

Guidely IBPS PO Mock 15, August 15, 2026

English Language

Q. 1	In each of the following questions, a highlighted word is given and used in the three statements. You have to identify in which of the following statements the word is correctly used, and mark it as your answer. If all sentences are correct, choose option E as your answer. Exert 1. The athlete had to exert all his strength to lift the heavy weights during the competition. 2. The government plans to exert a new policy to improve economic growth in rural areas. 3. She continued to exert a positive influence on her students even after retirement. A) Only 1  B) Only 2  C) Only 3  D) Both 1 and 3  E) All are correct 
Explanation:	Answer: D Sentence 1: The word “exert” is correctly used to mean applying physical effort or strength, which is the standard usage of the word. Sentence 2: The word “exert” is incorrect. One does not “exert” a policy; policies are implemented, introduced, or enforced. A word like “implement” or “introduce” would be appropriate here. Sentence 3: The word “exert” is correctly used to indicate applying or bringing to bear a positive influence, which fits the proper meaning of the word. So, Sentences 1 and 3 use exert in a grammatically correct and contextually meaningful manner. Therefore, option d) Both 1 and 3 is the correct choice.

Q. 2

In each of the following questions, a highlighted word is given and used in the three statements. You have to identify in which of the following statements the word is correctly used, and mark it as your answer. If all sentences are correct, choose option E as your answer.

Proscribe

1. The doctor decided to proscribe antibiotics to treat the patient's severe infection.
2. She proscribed a detailed plan for the upcoming project to ensure its success.
3. The government decided to proscribe the use of certain harmful chemicals in consumer products.

- A) Only 1 
- B) Only 2 
- C) Only 3 
- D) Both 1 and 2 
- E) All are correct 

Answer: C

Sentence 1: The word "**proscribe**" is incorrect. It means to forbid or prohibit, whereas the sentence intends to convey recommending or ordering medication. The correct word here is "prescribe."

Sentence 2: The word "**proscribe**" is incorrect. It does not mean to recommend or outline a plan; it refers to banning or condemning something. A word like "prescribed" or "outlined" would be appropriate.

Sentence 3: The word "**proscribe**" is correctly used to mean officially forbidding or prohibiting the use of harmful chemicals, aligning with the word's standard definition.

So, Sentence 3 uses **proscribe** in a grammatically correct and contextually meaningful manner.

Therefore, option c) Only 3 is the correct choice.

Explanation:

Q. 3	A part of the sentence is highlighted. Four alternatives marked as (A), (B), (C) and (D) are given as substitutions for the highlighted part, one of which will improve the sentence. Choose the correct alternative. In case no improvement is needed, choose the option "No improvement required" i.e. (E). The team leader, who everyone thought were the strongest candidate, was surprisingly dropped from the final selection list. A) was the strongest candidate ✓ B) is the strongest candidate ✗ C) had been the strongest candidates ✗ D) would be the strongest candidate ✗ E) No improvement required ✗
Explanation:	Answer: A The structure here is: who [everyone thought] was... "Everyone thought" is an embedded reporting clause - it does not change the fact that "who" refers to "the team leader" - singular. So the verb must be singular: "was", not "were". Also, since "thought" is past, the embedded clause uses past tense "was" (backshift: is - was). "were the strongest candidate" - plural verb; "who" refers to singular "team leader" B) "is the strongest candidate" - present tense; fails backshift after "thought" C) "had been the strongest candidates" - plural "candidates"; singular subject; wrong D) "would be the strongest candidate" - conditional; wrong structure here A) "was the strongest candidate" - singular + past backshift; correct The team leader, who everyone thought was the strongest candidate, was surprisingly dropped.

Q. 4

A part of the sentence is highlighted. Four alternatives marked as (A), (B), (C) and (D) are given as substitutions for the highlighted part, one of which will improve the sentence. Choose the correct alternative. In case no improvement is needed, choose the option "No improvement required" i.e. (E).

He prevented his younger brother to make the same mistake that had cost him so dearly in his early career.

A) from to make

B) to making

C) against making

D) from making

E) No improvement required

Answer: D

The verb "prevent" always follows the pattern:
prevent + object + from + gerund (-ing)

It never takes a to-infinitive after the object.

"prevented him to make" - to-infinitive; wrong pattern after prevent

A) "from to make" - "from + infinitive" is wrong; needs gerund

B) "to making" - "to + gerund" is not standard

C) "against making" - "against" is not used after prevent

D) "from making" - prevent + from + gerund; the only correct pattern

Similar patterns: stop someone from doing / refrain from doing / keep someone from doing

Correct: He prevented his younger brother from making the same mistake...

Explanation:

Q. 5	In the following questions, a sentence is given with a blank in it. It is then followed by five alternatives among which, one of the words fits correctly in the given blank so as to make the sentence meaningful. Find out the most suitable word and mark it as your answer. The Finance Minister stated that the government would _____ additional funds to the health sector in the revised budget estimates to strengthen primary care infrastructure. A) divert  B) freeze  C) allocate  D) borrow  E) retain 
Explanation:	Answer: C a) divert - Incorrect. "Divert funds" means to redirect money away from its original purpose, often with a negative connotation. The sentence describes a positive budgetary move toward health, not a redirection away from something else. b) freeze - Incorrect. "Freeze funds" means to stop access to or movement of money. This is the opposite of what is described - the government is channelling more money, not stopping it. c) allocate - Correct. "Allocate funds" is the standard official and budgetary term meaning to set aside a specific amount of money for a particular purpose. It fits precisely with "revised budget estimates." d) borrow - Incorrect. "Borrow funds" means to take money on credit. While governments do borrow, the sentence is about directing funds to health infrastructure, not about the source of those funds. e) retain - Incorrect. "Retain funds" means to keep money in reserve or hold it back. This implies the funds stay where they are, whereas the sentence clearly indicates a fresh infusion into the health sector.

Q. 6	A part of the sentence is highlighted. Four alternatives marked as (A), (B), (C) and (D) are given as substitutions for the highlighted part, one of which will improve the sentence. Choose the correct alternative. In case no improvement is needed, choose the option "No improvement required" i.e. (E). The CEO reminded the employees that the annual bonus depends on the company's overall performance and individual KPIs for the year. A) depended  B) would depend  C) had depended  D) will depend  E) No improvement required 
Explanation:	Answer: E Normally, reported speech requires backshift after a past reporting verb ("reminded"). But there is a key exception: Exception: When the subordinate clause expresses a general truth, standing policy, or current fact, the present tense is retained. "The annual bonus depends on performance" is a standing company policy - it is true now and in the future, not just at the time of speaking. So the present tense "depends" is correctly retained. A) "depended" - past tense; implies the policy no longer applies B) "would depend" - conditional; weakens the policy statement unnecessarily C) "had depended" - past perfect; implies the policy ended before the meeting D) "will depend" - future; present simple is more natural for a standing policy E) No improvement - "depends" correctly expresses the standing company policy Correct: The CEO reminded the employees that the annual bonus depends on the company's overall performance...

Q. 7

In the given question, sentences are given in jumbled form. Rearrange them in proper order and answer the questions that follow.

Rearrange the following sentences to form a coherent paragraph:

A. For the first time in the history of the National Defence Academy, a batch of women cadets successfully completed their training and were commissioned as officers of the Indian Army.

B. The Indian Military Academy in Dehradun is one of India's most prestigious institutions for training officers of the Indian Army, and it recently witnessed a historic moment during its Passing Out Parade.

C. President Droupadi Murmu, who serves as the Supreme Commander of the Armed Forces, reviewed the parade and formally recognised the achievement of these pioneering women officers.

D. The commissioning of India's first NDA female batch marks a proud turning point in the country's military history and sends a strong message about equal opportunity and the changing face of national service.

E. This landmark event is seen as a significant step towards greater gender inclusion within the Indian armed forces, a journey that began when the Supreme Court opened the doors of the NDA to women in the year 2021.

Which of the following is the penultimate sentence after rearrangement?

A) B 

B) C 

C) D 

D) E 

E) A 

The paragraph discusses the historic commissioning of the first batch of women officers trained through the National Defence Academy (NDA), highlighting its significance for gender inclusion in the Indian armed forces.

The paragraph begins with **sentence B**, which introduces the setting-the Indian Military Academy-and mentions a historic moment during its Passing Out Parade. **Sentence A** follows by explaining what that historic moment was: the commissioning of the first batch of women NDA cadets as Army officers. **Sentence C** adds an important event associated with the ceremony, namely President **Droupadi Murmu** reviewing the parade and recognising the achievement. **Sentence E** then explains the broader significance of this milestone by linking it to the Supreme Court's 2021 decision allowing women to enter the NDA. Finally, **sentence D** concludes the passage by summarising the historic importance of the event and its message of equal opportunity.

Explanation:

So, the correct sequence is: B - A - C - E - D.

Answer: D

The penultimate sentence in a paragraph is the one that appears just before the last sentence and serves as a bridge or transition to the final point. In this sequence, Sentence E, "This landmark event is seen as a significant step towards greater gender inclusion within the Indian armed forces, a journey that began when the Supreme Court opened the doors of the NDA to women in the year 2021." is the penultimate sentence.

Q. 8

In the given question, sentences are given in jumbled form. Rearrange them in proper order and answer the questions that follow.

Rearrange the following sentences to form a coherent paragraph:

A. For the first time in the history of the National Defence Academy, a batch of women cadets successfully completed their training and were commissioned as officers of the Indian Army.

B. The Indian Military Academy in Dehradun is one of India's most prestigious institutions for training officers of the Indian Army, and it recently witnessed a historic moment during its Passing Out Parade.

C. President Droupadi Murmu, who serves as the Supreme Commander of the Armed Forces, reviewed the parade and formally recognised the achievement of these pioneering women officers.

D. The commissioning of India's first NDA female batch marks a proud turning point in the country's military history and sends a strong message about equal opportunity and the changing face of national service.

E. This landmark event is seen as a significant step towards greater gender inclusion within the Indian armed forces, a journey that began when the Supreme Court opened the doors of the NDA to women in the year 2021.

Which of the following is the second sentence after rearrangement?

A) B 

B) C 

C) D 

D) E 

E) A 

Explanation:

The paragraph discusses the historic commissioning of the first batch of women officers trained through the National Defence Academy (NDA), highlighting its significance for gender inclusion in the Indian armed forces.

The paragraph begins with **sentence B**, which introduces the setting-the Indian Military Academy-and mentions a historic moment during its Passing Out Parade. **Sentence A** follows by explaining what that historic moment was: the commissioning of the first batch of women NDA cadets as Army officers. **Sentence C** adds an important event associated with the ceremony, namely President **Droupadi Murmu** reviewing the parade and recognising the achievement. **Sentence E** then explains the broader significance of this milestone by linking it to the Supreme Court's 2021 decision allowing women to enter the NDA. Finally, **sentence D** concludes the passage by summarising the historic importance of the event and its message of equal opportunity.

So, the correct sequence is: B - A - C - E - D.

Answer: E

Sentence A, "For the first time in the history of the National Defence Academy, a batch of women cadets successfully completed their training and were commissioned as officers of the Indian Army." is the second sentence.

Q. 9

In the given question, sentences are given in jumbled form. Rearrange them in proper order and answer the questions that follow.

Rearrange the following sentences to form a coherent paragraph:

A. For the first time in the history of the National Defence Academy, a batch of women cadets successfully completed their training and were commissioned as officers of the Indian Army.

B. The Indian Military Academy in Dehradun is one of India's most prestigious institutions for training officers of the Indian Army, and it recently witnessed a historic moment during its Passing Out Parade.

C. President Droupadi Murmu, who serves as the Supreme Commander of the Armed Forces, reviewed the parade and formally recognised the achievement of these pioneering women officers.

D. The commissioning of India's first NDA female batch marks a proud turning point in the country's military history and sends a strong message about equal opportunity and the changing face of national service.

E. This landmark event is seen as a significant step towards greater gender inclusion within the Indian armed forces, a journey that began when the Supreme Court opened the doors of the NDA to women in the year 2021.

Which of the following is the hindmost statement after rearrangement?

