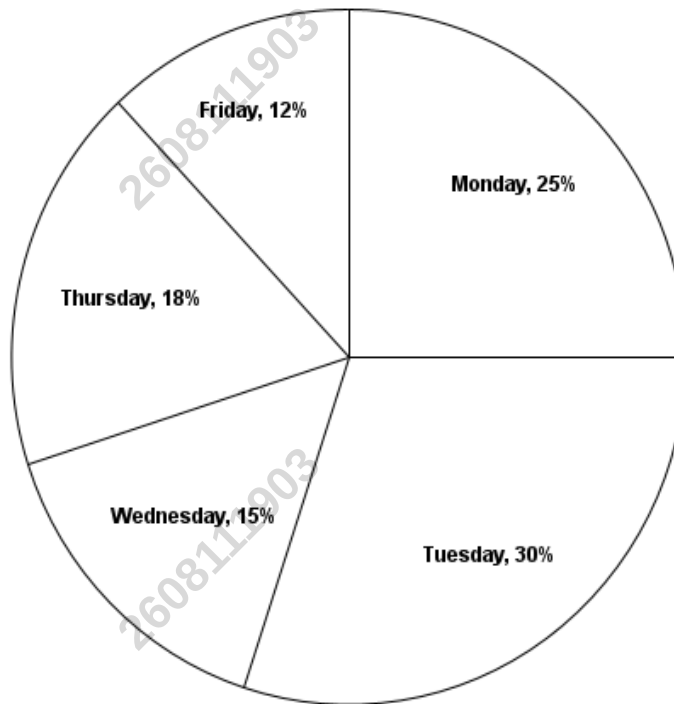

Hence, the correct answer is option B.

Q. 48

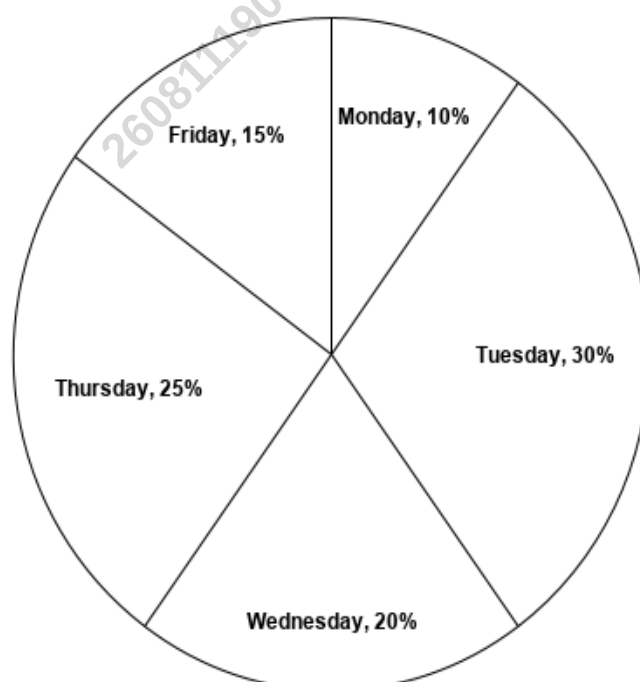

Study the following information carefully and answer the following questions.

The given pie chart shows the percentage distribution of the total number of people booked (Flight + Train) tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

Note: The total number of people who booked tickets on all days together is 8000, out of which 60% of the people booked tickets are train tickets.

The given pie chart shows the percentage distribution of the number of people booked flight tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

The number of bus tickets booked on Wednesday is $(\frac{3}{7})$ more than the number of train tickets and the average number of bus tickets booked on Wednesday and Tuesday is 700. Find the difference between the number of bus and flight tickets booked on Tuesday.

- A) 420 
- B) 380 
- C) 400 
- D) 620 
- E) 360 

On Monday:

The total number of people booked tickets = $8000 * 25/100 = 2000$

The number of people booked flight tickets = $3200 * 10/100 = 320$

The number of people booked train tickets = $(2000 - 320) = 1680$

On Tuesday:

The total number of people booked tickets = $8000 * 30/100 = 2400$

The number of people booked flight tickets = $3200 * 30/100 = 960$

The number of people booked train tickets = $(2400 - 960) = 1440$

On Wednesday:

The total number of people booked tickets = $8000 * 15/100 = 1200$

The number of people booked flight tickets = $3200 * 20/100 = 640$

The number of people booked train tickets = $(1200 - 640) = 560$

On Thursday:

The total number of people booked tickets = $8000 * 18/100 = 1440$

The number of people booked flight tickets = $3200 * 25/100 = 800$

The number of people booked train tickets = $(1440 - 800) = 640$

On Friday:

The total number of people booked tickets = $8000 * 12/100 = 960$

The number of people booked flight tickets = $3200 * 15/100 = 480$

The number of people booked train tickets = $(960 - 480) = 480$

Explanation:

Days	The total number of tickets booked	The number of flight tickets booked	The number of train tickets booked
Monday	2000	320	1680
Tuesday	2400	960	1440
Wednesday	1200	640	560
Thursday	1440	800	640
Friday	960	480	480

Answer: E

The number of bus tickets booked on Wednesday = $(560 + 560 * 3/7) = (560 + 240) = 800$

The number of bus tickets booked on Tuesday = $1400 - 800 = 600$

Required difference = $(960 - 600) = 360$

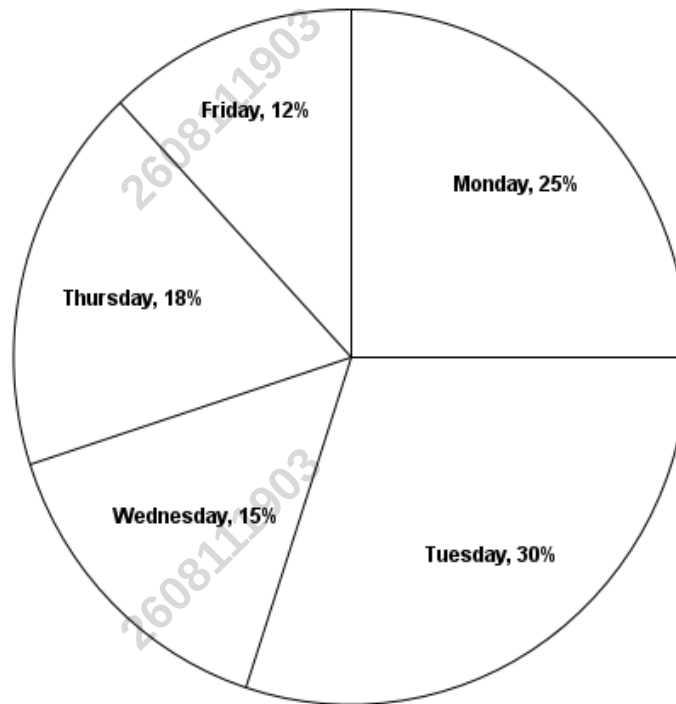

Hence, the correct answer is option E

Q. 49

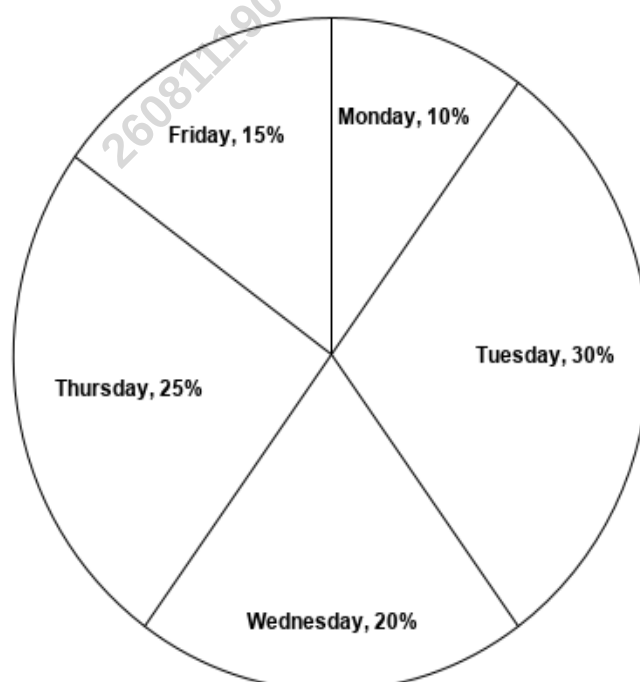

Study the following information carefully and answer the following questions.

The given pie chart shows the percentage distribution of the total number of people booked (Flight + Train) tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

Note: The total number of people who booked tickets on all days together is 8000, out of which 60% of the people booked tickets are train tickets.

The given pie chart shows the percentage distribution of the number of people booked flight tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

Find the sum of the number of people who booked train tickets on Monday, Tuesday and Wednesday and the number of people who booked flight tickets on Thursday and Friday.

- A) 4000 
- B) 4960 
- C) 5260 
- D) 3880 
- E) 3560 

On Monday:

The total number of people booked tickets = $8000 * 25/100 = 2000$

The number of people booked flight tickets = $3200 * 10/100 = 320$

The number of people booked train tickets = $(2000 - 320) = 1680$

On Tuesday:

The total number of people booked tickets = $8000 * 30/100 = 2400$

The number of people booked flight tickets = $3200 * 30/100 = 960$

The number of people booked train tickets = $(2400 - 960) = 1440$

On Wednesday:

The total number of people booked tickets = $8000 * 15/100 = 1200$

The number of people booked flight tickets = $3200 * 20/100 = 640$

The number of people booked train tickets = $(1200 - 640) = 560$

On Thursday:

The total number of people booked tickets = $8000 * 18/100 = 1440$

The number of people booked flight tickets = $3200 * 25/100 = 800$

The number of people booked train tickets = $(1440 - 800) = 640$

On Friday:

The total number of people booked tickets = $8000 * 12/100 = 960$

The number of people booked flight tickets = $3200 * 15/100 = 480$

The number of people booked train tickets = $(960 - 480) = 480$

Explanation:

Days	The total number of tickets booked	The number of flight tickets booked	The number of train tickets booked
Monday	2000	320	1680
Tuesday	2400	960	1440
Wednesday	1200	640	560
Thursday	1440	800	640
Friday	960	480	480

Answer: B

The sum of the number of people who booked train tickets on Monday, Tuesday and Wednesday = $(1680 + 1440 + 560) = 3680$

The number of people who booked flight tickets on Thursday and Friday = $(800 + 480) = 1280$

Required sum = $(3680 + 1280) = 4960$

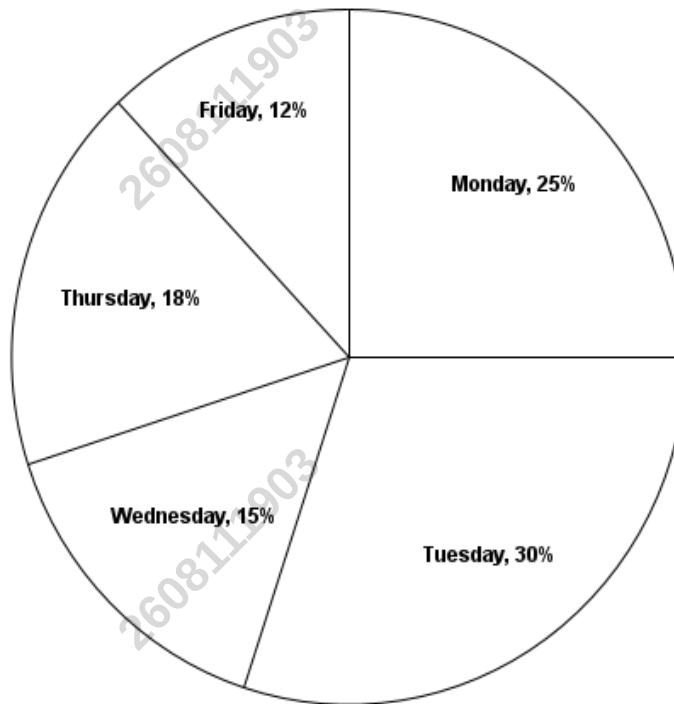

Hence, the correct answer is option B

Q. 50

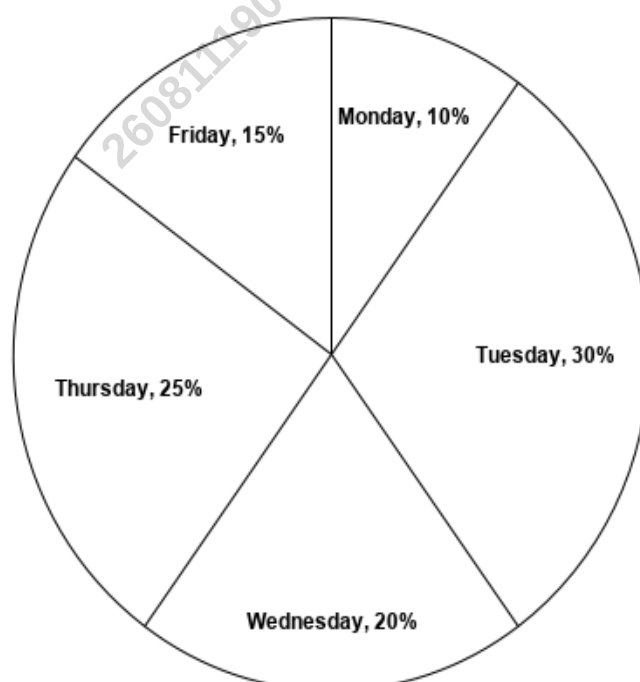

Study the following information carefully and answer the following questions.

The given pie chart shows the percentage distribution of the total number of people booked (Flight + Train) tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

Note: The total number of people who booked tickets on all days together is 8000, out of which 60% of the people booked tickets are train tickets.

The given pie chart shows the percentage distribution of the number of people booked flight tickets on five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively.

Find the ratio between the number of people who booked train tickets on Friday to the total number of people who booked tickets on Tuesday.

- A) 2:3 
- B) 1:5 
- C) 4:1 
- D) 7:6 
- E) 4:5 

On Monday:

The total number of people booked tickets = $8000 * 25/100 = 2000$

The number of people booked flight tickets = $3200 * 10/100 = 320$

The number of people booked train tickets = $(2000 - 320) = 1680$

On Tuesday:

The total number of people booked tickets = $8000 * 30/100 = 2400$

The number of people booked flight tickets = $3200 * 30/100 = 960$

The number of people booked train tickets = $(2400 - 960) = 1440$

On Wednesday:

The total number of people booked tickets = $8000 * 15/100 = 1200$

The number of people booked flight tickets = $3200 * 20/100 = 640$

The number of people booked train tickets = $(1200 - 640) = 560$

On Thursday:

The total number of people booked tickets = $8000 * 18/100 = 1440$

The number of people booked flight tickets = $3200 * 25/100 = 800$

The number of people booked train tickets = $(1440 - 800) = 640$

Explanation:**On Friday:**

The total number of people booked tickets = $8000 * 12/100 = 960$

The number of people booked flight tickets = $3200 * 15/100 = 480$

The number of people booked train tickets = $(960 - 480) = 480$

Days	The total number of tickets booked	The number of flight tickets booked	The number of train tickets booked
Monday	2000	320	1680
Tuesday	2400	960	1440
Wednesday	1200	640	560
Thursday	1440	800	640
Friday	960	480	480

Answer: B

The number of people who booked train tickets on Friday = 480

The total number of people who booked tickets on Tuesday = 2400

Required ratio = $480 : 2400 = 1 : 5$

Hence, the correct answer is option B

Q. 51

Study the following information carefully and answer the following questions.

Different types of cars (defective + non-defective) sold in three different shops namely P, Q and R respectively. The average number of cars sold in shop P and Q is 300 and the average number of cars sold in shop P and R is 325. The ratio of the number of defective cars and non-defective cars sold in shop P is 3:2 respectively and the number of defective cars sold in shop Q is 50 more than the number of non-defective cars sold in shop Q. The number of non-defective cars sold in shop R is 80 more than that of defective cars sold. The number of cars sold in shop R is 400.

The total number of cars sold in shop S is x% more than that of Q and the ratio of the number of defective cars sold in shop P to S is 3:4. If the number of non-defective cars sold in shop S is 20 less than that in shop R, then find the value of x.

- A) 15 
- B) 10 
- C) 8 
- D) 20 
- E) 25 

The sum of the number of cars sold in shop P and Q together = $300 * 2 = 600$

The sum of the number of cars sold in shop P and R together = $325 * 2 = 650$

The number of cars sold in shop P = $650 - 400 = 250$

The number of cars sold in shop Q = $600 - 250 = 350$

The number of defective cars sold in shop P = $250 * \frac{3}{5} = 150$

The number of non-defective cars sold in shop P = $250 * \frac{2}{5} = 100$

The number of non-defective cars sold in shop Q be 'a'

Then the number of defective cars sold in shop Q = $a + 50$

The number of cars sold in shop Q = 350

$$a + a + 50 = 350$$

$$2a = 300$$

$$a = 150$$

The number of non-defective cars sold in shop Q = $a = 150$

The number of defective cars sold in shop Q = $(a + 50) = (150 + 50) = 200$

The number of non-defective cars sold in shop R = $(400 + 80)/2 = 480/2 = 240$

The number of defective cars sold in shop R = $(400 - 240) = 160$

Answer: D

The total number of cars sold in shop S = $350 * (100 + x)/100$

The number of defective cars sold in shop S = $150 * \frac{4}{3} = 200$

The number of non-defective sold in shop S = $(240 - 20) = 220$

The total number of cars sold in shop S = $(200 + 220) = 420$

$$350 * (100 + x)/100 = 420$$

$$100 + x = 600/5$$

$$100 + x = 120$$

$$x = 20$$

Hence, the correct answer is option D

Explanation:

Q. 52

Study the following information carefully and answer the following questions.

Different types of cars (defective + non-defective) sold in three different shops namely P, Q and R respectively. The average number of cars sold in shop P and Q is 300 and the average number of cars sold in shop P and R is 325. The ratio of the number of defective cars and non-defective cars sold in shop P is 3:2 respectively and the number of defective cars sold in shop Q is 50 more than the number of non-defective cars sold in shop Q. The number of non-defective cars sold in shop R is 80 more than that of defective cars sold. The number of cars sold in shop R is 400.

In shop P, out of the total number of cars manufactured, 50% of the cars are sold. If the number of cars unsold in shop Q are $(\frac{1}{5})$ th less than that of P, then find the total number of cars manufactured in shop Q.

- A) 550 
- B) 450 
- C) 480 
- D) 520 
- E) 620 

Explanation:

The sum of the number of cars sold in shop P and Q together = $300 * 2 = 600$

The sum of the number of cars sold in shop P and R together = $325 * 2 = 650$

The number of cars sold in shop P = $650 - 400 = 250$

The number of cars sold in shop Q = $600 - 250 = 350$

The number of defective cars sold in shop P = $250 * \frac{3}{5} = 150$

The number of non-defective cars sold in shop P = $250 * \frac{2}{5} = 100$

The number of non-defective cars sold in shop Q be 'a'

Then the number of defective cars sold in shop Q = $a + 50$

The number of cars sold in shop Q = 350

$$a + a + 50 = 350$$

$$2a = 300$$

$$a = 150$$

The number of non-defective cars sold in shop Q = $a = 150$

The number of defective cars sold in shop Q = $(a + 50) = (150 + 50) = 200$

The number of non-defective cars sold in shop R = $(400 + 80)/2 = 480/2 = 240$

The number of defective cars sold in shop R = $(400 - 240) = 160$

Answer: A

The total number of cars manufactured in shop P = $250 * 100/50 = 500$

The number of cars unsold in shop P = $(500 - 250) = 250$

The number of cars unsold in shop Q = $250 - 250/5 = 200$

The total number of cars manufactured in shop Q = $(350 + 200) = 550$

Hence, the correct answer is option A

Q. 53

Study the following information carefully and answer the following questions.

Different types of cars (defective + non-defective) sold in three different shops namely P, Q and R respectively. The average number of cars sold in shop P and Q is 300 and the average number of cars sold in shop P and R is 325. The ratio of the number of defective cars and non-defective cars sold in shop P is 3:2 respectively and the number of defective cars sold in shop Q is 50 more than the number of non-defective cars sold in shop Q. The number of non-defective cars sold in shop R is 80 more than that of defective cars sold. The number of cars sold in shop R is 400.

In shop R, out of the number of defective cars sold, 45% are Alto cars and the rest are Ford cars. If the total number of Alto cars sold in shop R is 280, then find the difference between the number of defective and non-defective Ford cars sold in shop R.

- A) 45 
- B) 53 
- C) 50 
- D) 84 
- E) 56 

The sum of the number of cars sold in shop P and Q together = $300 * 2 = 600$

The sum of the number of cars sold in shop P and R together = $325 * 2 = 650$

The number of cars sold in shop P = $650 - 400 = 250$

The number of cars sold in shop Q = $600 - 250 = 350$

The number of defective cars sold in shop P = $250 * \frac{3}{5} = 150$

The number of non-defective cars sold in shop P = $250 * \frac{2}{5} = 100$

The number of non-defective cars sold in shop Q be 'a'

Then the number of defective cars sold in shop Q = $a + 50$

The number of cars sold in shop Q = 350

$$a + a + 50 = 350$$

$$2a = 300$$

$$a = 150$$

The number of non-defective cars sold in shop Q = $a = 150$

The number of defective cars sold in shop Q = $(a + 50) = (150 + 50) = 200$

The number of non-defective cars sold in shop R = $(400 + 80)/2 = 480/2 = 240$

The number of defective cars sold in shop R = $(400 - 240) = 160$

Answer: E

The number of defective Alto cars sold in shop R = $160 * \frac{45}{100} = 72$

The number of defective ford cars sold in shop R = $160 * \frac{55}{100} = 88$

The number of non-defective Alto cars sold in shop R = $(280 - 72) = 208$

The number of non-defective ford cars sold in shop R = $(240 - 208) = 32$

Required difference = $(88 - 32) = 56$

Hence, the correct answer is option E

Explanation:

Q. 54

Study the following information carefully and answer the following questions.

Different types of cars (defective + non-defective) sold in three different shops namely P, Q and R respectively. The average number of cars sold in shop P and Q is 300 and the average number of cars sold in shop P and R is 325. The ratio of the number of defective cars and non-defective cars sold in shop P is 3:2 respectively and the number of defective cars sold in shop Q is 50 more than the number of non-defective cars sold in shop Q. The number of non-defective cars sold in shop R is 80 more than that of defective cars sold. The number of cars sold in shop R is 400.

Find the sum of the number of defective cars sold in shop P and Q and the number of non-defective cars sold in shop R.

- A) 590 
- B) 330 
- C) 270 
- D) 500 
- E) 480 

Explanation:

The sum of the number of cars sold in shop P and Q together = $300 * 2 = 600$

The sum of the number of cars sold in shop P and R together = $325 * 2 = 650$

The number of cars sold in shop P = $650 - 400 = 250$

The number of cars sold in shop Q = $600 - 250 = 350$

The number of defective cars sold in shop P = $250 * \frac{3}{5} = 150$

The number of non-defective cars sold in shop P = $250 * \frac{2}{5} = 100$

The number of non-defective cars sold in shop Q be 'a'

Then the number of defective cars sold in shop Q = $a + 50$

The number of cars sold in shop Q = 350

$$a + a + 50 = 350$$

$$2a = 300$$

$$a = 150$$

The number of non-defective cars sold in shop Q = $a = 150$

The number of defective cars sold in shop Q = $(a + 50) = (150 + 50) = 200$

The number of non-defective cars sold in shop R = $(400 + 80)/2 = 480/2 = 240$

The number of defective cars sold in shop R = $(400 - 240) = 160$

Answer: A

The number of defective cars sold in shop P and Q = $(150 + 200) = 350$

The number of non-defective cars sold in shop R = 240

Required sum = $(350 + 240) = 590$

Hence, the correct answer is option A

Q. 55

Study the following information carefully and answer the following questions.

Different types of cars (defective + non-defective) sold in three different shops namely P, Q and R respectively. The average number of cars sold in shop P and Q is 300 and the average number of cars sold in shop P and R is 325. The ratio of the number of defective cars and non-defective cars sold in shop P is 3:2 respectively and the number of defective cars sold in shop Q is 50 more than the number of non-defective cars sold in shop Q. The number of non-defective cars sold in shop R is 80 more than that of defective cars sold. The number of cars sold in shop R is 400.

The total number of cars sold in shop R is what percentage of the number of non-defective cars sold in shop P?

- A) 380% 
- B) 400% 
- C) 250% 
- D) 180% 
- E) 100% 

Explanation:

The sum of the number of cars sold in shop P and Q together = $300 * 2 = 600$

The sum of the number of cars sold in shop P and R together = $325 * 2 = 650$

The number of cars sold in shop P = $650 - 400 = 250$

The number of cars sold in shop Q = $600 - 250 = 350$

The number of defective cars sold in shop P = $250 * \frac{3}{5} = 150$

The number of non-defective cars sold in shop P = $250 * \frac{2}{5} = 100$

The number of non-defective cars sold in shop Q be 'a'

Then the number of defective cars sold in shop Q = $a + 50$

The number of cars sold in shop Q = 350

$$a + a + 50 = 350$$

$$2a = 300$$

$$a = 150$$

The number of non-defective cars sold in shop Q = $a = 150$

The number of defective cars sold in shop Q = $(a + 50) = (150 + 50) = 200$

The number of non-defective cars sold in shop R = $(400 + 80)/2 = 480/2 = 240$

The number of defective cars sold in shop R = $(400 - 240) = 160$

Answer: B

The total number of cars sold in shop R = 400

The number of non-defective cars sold in shop P = 100

Required percentage = $(400/100) * 100 = 400\%$

Hence, the correct answer is option B

Q. 56	What value should come in the place of (?) in the following number series? 18, ?, 59, 298, 2090, 18815 A) 32  B) 17  C) 25  D) 19  E) 44 
Explanation:	Answer: D $(18 * 1) + 1 = 19$ $(19 * 3) + 2 = 59$ $(59 * 5) + 3 = 298$ $(298 * 7) + 4 = 2090$ $(2090 * 9) + 5 = 18815$ Hence, the correct answer is option D

Q. 57

What value should come in the place of (?) in the following number series?

66, 103, ?, 201, 262, 331

A) 145 B) 198 C) 148 D) 112 E) 124 **Explanation:****Answer: C**

$$8^2 + 2 = 66$$

$$10^2 + 3 = 103$$

$$12^2 + 4 = \mathbf{148}$$

$$14^2 + 5 = 201$$

$$16^2 + 6 = 262$$

$$18^2 + 7 = 331$$

Hence, the correct answer is option C

Q. 58

What value should come in the place of (?) in the following number series?

?, 1790, 2120, 2670, 3440, 4430

A) 1680 ✓

B) 1554 ✗

C) 1770 ✗

D) 1620 ✗

E) 1600 ✗

Explanation:**Answer: A**

$$1680 + 110 = 1790$$

$$1790 + 330 = 2120$$

$$2120 + 550 = 2670$$

$$2670 + 770 = 3440$$

$$3440 + 990 = 4430$$

Hence, the correct answer is option A

Q. 59

What value should come in the place of (?) in the following number series?

600, ?, 400, 3200, 320, 3840

A) 800 ✗

B) 640 ✗

C) 2400 ✓

D) 1800 ✗

E) 240 ✗

Explanation:**Answer: C**

$$600 \times 4 = 2400$$

$$2400/6 = 400$$

$$400 \times 8 = 3200$$

$$3200/10 = 320$$

$$320 \times 12 = 3840$$

Hence, the correct answer is option C

Q. 60

What value should come in the place of (?) in the following number series?

190, 173, 154, 131, 102, ? , 34

A) 71 B) 78 C) 92 D) 90 E) 60 **Explanation:****Answer: A** $190 - 17 = 173$ $173 - 19 = 154$ $154 - 23 = 131$ $131 - 29 = 102$ $102 - 31 = 71$ $71 - 37 = 34$

Hence, the correct answer is option A

Q. 61

Train A crosses a platform of 40% of its length in 21 seconds and it also crosses a car moving at 50 m/s travelling in the opposite direction in 5 seconds. Find the length of train A.

A) 455 m B) 375 m C) 298 m D) 420 m E) 355 m **Answer: B**

Let, the length of train A be $5x$ m

The platform length = $5x * 40/100 = 2x$ m

Let, the speed of train A be a respectively.

$$5x + 2x = a * 21$$

$$7x = a * 21$$

$$x = 3a$$

$$5x = (a + 50) * 5$$

$$15a = (a + 50) * 5$$

$$3a - a = 50$$

$$2a = 50$$

$$a = 25$$

The speed of train A = 25 m/s

The length of train A = $5 * 3 * 25 = 375$ m

Hence, the correct answer is option B

Explanation:

Q. 62

A three-digit number is such that its hundredth digit is equal to the product of the other 2 digits which are prime. Also, the absolute difference between the number and the number formed by its digits in reverse order is 396. If the three digit number is added by 18, then find the resultant value.

A) 650 B) 450 C) 980 D) 280 E) 550 **Explanation:****Answer: A**

The three digit number is such that its hundredth digit is equal to the product of the other 2 digits which are prime.

Prime numbers possible for this case are 2,3 only.

Thus, hundredth digit must be 6

The three-digit number can be 623 or 632.

Numbers in reverse order would be 326 or 236.

Absolute difference = $623 - 326$ or $632 - 236 = 297$ or 396

Thus, the required 3-digit number is 632.

Required sum = $(632 + 18) = 650$

Hence, the correct answer is option A

Q. 63

The present age of Q is $\frac{2}{3}$ rd of the present age of P and the ratio of the present age of P to R is 4:5. If the age of R 5 years ago is equal to the age of P 7 years hence, then find the present age of Q.

A) 30 years B) 35 years C) 32 years D) 48 years E) 60 years **Answer: C**

Let, the present ages of P and R are $4x$ years and $5x$ years respectively.

$$4x + 7 = 5x - 5$$

$$x = 12$$

The present age of P = $4 * 12 = 48$ years

The present age of Q = $48 * \frac{2}{3} = 32$ years

Hence, the correct answer is option C

Explanation:

Q. 64

x men or 2x women can complete a piece of work in 18 days. If 6 men and 8 women will complete the same piece of work in 9 days, then find the number of women who worked to complete the work in 18 days.

- A) 18 
- B) 9 
- C) 15 
- D) 21 
- E) 10 

Answer: E

According to the question

$$MX * 18 = 2WX * 18$$

$$M = 2W$$

$$2WX * 18 = (6M + 8W) * 9$$

$$WX * 4 = (12W + 8W)$$

$$4WX = 20W$$

$$4X = 20$$

$$x = 5$$

$$\text{Required value} = 5 * 2 = 10$$

Hence, the correct answer is option E

Explanation:

Q. 65

A dishonest dealer bought 28 kg of apples and sold them at the cost of 35 kg of apples. He earned extra profit by using a false weight of x grams instead of 1 kg. If the net profit earned by him was 100%, then calculate the value of x.

A) 625 grams

B) 710 grams

C) 650 grams

D) 800 grams

E) 280 grams

**Answer: A**

According to the question,

$$SP * 28 = CP * 35$$

$$SP/CP = 5/4$$

$$\text{The actual profit percentage} = ((5/4) - 1) * 100 = 25\%$$

Let, the profit percentage due to the false weight be m%

$$100 = 25 + m + (25 * m/100)$$

$$75 = m + m/4$$

$$75 = 5m/4$$

$$m\% = 60\%$$

$$60/100 = ((1000 - x)/x)$$

$$16x = 10000$$

$$x = 625 \text{ grams}$$

Hence, the correct answer is option A

Explanation:

Q. 66

A bottle contains lime solution and the quantity of 50% of the lime is 45 litres. If 20% of the lime is taken out and replaced by sugar solution and this process is repeated n times and then the quantity of sugar solution in the bottle becomes 43.92 litres. Find the value of 5n.

A) 20 B) 15 C) 25 D) 30 E) 35 **Answer: B**

The quantity of lime = $45 * 100/50 = 90$ litres

The 20% of the quantity of lime = $90 * 20/100 = 18$ litres

According to the question,

$$90 * (1 - (18/90))^n = 90 - 43.92$$

$$90 * ((5 - 1)/5)^n = 46.08$$

$$(4/5)^n = 46.08/90$$

$$(4/5)^n = 4608/9000$$

$$(4/5)^n = 64/125$$

$$(4/5)^n = (4/5)^3$$

$$n = 3$$

The value of $5n = 3 * 5 = 15$

Hence, the correct answer is option B

Explanation:

Q. 67

The area of the triangle is 250 cm^2 and the base of the triangle is 25 cm . If the side of the square is 2 cm less than the height of the triangle, then find the area of the square.