A) B 

B) C 

C) D 

D) E 

E) A 

The paragraph discusses the historic commissioning of the first batch of women officers trained through the National Defence Academy (NDA), highlighting its significance for gender inclusion in the Indian armed forces.

The paragraph begins with **sentence B**, which introduces the setting-the Indian Military Academy-and mentions a historic moment during its Passing Out Parade. **Sentence A** follows by explaining what that historic moment was: the commissioning of the first batch of women NDA cadets as Army officers. **Sentence C** adds an important event associated with the ceremony, namely President **Droupadi Murmu** reviewing the parade and recognising the achievement. **Sentence E** then explains the broader significance of this milestone by linking it to the Supreme Court's 2021 decision allowing women to enter the NDA. Finally, **sentence D** concludes the passage by summarising the historic importance of the event and its message of equal opportunity.

Explanation:

So, the correct sequence is: B - A - C - E - D.

Answer: C

The hindmost statement, also known as the last sentence, is the final statement that concludes the paragraph. The hindmost or last sentence is Sentence D: The commissioning of India's first NDA female batch marks a proud turning point in the country's military history and sends a strong message about equal opportunity and the changing face of national service.

Q. 10

In the given question, sentences are given in jumbled form. Rearrange them in proper order and answer the questions that follow.

Rearrange the following sentences to form a coherent paragraph:

A. For the first time in the history of the National Defence Academy, a batch of women cadets successfully completed their training and were commissioned as officers of the Indian Army.

B. The Indian Military Academy in Dehradun is one of India's most prestigious institutions for training officers of the Indian Army, and it recently witnessed a historic moment during its Passing Out Parade.

C. President Droupadi Murmu, who serves as the Supreme Commander of the Armed Forces, reviewed the parade and formally recognised the achievement of these pioneering women officers.

D. The commissioning of India's first NDA female batch marks a proud turning point in the country's military history and sends a strong message about equal opportunity and the changing face of national service.

E. This landmark event is seen as a significant step towards greater gender inclusion within the Indian armed forces, a journey that began when the Supreme Court opened the doors of the NDA to women in the year 2021.

Which of the following is the introductory statement after rearrangement?

A) B 

B) C 

C) D 

D) E 

E) A 

Explanation:

The paragraph discusses the historic commissioning of the first batch of women officers trained through the National Defence Academy (NDA), highlighting its significance for gender inclusion in the Indian armed forces.

The paragraph begins with **sentence B**, which introduces the setting-the Indian Military Academy-and mentions a historic moment during its Passing Out Parade. **Sentence A** follows by explaining what that historic moment was: the commissioning of the first batch of women NDA cadets as Army officers. **Sentence C** adds an important event associated with the ceremony, namely President **Droupadi Murmu** reviewing the parade and recognising the achievement. **Sentence E** then explains the broader significance of this milestone by linking it to the Supreme Court's 2021 decision allowing women to enter the NDA. Finally, **sentence D** concludes the passage by summarising the historic importance of the event and its message of equal opportunity.

So, the correct sequence is: B - A - C - E - D.

Answer: A

The introductory statement after rearrangement is sentence B: "The Indian Military Academy in Dehradun is one of India's most prestigious institutions for training officers of the Indian Army, and it recently witnessed a historic moment during its Passing Out Parade."

Q. 11

In the given question, sentences are given in jumbled form. Rearrange them in proper order and answer the questions that follow.

Rearrange the following sentences to form a coherent paragraph:

A. For the first time in the history of the National Defence Academy, a batch of women cadets successfully completed their training and were commissioned as officers of the Indian Army.

B. The Indian Military Academy in Dehradun is one of India's most prestigious institutions for training officers of the Indian Army, and it recently witnessed a historic moment during its Passing Out Parade.

C. President Droupadi Murmu, who serves as the Supreme Commander of the Armed Forces, reviewed the parade and formally recognised the achievement of these pioneering women officers.

D. The commissioning of India's first NDA female batch marks a proud turning point in the country's military history and sends a strong message about equal opportunity and the changing face of national service.

E. This landmark event is seen as a significant step towards greater gender inclusion within the Indian armed forces, a journey that began when the Supreme Court opened the doors of the NDA to women in the year 2021.

Which of the following is the third statement after rearrangement?

A) A 

B) B 

C) C 

D) D 

E) E 

Explanation:

The paragraph discusses the historic commissioning of the first batch of women officers trained through the National Defence Academy (NDA), highlighting its significance for gender inclusion in the Indian armed forces.

The paragraph begins with **sentence B**, which introduces the setting-the Indian Military Academy-and mentions a historic moment during its Passing Out Parade. **Sentence A** follows by explaining what that historic moment was: the commissioning of the first batch of women NDA cadets as Army officers. **Sentence C** adds an important event associated with the ceremony, namely President **Droupadi Murmu** reviewing the parade and recognising the achievement. **Sentence E** then explains the broader significance of this milestone by linking it to the Supreme Court's 2021 decision allowing women to enter the NDA. Finally, **sentence D** concludes the passage by summarising the historic importance of the event and its message of equal opportunity.

So, the correct sequence is: B - A - C - E - D.

Answer: C

The third statement after rearrangement is sentence C: President Droupadi Murmu, who serves as the Supreme Commander of the Armed Forces, reviewed the parade and formally recognised the achievement of these pioneering women officers.

Q. 12

In each of the questions given below four words are given in bold. These words may or may not be in their correct position. Following each sentence four sequences are provided. Select the sequence of the words which will make the given sentence contextually and grammatically meaningful. If the words are correct at their current position, then choose option (e) as your answer.

Following the bilateral (A) discussions held on the sidelines of the summit, leaders from several evolving (B) nations emphasized the need for collective (C) action to address the participating (D) challenges affecting global trade and technological cooperation.

A) CBAD B) BACD C) ADCB D) BCAD E) No interchange required **Answer: C**

The correct sequence to make the sentence contextually and grammatically meaningful is: c) ADCB

So, the sentence will be: Following the **bilateral** discussions held on the sidelines of the summit, leaders from several **participating** nations emphasized the need for **collective** action to address the **evolving** challenges affecting global trade and technological cooperation.

In this sequence:

Explanation:

"A" comes first: "bilateral discussions" is a standard diplomatic phrase referring to talks between two parties.

"D" comes second: "participating nations" correctly describes the countries taking part in the summit.

"C" comes third: "collective action" is a common expression indicating joint efforts by multiple countries.

"B" comes last: "evolving challenges" appropriately describes challenges that are continuously changing and developing.

So, the correct sequence is indeed **"ADCB,"** where each word fits naturally in its position, making the sentence both grammatically correct and contextually meaningful.

Q. 13

In each of the questions given below four words are given in bold. These words may or may not be in their correct position. Following each sentence four sequences are provided. Select the sequence of the words which will make the given sentence contextually and grammatically meaningful. If the words are correct at their current position, then choose option (e) as your answer.

While economists acknowledged the cautious (A) pressure on household budgets, policymakers remained persistent (B) about introducing fresh stimulus measures, citing uncertain (C) global conditions and the gradual (D) recovery of domestic demand.

A) ADCB B) BACD C) BADC D) CADB E) No interchange required **Answer: B**

The correct sequence to make the sentence contextually and grammatically meaningful is: b) BACD

So, the sentence will be: While economists acknowledged the **persistent** pressure on household budgets, policymakers remained **cautious** about introducing fresh stimulus measures, citing **uncertain** global conditions and the **gradual** recovery of domestic demand.

In this sequence:

Explanation:

"B" comes first: "persistent pressure" is a natural collocation, indicating pressure that continues over time.

"A" comes second: "cautious" appropriately describes the policymakers' attitude toward introducing new stimulus measures.

"C" comes third: "uncertain global conditions" is a common phrase referring to unpredictable international economic circumstances.

"D" comes last: "gradual recovery" correctly describes a slow and steady improvement in domestic demand.

So, the correct sequence is indeed **"BACD,"** where each word fits naturally in its position, making the sentence both grammatically correct and contextually meaningful.

Q. 14

In the following questions, a sentence is given with a blank in it. It is then followed by five alternatives among which, one of the words fits correctly in the given blank so as to make the sentence meaningful. Find out the most suitable word and mark it as your answer.

India's current account deficit is expected to remain _____ in the coming quarters, supported by robust services exports and steady remittance inflows.

A) elevated

B) manageable

C) volatile

D) ambiguous

E) widening

**Answer: B**

The correct answer is b) manageable

a) elevated - Incorrect. "Elevated" means higher than normal or at a raised level, implying a problem. This contradicts the second half of the sentence, which gives positive supporting factors like strong services exports and remittances.

b) manageable - Correct. "Manageable" means within controllable limits and not a cause for concern. It is the most fitting word given that the sentence attributes stability to positive economic factors - a typical economic commentary phrasing.

c) volatile - Incorrect. "Volatile" means unpredictable or subject to rapid change. The second half of the sentence indicates a stable, positive outlook, which is inconsistent with volatility.

d) ambiguous - Incorrect. "Ambiguous" means unclear or open to different interpretations. A current account deficit cannot be "ambiguous" in the economic sense - it is a measured figure, not an unclear concept.

e) widening - Incorrect. "Widening" means increasing or growing larger. This would imply the deficit is getting worse, which again contradicts the supportive factors mentioned in the sentence.

Explanation:

Q. 15

A part of the sentence is highlighted. Four alternatives marked as (A), (B), (C) and (D) are given as substitutions for the highlighted part, one of which will improve the sentence. Choose the correct alternative. In case no improvement is needed, choose the option "No improvement required" i.e. (E).

Mr. Sharma, along with his two colleagues, were awarded the prestigious national research grant for their groundbreaking work.

A) were being awarded

B) have been awarded

C) was awarded

D) had being awarded

E) No improvement required

Answer: C

The subject of the sentence is "Mr. Sharma", which is singular, so the verb should also be singular (was instead of were).

The phrase "along with his two colleagues" is additional information and does not affect the subject-verb agreement.

The correct structure is: Singular subject + along with + additional phrase + singular verb.

Hence, the corrected sentence is: "Mr. Sharma, along with his two colleagues, was awarded the prestigious national research grant for their groundbreaking work."

Explanation:

Other options are incorrect:

A) Incorrect: "were being awarded" changes the meaning to an ongoing action and does not match the sentence structure.

B) Incorrect: "have been awarded" Changes the tense from simple past to present perfect.

D) Incorrect: "had being awarded" is grammatically incorrect; the correct form would be had been awarded.

E) Incorrect: The original sentence has a subject-verb agreement error (were → was).

Q. 16

Given below are a few questions with three sentences in each of them which may or may not contain errors in them. You have to find the sentence which has or have no error/s in them and mark your answers accordingly. If none of the sentences are correct then choose option E as your answer.

A. Successful companies invest heavily into employee training to boost productivity, morale, and long-term retention rates.

B. A compelling brand story connects emotionally with customers, turning casual buyers into loyal, lifelong advocates.

C. Diversifying your investment portfolio helps reducing risk while steadily building wealth over several decades.

A) Only A 

B) Only B 

C) Both A and B 

D) Both A and C 

E) All errors 

Answer: B

A. Successful companies invest heavily into employee training to boost productivity, morale, and long-term retention rates.

Error: The preposition "into" is incorrect after invest.

Correct: Successful companies invest heavily in employee training to boost productivity, morale, and long-term retention rates.

B. A compelling brand story connects emotionally with customers, turning casual buyers into loyal, lifelong advocates.

No error.

"Connects emotionally with customers" is correct.

"Turning casual buyers into loyal, lifelong advocates" is grammatically and logically appropriate.

C. Diversifying your investment portfolio helps reducing risk while steadily building wealth over several decades.

Error: After helps, the base form of the verb is preferred.

Correct: Diversifying your investment portfolio helps reduce risk while steadily building wealth over several decades.

Explanation:

Q. 17

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

What was India's GDP growth rate in the January–March 2026 quarter, and how did it compare to market expectations?

A) 8 per cent, which was exactly in line with market expectations.

B) 7.2 per cent, which fell below market expectations of 7.8 per cent.