A) 324 cm^2 B) 256 cm^2 C) 400 cm^2 D) 64 cm^2 E) 100 cm^2 **Answer: A**

The area of the triangle = $\frac{1}{2} * bh \text{ cm}^2$

$$250 = \frac{1}{2} * 25 * h$$

$$10 * 2 = h$$

$$h = 20$$

The height of the triangle = 20 cm

The side of the square = $20 - 2 = 18 \text{ cm}$

The area of the square = $a^2 = 18^2 = 324 \text{ cm}^2$

Hence, the correct answer is option A

Explanation:

Q. 68

A and B entered into a business by investing Rs. $5y$ and Rs. $(4y + 500)$ respectively. After 5 months, A increased his investment by Rs. 600 and B decreased his investment by Rs. 200. If at the end of the year, the ratio of the profit share of A to B is 51:47, then find the value of y .

A) 280 B) 320 C) 300 D) 100 E) 180 **Answer: D**

The ratio of the profit share of A to B = $((5y * 5 + (5y + 600) * 7) : ((4y + 500) * 5 + (4y + 300) * 7))$

$$= (25y + 35y + 4200) : (20y + 2500 + 28y + 2100)$$
$$= (60y + 4200) : (48y + 4600)$$
$$= (30y + 2100) : (24y + 2300)$$
$$= (15y + 1050) : (12y + 1150)$$
$$(15y + 1050) / (12y + 1150) = 51/47$$
$$705y + 49350 = 612y + 58650$$
$$93y = 9300$$
$$y = 100$$

Hence, the correct answer is option D

Explanation:

Q. 69

A invested Rs. 18500 in compound interest at the rate of 20% per annum for 2 years and the interest obtained is Rs. x less than the interest obtained by B in simple interest, while B invested Rs. 16000 at the rate of 18% per annum for 4 years. Find the value of x.

A) Rs. 3380 B) Rs. 2850 C) Rs. 4250 D) Rs. 4150 E) Rs. 5560 **Explanation:****Answer: A**

The interest received by B,

$$SI = PNR/100$$

$$SI = 16000 * 18 * 4/100$$

$$SI = \text{Rs. } 11520$$

The interest received by A,

$$CI = P(1 + R/100)^n - P$$

$$CI = 18500 * 1.2 * 1.2 - 18500$$

$$CI = \text{Rs. } 8140$$

$$x = 11520 - 8140 = \text{Rs. } 3380$$

Hence, the correct answer is option A

Q. 70

A has Rs. 105 with him and B has Rs. P with him. B has coins of denominations of Rs. 2 and Rs. 5 in the ratio of 5:3, while A has denominations of 50 paise and Rs. 1 in the ratio of 1:3. The number of Rs. 5 coins is 10% of the number of Rs. 1 coins. Find the value of P.

A) 70 B) 50 C) 64 D) 75 E) 45 **Explanation:****Answer: D**

Let the 50 paise and Rs. 1 coins be a and 3a respectively

Now,

$$a/2 + 3a = 105$$

$$7a/2 = 105$$

So, value of a = 30

$$\text{The number of Rs. 5 coins} = 10\% \times 3 \times 30 = 9$$

$$\text{The number of Rs. 2 coins} = 5/3 \times 9 = 15$$

$$\text{Value of P} = 15 \times 2 + 5 \times 9 = \text{Rs. 75}$$

Hence, the correct answer is option D

Reasoning Ability

Q. 71

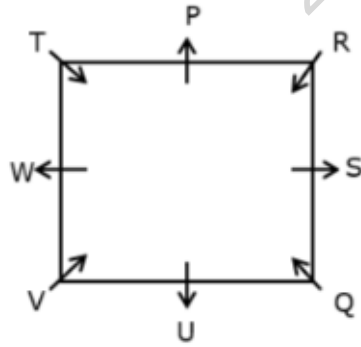

Study the following information carefully and answer the given questions.

Eight persons viz. P, Q, R, S, T, U, V and W are sitting around a square table in such a way that four of them are sitting at the corners and facing the centre, while four of them are sitting in the middle of the sides and facing outside (**opposite to the centre**).

S sits third to the right of V, who sits at one of the corners of the table. One person sits between V and T, who sits immediate left of P. T sits opposite to Q. The number of persons sitting between S and Q is **one less than** the number of persons sitting between P and W, when counted from the right of both Q and W. Two persons sit between W and R. U doesn't sit adjacent to R.

What is the position of U with respect to S?

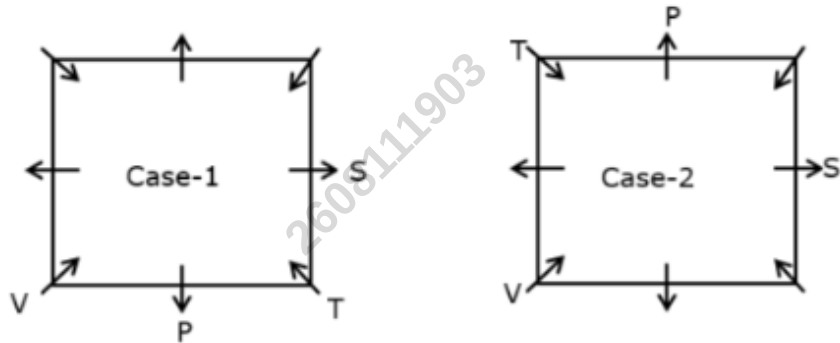

- A) Fourth to the left 
- B) Second to the left 
- C) Third to the right 
- D) Second to the right 
- E) Immediate left 

Explanation:**Final arrangement**

We have,

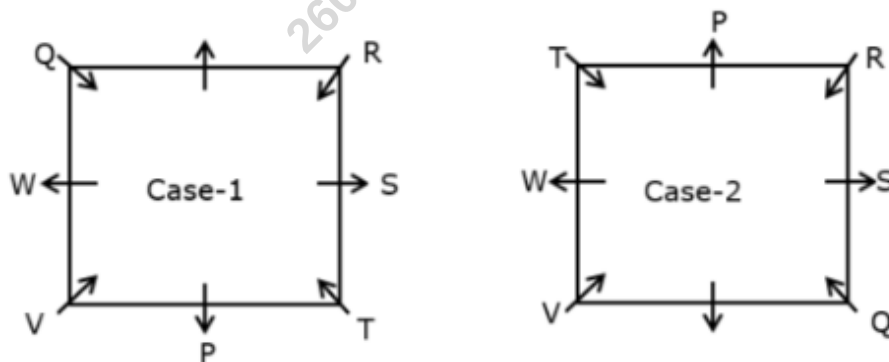

- S sits third to the right of V, who sits at one of the corners of the table.
- One person sits between V and T, who sits immediate left of P.

From the above conditions, there are two possibilities

Again, we have

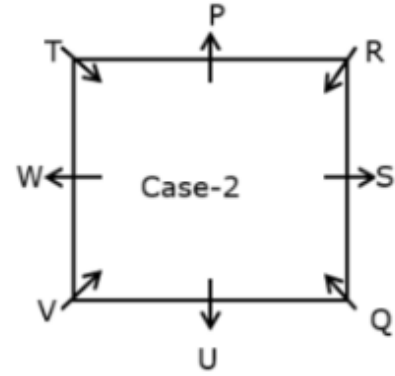

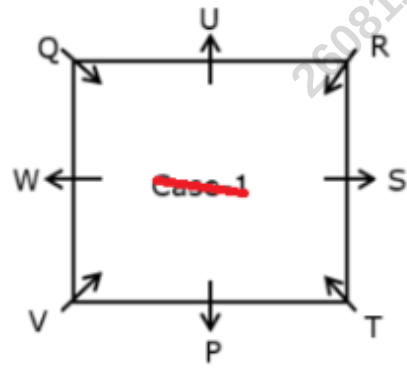

- T sits opposite to Q.
- The number of persons sitting between S and Q is **one less** than the number of persons sitting between P and W, when counted from the right of both Q and W.
- Two persons sit between W and R.

Again, we have

- U doesn't sit adjacent to R.

After applying the above conditions, Case 1 gets eliminated because U doesn't sit adjacent to R, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: D

Q. 72

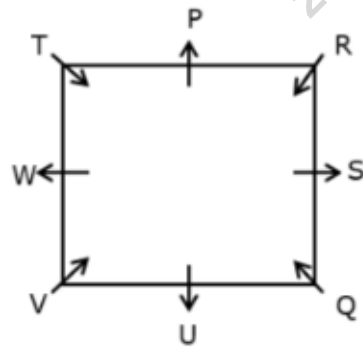

Study the following information carefully and answer the given questions.

Eight persons viz. P, Q, R, S, T, U, V and W are sitting around a square table in such a way that four of them are sitting at the corners and facing the centre, while four of them are sitting in the middle of the sides and facing outside (**opposite to the centre**).

S sits third to the right of V, who sits at one of the corners of the table. One person sits between V and T, who sits immediate left of P. T sits opposite to Q. The number of persons sitting between S and Q is **one less than** the number of persons sitting between P and W, when counted from the right of both Q and W. Two persons sit between W and R. U doesn't sit adjacent to R.

Which of the following pair of persons sit immediate right of each other?

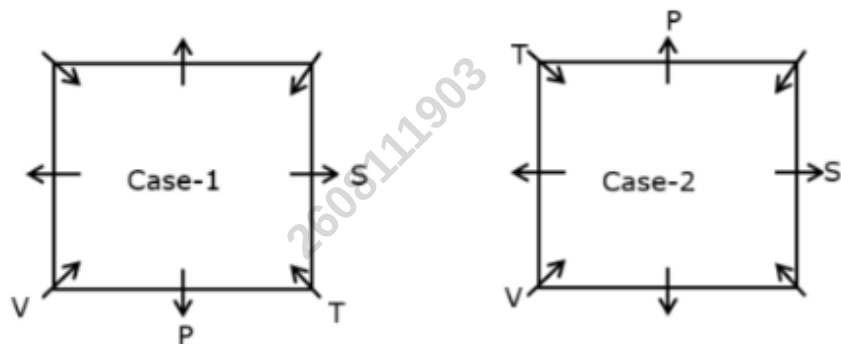

- A) UQ 
- B) RS 
- C) TW 
- D) TQ 
- E) SW 

Explanation:**Final arrangement**

We have,

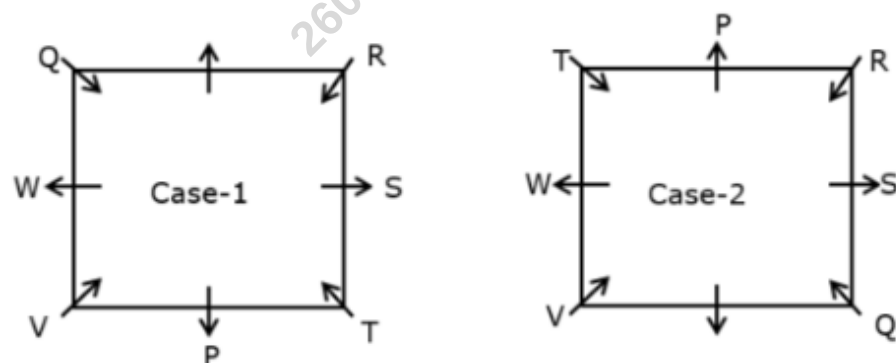

- S sits third to the right of V, who sits at one of the corners of the table.
- One person sits between V and T, who sits immediate left of P.

From the above conditions, there are two possibilities

Again, we have

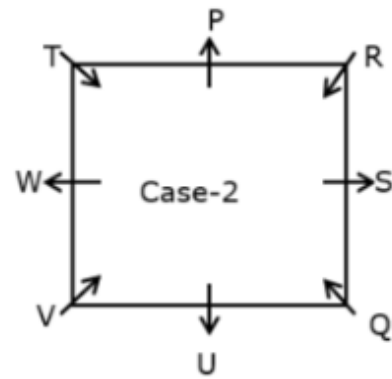

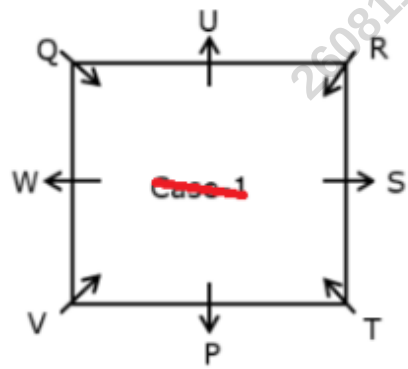

- T sits opposite to Q.
- The number of persons sitting between S and Q is **one less** than the number of persons sitting between P and W, when counted from the right of both Q and W.
- Two persons sit between W and R.

Again, we have

- U doesn't sit adjacent to R.

After applying the above conditions, Case 1 gets eliminated because U doesn't sit adjacent to R, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: C

Q. 73

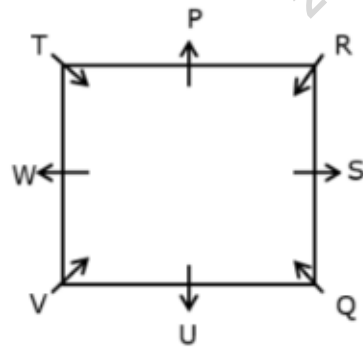

Study the following information carefully and answer the given questions.

Eight persons viz. P, Q, R, S, T, U, V and W are sitting around a square table in such a way that four of them are sitting at the corners and facing the centre, while four of them are sitting in the middle of the sides and facing outside (**opposite to the centre**).

S sits third to the right of V, who sits at one of the corners of the table. One person sits between V and T, who sits immediate left of P. T sits opposite to Q. The number of persons sitting between S and Q is **one less than** the number of persons sitting between P and W, when counted from the right of both Q and W. Two persons sit between W and R. U doesn't sit adjacent to R.

How many persons sit between T and R, when counted from the right of T?

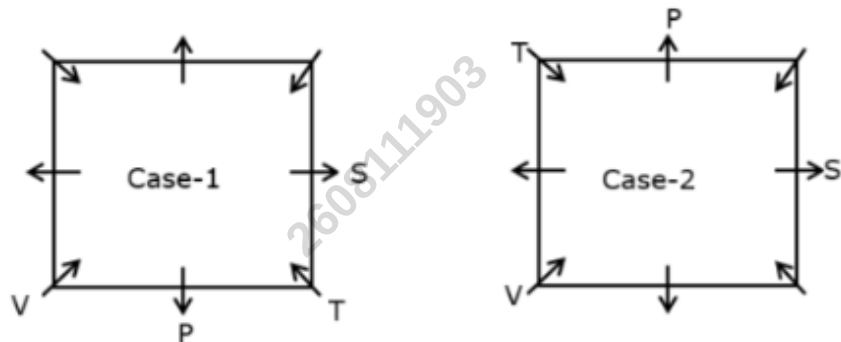

- A) One 
- B) Two 
- C) Three 
- D) No one 
- E) Five 

Explanation:**Final arrangement**

We have,

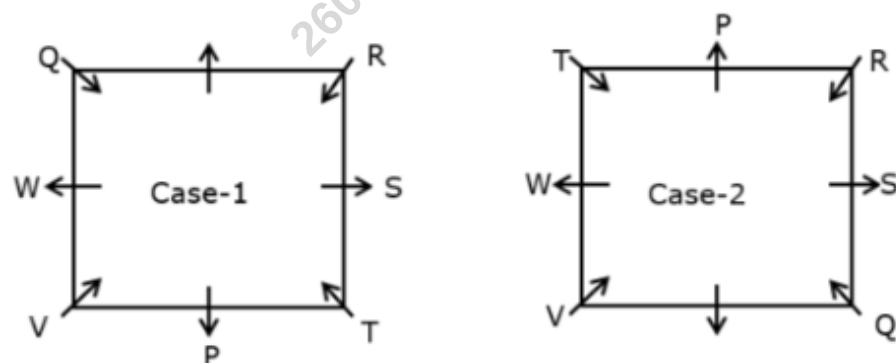

- S sits third to the right of V, who sits at one of the corners of the table.
- One person sits between V and T, who sits immediate left of P.

From the above conditions, there are two possibilities

Again, we have

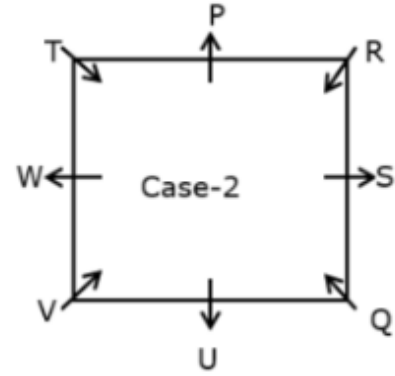

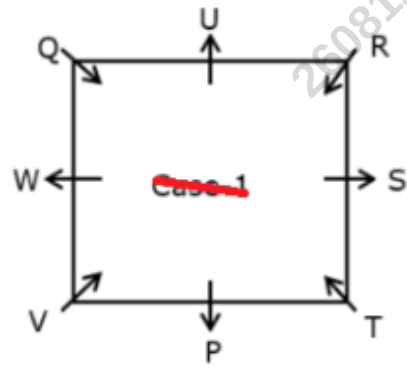

- T sits opposite to Q.
- The number of persons sitting between S and Q is **one less** than the number of persons sitting between P and W, when counted from the right of both Q and W.
- Two persons sit between W and R.

Again, we have

- U doesn't sit adjacent to R.

After applying the above conditions, Case 1 gets eliminated because U doesn't sit adjacent to R, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: E

Q. 74

Study the following information carefully and answer the given questions.

Eight persons viz. P, Q, R, S, T, U, V and W are sitting around a square table in such a way that four of them are sitting at the corners and facing the centre, while four of them are sitting in the middle of the sides and facing outside (**opposite to the centre**).

S sits third to the right of V, who sits at one of the corners of the table. One person sits between V and T, who sits immediate left of P. T sits opposite to Q. The number of persons sitting between S and Q is **one less than** the number of persons sitting between P and W, when counted from the right of both Q and W. Two persons sit between W and R. U doesn't sit adjacent to R.

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

A) Two persons sit between U and R, when counted from the right of R

B) Both S and Q are immediate neighbours

C) W doesn't sit in the middle of the table

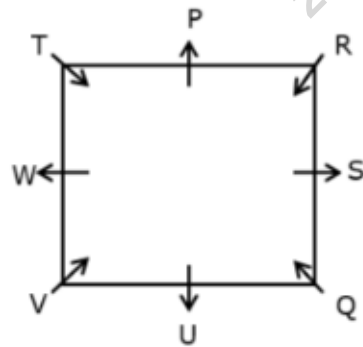

D) T faces W

E) All the statements are true

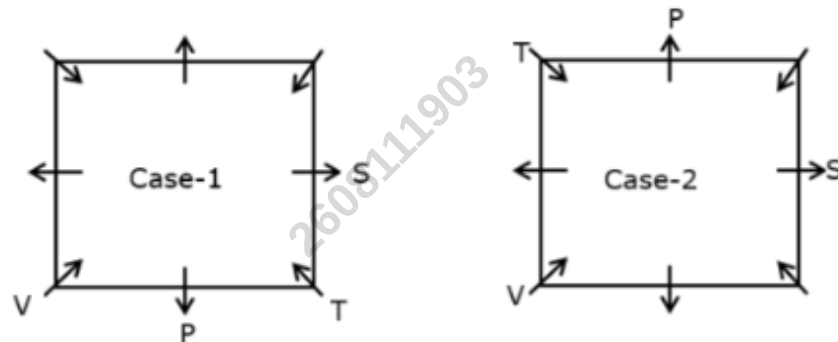

Explanation:**Final arrangement**

We have,

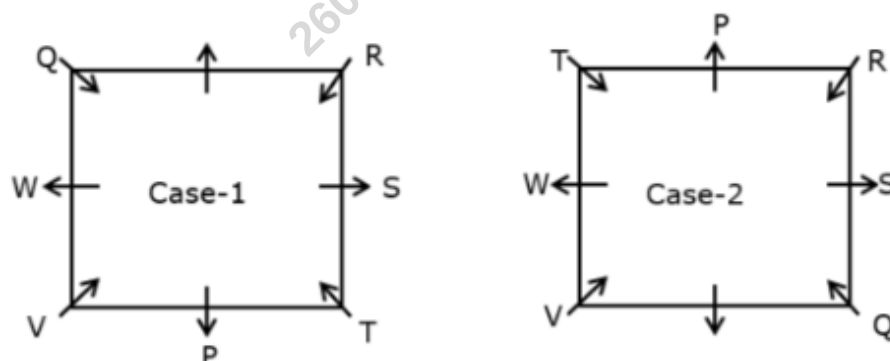

- S sits third to the right of V, who sits at one of the corners of the table.
- One person sits between V and T, who sits immediate left of P.

From the above conditions, there are two possibilities

Again, we have

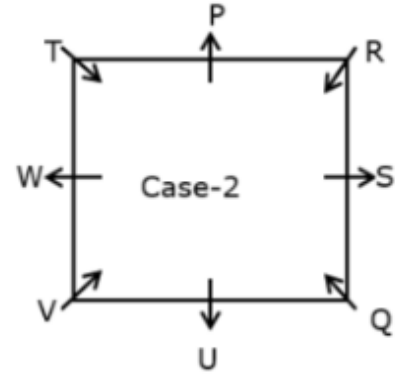

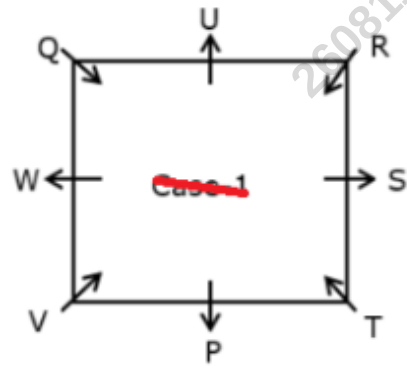

- T sits opposite to Q.
- The number of persons sitting between S and Q is **one less** than the number of persons sitting between P and W, when counted from the right of both Q and W.
- Two persons sit between W and R.

Again, we have

- U doesn't sit adjacent to R.

After applying the above conditions, Case 1 gets eliminated because U doesn't sit adjacent to R, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: B

Q. 75

Study the following information carefully and answer the given questions.

Eight persons viz. P, Q, R, S, T, U, V and W are sitting around a square table in such a way that four of them are sitting at the corners and facing the centre, while four of them are sitting in the middle of the sides and facing outside (**opposite to the centre**).

S sits third to the right of V, who sits at one of the corners of the table. One person sits between V and T, who sits immediate left of P. T sits opposite to Q. The number of persons sitting between S and Q is **one less than** the number of persons sitting between P and W, when counted from the right of both Q and W. Two persons sit between W and R. U doesn't sit adjacent to R.

Who among the following person is an immediate neighbour of U?**I. The one who sits immediate left of S****II. V****III. The one who sits second to the left of R**

A) Only I

B) Only III

C) Only I and III

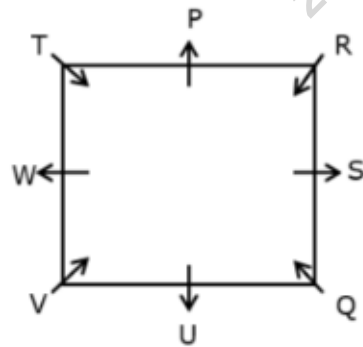

D) Only II and III

E) All I, II and III

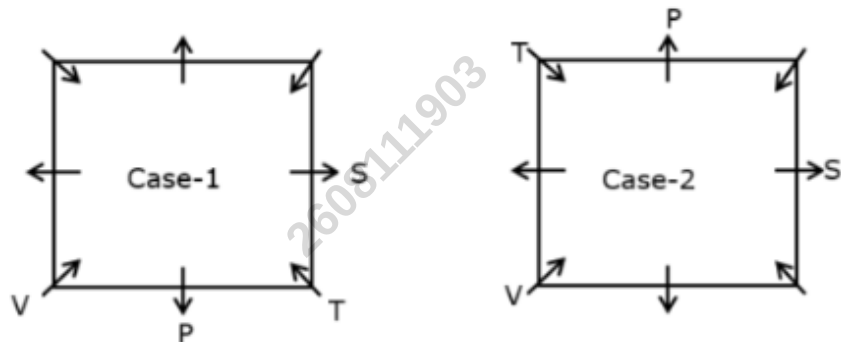

Explanation:**Final arrangement**

We have,

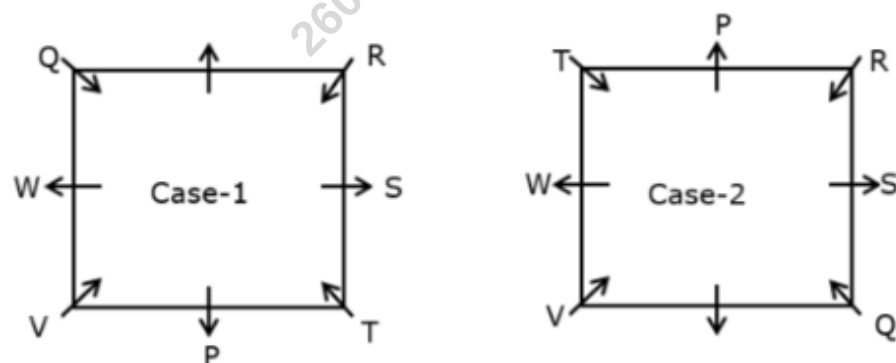

- S sits third to the right of V, who sits at one of the corners of the table.
- One person sits between V and T, who sits immediate left of P.

From the above conditions, there are two possibilities

Again, we have

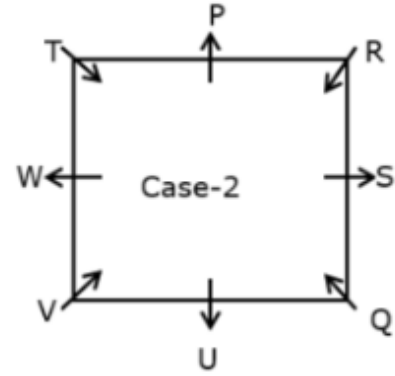

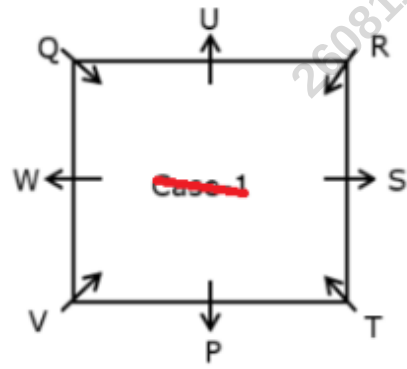

- T sits opposite to Q.
- The number of persons sitting between S and Q is **one less** than the number of persons sitting between P and W, when counted from the right of both Q and W.
- Two persons sit between W and R.

Again, we have

- U doesn't sit adjacent to R.

After applying the above conditions, Case 1 gets eliminated because U doesn't sit adjacent to R, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: D

Q. 76

Study the following information carefully and answer the given questions.

Six persons, viz. A, B, C, D, E and F live on three different floors of a three-storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered three. Each person is attending different events, viz. Roka, Mehendi, Sangeet, Haldi, Marriage and Reception.

Note-I: Each floor has two flats, viz., Flat P and Flat Q, **where Flat P is to the west of Flat Q.**

Note-II: Flat Q of floor 2 is immediately above Flat Q of floor 1. Similarly, Flat P of floor 3 is immediately above Flat P of floor 2.

Note-III: The area of each flat on each floor is the same.

Note-IV: Only two persons live on each floor and only one person lives in each flat.

The one who attends Reception lives on an odd-numbered floor. C lives immediately below the one who attends Reception, but both are living in different types of flats. The number of floors above C is **one less** than the number of floors below the one who attends Sangeet. The one who attends Marriage lives below E but not in the same flat. D lives to the west of E. The one who attends Haldi lives immediately below the flat of D. The one who attends roka lives on one of the floors below A. F neither attends Marriage nor lives in the same flat as A.

B attends _____ and lives to the _____ of the one who attends Sangeet.

A) Roka, West

B) Haldi, South

C) Marriage, South-west

D) Mehendi-North

E) Roka, North-East

Explanation:**Final arrangement**

Floors	Flat P	Flat Q
3	D, Reception	E, Sangeet
2	A, Haldi	C, Mehendi
1	B, Marriage	F, Roka

We have,

- The one who attends Reception lives on an odd-numbered floor.
- C lives immediately below the one who attends Reception, but both are living in different types of flats.

From the above conditions, there are two possibilities

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	Reception			Reception
2		C	C	
1				

Again, we have

- The number of floors above C is **one less** than the number of floors below the one who attends Sangeet.
- The one who attends Marriage lives below E but not in the same flat.
- D lives to the west of E.
- The one who attends Haldi lives immediately below the flat of D.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	Haldi/	C, Haldi/	C, Haldi	Haldi
1	Marriage		Marriage	

Again, we have

- The one who attends roka lives on one of the floors below A.
- F neither attends Marriage nor lives in the same flat as A.

After applying the above conditions, Case 2 gets eliminated because F neither attends Marriage nor lives in the same flat as A, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	A, Haldi	C, Mehendi	C, Haldi	A
1	B, Marriage	F, Roka	F, Marriage	Roka

Answer: C

Q. 77

Study the following information carefully and answer the given questions.

Six persons, viz. A, B, C, D, E and F live on three different floors of a three-storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered three. Each person is attending different events, viz. Roka, Mehendi, Sangeet, Haldi, Marriage and Reception.

Note-I: Each floor has two flats, viz., Flat P and Flat Q, **where Flat P is to the west of Flat Q.**

Note-II: Flat Q of floor 2 is immediately above Flat Q of floor 1. Similarly, Flat P of floor 3 is immediately above Flat P of floor 2.

Note-III: The area of each flat on each floor is the same.

Note-IV: Only two persons live on each floor and only one person lives in each flat.

The one who attends Reception lives on an odd-numbered floor. C lives immediately below the one who attends Reception, but both are living in different types of flats. The number of floors above C is **one less** than the number of floors below the one who attends Sangeet. The one who attends Marriage lives below E but not in the same flat. D lives to the west of E. The one who attends Haldi lives immediately below the flat of D. The one who attends roka lives on one of the floors below A. F neither attends Marriage nor lives in the same flat as A.

Who among the following person attends Mehendi?

A) A 

B) The one who lives immediately below the flat of F 

C) D 

D) The one who lives two floors above the one who attends Marriage 

E) C 

Explanation:**Final arrangement**

Floors	Flat P	Flat Q
3	D, Reception	E, Sangeet
2	A, Haldi	C, Mehendi
1	B, Marriage	F, Roka

We have,

- The one who attends Reception lives on an odd-numbered floor.
- C lives immediately below the one who attends Reception, but both are living in different types of flats.

From the above conditions, there are two possibilities

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	Reception			Reception
2		C	C	
1				

Again, we have

- The number of floors above C is **one less** than the number of floors below the one who attends Sangeet.
- The one who attends Marriage lives below E but not in the same flat.
- D lives to the west of E.
- The one who attends Haldi lives immediately below the flat of D.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	Haldi/	C, Haldi/	C, Haldi	Haldi
1	Marriage		Marriage	

Again, we have

- The one who attends roka lives on one of the floors below A.
- F neither attends Marriage nor lives in the same flat as A.

After applying the above conditions, Case 2 gets eliminated because F neither attends Marriage nor lives in the same flat as A, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	A, Haldi	C, Mehendi	C, Haldi	A
1	B, Marriage	F, Roka	F, Marriage	Roka

Answer: E

Q. 78

Study the following information carefully and answer the given questions.

Six persons, viz. A, B, C, D, E and F live on three different floors of a three-storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered three. Each person is attending different events, viz. Roka, Mehendi, Sangeet, Haldi, Marriage and Reception.

Note-I: Each floor has two flats, viz., Flat P and Flat Q, **where Flat P is to the west of Flat Q.**

Note-II: Flat Q of floor 2 is immediately above Flat Q of floor 1. Similarly, Flat P of floor 3 is immediately above Flat P of floor 2.

Note-III: The area of each flat on each floor is the same.

Note-IV: Only two persons live on each floor and only one person lives in each flat.

The one who attends Reception lives on an odd-numbered floor. C lives immediately below the one who attends Reception, but both are living in different types of flats. The number of floors above C is **one less** than the number of floors below the one who attends Sangeet. The one who attends Marriage lives below E but not in the same flat. D lives to the west of E. The one who attends Haldi lives immediately below the flat of D. The one who attends roka lives on one of the floors below A. F neither attends Marriage nor lives in the same flat as A.

In which of the following floor and flat does A live?