C) 7.7 per cent, which was slightly below the market expectation of 8 per cent.

D) 7.8 per cent, which was comfortably above the market expectation of 7.2 per cent.

E) 6.9 per cent, which was well below the market expectation of 7.8 per cent.

Explanation:

Answer: D

a) Incorrect. 8 per cent was the growth rate of the preceding quarter (October–December 2025), not January–March 2026. Market expectations were 7.2 per cent, not 8 per cent.

b) Incorrect. This reverses the numbers. 7.2 per cent was the market expectation, not the actual growth figure. Actual growth of 7.8 per cent beat, not missed, expectations.

c) Incorrect. 7.7 per cent is the full-year FY26 growth figure, not the January–March quarterly figure. The passage clearly distinguishes between the two.

d) Correct. The passage states: 'GDP growth came in at 7.8 per cent...comfortably above market expectations of 7.2 per cent' - directly matching this option.

e) Incorrect. 6.9 per cent is the RBI's earlier GDP forecast for FY2026-27, which was later revised downward. It has nothing to do with the January–March 2026 quarterly figure.

Q. 18

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

The author describes the RBI as 'navigating a tightrope.' What does this suggest about the RBI's situation?

A) The RBI is performing exceptionally well by maintaining both growth and low inflation simultaneously.

B) The RBI is in a difficult position - freezing rates while also cutting its own growth forecast signals caution without clear direction. ✓

C) The RBI is planning to raise interest rates sharply in its next meeting to control inflation. ✗

D) The RBI has lost credibility among investors by making too many policy changes in a short time. ✗

E) The RBI is following an aggressive monetary policy to attract more foreign investment into India. ✗

Answer: B

Explanation:

a) Incorrect. The passage does not present the RBI's position as a success. The 'tightrope' metaphor conveys difficulty and uncertainty, not exceptional performance.

b) Correct. The author states: 'A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope.' This means the RBI is caught between conflicting signals - unable to cut rates (due to inflation risk) yet acknowledging slower growth ahead.

c) Incorrect. The passage says the RBI held rates steady for the third consecutive meeting - there is no mention of a planned sharp rate hike.

d) Incorrect. The passage does not accuse the RBI of making too many policy changes or losing credibility through frequent reversals.

e) Incorrect. The RBI's stance is described as 'neutral' - not aggressive. Aggressive monetary policy would imply sharp rate movements, which contradicts the 'steady rate' decision described.

Q. 19

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

According to the passage, what has happened to India's inflation projection for the current fiscal year?

A) It has fallen from 5.1 per cent to 4.6 per cent, reflecting improved supply conditions. 

B) It has remained unchanged at 4.6 per cent despite global pressures. 

C) It has risen significantly from an earlier estimate of 4.6 per cent to a projected 5.1 per cent.

D) It has crossed 6 per cent, triggering emergency measures by the RBI.

E) It has been revised downward to 4.1 per cent due to falling global commodity prices.

Explanation:

Answer: C

a) Incorrect. This reverses the direction of revision. The passage clearly states inflation has gone UP from 4.6 per cent to 5.1 per cent - not fallen.

b) Incorrect. The passage explicitly states the projection has changed - it is 'up significantly from an earlier estimate of 4.6 per cent', ruling out an unchanged figure.

c) Correct. The passage directly states: 'Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent.'

d) Incorrect. The projected inflation is 5.1 per cent - not above 6 per cent. Emergency measures mentioned in the passage are related to capital outflows and the rupee, not inflation crossing 6 per cent.

e) Incorrect. There is no mention of inflation being revised downward to 4.1 per cent. The trend described in the passage is upward, not downward.

Q. 20

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

Which of the following is cited in the passage as evidence of pressure on the Indian rupee?

A) The RBI raised the repo rate three consecutive times, tightening liquidity in the system.

B) India's trade deficit widened sharply due to record gold and electronics imports.

C) Foreign investors sold over \$20 billion in Indian shares, making the rupee one of Asia's worst-performing currencies in 2026.

D) The government announced a large spending package that increased the fiscal deficit beyond acceptable limits.

E) The West Asia conflict directly cut off India's export revenues from Gulf countries.

Explanation:

Answer: C

a) Incorrect. The RBI held rates steady - it did not raise them three times. Liquidity tightening through rate hikes is not what the passage describes.

b) Incorrect. Trade deficits from gold and electronics imports are not mentioned in the passage. The rupee pressure is linked to equity market outflows, not import bills.

c) Correct. The passage directly states: 'Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026.'

d) Incorrect. No large government spending package is announced in the passage. In fact, fiscal discipline is recommended precisely to avoid this scenario.

e) Incorrect. The West Asia conflict is mentioned in the context of rising energy costs and global uncertainty - not as a direct cut-off of India's export revenues from Gulf countries.

Q. 21

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

The passage mentions that agriculture grew at only 3.6 per cent. Why does the author consider this a concern?

A) Because agriculture is India's largest contributor to GDP and its slow growth will drag down overall numbers.

B) Because agriculture still employs nearly half the workforce, and its slow growth means rural incomes and inclusive development are being left behind.

C) Because farm exports are India's primary source of foreign exchange, and slow agricultural growth worsens the rupee problem.

D) Because slow agricultural growth signals poor monsoon performance, which will affect food inflation directly.

E) Because most of India's FDI inflows are directed at the agriculture sector, and slow growth will reduce investor interest.

Answer: B

Explanation:

a) Incorrect. The passage does not say agriculture is the largest GDP contributor - services, manufacturing, and construction drove the recent surge. The concern is about employment and inclusion, not GDP share.

b) Correct. The passage states: 'agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities.'

c) Incorrect. Farm exports as a primary source of forex is not mentioned in the passage. The rupee pressure is linked to equity outflows, not agricultural export performance.

d) Incorrect. Monsoon performance is not mentioned anywhere in the passage. The concern about agriculture is framed in terms of workforce employment and inclusive growth, not weather patterns.

e) Incorrect. FDI into agriculture is not discussed in the passage. No connection between agricultural growth and FDI inflows is made.

Q. 22

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

According to the passage, why should India avoid large fiscal deficit overruns at this time?

A) Because the IMF has warned India that deficit overruns will lead to a credit rating downgrade.

B) Because deficit overruns would further unsettle foreign investors and weaken the rupee, which is already under pressure.

C) Because the government has already spent its full budget allocation and has no room for additional spending.

D) Because high deficits will automatically trigger RBI rate hikes, raising borrowing costs for businesses.

E) Because India's Constitution limits the fiscal deficit to a fixed percentage and any overrun is illegal.

Explanation:

Answer: B

a) Incorrect. The IMF and credit ratings are not mentioned anywhere in the passage. The concern about deficits is framed in terms of investor confidence and the rupee.

b) Correct. The passage states: 'deficit overruns would further spook foreign investors and weaken the rupee' - directly supporting this option, especially in the context of already fragile investor sentiment and rupee pressure.

c) Incorrect. No mention is made of the government exhausting its budget. The passage warns against the temptation to overspend, not that spending capacity has already been used up.

d) Incorrect. The passage does not suggest that deficit overruns will automatically trigger RBI rate hikes. The RBI's rate decisions are discussed separately from fiscal policy.

e) Incorrect. Constitutional limits on fiscal deficit are not mentioned in the passage. The argument for fiscal discipline is economic and investor-related, not legal.

Q. 23

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

Choose the option that is closest in meaning to the word 'stellar' as used in the passage.

A) ordinary and unremarkable

B) outstanding and impressive

C) flawed and troubled

D) modest and adequate

E) negligible and weak

Explanation:

Answer: B

'Stellar' means exceptionally good, brilliant, or impressive — as used in the passage to describe India's strong GDP performance. Option (b) directly captures this meaning. The remaining options — ordinary, flawed, modest, negligible — all suggest mediocrity or weakness, which is the opposite of what 'stellar' conveys.

Q. 24

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

Choose the option that is most opposite in meaning to the word 'conducive' as used in the passage.

A) favourable and helpful

B) beneficial and supportive

C) unfavourable and hostile

D) encouraging and positive

E) advantageous and useful

Explanation:

Answer: C

'Conducive' means helping to bring about a favourable condition or result — here, keeping borrowing costs conducive to investment means keeping conditions favourable for investment to happen. Its opposite would be something that hinders or works against that outcome, which is exactly what (c) describes. Options (a), (b), (d), and (e) are all synonyms of 'conducive', not antonyms.

Q. 25

Read the following passage carefully and answer the questions that follow:

India's economy delivered a **stellar** performance in the January-March quarter of 2026. GDP growth came in at 7.8 per cent, easing slightly from 8 per cent in the preceding quarter but comfortably above market expectations of 7.2 per cent, taking full-year FY26 growth to 7.7 per cent. Prime Minister Modi has every reason to proclaim India the world's fastest-growing major economy. The number is real. The achievement is genuine. But a number, however impressive, is not the full story. Look past the headline, and the stress fractures become visible. Begin with the central bank.

The Reserve Bank of India held its repo rate steady at 5.25 per cent for the third consecutive meeting in June, maintaining a neutral stance even as it cut its GDP growth forecast for FY2026-27 sharply to 6.6 per cent from an earlier 6.9 per cent. A central bank that simultaneously freezes rates and slashes its own growth projection is not a central bank radiating confidence. It is one navigating a tightrope. Inflation is now projected to average 5.1 per cent for the current fiscal year, up significantly from an earlier estimate of 4.6 per cent. The "rare Goldilocks" era that RBI Governor Malhotra celebrated just months ago has quietly given way to stagflationary risk. Then there is the rupee downslide.

Foreign investors have offloaded over \$20 billion in Indian shares so far this year, placing the rupee under severe pressure and making it one of Asia's worst-performing major currencies in 2026. A sliding currency is more than a financial statistic - it is a barometer of confidence, and right now that barometer is falling. Capital outflows of \$13.7 billion from the equity segment alone since January have prompted the RBI to roll out emergency measures to attract foreign capital.

The global backdrop adds further complexity. Economists have cautioned that growth is likely to moderate this year amid rising energy costs and global uncertainty linked to the West Asia conflict. India's ability to source affordable energy has been disrupted, and the RBI's own revised growth trajectory for FY27 ranges between 6.3 per cent and 6.8 per cent across quarters - a step down from FY26's pace. What should India do to keep the momentum alive? Three imperatives stand out. First, protect the rupee without choking growth.

The RBI must strike a balance between currency stability and keeping borrowing costs **conducive** to investment. Deepening forex reserves, encouraging long-term capital inflows and reducing oil import dependence are the sustainable answers. Second, broaden the base of growth. While services, manufacturing and construction have driven the recent surge, agriculture grew just 3.6 per cent - a sector that still employs nearly half the workforce. Inclusive growth demands that rural incomes rise, farm productivity improves and the benefits of the services boom reach beyond Tier-1 cities. Third, stay fiscally disciplined. The temptation to spend India's way through global headwinds is understandable, but deficit overruns would further spook foreign investors and weaken the rupee. The economy needs not just celebration, but honest diagnosis. The numbers are strong. The foundations need tending.

What is the central theme of the passage?

A) India's GDP growth of 7.8% proves it is the strongest economy in the world with no underlying risks.

B) The RBI's decision to hold the repo rate is damaging India's economic growth prospects.

C) India's strong GDP performance is real but masks serious underlying concerns including rupee pressure, inflation risk, and uneven growth that require honest policy attention.

D) Foreign investors are permanently leaving India's markets due to political instability.

E) Agriculture is the most important sector India must focus on to sustain its economic growth.

Answer: C

Explanation:

a) Incorrect. The passage explicitly says 'a number, however impressive, is not the full story' and goes on to list stress fractures - ruling out any claim that there are no underlying risks.

b) Incorrect. The RBI's rate decision is one concern discussed, but the passage does not frame it as the cause of growth damage. The passage calls for balancing rate decisions, not criticising them outright.

c) Correct. The passage opens by acknowledging the genuine GDP achievement and then systematically unpacks the hidden stresses - RBI's downgraded forecasts, inflation risk, rupee slide, foreign outflows, and uneven sectoral growth - before offering three policy imperatives. This dual acknowledgement of strength and fragility is the central theme.

d) Incorrect. Foreign investors are selling Indian shares due to market pressures, but the passage presents this as a current challenge, not a permanent or politically driven exit.

e) Incorrect. Agriculture's slow growth is cited as one concern within the 'broaden the base' imperative, but it is a supporting detail - not the central theme of the passage.

Q. 26	In the following questions, a sentence is given with a blank in it. It is then followed by five alternatives among which, one of the words fits correctly in the given blank so as to make the sentence meaningful. Find out the most suitable word and mark it as your answer. The Supreme Court observed that the state government had failed to ____ with the earlier order directing immediate relief to flood-affected families in the region. A) interfere  B) comply  C) negotiate  D) proceed  E) engage 
Explanation:	Answer: B a) interfere - Incorrect. "Interfere with an order" means to obstruct or meddle with it, not to follow it. The sentence is about the government's failure to act on the court's directions, not about obstructing them. b) comply - Correct. "Comply with an order" is the precise legal and judicial phrase meaning to act in accordance with a directive. The Supreme Court's language in such contexts almost always uses "comply with." c) negotiate - Incorrect. "Negotiate with an order" is not a standard collocation. Court orders are not negotiated - they are either followed or challenged. This option misunderstands the judicial process. d) proceed - Incorrect. "Proceed with an order" might seem plausible but is not the standard term in legal usage. Moreover, it does not capture the obligation to carry out what was directed. e) engage - Incorrect. "Engage with an order" is informal and vague. In legal context, engagement does not mean implementation. The sentence needs a word that signals full execution of the court's directive.

Q. 27

Given below are a few questions with three sentences in each of them which may or may not contain errors in them. You have to find the sentence which has or have no error/s in them and mark your answers accordingly. If none of the sentences are correct then choose option E as your answer.

A. Consistency matters more than intensity when building sustainable habits that supports long-term physical health.

B. Networking genuinely, rather than transactionally, often opens unexpected doors throughout one's entire professional career

C. A strange letter arrived at midnight, containing clues to a secret no one dared uncover.

A) Only A 

B) Only B 

C) Both A and B 

D) Both B and C 

E) All errors 

Answer: D

A. Consistency matters more than intensity when building sustainable habits that supports long-term physical health.

Error: The subject "habits" is plural, so the verb should be plural.

Correct: Consistency matters more than intensity when building sustainable habits that support long-term physical health.

B. Networking genuinely, rather than transactionally, often opens unexpected doors throughout one's entire professional career.

No error.

The sentence is grammatically correct.

"Networking genuinely" and "throughout one's entire professional career" are appropriately used.

C. A strange letter arrived at midnight, containing clues to a secret no one dared uncover.

No error.

The sentence is grammatically correct.

The participial phrase "containing clues..." correctly modifies "letter."

Explanation:

Q. 28

Given below are a few questions with three sentences in each of them which may or may not contain errors in them. You have to find the sentence which has or have no error/s in them and mark your answers accordingly. If none of the sentences are correct then choose option E as your answer.

A. Organizations must regularly update their security protocols to defend against increasingly sophisticated cyberattacks worldwide.

B. Home prices in growing suburban neighborhoods continue rising as much families seek larger, affordable spaces.

C. Raising confident children requires patience, consistent boundaries, and unconditional love through even the hardest days.

A) Only A

B) Only B

C) Both A and C

D) Both B and C

E) All errors

Answer: C

A. Organizations must regularly update their security protocols to defend against increasingly sophisticated cyberattacks worldwide.

No error.

The sentence is grammatically correct.

"Update their security protocols" and "defend against cyberattacks" are appropriately used.

B. Home prices in growing suburban neighborhoods continue rising as much families seek larger, affordable spaces.

Explanation:

Error: The phrase "as much families" is incorrect.

Much is used with uncountable nouns, whereas families is a countable plural noun.

Correct: Home prices in growing suburban neighborhoods continue rising as more families seek larger, affordable spaces.

C. Raising confident children requires patience, consistent boundaries, and unconditional love through even the hardest days.

No error.

The subject "Raising confident children" correctly takes the singular verb "requires."

The sentence is grammatically sound.

Q. 29	In each of the following questions, an idiom is given. Choose the option that best expresses the meaning of the idiom. A wild goose chase A) A highly profitable hunting expedition. ✗ B) A foolish and hopeless search for something unattainable. ✓ C) A strategic planning session for expansion. ✗ D) An athletic competition requiring great stamina. ✗ E) A well-organized collective effort to solve a crisis. ✗
Explanation:	Answer: B (a) Hunting expedition: Incorrect. This is a literalist fallacy, treating the metaphorical pursuit of an animal as an actual event. (b) Foolish/hopeless search (Correct): Correct. It describes a pursuit or task that is entirely futile because the objective either does not exist or cannot be achieved. (c) Strategic planning: Incorrect. This is a semantic contradiction, as the idiom implies a complete lack of structure and viability. (d) Athletic competition: Incorrect. This is a contextual misattribution, confusing physical exertion with futility. (e) Collective effort: Incorrect. This represents the antonym of the idiom's chaotic and unsuccessful connotation.

Q. 30	In each of the following questions, an idiom is given. Choose the option that best expresses the meaning of the idiom. To face the music A) To attend a concert or musical performance.  B) To express an artistic or creative opinion openly.  C) To accept the unpleasant consequences of one's actions.  D) To dismiss a serious problem with a cheerful attitude.  E) To undergo formal training in communication skills. 
Explanation:	Answer: C (a) Attend a concert: Incorrect. This is a denotative error that interprets "music" literally rather than symbolically. (b) Express artistic opinion: Incorrect. This is a domain error, restricting the phrase to the creative arts. (c) Accept unpleasant consequences (Correct): Correct. It signifies confronting criticism, punishment, or retribution for a past mistake or failure. (d) Dismiss a problem: Incorrect. This describes a state of denial or forced optimism, which is the opposite of facing accountability. (e) Formal training: Incorrect. This is an irrelevant distractor with no semantic connection to the idiom.

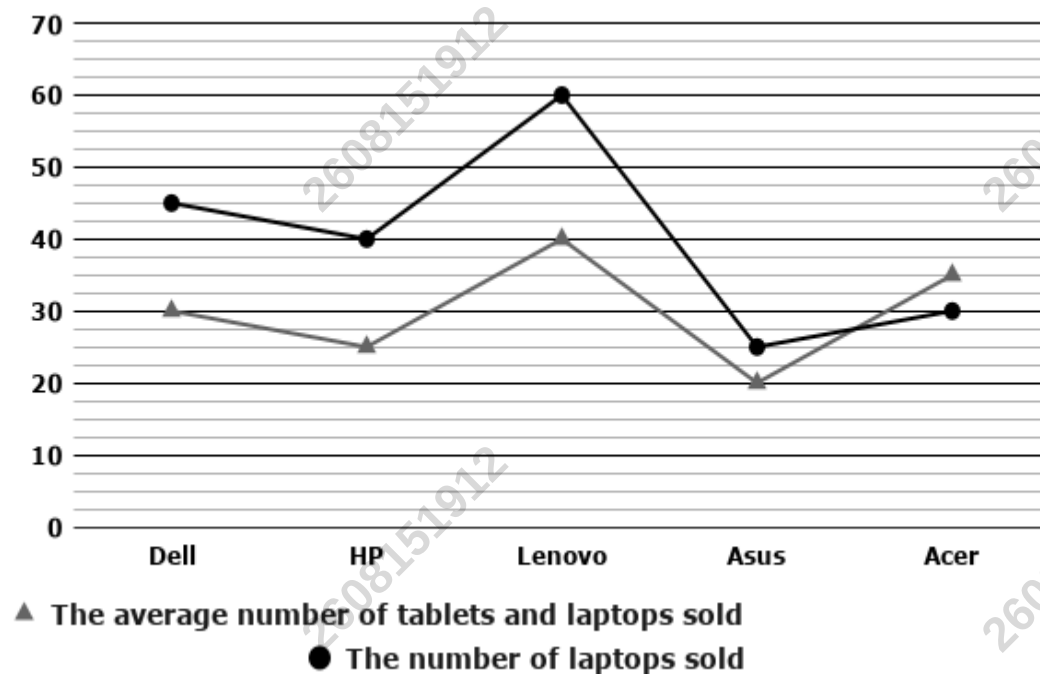

Quantitative Aptitude

Q. 31

Study the following information carefully and answer the questions given below.

The given line graph shows the average number of tablets and laptops sold by five companies namely Dell, HP, Lenovo, Asus, and Acer along with the number of laptops sold by each company.

Note: The total number of electronic items sold = The number of tablets sold + The number of laptops sold.

Find the ratio of the total number of tablets sold by Lenovo and Asus together to the total number of laptops sold by Dell and HP together.

- A) 8 : 3 ✗
B) 12 : 7 ✗
C) 6 : 5 ✗
D) 7 : 17 ✓
E) 12 : 5 ✗

Dell:

The total number of electronic items sold by Dell = $30 \times 2 = 60$

The number of laptops sold by Dell = 45

The number of tablets sold by Dell = $60 - 45 = 15$

HP:

The total number of electronic items sold by HP = $25 \times 2 = 50$

The number of laptops sold by HP = 40

The number of tablets sold by HP = $50 - 40 = 10$

Lenovo:

The total number of electronic items sold by Lenovo = $40 \times 2 = 80$

The number of laptops sold by Lenovo = 60

The number of tablets sold by Lenovo = $80 - 60 = 20$

Asus:

The total number of electronic items sold by Asus = $20 \times 2 = 40$

The number of laptops sold by Asus = 25

The number of tablets sold by Asus = $40 - 25 = 15$

Explanation:**Acer:**

The total number of electronic items sold by Acer = $35 \times 2 = 70$

The number of laptops sold by Acer = 30

The number of tablets sold by Acer = $70 - 30 = 40$

Company	The number of laptops sold	The number of tablets sold	The total number of electronic items sold
Dell	45	15	60
HP	40	10	50
Lenovo	60	20	80
Asus	25	15	40
Acer	30	40	70

Answer: D

The total number of tablets sold by Lenovo and Asus together = $20 + 15 = 35$

The total number of laptops sold by Dell and HP together = $45 + 40 = 85$

The required ratio = $35 : 85 = 7 : 17$

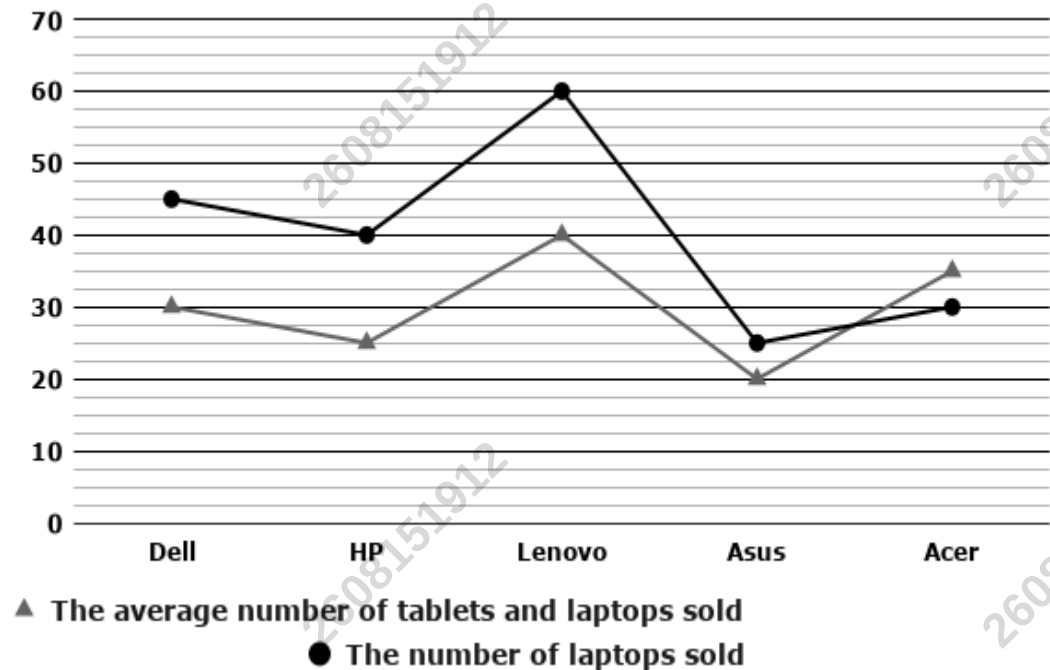

Hence, the correct answer is option D.