A) Floor 2, Flat P 

B) Floor 2, Flat Q 

C) Floor 1, Flat P 

D) Floor 3, Flat P 

E) Floor 3, Flat Q 

Explanation:**Final arrangement**

Floors	Flat P	Flat Q
3	D, Reception	E, Sangeet
2	A, Haldi	C, Mehendi
1	B, Marriage	F, Roka

We have,

- The one who attends Reception lives on an odd-numbered floor.
- C lives immediately below the one who attends Reception, but both are living in different types of flats.

From the above conditions, there are two possibilities

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	Reception			Reception
2		C	C	
1				

Again, we have

- The number of floors above C is **one less** than the number of floors below the one who attends Sangeet.
- The one who attends Marriage lives below E but not in the same flat.
- D lives to the west of E.
- The one who attends Haldi lives immediately below the flat of D.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	Haldi/	C, Haldi/	C, Haldi	Haldi
1	Marriage		Marriage	

Again, we have

- The one who attends roka lives on one of the floors below A.
- F neither attends Marriage nor lives in the same flat as A.

After applying the above conditions, Case 2 gets eliminated because F neither attends Marriage nor lives in the same flat as A, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	A, Haldi	C, Mehendi	C, Haldi	A
1	B, Marriage	F, Roka	F, Marriage	Roka

Answer: A

Q. 79

Study the following information carefully and answer the given questions.

Six persons, viz. A, B, C, D, E and F live on three different floors of a three-storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered three. Each person is attending different events, viz. Roka, Mehendi, Sangeet, Haldi, Marriage and Reception.

Note-I: Each floor has two flats, viz., Flat P and Flat Q, **where Flat P is to the west of Flat Q.**

Note-II: Flat Q of floor 2 is immediately above Flat Q of floor 1. Similarly, Flat P of floor 3 is immediately above Flat P of floor 2.

Note-III: The area of each flat on each floor is the same.

Note-IV: Only two persons live on each floor and only one person lives in each flat.

The one who attends Reception lives on an odd-numbered floor. C lives immediately below the one who attends Reception, but both are living in different types of flats. The number of floors above C is **one less** than the number of floors below the one who attends Sangeet. The one who attends Marriage lives below E but not in the same flat. D lives to the west of E. The one who attends Haldi lives immediately below the flat of D. The one who attends roka lives on one of the floors below A. F neither attends Marriage nor lives in the same flat as A.

Who among the following person lives two floors below the flat of the one who attends Sangeet?

A) B

B) The one who lives in flat Q on floor 1

C) C

D) The one who lives immediately above the one who attends Haldi

E) No one

Explanation:**Final arrangement**

Floors	Flat P	Flat Q
3	D, Reception	E, Sangeet
2	A, Haldi	C, Mehendi
1	B, Marriage	F, Roka

We have,

- The one who attends Reception lives on an odd-numbered floor.
- C lives immediately below the one who attends Reception, but both are living in different types of flats.

From the above conditions, there are two possibilities

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	Reception			Reception
2		C	C	
1				

Again, we have

- The number of floors above C is **one less** than the number of floors below the one who attends Sangeet.
- The one who attends Marriage lives below E but not in the same flat.
- D lives to the west of E.
- The one who attends Haldi lives immediately below the flat of D.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	Haldi/	C, Haldi/	C, Haldi	Haldi
1	Marriage		Marriage	

Again, we have

- The one who attends roka lives on one of the floors below A.
- F neither attends Marriage nor lives in the same flat as A.

After applying the above conditions, Case 2 gets eliminated because F neither attends Marriage nor lives in the same flat as A, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	A, Haldi	C, Mehendi	C, Haldi	A
1	B, Marriage	F, Roka	F, Marriage	Roka

Answer: B

Q. 80

Study the following information carefully and answer the given questions.

Six persons, viz. A, B, C, D, E and F live on three different floors of a three-storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered three. Each person is attending different events, viz. Roka, Mehendi, Sangeet, Haldi, Marriage and Reception.

Note-I: Each floor has two flats, viz., Flat P and Flat Q, where Flat P is to the west of Flat Q.

Note-II: Flat Q of floor 2 is immediately above Flat Q of floor 1. Similarly, Flat P of floor 3 is immediately above Flat P of floor 2.

Note-III: The area of each flat on each floor is the same.

Note-IV: Only two persons live on each floor and only one person lives in each flat.

The one who attends Reception lives on an odd-numbered floor. C lives immediately below the one who attends Reception, but both are living in different types of flats. The number of floors above C is **one less** than the number of floors below the one who attends Sangeet. The one who attends Marriage lives below E but not in the same flat. D lives to the west of E. The one who attends Haldi lives immediately below the flat of D. The one who attends roka lives on one of the floors below A. F neither attends Marriage nor lives in the same flat as A.

The one who lives on floor 1 attends which of the following events?

A) Haldi

B) Roka

C) Marriage

D) Both a and b

E) Both b and c

Explanation:**Final arrangement**

Floors	Flat P	Flat Q
3	D, Reception	E, Sangeet
2	A, Haldi	C, Mehendi
1	B, Marriage	F, Roka

We have,

- The one who attends Reception lives on an odd-numbered floor.
- C lives immediately below the one who attends Reception, but both are living in different types of flats.

From the above conditions, there are two possibilities

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	Reception			Reception
2		C	C	
1				

Again, we have

- The number of floors above C is **one less** than the number of floors below the one who attends Sangeet.
- The one who attends Marriage lives below E but not in the same flat.
- D lives to the west of E.
- The one who attends Haldi lives immediately below the flat of D.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	Haldi/	C, Haldi/	C, Haldi	Haldi
1	Marriage		Marriage	

Again, we have

- The one who attends roka lives on one of the floors below A.
- F neither attends Marriage nor lives in the same flat as A.

After applying the above conditions, Case 2 gets eliminated because F neither attends Marriage nor lives in the same flat as A, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat P	Flat Q	Flat P	Flat Q
3	D, Reception	E, Sangeet	D, Sangeet	E, Reception
2	A, Haldi	C, Mehendi	C, Haldi	A
1	B, Marriage	F, Roka	F, Marriage	Roka

Answer: E

Q. 81

Study the following information carefully and answer the given questions.

Seven persons viz. L, M, N, O, P, Q and S are working in a bank at different designations such as Clerk, Probationary officer (PO), Specialist officer (SO), Branch Manager (BM), General Manager (GM), Chairman and Managing Director (MD). The hierarchy of the designations are given in increasing order such as Managing Director (MD) is the senior-most designation, whereas Clerk is the junior-most designation. Each person has a different number of files. No one has less than 10 files and more than 70 files.

P is not junior to the General Manager but has 8 files less than N. Only three persons are designated between P and the one who has 24 files. The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files. S is five persons senior to the one who has 11 files. The sum of the number of files with the one who is Clerk and M is 61 files. M is immediately senior to the one who has 22 files more than S. Only two persons are designated between O and Q, who has a prime number of files. L has 3 files less than S. The difference between the number of files with L and N is 13.

Who among the following has an odd number of files?**I. The one who is designated as Probationary Officer (PO)****II. S****III. The one who is two persons junior to P****A) Only II and III****B) Only III****C) Only I and II****D) Only I and III****E) All I, II and III**

Explanation:**Final arrangement**

Designation	Persons	Number of files
Managing director (MD)	P	29
Chairman	S	27
General Manager (GM)	M	50
Branch Manager (BM)	O	49
Specialist officer (SO)	L	24
Probationary Office (PO)	N	37
Clerk	Q	11

We have,

- P is not junior to the General Manager but has 8 files less than N.
- Only three persons are designated between P and the one who has 24 files.

From the above conditions, there are three possibilities

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)			P (8-N)
Chairman		P (8-N)	
General Manager (GM)	P (8-N)		
Branch Manager (BM)			
Specialist officer (SO)			(24)
Probationary Office (PO)		(24)	
Clerk	(24)		

Again, we have

- The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files.
- S is five persons senior to the one who has 11 files.

Odd perfect square number of files means only 25/49 files, because no one has less than 10 files and more than 70 files.

After applying the above conditions, Case 2 gets eliminated because S is five persons senior to the one who has 11 files, which is not satisfied.

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)	S		P (8-N)
Chairman	(25/49)	P (8-N)	S
General Manager (GM)	P (8-N)	(25/49)	
Branch Manager (BM)			(25/49)
Specialist officer (SO)			(24)
Probationary Office (PO)	(11)	(24)	
Clerk	(24)		(11)

Again, we have

- The sum of the number of files with the one who is Clerk and M is 61 files.
- M is immediately senior to the one who has 22 files more than S.

In Case 3, the one who is immediately junior to M has 25/49 files, which is 22 files more than S. If the person has 25 files, then S has only 3 files this is not possible. Then, if the person has 49 files, **S has 27 files.**

The sum of the number of files with the one who is Clerk and M is 61 files means, In Case 1, $24+M=61$; **M=37 files.** In Case 3, $11+M=61$; **M=50 files.**

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S	P (8-N)
Chairman	(25/49)	S (27)
General Manager (GM)	P (8-N)	M (50)
Branch Manager (BM)	M (37)	(49)
Specialist officer (SO)	(22+S)	(24)
Probationary Office (PO)	(11)	
Clerk	(24)	(11)

Again, we have

- Only two persons are designated between O and Q, who has prime number of files.
- L has 3 files less than S.
- The difference between the number of files with L and N is 13.
- P has 8 files less than N

In Case-1, if N has 11 files, then P has only 3 files, which is not possible. Then, if N has 24 files, then P has 16 files. If L has 11 files, then **S has 14 files.**

In Case 3, the difference between the number of files with L and N is 13, which means $24 - N = 13$; N has either 11/37, but each person has different number of files. Already, Q has 11 files then, **N has 37 files and P has 29 files.**

After applying the above conditions, Case 1 gets eliminated because if S has 14 files, then Q has 36 files and if S has 27 files, then Q has 49 files but Q has a prime number of files. Hence, Case 3 shows the final arrangement.

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S (14)	P (29)
Chairman	O (25/49)	S (27)
General Manager (GM)	P (16)	M (50)
Branch Manager (BM)	M (37)	O (49)
Specialist officer (SO)	Q (36)	L (24)
Probationary Office (PO)	L (11)	N (37)
Clerk	N (24)	Q (11)

Answer: C

Q. 82

Study the following information carefully and answer the given questions.

Seven persons viz. L, M, N, O, P, Q and S are working in a bank at different designations such as Clerk, Probationary officer (PO), Specialist officer (SO), Branch Manager (BM), General Manager (GM), Chairman and Managing Director (MD). The hierarchy of the designations are given in increasing order such as Managing Director (MD) is the senior-most designation, whereas Clerk is the junior-most designation. Each person has a different number of files. No one has less than 10 files and more than 70 files.

P is not junior to the General Manager but has 8 files less than N. Only three persons are designated between P and the one who has 24 files. The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files. S is five persons senior to the one who has 11 files. The sum of the number of files with the one who is Clerk and M is 61 files. M is immediately senior to the one who has 22 files more than S. Only two persons are designated between O and Q, who has a prime number of files. L has 3 files less than S. The difference between the number of files with L and N is 13.

The number of persons designated between the one who has 24 files and S is twice that of the number of persons junior to__.

A) Q B) The one who has 10 files more than S C) The one who has 32 files D) O E) P 

Explanation:**Final arrangement**

Designation	Persons	Number of files
Managing director (MD)	P	29
Chairman	S	27
General Manager (GM)	M	50
Branch Manager (BM)	O	49
Specialist officer (SO)	L	24
Probationary Office (PO)	N	37
Clerk	Q	11

We have,

- P is not junior to the General Manager but has 8 files less than N.
- Only three persons are designated between P and the one who has 24 files.

From the above conditions, there are three possibilities

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)			P (8-N)
Chairman		P (8-N)	
General Manager (GM)	P (8-N)		
Branch Manager (BM)			
Specialist officer (SO)			(24)
Probationary Office (PO)		(24)	
Clerk	(24)		

Again, we have

- The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files.
- S is five persons senior to the one who has 11 files.

Odd perfect square number of files means only 25/49 files, because no one has less than 10 files and more than 70 files.

After applying the above conditions, Case 2 gets eliminated because S is five persons senior to the one who has 11 files, which is not satisfied.

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)	S		P (8-N)
Chairman	(25/49)	P (8-N)	S
General Manager (GM)	P (8-N)	(25/49)	
Branch Manager (BM)			(25/49)
Specialist officer (SO)			(24)
Probationary Office (PO)	(11)	(24)	
Clerk	(24)		(11)

Again, we have

- The sum of the number of files with the one who is Clerk and M is 61 files.
- M is immediately senior to the one who has 22 files more than S.

In Case 3, the one who is immediately junior to M has 25/49 files, which is 22 files more than S. If the person has 25 files, then S has only 3 files this is not possible. Then, if the person has 49 files, **S has 27 files.**

The sum of the number of files with the one who is Clerk and M is 61 files means, In Case 1, $24+M=61$; **M=37 files.** In Case 3, $11+M=61$; **M=50 files.**

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S	P (8-N)
Chairman	(25/49)	S (27)
General Manager (GM)	P (8-N)	M (50)
Branch Manager (BM)	M (37)	(49)
Specialist officer (SO)	(22+S)	(24)
Probationary Office (PO)	(11)	
Clerk	(24)	(11)

Again, we have

- Only two persons are designated between O and Q, who has prime number of files.
- L has 3 files less than S.
- The difference between the number of files with L and N is 13.
- P has 8 files less than N

In Case-1, if N has 11 files, then P has only 3 files, which is not possible. Then, if N has 24 files, then P has 16 files. If L has 11 files, then **S has 14 files.**

In Case 3, the difference between the number of files with L and N is 13, which means $24 - N = 13$; N has either 11/37, but each person has different number of files. Already, Q has 11 files then, **N has 37 files and P has 29 files.**

After applying the above conditions, Case 1 gets eliminated because if S has 14 files, then Q has 36 files and if S has 27 files, then Q has 49 files but Q has a prime number of files. Hence, Case 3 shows the final arrangement.

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S (14)	P (29)
Chairman	O (25/49)	S (27)
General Manager (GM)	P (16)	M (50)
Branch Manager (BM)	M (37)	O (49)
Specialist officer (SO)	Q (36)	L (24)
Probationary Office (PO)	L (11)	N (37)
Clerk	N (24)	Q (11)

Answer: B

Q. 83

Study the following information carefully and answer the given questions.

Seven persons viz. L, M, N, O, P, Q and S are working in a bank at different designations such as Clerk, Probationary officer (PO), Specialist officer (SO), Branch Manager (BM), General Manager (GM), Chairman and Managing Director (MD). The hierarchy of the designations are given in increasing order such as Managing Director (MD) is the senior-most designation, whereas Clerk is the junior-most designation. Each person has a different number of files. No one has less than 10 files and more than 70 files.

P is not junior to the General Manager but has 8 files less than N. Only three persons are designated between P and the one who has 24 files. The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files. S is five persons senior to the one who has 11 files. The sum of the number of files with the one who is Clerk and M is 61 files. M is immediately senior to the one who has 22 files more than S. Only two persons are designated between O and Q, who has a prime number of files. L has 3 files less than S. The difference between the number of files with L and N is 13.

How many files does M have?

- A) 37 
- B) 29 
- C) 24 
- D) 49 
- E) 50 

Explanation:**Final arrangement**

Designation	Persons	Number of files
Managing director (MD)	P	29
Chairman	S	27
General Manager (GM)	M	50
Branch Manager (BM)	O	49
Specialist officer (SO)	L	24
Probationary Office (PO)	N	37
Clerk	Q	11

We have,

- P is not junior to the General Manager but has 8 files less than N.
- Only three persons are designated between P and the one who has 24 files.

From the above conditions, there are three possibilities

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)			P (8-N)
Chairman		P (8-N)	
General Manager (GM)	P (8-N)		
Branch Manager (BM)			
Specialist officer (SO)			(24)
Probationary Office (PO)		(24)	
Clerk	(24)		

Again, we have

- The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files.
- S is five persons senior to the one who has 11 files.

Odd perfect square number of files means only 25/49 files, because no one has less than 10 files and more than 70 files.

After applying the above conditions, Case 2 gets eliminated because S is five persons senior to the one who has 11 files, which is not satisfied.

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)	S		P (8-N)
Chairman	(25/49)	P (8-N)	S
General Manager (GM)	P (8-N)	(25/49)	
Branch Manager (BM)			(25/49)
Specialist officer (SO)			(24)
Probationary Office (PO)	(11)	(24)	
Clerk	(24)		(11)

Again, we have

- The sum of the number of files with the one who is Clerk and M is 61 files.
- M is immediately senior to the one who has 22 files more than S.