Q. 32

Study the following information carefully and answer the questions given below.

The given line graph shows the average number of tablets and laptops sold by five companies namely Dell, HP, Lenovo, Asus, and Acer along with the number of laptops sold by each company.

Note: The total number of electronic items sold = The number of tablets sold + The number of laptops sold.

If the average number of total electronic items sold by Dell, Lenovo and Samsung is 65, and the ratio of the number of laptops to tablets sold by Samsung is 3 : 2 respectively, find the total number of tablets sold by Asus and Samsung together.

- A) 37 ✓
- B) 41 ✗
- C) 28 ✗
- D) 35 ✗
- E) 46 ✗

Explanation:**Dell:**

The total number of electronic items sold by Dell = $30 * 2 = 60$

The number of laptops sold by Dell = 45

The number of tablets sold by Dell = $60 - 45 = 15$

HP:

The total number of electronic items sold by HP = $25 * 2 = 50$

The number of laptops sold by HP = 40

The number of tablets sold by HP = $50 - 40 = 10$

Lenovo:

The total number of electronic items sold by Lenovo = $40 * 2 = 80$

The number of laptops sold by Lenovo = 60

The number of tablets sold by Lenovo = $80 - 60 = 20$

Asus:

The total number of electronic items sold by Asus = $20 * 2 = 40$

The number of laptops sold by Asus = 25

The number of tablets sold by Asus = $40 - 25 = 15$

Acer:

The total number of electronic items sold by Acer = $35 * 2 = 70$

The number of laptops sold by Acer = 30

The number of tablets sold by Acer = $70 - 30 = 40$

Company	The number of laptops sold	The number of tablets sold	The total number of electronic items sold
Dell	45	15	60
HP	40	10	50
Lenovo	60	20	80
Asus	25	15	40
Acer	30	40	70

Answer: A

The total number of electronic items sold by Dell, Lenovo and Samsung = $65 * 3 = 195$

The total number of electronic items sold by Samsung = $195 - (60 + 80) = 55$

The number of tablets sold by Samsung = $55 * 2/5 = 22$

The number of tablets sold by Asus = 15

The required answer = $22 + 15 = 37$

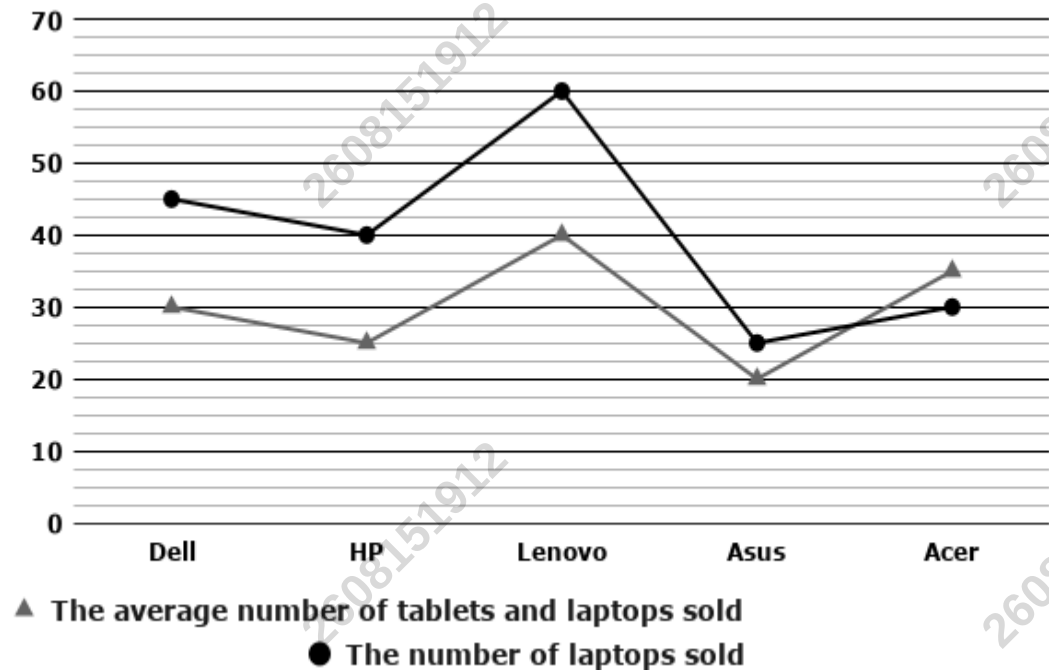

Hence, the correct answer is option A.

Q. 33

Study the following information carefully and answer the questions given below.

The given line graph shows the average number of tablets and laptops sold by five companies namely Dell, HP, Lenovo, Asus, and Acer along with the number of laptops sold by each company.

Note: The total number of electronic items sold = The number of tablets sold + The number of laptops sold.

Out of the total laptops sold by Dell and HP together 40% were defective and the remaining laptops sold by these two companies are non-defective. Out of the total tablets sold by Lenovo and Acer together 25% were defective and the remaining tablets sold by these two companies are non-defective. What is the ratio of the number of non-defective laptops (Dell + HP) to non-defective tablets (Lenovo + Acer)?

- A) 7 : 15 ☒
- B) 12 : 7 ☒
- C) 7 : 8 ☒
- D) 15 : 11 ☒
- E) 17 : 15 ☒

Explanation:**Dell:**

The total number of electronic items sold by Dell = $30 \times 2 = 60$

The number of laptops sold by Dell = 45

The number of tablets sold by Dell = $60 - 45 = 15$

HP:

The total number of electronic items sold by HP = $25 \times 2 = 50$

The number of laptops sold by HP = 40

The number of tablets sold by HP = $50 - 40 = 10$

Lenovo:

The total number of electronic items sold by Lenovo = $40 \times 2 = 80$

The number of laptops sold by Lenovo = 60

The number of tablets sold by Lenovo = $80 - 60 = 20$

Asus:

The total number of electronic items sold by Asus = $20 \times 2 = 40$

The number of laptops sold by Asus = 25

The number of tablets sold by Asus = $40 - 25 = 15$

Acer:

The total number of electronic items sold by Acer = $35 \times 2 = 70$

The number of laptops sold by Acer = 30

The number of tablets sold by Acer = $70 - 30 = 40$

Company	The number of laptops sold	The number of tablets sold	The total number of electronic items sold
Dell	45	15	60
HP	40	10	50
Lenovo	60	20	80
Asus	25	15	40
Acer	30	40	70

Answer: E

The total number of laptops sold by Dell and HP together = $45 + 40 = 85$

The number of non-defective laptops sold by Dell and HP together = $85 \times 60\% = 51$

The total number of tablets sold by Lenovo and Acer = $20 + 40 = 60$

The number of non-defective tablets sold by Lenovo and Acer = $60 \times 75\% = 45$

The required ratio = $51 : 45 = 17 : 15$

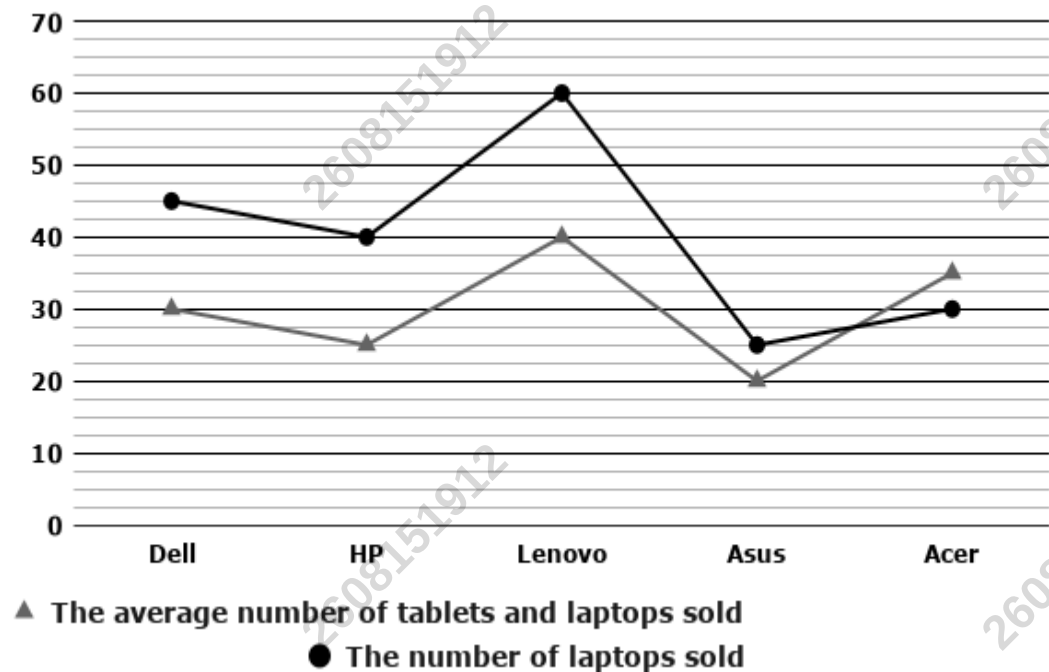

Hence, the correct answer is option E.

Q. 34

Study the following information carefully and answer the questions given below.

The given line graph shows the average number of tablets and laptops sold by five companies namely Dell, HP, Lenovo, Asus, and Acer along with the number of laptops sold by each company.

Note: The total number of electronic items sold = The number of tablets sold + The number of laptops sold.

The total number of laptops sold by Asus and Acer together is what percentage more or less than the number of tablets sold by HP?

- A) 320% more ☒
- B) 200% less ☒
- C) 450% more ☒
- D) 450% less ☒
- E) 300% more ☒

Dell:

The total number of electronic items sold by Dell = $30 * 2 = 60$

The number of laptops sold by Dell = 45

The number of tablets sold by Dell = $60 - 45 = 15$

HP:

The total number of electronic items sold by HP = $25 * 2 = 50$

The number of laptops sold by HP = 40

The number of tablets sold by HP = $50 - 40 = 10$

Lenovo:

The total number of electronic items sold by Lenovo = $40 * 2 = 80$

The number of laptops sold by Lenovo = 60

The number of tablets sold by Lenovo = $80 - 60 = 20$

Asus:

The total number of electronic items sold by Asus = $20 * 2 = 40$

The number of laptops sold by Asus = 25

The number of tablets sold by Asus = $40 - 25 = 15$

Acer:

The total number of electronic items sold by Acer = $35 * 2 = 70$

The number of laptops sold by Acer = 30

The number of tablets sold by Acer = $70 - 30 = 40$

Explanation:

Company	The number of laptops sold	The number of tablets sold	The total number of electronic items sold
Dell	45	15	60
HP	40	10	50
Lenovo	60	20	80
Asus	25	15	40
Acer	30	40	70

Answer: C

The total number of laptops sold by Asus and Acer together = $25 + 30 = 55$

The number of tablets sold by HP = 10

The required percentage = $(55 - 10) * 100/10 = 450\%$ more

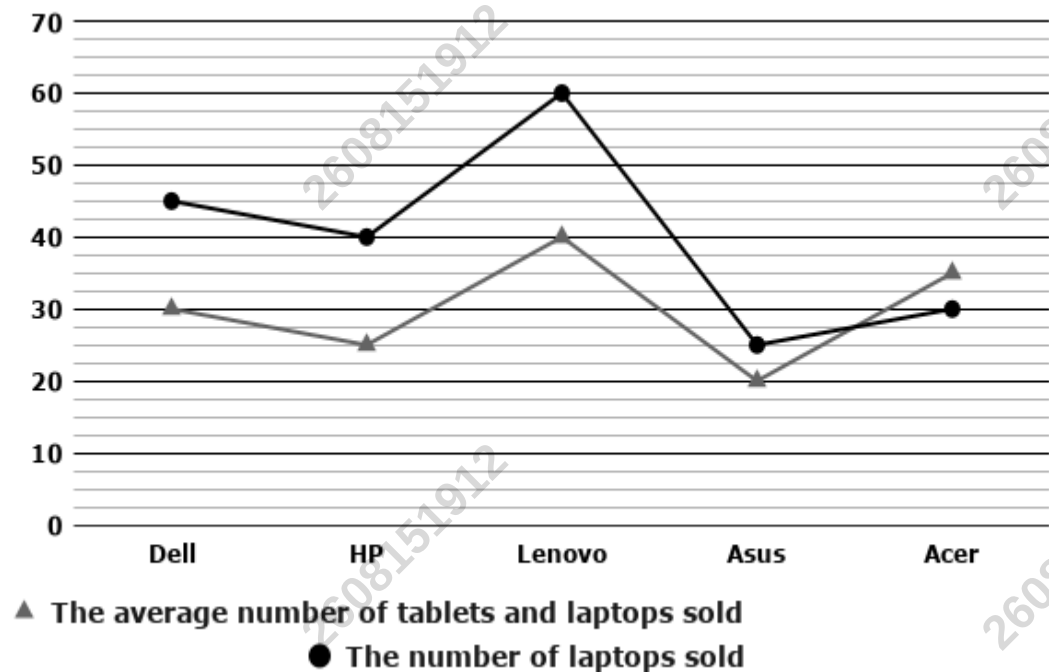

Hence, the correct answer is option C.

Q. 35

Study the following information carefully and answer the questions given below.

The given line graph shows the average number of tablets and laptops sold by five companies namely Dell, HP, Lenovo, Asus, and Acer along with the number of laptops sold by each company.

Note: The total number of electronic items sold = The number of tablets sold + The number of laptops sold.

The ratio of the number of tablets unsold by Dell to HP is 3:5 and the ratio of the number of tablets manufactured by Dell to HP is 24:25. Find the total number of tablets manufactured by Dell and HP.

- A) 98 ✗
- B) 49 ✓
- C) 147 ✗
- D) 196 ✗
- E) 392 ✗

Explanation:**Dell:**

The total number of electronic items sold by Dell = $30 * 2 = 60$

The number of laptops sold by Dell = 45

The number of tablets sold by Dell = $60 - 45 = 15$

HP:

The total number of electronic items sold by HP = $25 * 2 = 50$

The number of laptops sold by HP = 40

The number of tablets sold by HP = $50 - 40 = 10$

Lenovo:

The total number of electronic items sold by Lenovo = $40 * 2 = 80$

The number of laptops sold by Lenovo = 60

The number of tablets sold by Lenovo = $80 - 60 = 20$

Asus:

The total number of electronic items sold by Asus = $20 * 2 = 40$

The number of laptops sold by Asus = 25

The number of tablets sold by Asus = $40 - 25 = 15$

Acer:

The total number of electronic items sold by Acer = $35 * 2 = 70$

The number of laptops sold by Acer = 30

The number of tablets sold by Acer = $70 - 30 = 40$

Company	The number of laptops sold	The number of tablets sold	The total number of electronic items sold
Dell	45	15	60
HP	40	10	50
Lenovo	60	20	80
Asus	25	15	40
Acer	30	40	70

Answer: B

The number of tablets sold by HP = 10

The number of tablets sold by Dell = 15

The number of tablets unsold by Dell = $3x$

The number of tablets unsold by HP = $5x$

The number of tablets manufactured by Dell = $24y$

The number of tablets manufactured by HP = 25y

$$24y - 3x = 15 \text{ -----[1]}$$

$$25y - 5x = 10 \text{ -----[2]}$$

From equ [1] and [2]

$$45y = 45$$

$$y = 1$$

$$\text{The required total} = 24 * 1 + 25 * 1 = 49$$

Hence, the correct answer is option B.

Q. 36

What approximate value should come in the place of (?) in the following questions.

$$? * 468.01 \div (13.11 * 9.12) + 110.11 = 25.01 * 6.3$$

A) 9 

B) 12 

C) 8 

D) 10 

E) 5 

Answer: D

$$? * 468.01 \div (13.11 * 9.12) + 110.11 = 25.01 * 6.3$$

$$? * 468 \div (13 * 9) + 110 = 25 * 6$$

$$? * 4 + 110 = 25 * 6$$

$$? * 4 + 110 = 150$$

$$? * 4 = 40$$

$$? = 10$$

Hence, the correct answer is option D.

Explanation:

Q. 37	What approximate value should come in the place of (?) in the following questions. $? \div 15.15 = 45.02\% \text{ of } 600.23 + 8.14 * 195.17/13.13$ A) 5850 ✓ B) 5190 ✗ C) 5250 ✗ D) 5140 ✗ E) 5320 ✗
Explanation:	Answer: A $? \div 15.15 = 45.02\% \text{ of } 600.23 + 8.14 * 195.17/13.13$ $? \div 15 = 45\% \text{ of } 600 + 8 * 195/13$ $? \div 15 = 270 + 120$ $? \div 15 = 390$ $? = 390 * 15$ $? = 5850$ Hence, the correct answer is option A.

Q. 38

What approximate value should come in the place of (?) in the following questions.

$$1650.03 \div 50.09 + 21.11 * 4.09 = ?^2 - 27.27$$

A) 11 B) 7 C) 12 D) 4 E) 13 **Answer: C**

$$1650.03 \div 50.09 + 21.11 * 4.09 = ?^2 - 27.27$$

$$1650 \div 50 + 21 * 4 = ?^2 - 27$$

$$33 + 84 = ?^2 - 27$$

$$117 = ?^2 - 27$$

$$?^2 = 144$$

$$? = 12$$

Hence, the correct answer is option C.

Explanation:

Q. 39

What approximate value should come in the place of (?) in the following questions.

$$(13.02/19.17) * (57.05/52.25) * ? = 9.08 * 75.14 \div 15.13$$

A) 50 B) 60 C) 40 D) 70 E) 30 **Answer: B**

$$(13.02/19.17) * (57.05/52.25) * ? = 9.08 * 75.14 \div 15.13$$

$$(13/19) * (57/52) * ? = 9 * 75 \div 15$$

$$(3/4) * ? = 45$$

$$? = 60$$

Hence, the correct answer is option B.

Explanation:

Q. 40	What approximate value should come in the place of (?) in the following questions. $(15.03 \times 28.36) \div 7.28 + 129.11 = ? + 13.12 \times 1.87$ A) 175  B) 189  C) 134  D) 128  E) 163 
Explanation:	Answer: E $(15.03 \times 28.36) \div 7.28 + 129.11 = ? + 13.12 \times 1.87$ $(15 \times 28) \div 7 + 129 = ? + 13 \times 2$ $60 + 129 = ? + 26$ $189 = ? + 26$ $163 = ?$ Hence, the correct answer is option E.

Q. 41

A sum of money amounts to Rs. 22,500 at compound interest in 2 years and to Rs. 27,000 in 3 years, when the interest is compounded annually at R% per annum. Find the simple interest on Rs. 18,500 at the same rate of interest for 4 years.

A) Rs. 15200

B) Rs. 14500

C) Rs. 13200

D) Rs. 15400

E) Rs. 14800

**Answer: E**

Formula used:

The compound interest = $P[(1 + R/100)^n - 1]$ The compound amount = $P(1 + R/100)^n$ The simple interest = $PRT/100$ $P(1 + R/100)^2 = 22500$ -----(1) $P(1 + R/100)^3 = 27000$ -----(2)

After dividing (2) equation with (1) equation

 $(1 + R/100) = 6/5$ $R/100 = 1/5$ $R = 20\%$ The simple interest = $PNR/100 = 18500 * 20\% * 4 = \text{Rs. } 14800$

Hence, the correct answer is option E.

Explanation:

Q. 42

The total time taken to travel $(z + 180)$ km downstream at a speed of 30 km/hr, and $(z+30)$ km upstream at a speed of 20 km/hr is 17.5 hours. Find the value of z .

- A) 150 
- B) 130 
- C) 120 
- D) 140 
- E) 100 

Answer: C

According to the question,

$$(z + 180)/30 + (z + 30)/20 = 17.5$$

$$2z + 360 + 3z + 90 = 1050$$

$$5z = 600$$

$$z = 120$$

Hence, the correct option is C.

Explanation:

Q. 43

The initial investments of three partners, X, Y, and Z, are in the ratio of 4 : 5 : 8, respectively. If X increases his investment by 25%, Y decreases his investment by 20%, and Z increases his investment by 15%, then find the new ratio of their investments.

A) 23 : 20 : 41

B) 21 : 23 : 43

C) 25 : 20 : 46

D) 25 : 24 : 41

E) 23 : 21 : 44

**Answer: C**

Let the initial investment of X = 400a

The initial investment of Y = 500a

The initial investment of Z = 800a

Explanation:The increased investment of X = $400a \times \frac{125}{100} = 500a$ The decreased investment of Y = $500a \times \frac{80}{100} = 400a$ The increased investment of Z = $800a \times \frac{115}{100} = 920a$ The new ratio of their investments = $500a : 400a : 920a = 25 : 20 : 46$

Hence, the correct answer is option C.

Q. 44

'A' and 'B' together started a business by investing in the ratio of 5:6. After 6 months from the start of the business, 'A' added 25% of his initial investment and 'C' joined them by investing Rs.1000X. After 18 months from the start of the business, the profit share of 'A' and 'B' together was Rs. 14,200 out of a total profit of Rs. 19,200. Find the sum invested by 'C', if the amount invested by A and B together is Rs. 44,000

- A) Rs.30000 
- B) Rs.25000 
- C) Rs.20000 
- D) Rs.22000 
- E) Rs.18650 

Answer: B

'A' and 'B' invested the amount in the ratio = 5:6 while their total amount = Rs.44000

Amount invested by A = $(44000) \times \frac{5}{11}$ = Rs.20000

Amount invested by B = $(44000) \times \frac{6}{11}$ = Rs.24000

Profit share ratio of A, B and C = $[(20000 \times 6) + (25000 \times 12)] : [24000 \times 18] : [1000X \times 12]$

= $[120000 + 300000] : [24000 \times 12] : [1000X \times 12]$

= 420000 : 432000 : 12000X

= 420 : 432 : 12X

= 35 : 36 : X

Profit share of A and B = 14200 and Profit share of C = $19200 - 14200 = 5000$

So, $\frac{X}{(35+36+X)} = \frac{5000}{19200}$

$\frac{X}{71+X} = \frac{25}{96}$

$96X = 25X + (71 \times 25);$

$71X = (71 \times 25),$

Therefore, $X = 25$

So, the sum invested by 'C' = $1000X = 1000 \times 25 = 25000$

Hence, the correct option is B.

Explanation:

Q. 45	Two trains, Train P and Train Q, are 280 meters and 170 meters long, respectively. They are running on parallel tracks in the same direction. If the speed of Train P is 74 km/h and it completely overtakes Train Q in 81 seconds, find the speed of Train Q in km/h. A) 54 km/hr ✓ B) 45 km/hr ✗ C) 72 km/hr ✗ D) 63 km/hr ✗ E) 36 km/hr ✗
Explanation:	Answer: A The total distance covered by train P = $280 + 170 = 450$ meters The relative speed of train P and train Q in same direction = $450/81 = (50/9)$ m/sec = $(50/9) * (18/5) = 20$ km/hr The speed of train Q = $74 - 20 = 54$ km/hr Hence, the correct answer is option A.

Q. 46

The following questions contain two equations as I and II. You have to solve both equations and determine the relationship between them and give answer as,

I. $x^2 - 3\sqrt{7}x + 14 = 0$

II. $y^2 - 5\sqrt{7}y + 42 = 0$

A) $x > y$ 

B) $x \geq y$ 

C) $x = y$ or a relationship cannot be established. 