In Case 3, the one who is immediately junior to M has 25/49 files, which is 22 files more than S. If the person has 25 files, then S has only 3 files this is not possible. Then, if the person has 49 files, **S has 27 files.**

The sum of the number of files with the one who is Clerk and M is 61 files means, In Case 1, $24+M=61$; **M=37 files.** In Case 3, $11+M=61$; **M=50 files.**

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S	P (8-N)
Chairman	(25/49)	S (27)
General Manager (GM)	P (8-N)	M (50)
Branch Manager (BM)	M (37)	(49)
Specialist officer (SO)	(22+S)	(24)
Probationary Office (PO)	(11)	
Clerk	(24)	(11)

Again, we have

- Only two persons are designated between O and Q, who has prime number of files.
- L has 3 files less than S.
- The difference between the number of files with L and N is 13.
- P has 8 files less than N

In Case-1, if N has 11 files, then P has only 3 files, which is not possible. Then, if N has 24 files, then P has 16 files. If L has 11 files, then **S has 14 files.**

In Case 3, the difference between the number of files with L and N is 13, which means $24 - N = 13$; N has either 11/37, but each person has different number of files. Already, Q has 11 files then, **N has 37 files and P has 29 files.**

After applying the above conditions, Case 1 gets eliminated because if S has 14 files, then Q has 36 files and if S has 27 files, then Q has 49 files but Q has a prime number of files. Hence, Case 3 shows the final arrangement.

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S (14)	P (29)
Chairman	O (25/49)	S (27)
General Manager (GM)	P (16)	M (50)
Branch Manager (BM)	M (37)	O (49)
Specialist officer (SO)	Q (36)	L (24)
Probationary Office (PO)	L (11)	N (37)
Clerk	N (24)	Q (11)

Answer: E

Q. 84

Study the following information carefully and answer the given questions.

Seven persons viz. L, M, N, O, P, Q and S are working in a bank at different designations such as Clerk, Probationary officer (PO), Specialist officer (SO), Branch Manager (BM), General Manager (GM), Chairman and Managing Director (MD). The hierarchy of the designations are given in increasing order such as Managing Director (MD) is the senior-most designation, whereas Clerk is the junior-most designation. Each person has a different number of files. No one has less than 10 files and more than 70 files.

P is not junior to the General Manager but has 8 files less than N. Only three persons are designated between P and the one who has 24 files. The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files. S is five persons senior to the one who has 11 files. The sum of the number of files with the one who is Clerk and M is 61 files. M is immediately senior to the one who has 22 files more than S. Only two persons are designated between O and Q, who has a prime number of files. L has 3 files less than S. The difference between the number of files with L and N is 13.

What is the sum of the number of files with the one who is designated as Specialist Officer (SO) and the one who is immediately senior to S?

- A) 50 
- B) 87 
- C) 53 
- D) 74 
- E) 61 

Explanation:**Final arrangement**

Designation	Persons	Number of files
Managing director (MD)	P	29
Chairman	S	27
General Manager (GM)	M	50
Branch Manager (BM)	O	49
Specialist officer (SO)	L	24
Probationary Office (PO)	N	37
Clerk	Q	11

We have,

- P is not junior to the General Manager but has 8 files less than N.
- Only three persons are designated between P and the one who has 24 files.

From the above conditions, there are three possibilities

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)			P (8-N)
Chairman		P (8-N)	
General Manager (GM)	P (8-N)		
Branch Manager (BM)			
Specialist officer (SO)			(24)
Probationary Office (PO)		(24)	
Clerk	(24)		

Again, we have

- The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files.
- S is five persons senior to the one who has 11 files.

Odd perfect square number of files means only 25/49 files, because no one has less than 10 files and more than 70 files.

After applying the above conditions, Case 2 gets eliminated because S is five persons senior to the one who has 11 files, which is not satisfied.

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)	S		P (8-N)
Chairman	(25/49)	P (8-N)	S
General Manager (GM)	P (8-N)	(25/49)	
Branch Manager (BM)			(25/49)
Specialist officer (SO)			(24)
Probationary Office (PO)	(11)	(24)	
Clerk	(24)		(11)

Again, we have

- The sum of the number of files with the one who is Clerk and M is 61 files.
- M is immediately senior to the one who has 22 files more than S.

In Case 3, the one who is immediately junior to M has 25/49 files, which is 22 files more than S. If the person has 25 files, then S has only 3 files this is not possible. Then, if the person has 49 files, **S has 27 files.**

The sum of the number of files with the one who is Clerk and M is 61 files means, In Case 1, $24+M=61$; **M=37 files.** In Case 3, $11+M=61$; **M=50 files.**

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S	P (8-N)
Chairman	(25/49)	S (27)
General Manager (GM)	P (8-N)	M (50)
Branch Manager (BM)	M (37)	(49)
Specialist officer (SO)	(22+S)	(24)
Probationary Office (PO)	(11)	
Clerk	(24)	(11)

Again, we have

- Only two persons are designated between O and Q, who has prime number of files.
- L has 3 files less than S.
- The difference between the number of files with L and N is 13.
- P has 8 files less than N

In Case-1, if N has 11 files, then P has only 3 files, which is not possible. Then, if N has 24 files, then P has 16 files. If L has 11 files, then **S has 14 files.**

In Case 3, the difference between the number of files with L and N is 13, which means $24 - N = 13$; N has either 11/37, but each person has different number of files. Already, Q has 11 files then, **N has 37 files and P has 29 files.**

After applying the above conditions, Case 1 gets eliminated because if S has 14 files, then Q has 36 files and if S has 27 files, then Q has 49 files but Q has a prime number of files. Hence, Case 3 shows the final arrangement.

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S (14)	P (29)
Chairman	O (25/49)	S (27)
General Manager (GM)	P (16)	M (50)
Branch Manager (BM)	M (37)	O (49)
Specialist officer (SO)	Q (36)	L (24)
Probationary Office (PO)	L (11)	N (37)
Clerk	N (24)	Q (11)

Answer: C

Q. 85

Study the following information carefully and answer the given questions.

Seven persons viz. L, M, N, O, P, Q and S are working in a bank at different designations such as Clerk, Probationary officer (PO), Specialist officer (SO), Branch Manager (BM), General Manager (GM), Chairman and Managing Director (MD). The hierarchy of the designations are given in increasing order such as Managing Director (MD) is the senior-most designation, whereas Clerk is the junior-most designation. Each person has a different number of files. No one has less than 10 files and more than 70 files.

P is not junior to the General Manager but has 8 files less than N. Only three persons are designated between P and the one who has 24 files. The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files. S is five persons senior to the one who has 11 files. The sum of the number of files with the one who is Clerk and M is 61 files. M is immediately senior to the one who has 22 files more than S. Only two persons are designated between O and Q, who has a prime number of files. L has 3 files less than S. The difference between the number of files with L and N is 13.

In which of the following designations does O work?

A) Chairman

B) Branch Manager (BM)

C) Clerk

D) Managing director (MD)

E) Specialist officer (SO)

Explanation:**Final arrangement**

Designation	Persons	Number of files
Managing director (MD)	P	29
Chairman	S	27
General Manager (GM)	M	50
Branch Manager (BM)	O	49
Specialist officer (SO)	L	24
Probationary Office (PO)	N	37
Clerk	Q	11

We have,

- P is not junior to the General Manager but has 8 files less than N.
- Only three persons are designated between P and the one who has 24 files.

From the above conditions, there are three possibilities

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)			P (8-N)
Chairman		P (8-N)	
General Manager (GM)	P (8-N)		
Branch Manager (BM)			
Specialist officer (SO)			(24)
Probationary Office (PO)		(24)	
Clerk	(24)		

Again, we have

- The number of persons junior to the one who has 24 files is **one less** than the number of persons senior to the one who has an odd perfect square number of files.
- S is five persons senior to the one who has 11 files.

Odd perfect square number of files means only 25/49 files, because no one has less than 10 files and more than 70 files.

After applying the above conditions, Case 2 gets eliminated because S is five persons senior to the one who has 11 files, which is not satisfied.

	Case-1	Case-2	Case-3
Designation	Persons	Persons	Persons
Managing director (MD)	S		P (8-N)
Chairman	(25/49)	P (8-N)	S
General Manager (GM)	P (8-N)	(25/49)	
Branch Manager (BM)			(25/49)
Specialist officer (SO)			(24)
Probationary Office (PO)	(11)	(24)	
Clerk	(24)		(11)

Again, we have

- The sum of the number of files with the one who is Clerk and M is 61 files.
- M is immediately senior to the one who has 22 files more than S.

In Case 3, the one who is immediately junior to M has 25/49 files, which is 22 files more than S. If the person has 25 files, then S has only 3 files this is not possible. Then, if the person has 49 files, **S has 27 files.**

The sum of the number of files with the one who is Clerk and M is 61 files means, In Case 1, $24+M=61$; **M=37 files.** In Case 3, $11+M=61$; **M=50 files.**

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S	P (8-N)
Chairman	(25/49)	S (27)
General Manager (GM)	P (8-N)	M (50)
Branch Manager (BM)	M (37)	(49)
Specialist officer (SO)	(22+S)	(24)
Probationary Office (PO)	(11)	
Clerk	(24)	(11)

Again, we have

- Only two persons are designated between O and Q, who has prime number of files.
- L has 3 files less than S.
- The difference between the number of files with L and N is 13.
- P has 8 files less than N

In Case-1, if N has 11 files, then P has only 3 files, which is not possible. Then, if N has 24 files, then P has 16 files. If L has 11 files, then **S has 14 files.**

In Case 3, the difference between the number of files with L and N is 13, which means $24 - N = 13$; N has either 11/37, but each person has different number of files. Already, Q has 11 files then, **N has 37 files and P has 29 files.**

After applying the above conditions, Case 1 gets eliminated because if S has 14 files, then Q has 36 files and if S has 27 files, then Q has 49 files but Q has a prime number of files. Hence, Case 3 shows the final arrangement.

	Case-1	Case-3
Designation	Persons	Persons
Managing director (MD)	S (14)	P (29)
Chairman	O (25/49)	S (27)
General Manager (GM)	P (16)	M (50)
Branch Manager (BM)	M (37)	O (49)
Specialist officer (SO)	Q (36)	L (24)
Probationary Office (PO)	L (11)	N (37)
Clerk	N (24)	Q (11)

Answer: B

Q. 86

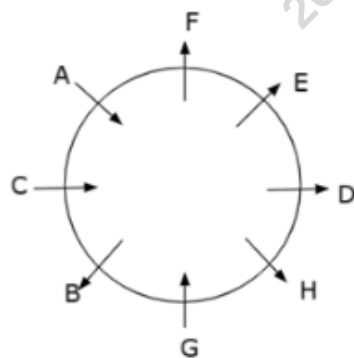

Study the following information carefully and answer the given questions.

Eight persons, viz. A, B, C, D, E, F, G and H are sitting around a circular table in such a way that some of them are facing the centre while some of them are facing away from the centre.

D sits second to the right of G, where both of them face different directions. Two persons sit between G and A, who doesn't sit adjacent to D. F sits two places away from D. F sits third to the right of B, who faces away from the centre. Both B and A are not immediate neighbours. C sits second to the left of F. E sits third to the left of C, who faces the same direction as A. H sits second to the right of E, who doesn't face towards the centre. H faces the same direction as D.

Which among the following pair of persons faces the same direction to each other?

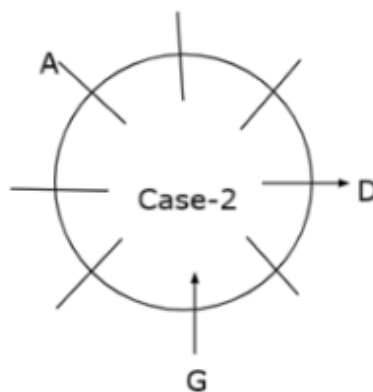

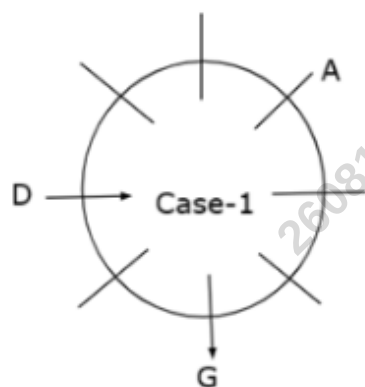

A) HA B) ED C) GE D) CB E) Both b and d 

Explanation:**Final arrangement**

We have,

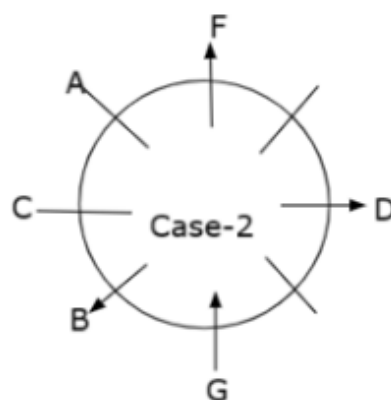

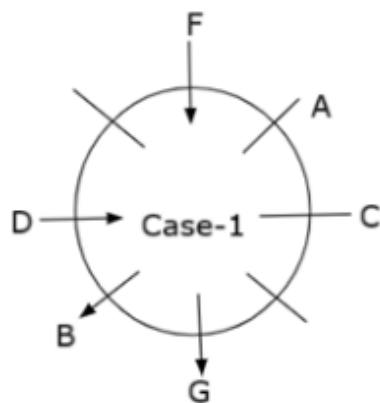

- D sits second to the right of G, where both of them face different directions.
- Two persons sit between G and A, who doesn't sit adjacent to D.

From the above conditions, there are two possibilities

Again, we have

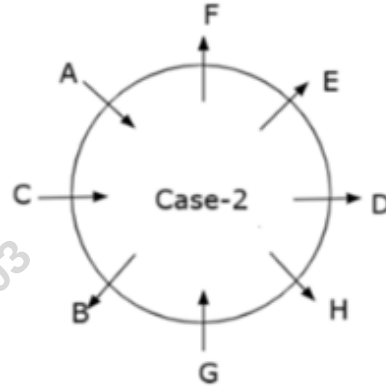

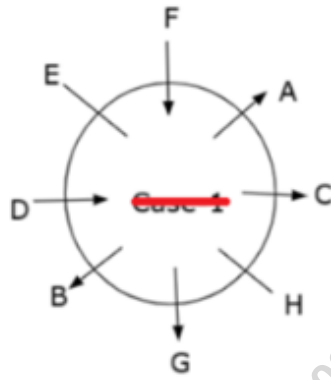

- F sits two places away from D.
- F sits third to the right of B, who faces away from the centre.
- Both B and A are not immediate neighbours.
- C sits second to the left of F.

Again, we have

- E sits third to the left of C, who faces the same direction as A.
- H sits second to the right of E, who doesn't face towards the centre.
- H faces the same direction as D.

After applying the above conditions, Case 1 gets eliminated because H sits second to the right of E, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: B

Q. 87

Study the following information carefully and answer the given questions.

Eight persons, viz. A, B, C, D, E, F, G and H are sitting around a circular table in such a way that some of them are facing the centre while some of them are facing away from the centre.

D sits second to the right of G, where both of them face different directions. Two persons sit between G and A, who doesn't sit adjacent to D. F sits two places away from D. F sits third to the right of B, who faces away from the centre. Both B and A are not immediate neighbours. C sits second to the left of F. E sits third to the left of C, who faces the same direction as A. H sits second to the right of E, who doesn't face towards the centre. H faces the same direction as D.