D) $x < y$ 

E) $x \leq y$ 

Explanation:

Answer: E

I. $x^2 - 3\sqrt{7}x + 14 = 0$

$$x^2 - 2\sqrt{7}x - \sqrt{7}x + 14 = 0$$

$$x(x - 2\sqrt{7}) - \sqrt{7}(x - 2\sqrt{7}) = 0$$

$$(x - \sqrt{7})(x - 2\sqrt{7}) = 0$$

$$x = \sqrt{7} \text{ or } 2\sqrt{7}$$

II. $y^2 - 5\sqrt{7}y + 42 = 0$

$$y^2 - 3\sqrt{7}y - 2\sqrt{7}y + 42 = 0$$

$$y(y - 3\sqrt{7}) - 2\sqrt{7}(y - 3\sqrt{7}) = 0$$

$$(y - 2\sqrt{7})(y - 3\sqrt{7}) = 0$$

$$y = 2\sqrt{7} \text{ or } 3\sqrt{7}$$

$$\text{So, } x \leq y$$

Hence, the correct answer is option E.

Q. 47

The following questions contain two equations as I and II. You have to solve both equations and determine the relationship between them and give answer as,

I. $2x^2 - 17x + 36 = 0$

II. $2y^2 - 13y + 20 = 0$

A) $x > y$ 

B) $x \geq y$ 

C) $x = y$ or a relationship cannot be established. 

D) $x < y$ 

E) $x \leq y$ 

Answer: B

I. $2x^2 - 17x + 36 = 0$

$$2x^2 - 9x - 8x + 36 = 0$$

$$x(2x - 9) - 4(2x - 9) = 0$$

$$(x - 4)(2x - 9) = 0$$

$$x = 4 \text{ or } 9/2$$

II. $2y^2 - 13y + 20 = 0$

$$2y^2 - 8y - 5y + 20 = 0$$

$$2y(y - 4) - 5(y - 4) = 0$$

$$(2y - 5)(y - 4) = 0$$

$$y = 4 \text{ or } 5/2$$

$$\text{So, } x \geq y$$

Hence, the correct answer is option B.

Explanation:

Q. 48

The following questions contain two equations as I and II. You have to solve both equations and determine the relationship between them and give answer as,

I. $2x^2 - 19x + 45 = 0$

II. $2y^2 - 15y + 28 = 0$

A) $x > y$ ✓

B) $x \geq y$ ✗

C) $x = y$ or a relationship cannot be established. ✗

D) $x < y$ ✗

E) $x \leq y$ ✗

Explanation:

Answer: A

I. $2x^2 - 19x + 45 = 0$

$$2x^2 - 10x - 9x + 45 = 0$$

$$2x(x - 5) - 9(x - 5) = 0$$

$$(2x - 9)(x - 5) = 0$$

$$x = 9/2 \text{ or } 5$$

II. $2y^2 - 15y + 28 = 0$

$$2y^2 - 8y - 7y + 28 = 0$$

$$2y(y - 4) - 7(y - 4) = 0$$

$$(2y - 7)(y - 4) = 0$$

$$y = 7/2 \text{ or } 4$$

$$\text{So, } x > y$$

Hence, the correct answer is option A.

Q. 49

The following questions contain two equations as I and II. You have to solve both equations and determine the relationship between them and give answer as,

I. $4x^2 - 13x + 10 = 0$

II. $2y^2 - 15y + 25 = 0$

A) $x > y$ 

B) $x \geq y$ 

C) $x = y$ or a relationship cannot be established. 

D) $x < y$ 

E) $x \leq y$ 

Explanation:

Answer: D

I. $4x^2 - 13x + 10 = 0$

$$4x^2 - 8x - 5x + 10 = 0$$

$$4x(x - 2) - 5(x - 2) = 0$$

$$(4x - 5)(x - 2) = 0$$

$$x = 5/4 \text{ or } 2$$

II. $2y^2 - 15y + 25 = 0$

$$2y^2 - 10y - 5y + 25 = 0$$

$$2y(y - 5) - 5(y - 5) = 0$$

$$(2y - 5)(y - 5) = 0$$

$$y = 5/2 \text{ or } 5$$

$$\text{So, } x < y$$

Hence, the correct answer is option D.

Q. 50

The following questions contain two equations as I and II. You have to solve both equations and determine the relationship between them and give answer as,

I. $x^2 + 3x - 28 = 0$

II. $y^2 - 5y - 36 = 0$

A) $x > y$ 

B) $x \geq y$ 

C) $x = y$ or a relationship cannot be established. 

D) $x < y$ 

E) $x \leq y$ 

Explanation:

Answer: C

I. $x^2 + 3x - 28 = 0$

$$x^2 + 7x - 4x - 28 = 0$$

$$x(x + 7) - 4(x + 7) = 0$$

$$(x - 4)(x + 7) = 0$$

$$x = 4 \text{ or } -7$$

II. $y^2 - 5y - 36 = 0$

$$y^2 - 9y + 4y - 36 = 0$$

$$y(y - 9) + 4(y - 9) = 0$$

$$(y - 9)(y + 4) = 0$$

$$y = 9 \text{ or } -4$$

So, the relationship cannot be established.

Hence, the correct answer is option C.

Q. 51

Study the following information carefully and answer the questions given below.

The given table below shows the total number of items (mugs and plates) manufactured by five different shops namely A, B, C, D and E along with the ratio of the number of mugs to the number of plates manufactured by each shop.

Note: The total number of items manufactured = The number of mugs manufactured + The number of plates manufactured.

Shop	The total number of items manufactured	The ratio of the number of mugs to plates manufactured
A	720	5 : 4
B	600	7 : 5
C	840	4 : 3
D	540	2 : 1
E	900	11 : 7

The total number of mugs manufactured by shops A and D together is how much more or less than the total number of plates manufactured by shops C and E together?

- A) 50 less 
- B) 40 more 
- C) 30 less 
- D) 50 more 
- E) 20 less 

Shop A:

The total number of items manufactured by shop A = 720

The number of mugs manufactured by shop A = $720 \times (5/9) = 400$

The number of plates manufactured by shop A = $720 - 400 = 320$

Shop B:

The total number of items manufactured by shop B = 600

The number of mugs manufactured by shop B = $600 \times (7/12) = 350$

The number of plates manufactured by shop B = $600 - 350 = 250$

Shop C:

The total number of items manufactured by shop C = 840

The number of mugs manufactured by shop C = $840 \times (4/7) = 480$

The number of plates manufactured by shop C = $840 - 480 = 360$

Shop D:

The total number of items manufactured by shop D = 540

The number of mugs manufactured by shop D = $540 \times (2/3) = 360$

The number of plates manufactured by shop D = $540 - 360 = 180$

Explanation:**Shop E:**

The total number of items manufactured by shop E = 900

The number of mugs manufactured by shop E = $900 \times (11/18) = 550$

The number of plates manufactured by shop E = $900 - 550 = 350$

Shop	The number of mugs manufactured	The number of plates manufactured	The total number of items manufactured together
A	400	320	720
B	350	250	600
C	480	360	840
D	360	180	540
E	550	350	900

Answer: D

The total number of mugs manufactured by shops A and D together = $400 + 360 = 760$

The total number of plates manufactured by shops C and E together = $360 + 350 = 710$

The required difference = $760 - 710 = 50$ more

Hence, the correct answer is option D.

Q. 52

Study the following information carefully and answer the questions given below.

The given table below shows the total number of items (mugs and plates) manufactured by five different shops namely A, B, C, D and E along with the ratio of the number of mugs to the number of plates manufactured by each shop.

Note: The total number of items manufactured = The number of mugs manufactured + The number of plates manufactured.

Shop	The total number of items manufactured	The ratio of the number of mugs to plates manufactured
A	720	5 : 4
B	600	7 : 5
C	840	4 : 3
D	540	2 : 1
E	900	11 : 7

If the ratio of the number of mugs sold to unsold by shop B is 4 : 3, and the number of mugs sold by shop B is 92 more than the number of plates sold by the same shop. Find the number of plates unsold by shop B.

- A) 142 
- B) 154 
- C) 165 
- D) 187 
- E) 192 

Shop A:

The total number of items manufactured by shop A = 720

The number of mugs manufactured by shop A = $720 \times (5/9) = 400$

The number of plates manufactured by shop A = $720 - 400 = 320$

Shop B:

The total number of items manufactured by shop B = 600

The number of mugs manufactured by shop B = $600 \times (7/12) = 350$

The number of plates manufactured by shop B = $600 - 350 = 250$

Shop C:

The total number of items manufactured by shop C = 840

The number of mugs manufactured by shop C = $840 \times (4/7) = 480$

The number of plates manufactured by shop C = $840 - 480 = 360$

Shop D:

The total number of items manufactured by shop D = 540

The number of mugs manufactured by shop D = $540 \times (2/3) = 360$

The number of plates manufactured by shop D = $540 - 360 = 180$

Shop E:

The total number of items manufactured by shop E = 900

The number of mugs manufactured by shop E = $900 \times (11/18) = 550$

The number of plates manufactured by shop E = $900 - 550 = 350$

Explanation:

Shop	The number of mugs manufactured	The number of plates manufactured	The total number of items manufactured together
A	400	320	720
B	350	250	600
C	480	360	840
D	360	180	540
E	550	350	900

Answer: A

The number of mugs sold by shop B = $350 \times 4/7 = 200$

The number of mugs unsold by shop B = $350 - 200 = 150$

The number of plates sold by shop B = $200 - 92 = 108$

The number of unsold plates by shop B = $250 - 108 = 142$

Hence, the correct answer is option A.

Q. 53

Study the following information carefully and answer the questions given below.

The given table below shows the total number of items (mugs and plates) manufactured by five different shops namely A, B, C, D and E along with the ratio of the number of mugs to the number of plates manufactured by each shop.

Note: The total number of items manufactured = The number of mugs manufactured + The number of plates manufactured.

Shop	The total number of items manufactured	The ratio of the number of mugs to plates manufactured
A	720	5 : 4
B	600	7 : 5
C	840	4 : 3
D	540	2 : 1
E	900	11 : 7

If the total number of items manufactured by shop Z is 25% more than the total number of items manufactured by shop A, and the number of plates manufactured by shop Z is equal to the number of plates manufactured by shop C, find the number of mugs manufactured by shop Z.

- A) 640 
- B) 270 
- C) 320 
- D) 450 
- E) 540 

Shop A:

The total number of items manufactured by shop A = 720

The number of mugs manufactured by shop A = $720 \times (5/9) = 400$

The number of plates manufactured by shop A = $720 - 400 = 320$

Shop B:

The total number of items manufactured by shop B = 600

The number of mugs manufactured by shop B = $600 \times (7/12) = 350$

The number of plates manufactured by shop B = $600 - 350 = 250$

Shop C:

The total number of items manufactured by shop C = 840

The number of mugs manufactured by shop C = $840 \times (4/7) = 480$

The number of plates manufactured by shop C = $840 - 480 = 360$

Shop D:

The total number of items manufactured by shop D = 540

The number of mugs manufactured by shop D = $540 \times (2/3) = 360$

The number of plates manufactured by shop D = $540 - 360 = 180$

Explanation:**Shop E:**

The total number of items manufactured by shop E = 900

The number of mugs manufactured by shop E = $900 \times (11/18) = 550$

The number of plates manufactured by shop E = $900 - 550 = 350$

Shop	The number of mugs manufactured	The number of plates manufactured	The total number of items manufactured together
A	400	320	720
B	350	250	600
C	480	360	840
D	360	180	540
E	550	350	900

Answer: E

The total number of items manufactured by shop Z = $720 \times 125/100 = 900$

The number of plates manufactured by shop Z = 360

The number of mugs manufactured by shop Z = $900 - 360 = 540$

Hence, the correct answer is option E.

Q. 54

Study the following information carefully and answer the questions given below.

The given table below shows the total number of items (mugs and plates) manufactured by five different shops namely A, B, C, D and E along with the ratio of the number of mugs to the number of plates manufactured by each shop.

Note: The total number of items manufactured = The number of mugs manufactured + The number of plates manufactured.