____sits fourth to the right of H and faces____.

A) B, Away from the centre

B) D, Towards the centre

C) C, Away from the centre

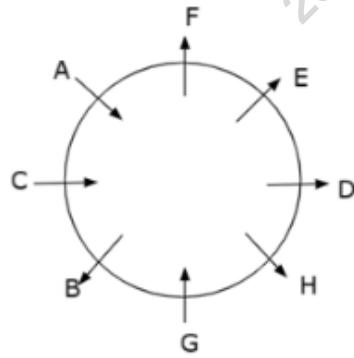

D) A, Towards the center

E) F, Away from the centre

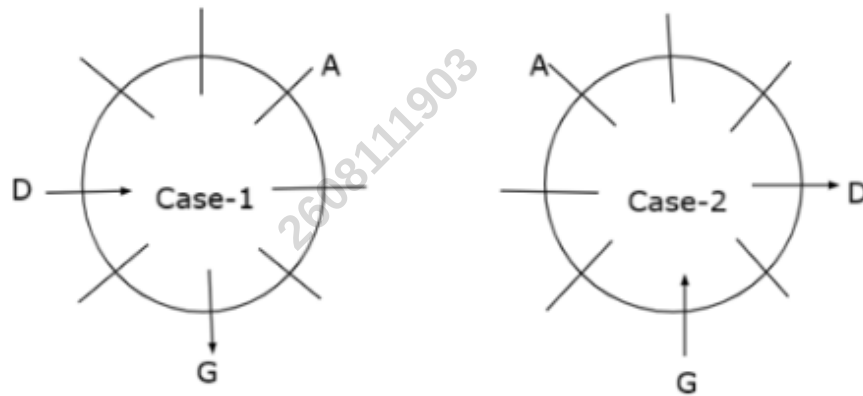

Explanation:**Final arrangement**

We have,

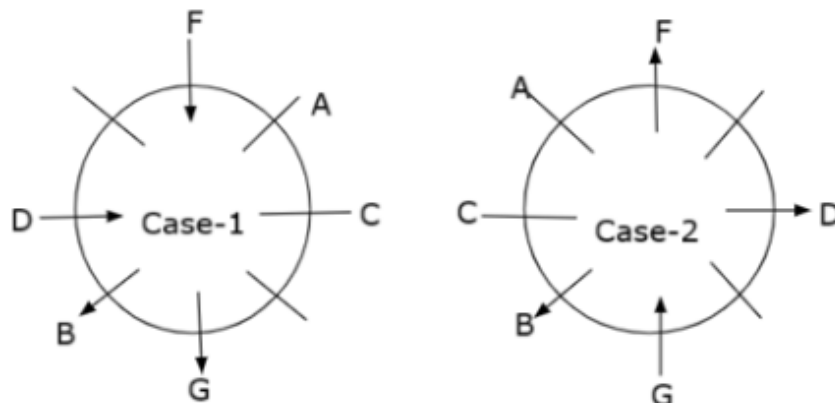

- D sits second to the right of G, where both of them face different directions.
- Two persons sit between G and A, who doesn't sit adjacent to D.

From the above conditions, there are two possibilities

Again, we have

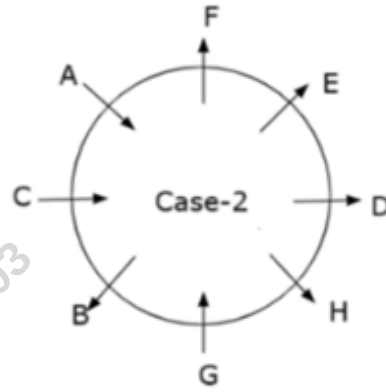

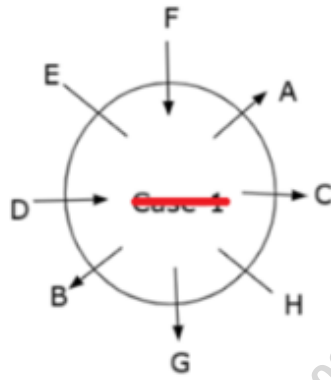

- F sits two places away from D.
- F sits third to the right of B, who faces away from the centre.
- Both B and A are not immediate neighbours.
- C sits second to the left of F

Again, we have

- E sits third to the left of C, who faces the same direction as A.
- H sits second to the right of E, who doesn't face towards the centre.
- H faces the same direction as D.

After applying the above conditions, Case 1 gets eliminated because H sits second to the right of E, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: D

Q. 88

Study the following information carefully and answer the given questions.

Eight persons, viz. A, B, C, D, E, F, G and H are sitting around a circular table in such a way that some of them are facing the centre while some of them are facing away from the centre.

D sits second to the right of G, where both of them face different directions. Two persons sit between G and A, who doesn't sit adjacent to D. F sits two places away from D. F sits third to the right of B, who faces away from the centre. Both B and A are not immediate neighbours. C sits second to the left of F. E sits third to the left of C, who faces the same direction as A. H sits second to the right of E, who doesn't face towards the centre. H faces the same direction as D.

The number of persons facing towards the centre is ____ the number of persons facing away from the centre.

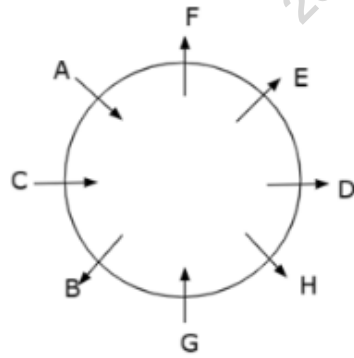

A) One less than 

B) Two more than 

C) One more than 

D) Same as 

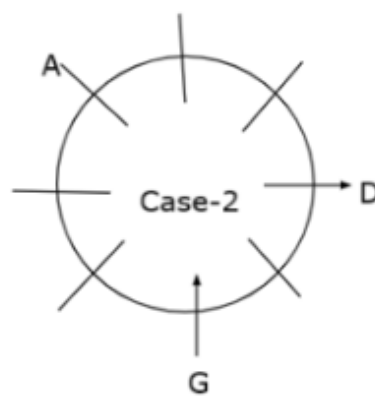

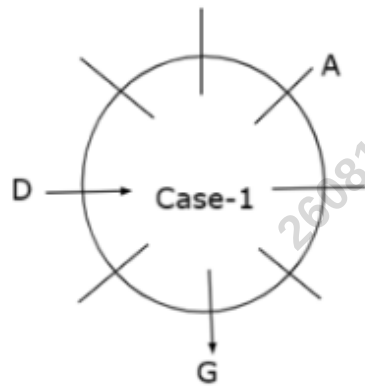

E) Two less than 

Explanation:**Final arrangement**

We have,

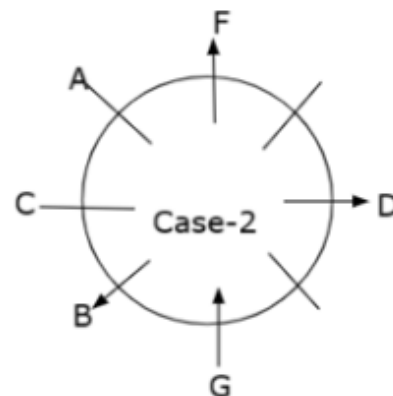

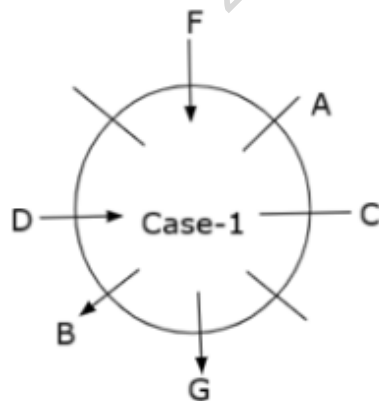

- D sits second to the right of G, where both of them face different directions.
- Two persons sit between G and A, who doesn't sit adjacent to D.

From the above conditions, there are two possibilities

Again, we have

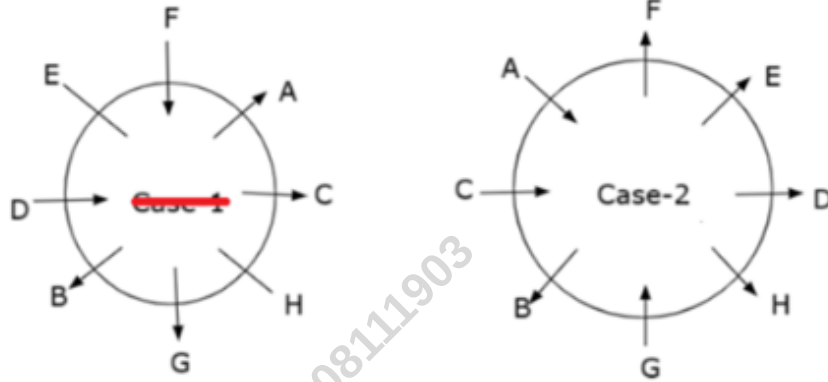

- F sits two places away from D.
- F sits third to the right of B, who faces away from the centre.
- Both B and A are not immediate neighbours.
- C sits second to the left of F

Again, we have

- E sits third to the left of C, who faces the same direction as A.
- H sits second to the right of E, who doesn't face towards the centre.
- H faces the same direction as D.

After applying the above conditions, Case 1 gets eliminated because H sits second to the right of E, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: E

Q. 89

Study the following information carefully and answer the given questions.

Eight persons, viz. A, B, C, D, E, F, G and H are sitting around a circular table in such a way that some of them are facing the centre while some of them are facing away from the centre.

D sits second to the right of G, where both of them face different directions. Two persons sit between G and A, who doesn't sit adjacent to D. F sits two places away from D. F sits third to the right of B, who faces away from the centre. Both B and A are not immediate neighbours. C sits second to the left of F. E sits third to the left of C, who faces the same direction as A. H sits second to the right of E, who doesn't face towards the centre. H faces the same direction as D.

What is the position of E with respect to A?

A) Third to the left

B) Second to the right

C) Fourth to the right

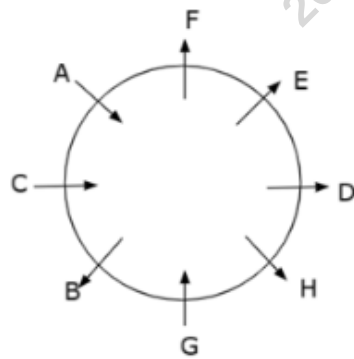

D) Second to the left

E) Immediate left

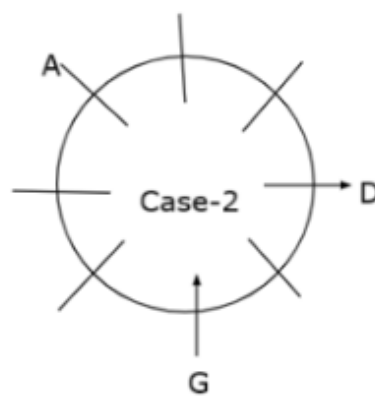

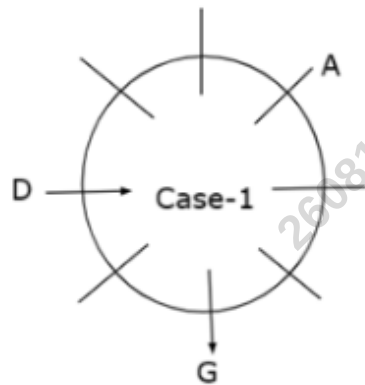

Explanation:**Final arrangement**

We have,

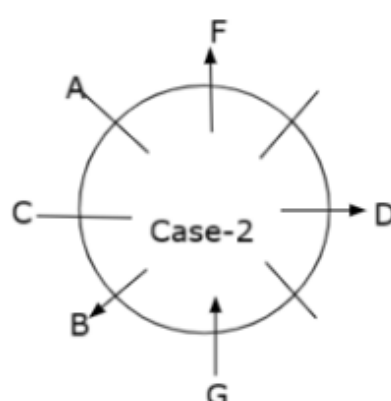

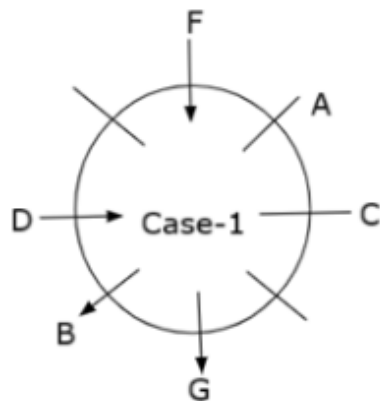

- D sits second to the right of G, where both of them face different directions.
- Two persons sit between G and A, who doesn't sit adjacent to D.

From the above conditions, there are two possibilities

Again, we have

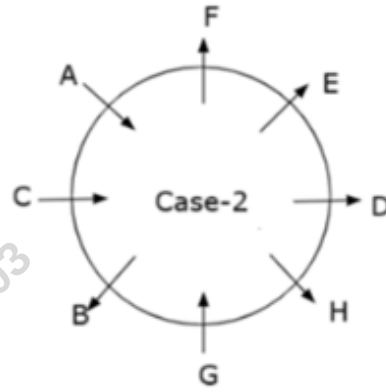

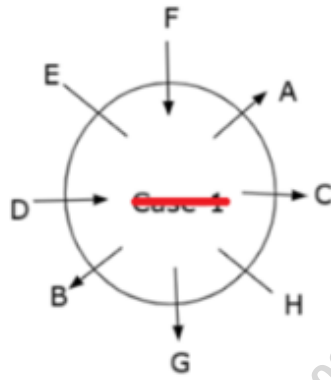

- F sits two places away from D.
- F sits third to the right of B, who faces away from the centre.
- Both B and A are not immediate neighbours.
- C sits second to the left of F.

Again, we have

- E sits third to the left of C, who faces the same direction as A.
- H sits second to the right of E, who doesn't face towards the centre.
- H faces the same direction as D.

After applying the above conditions, Case 1 gets eliminated because H sits second to the right of E, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: D

Q. 90

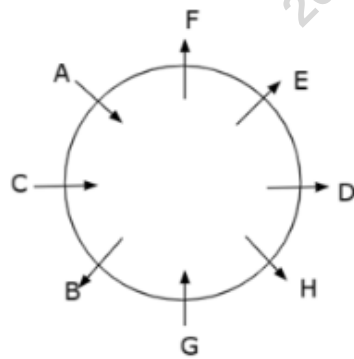

Study the following information carefully and answer the given questions.

Eight persons, viz. A, B, C, D, E, F, G and H are sitting around a circular table in such a way that some of them are facing the centre while some of them are facing away from the centre.

D sits second to the right of G, where both of them face different directions. Two persons sit between G and A, who doesn't sit adjacent to D. F sits two places away from D. F sits third to the right of B, who faces away from the centre. Both B and A are not immediate neighbours. C sits second to the left of F. E sits third to the left of C, who faces the same direction as A. H sits second to the right of E, who doesn't face towards the centre. H faces the same direction as D.

If J sits to the immediate right of E and to the immediate left of D and also J faces the same direction as A, then how many persons sit between J and B, when counted from the left of J?

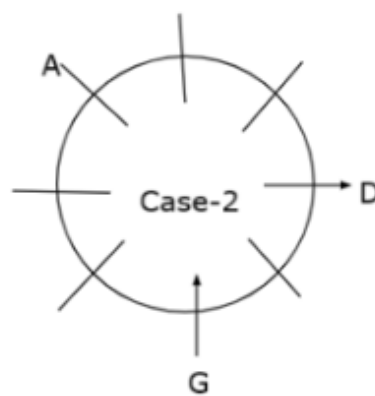

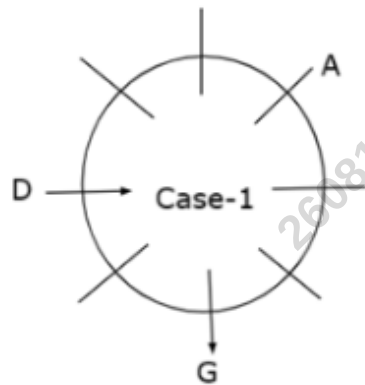

A) Four B) One C) Three D) Two E) No one 

Explanation:**Final arrangement**

We have,

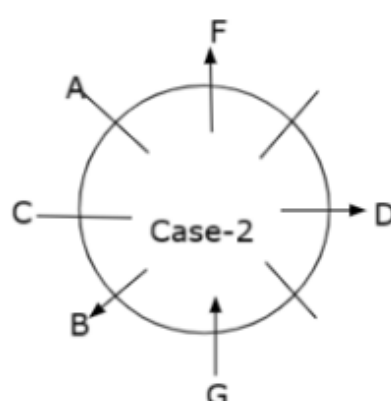

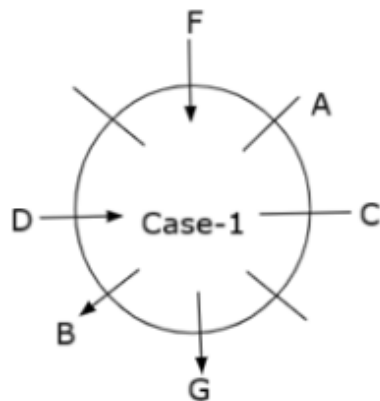

- D sits second to the right of G, where both of them face different directions.
- Two persons sit between G and A, who doesn't sit adjacent to D.