Shop	The total number of items manufactured	The ratio of the number of mugs to plates manufactured
A	720	5 : 4
B	600	7 : 5
C	840	4 : 3
D	540	2 : 1
E	900	11 : 7

The average number of plates manufactured by shops A and D together is what percentage more or less than the average number of mugs manufactured by shops C and D?

- A) 35.45% less 
- B) 52.33% more 
- C) 40.47% less 
- D) 48.61% more 
- E) 66.66% less 

Shop A:

The total number of items manufactured by shop A = 720

The number of mugs manufactured by shop A = $720 \times (5/9) = 400$

The number of plates manufactured by shop A = $720 - 400 = 320$

Shop B:

The total number of items manufactured by shop B = 600

The number of mugs manufactured by shop B = $600 \times (7/12) = 350$

The number of plates manufactured by shop B = $600 - 350 = 250$

Shop C:

The total number of items manufactured by shop C = 840

The number of mugs manufactured by shop C = $840 \times (4/7) = 480$

The number of plates manufactured by shop C = $840 - 480 = 360$

Shop D:

The total number of items manufactured by shop D = 540

The number of mugs manufactured by shop D = $540 \times (2/3) = 360$

The number of plates manufactured by shop D = $540 - 360 = 180$

Explanation:**Shop E:**

The total number of items manufactured by shop E = 900

The number of mugs manufactured by shop E = $900 \times (11/18) = 550$

The number of plates manufactured by shop E = $900 - 550 = 350$

Shop	The number of mugs manufactured	The number of plates manufactured	The total number of items manufactured together
A	400	320	720
B	350	250	600
C	480	360	840
D	360	180	540
E	550	350	900

Answer: C

The average number of plates manufactured by shops A and D = $(320 + 180)/2 = 250$

The average number of mugs manufactured by shops C and D = $(480 + 360)/2 = 420$

The required percentage = $[(420 - 250) \times 100 / 420] = 40.47\%$ less

Hence, the correct answer is option C.

Q. 55

Study the following information carefully and answer the questions given below.

The given table below shows the total number of items (mugs and plates) manufactured by five different shops namely A, B, C, D and E along with the ratio of the number of mugs to the number of plates manufactured by each shop.

Note: The total number of items manufactured = The number of mugs manufactured + The number of plates manufactured.

Shop	The total number of items manufactured	The ratio of the number of mugs to plates manufactured
A	720	5 : 4
B	600	7 : 5
C	840	4 : 3
D	540	2 : 1
E	900	11 : 7

The total number of items manufactured by shop D is what percentage of the total number of items manufactured by shop E?

- A) 40% 
- B) 60% 
- C) 30% 
- D) 50% 
- E) 70% 

Shop A:

The total number of items manufactured by shop A = 720

The number of mugs manufactured by shop A = $720 \times (5/9) = 400$

The number of plates manufactured by shop A = $720 - 400 = 320$

Shop B:

The total number of items manufactured by shop B = 600

The number of mugs manufactured by shop B = $600 \times (7/12) = 350$

The number of plates manufactured by shop B = $600 - 350 = 250$

Shop C:

The total number of items manufactured by shop C = 840

The number of mugs manufactured by shop C = $840 \times (4/7) = 480$

The number of plates manufactured by shop C = $840 - 480 = 360$

Shop D:

The total number of items manufactured by shop D = 540

The number of mugs manufactured by shop D = $540 \times (2/3) = 360$

The number of plates manufactured by shop D = $540 - 360 = 180$

Explanation:**Shop E:**

The total number of items manufactured by shop E = 900

The number of mugs manufactured by shop E = $900 \times (11/18) = 550$

The number of plates manufactured by shop E = $900 - 550 = 350$

Shop	The number of mugs manufactured	The number of plates manufactured	The total number of items manufactured together
A	400	320	720
B	350	250	600
C	480	360	840
D	360	180	540
E	550	350	900

Answer: B

The total number of items manufactured by shop D = 540

The total number of items manufactured by shop E = 900

The required percentage = $540 \times 100 / 900 = 60\%$

Hence, the correct answer is option B.

Q. 56

Study the following information carefully and answer the questions given below.

The given table below shows the total number of items (mugs and plates) manufactured by five different shops namely A, B, C, D and E along with the ratio of the number of mugs to the number of plates manufactured by each shop.

Note: The total number of items manufactured = The number of mugs manufactured + The number of plates manufactured.

Shop	The total number of items manufactured	The ratio of the number of mugs to plates manufactured
A	720	5 : 4
B	600	7 : 5
C	840	4 : 3
D	540	2 : 1
E	900	11 : 7

Find the difference between the total number of items manufactured by shop B and the number of mugs manufactured by shop E.

- A) 5 
- B) 40 
- C) 55 
- D) 50 
- E) 60 

Shop A:

The total number of items manufactured by shop A = 720

The number of mugs manufactured by shop A = $720 \times (5/9) = 400$

The number of plates manufactured by shop A = $720 - 400 = 320$

Shop B:

The total number of items manufactured by shop B = 600

The number of mugs manufactured by shop B = $600 \times (7/12) = 350$

The number of plates manufactured by shop B = $600 - 350 = 250$

Shop C:

The total number of items manufactured by shop C = 840

The number of mugs manufactured by shop C = $840 \times (4/7) = 480$

The number of plates manufactured by shop C = $840 - 480 = 360$

Shop D:

The total number of items manufactured by shop D = 540

The number of mugs manufactured by shop D = $540 \times (2/3) = 360$

The number of plates manufactured by shop D = $540 - 360 = 180$

Shop E:

The total number of items manufactured by shop E = 900

The number of mugs manufactured by shop E = $900 \times (11/18) = 550$

The number of plates manufactured by shop E = $900 - 550 = 350$

Explanation:

Shop	The number of mugs manufactured	The number of plates manufactured	The total number of items manufactured together
A	400	320	720
B	350	250	600
C	480	360	840
D	360	180	540
E	550	350	900

Answer: D

The difference between the total items manufactured by shop B and mugs manufactured by shop E = $600 - 550 = 50$

Hence, the correct answer is option D.

Q. 57

A 144-litre mixture A contains milk and water, and the quantity of milk is 40% more than that of water. When $2x$ litres of mixture A are taken out, the quantity of water in mixture A becomes $(x + 5)$ litres. If mixture B contains $5x$ litres and $(2x - 10)$ litres of milk and water, then find the total quantity of mixture B.

A) 220 litres B) 180 litres C) 200 litres D) 320 litres E) 420 litres **Answer: C**

Let the initial quantity of water in mixture A be $5b$ litres.

So, the initial quantity of milk in mixture A = $1.4 * 5b = 7b$ litres

$$5b + 7b = 144$$

$$12b = 144$$

$$b = 12$$

The initial quantity of water in mixture A = $5 * 12 = 60$ litres

The initial quantity of milk in mixture A = $7 * 12 = 84$ litres

Explanation:

$$60 - \{2x * (5/12)\} = x + 5$$

$$x + (5x/6) = 60 - 5$$

$$(11x/6) = 55$$

$$x = 30$$

The quantity of milk in mixture B = $5 * 30 = 150$ litres

The quantity of water in mixture B = $2 * 30 - 10 = 50$ litres

The total quantity of milk and water in mixture B = $(150 + 50) = 200$ litres

Hence, the correct option is C.

Q. 58

The sum of the present ages of P, Q and R is 84 years. Six years ago, the age of P was three times the age of R, and at that same time, Q was 4 years younger than P. Find the present age of Q.

A) 33 years

B) 35 years

C) 30 years

D) 32 years

E) 38 years

**Answer: D**

Let the age of R 6 years ago = x

The present age of R = $x + 6$

The age of P 6 years ago = $3x$

The present age of P = $3x + 6$

The age of Q 6 years ago = $3x - 4$

The present age of Q = $3x - 4 + 6 = 3x + 2$

Explanation:

According to the question,

$$x + 6 + 3x + 6 + 3x + 2 = 84$$

$$7x + 14 = 84$$

$$7x = 70$$

$$x = 10$$

$$\text{The present age of Q} = 3x + 2 = 30 + 2 = 32 \text{ years}$$

Hence, the correct answer is option D.

Q. 59

The product of a number and twice the same number is 392. Find the number.

A) 15 

B) 12 

C) 14 

D) 16 

E) 18 

Explanation:

Answer: C

Let the number = x

According to the question,

$$x * 2x = 392$$

$$2x^2 = 392$$

$$x^2 = 196$$

$$x = 14$$

The number = 14

Hence, the correct answer is option C.

Q. 60

Pipes A and B together can fill a tank in 80 hours, whereas pipes B and C together can fill the tank in 60 hours. Pipes A and B are opened together for 20 hours, after which pipe A is closed. Pipes B and C are then opened together for 15 hours, after which pipe B is closed. The remaining tank is filled by pipe C alone in 60 hours. Find the time taken by pipe C alone to fill the entire tank.

- A) 180 hours 
- B) 125 hours 
- C) 210 hours 
- D) 120 hours 
- E) 150 hours 

Explanation:**Answer: D**

Let the total work = 240 units (LCM of 60 and 80)

The efficiency of pipe A and B = $240/80 = 3$ units

The efficiency of pipe B and C = $240/60 = 4$ units

The time taken by pipes A and B together to fill in 20 hours = $20 * 3 = 60$ units

The time taken by pipes B and C together to fill in 15 hours = $15 * 4 = 60$ units

The time taken by C alone to fill the tank in the remaining 60 hours = $240 - 60 - 60 = 120$ units

The time taken by C alone to fill in one hour = $120/60 = 2$ units

Time taken = $240/2 = 120$ hours

Q. 61

The area of the right angled triangle is 30 m^2 and the base of the right angled triangle is $x \text{ m}$ more than its height and the volume of the sphere is 38808 m^3 . If the base of the right angled triangle is 9 m less than the radius of the sphere, then find the height of the right angled triangle.

A) 5 m ✓B) 8 m ✗C) 4 m ✗D) 12 m ✗E) 10 m ✗**Answer: A**The volume of the sphere = $\frac{4}{3}(\pi r^3)$

$$\frac{4}{3} * \frac{22}{7} * r^3 = 38808$$

$$r^3 = 9261$$

$$r = 21 \text{ m}$$

$$\text{The base of the right angled triangle} = 21 - 9 = 12 \text{ m}$$

$$\text{The height of the right angled triangle} = (12 - x) \text{ m}$$

$$\text{The area of the right angled triangle} = \frac{1}{2} * b * h$$

$$\frac{1}{2} * 12 * (12 - x) = 30$$

$$144 - 12x = 60$$

$$84 = 12x$$

$$x = 7 \text{ m}$$

$$\text{The height of the right angled triangle} = 12 - 7 = 5 \text{ m}$$

Explanation:

Q. 62

A bag contains 90 color pencils of 3 types i.e. white, yellow and green. The number of yellow and green pencils are 'x' and 'y' respectively and the number of white pencils is 42. The probability of drawing a yellow pencil is $(4/15)$ more than the probability of drawing a green pencil from the bag. Find the probability of drawing a green pencil from the bag.

- A) $8/15$ 
 B) $5/18$ 
 C) $2/5$ 
 D) $2/15$ 
 E) $4/15$ 

Answer: D

Probability of drawing a yellow pencil from the bag = $(x/90)$

Probability of drawing a green pencil from the bag = $(y/90)$

Probability of drawing a yellow pencil = $(4/15)$ + probability of drawing a green pencil

$$(x/90) = (4/15) + (y/90)$$

$$(x/90) - (y/90) = 4/15$$

$$(x-y)/90 = 4/15$$

Explanation:

$$x-y = 24 \dots \text{eqn (1)}$$

Total number of pencils in the bag = 90 and white pencils = 42

$$\text{So, } x + y + 42 = 90$$

$$x + y = 48 \dots \text{eqn (2)}$$

After equating eqn (1) and (2) we get, $x = 36$, $y = 12$

Therefore, the probability of drawing a green pencil = $[(12C1) / (90C1)] = 2/15$

Hence, the correct option is D.

Q. 63

Study the following information carefully and answer the questions given below.

A shopkeeper purchased three different articles, M, N, and O. The ratio of the cost prices of