From the above conditions, there are two possibilities

Again, we have

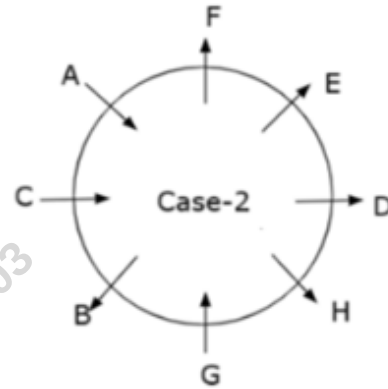

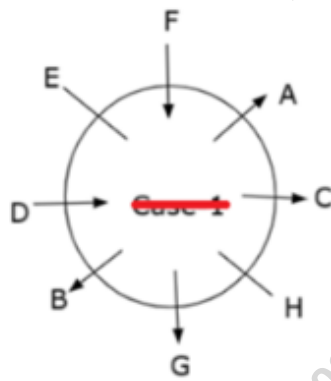

- F sits two places away from D.
- F sits third to the right of B, who faces away from the centre.
- Both B and A are not immediate neighbours.
- C sits second to the left of F

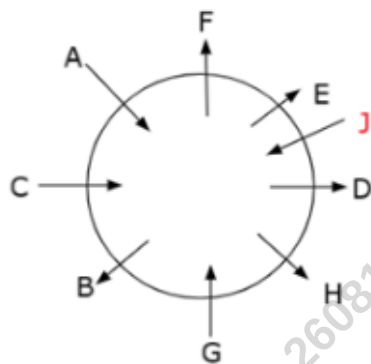

Again, we have

- E sits third to the left of C, who faces the same direction as A.
- H sits second to the right of E, who doesn't face towards the centre.
- H faces the same direction as D.

After applying the above conditions, Case 1 gets eliminated because H sits second to the right of E, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: C

Q. 91

Study the following information carefully and answer the given questions.

Eight persons viz. I, J, K, L, M, N, O and P went abroad in eight different months, viz. March, April, May, June, August, September, October and December of the same year. No two persons went abroad in the same month.

M went abroad in the month having an odd number of days, but not after August. Only three persons went between M and I, who went immediately before O. N went three months after K. Only one person went between K and J. The number of persons went between I and J is **one more** than the number of persons went after L. P doesn't go in March.

Who among the following person went abroad in October?A) M B) The one who went immediately after L C) I D) K E) The one who went two persons after M 

Explanation:**Final arrangement**

Months	Persons
March	I
April	O
May	P
June	J
August	M
September	K
October	L
December	N

We have,

- M went abroad in the month having an odd number of days, but not after August.
- Only three persons went between M and I, who went immediately before O.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O		
May		M	
June			
August	M		I
September			O
October		I	
December		O	

Again, we have

- N went three months after K.
- Only one person went between K and J.

After applying the above conditions, Case 3 gets eliminated because N went three months after K, which is not satisfied.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O	J	
May		M	
June	J	K	
August	M		I
September	K	N	O
October		I	
December	N	O	

Again, we have

- The number of persons went between I and J is **one more** than the number of persons went after L.
- P doesn't go in March.

After applying the above conditions, Case 2 gets eliminated because P doesn't go in March, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1	Case-2
Months	Persons	Persons
March	I	P
April	O	J
May	P	M
June	J	K
August	M	L
September	K	N
October	L	I
December	N	O

Answer: E

Q. 92

Study the following information carefully and answer the given questions.

Eight persons viz. I, J, K, L, M, N, O and P went abroad in eight different months, viz. March, April, May, June, August, September, October and December of the same year. No two persons went abroad in the same month.

M went abroad in the month having an odd number of days, but not after August. Only three persons went between M and I, who went immediately before O. N went three months after K. Only one person went between K and J. The number of persons went between I and J is **one more** than the number of persons went after L. P doesn't go in March.

P went abroad in which of the following months?A) April B) September C) May D) June E) December 

Explanation:**Final arrangement**

Months	Persons
March	I
April	O
May	P
June	J
August	M
September	K
October	L
December	N

We have,

- M went abroad in the month having an odd number of days, but not after August.
- Only three persons went between M and I, who went immediately before O.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O		
May		M	
June			
August	M		I
September			O
October		I	
December		O	

Again, we have

- N went three months after K.
- Only one person went between K and J.

After applying the above conditions, Case 3 gets eliminated because N went three months after K, which is not satisfied.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O	J	
May		M	
June	J	K	
August	M		I
September	K	N	O
October		I	
December	N	O	

Again, we have

- The number of persons went between I and J is **one more** than the number of persons went after L.
- P doesn't go in March.

After applying the above conditions, Case 2 gets eliminated because P doesn't go in March, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1	Case-2
Months	Persons	Persons
March	I	P
April	O	J
May	P	M
June	J	K
August	M	L
September	K	N
October	L	I
December	N	O

Answer: C

Q. 93

Study the following information carefully and answer the given questions.

Eight persons viz. I, J, K, L, M, N, O and P went abroad in eight different months, viz. March, April, May, June, August, September, October and December of the same year. No two persons went abroad in the same month.

M went abroad in the month having an odd number of days, but not after August. Only three persons went between M and I, who went immediately before O. N went three months after K. Only one person went between K and J. The number of persons went between I and J is **one more** than the number of persons went after L. P doesn't go in March.

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

A) N- The one who went in September

B) The one who went in April-K

C) P-I

D) M-P

E) K- The one who went in June

Explanation:**Final arrangement**

Months	Persons
March	I
April	O
May	P
June	J
August	M
September	K
October	L
December	N

We have,

- M went abroad in the month having an odd number of days, but not after August.
- Only three persons went between M and I, who went immediately before O.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O		
May		M	
June			
August	M		I
September			O
October		I	
December		O	

Again, we have

- N went three months after K.
- Only one person went between K and J.

After applying the above conditions, Case 3 gets eliminated because N went three months after K, which is not satisfied.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O	J	
May		M	
June	J	K	
August	M		I
September	K	N	O
October		I	
December	N	O	

Again, we have

- The number of persons went between I and J is **one more** than the number of persons went after L.
- P doesn't go in March.

After applying the above conditions, Case 2 gets eliminated because P doesn't go in March, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1	Case-2
Months	Persons	Persons
March	I	P
April	O	J
May	P	M
June	J	K
August	M	L
September	K	N
October	L	I
December	N	O

Answer: B (The first person went abroad two persons after the second person in all options, except option b)

Q. 94

Study the following information carefully and answer the given questions.

Eight persons viz. I, J, K, L, M, N, O and P went abroad in eight different months, viz. March, April, May, June, August, September, October and December of the same year. No two persons went abroad in the same month.

M went abroad in the month having an odd number of days, but not after August. Only three persons went between M and I, who went immediately before O. N went three months after K. Only one person went between K and J. The number of persons went between I and J is **one more** than the number of persons went after L. P doesn't go in March.

Who among the following person doesn't go abroad in the month having 31 days?

I. O

II. The one who went two persons before N

III. J

A) Only II B) Only II and III C) Only I and II D) Only I and III E) All I, II and III 

Explanation:**Final arrangement**

Months	Persons
March	I
April	O
May	P
June	J
August	M
September	K
October	L
December	N

We have,

- M went abroad in the month having an odd number of days, but not after August.
- Only three persons went between M and I, who went immediately before O.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O		
May		M	
June			
August	M		I
September			O
October		I	
December		O	

Again, we have

- N went three months after K.
- Only one person went between K and J.

After applying the above conditions, Case 3 gets eliminated because N went three months after K, which is not satisfied.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O	J	
May		M	
June	J	K	
August	M		I
September	K	N	O
October		I	
December	N	O	

Again, we have

- The number of persons went between I and J is **one more** than the number of persons went after L.
- P doesn't go in March.

After applying the above conditions, Case 2 gets eliminated because P doesn't go in March, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1	Case-2
Months	Persons	Persons
March	I	P
April	O	J
May	P	M
June	J	K
August	M	L
September	K	N
October	L	I
December	N	O

Answer: E

Q. 95

Study the following information carefully and answer the given questions.

Eight persons viz. I, J, K, L, M, N, O and P went abroad in eight different months, viz. March, April, May, June, August, September, October and December of the same year. No two persons went abroad in the same month.

M went abroad in the month having an odd number of days, but not after August. Only three persons went between M and I, who went immediately before O. N went three months after K. Only one person went between K and J. The number of persons went between I and J is **one more** than the number of persons went after L. P doesn't go in March.

Which of the following statement(s) is/are true with respect to the final arrangement?

A) I went abroad in October

B) Only two persons went between P and K

C) No one went after O

D) J went in the month having 31 days

E) None is true

Explanation:**Final arrangement**

Months	Persons
March	I
April	O
May	P
June	J
August	M
September	K
October	L
December	N

We have,

- M went abroad in the month having an odd number of days, but not after August.
- Only three persons went between M and I, who went immediately before O.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O		
May		M	
June			
August	M		I
September			O
October		I	
December		O	

Again, we have

- N went three months after K.
- Only one person went between K and J.

After applying the above conditions, Case 3 gets eliminated because N went three months after K, which is not satisfied.

	Case-1	Case-2	Case-3
Months	Persons	Persons	Persons
March	I		M
April	O	J	
May		M	
June	J	K	
August	M		I
September	K	N	O
October		I	
December	N	O	

Again, we have

- The number of persons went between I and J is **one more** than the number of persons went after L.
- P doesn't go in March.

After applying the above conditions, Case 2 gets eliminated because P doesn't go in March, which is not satisfied. Hence, Case 1 shows the final arrangement.

	Case-1	Case-2
Months	Persons	Persons
March	I	P
April	O	J
May	P	M
June	J	K
August	M	L
September	K	N
October	L	I
December	N	O

Answer: B

Q. 96

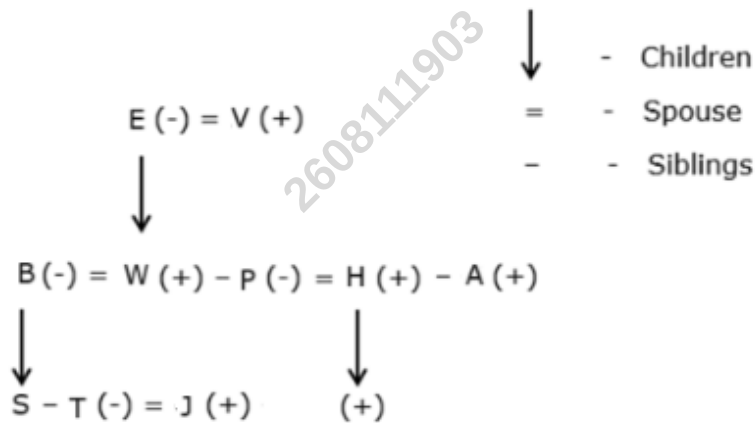

Study the following information carefully and answer the given questions.

E is the mother of only P and W. A is the brother-in-law of P, who is the paternal aunt of S. H is the brother-in-law of W and son-in-law of V, who is the grandfather of S. Both V and H have only one son. B is the sister-in-law of P and doesn't have any siblings. B is the mother of T, who is the wife of J.

How is S related to B?

- A) Daughter-in-law 
- B) Son 
- C) Daughter 
- D) Son-in-law 
- E) Cannot be determined 

Explanation:

Answer: E

Q. 97

Study the following information carefully and answer the given questions.

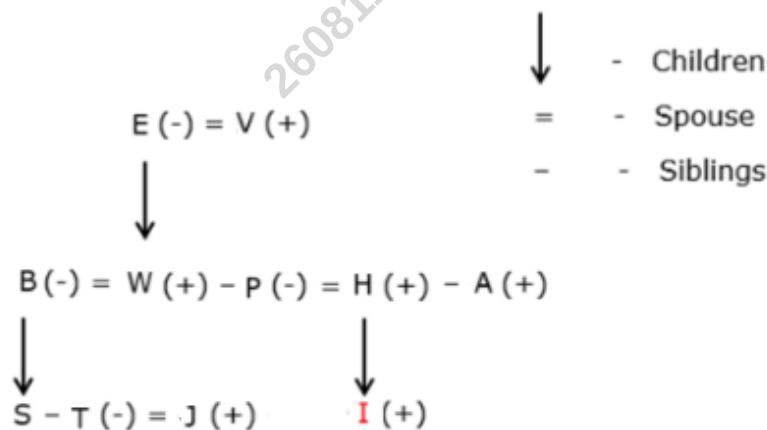

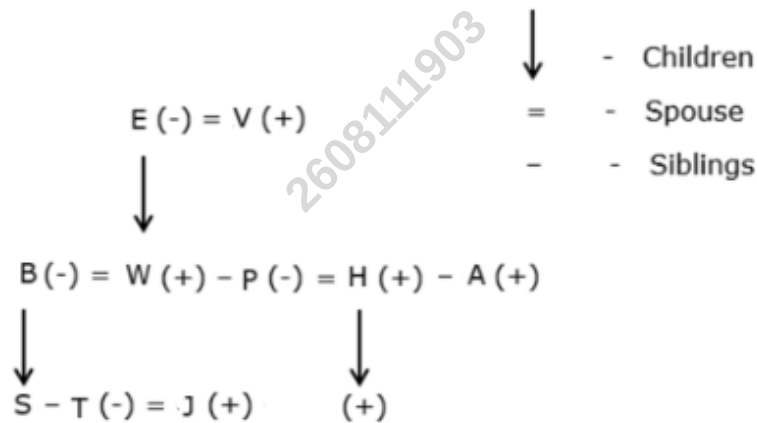

E is the mother of only P and W. A is the brother-in-law of P, who is the paternal aunt of S. H is the brother-in-law of W and son-in-law of V, who is the grandfather of S. Both V and H have only one son. B is the sister-in-law of P and doesn't have any siblings. B is the mother of T, who is the wife of J.

If I is the nephew of W, then how is I related to A?

- A) Uncle ☒
- B) Son ☒
- C) Nephew ☒
- D) Grandson ☒
- E) Son-in-law ☒

Explanation:

Answer: C

Q. 98

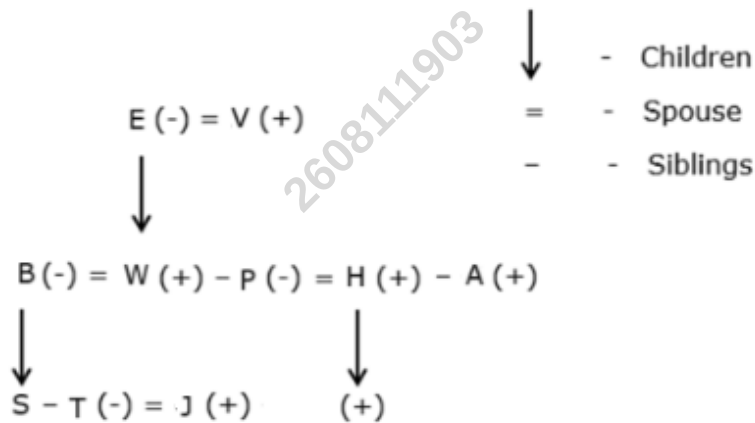

Study the following information carefully and answer the given questions.

E is the mother of only P and W. A is the brother-in-law of P, who is the paternal aunt of S. H is the brother-in-law of W and son-in-law of V, who is the grandfather of S. Both V and H have only one son. B is the sister-in-law of P and doesn't have any siblings. B is the mother of T, who is the wife of J.

J addresses who among the following person as Father-in-law?

- A) H 
 B) A 
 C) V 
 D) W 
 E) S 

Explanation:

Answer: D

Q. 99

If in the given number "425479138", all the odd digits are decreased by one, and the other digits remain unchanged, and then all the digits are arranged in decreasing order from the left end, then what is the sum of the digits which are third from both ends?

A) 10 B) 14 C) 2 D) 8 E) 12 **Answer: D****4 2 5 4 7 9 1 3 8****4 2 4 4 6 8 0 2 8****8 8 6 4 4 4 2 2 0**

The third digit from both ends is 6 and 2

6+2=8**Explanation:**

Q. 100

If in the word "DISPUTABLE" all the vowels are changed to the immediate next letter and all the consonants are changed to the second succeeding letter, as per the English alphabetical series and then all the letters are arranged in alphabetical order from the left end, then which of the following letter is fifth to the left of the third consonant from the right end?

- A) N 
B) D 
C) V 
D) F 
E) U 

Answer: B

D I S P U T A B L E

F J U R V V B D N F

B D F F J N R U V V

The third consonant from the right end is R and then the fifth letter to the left of R is D.

Explanation:
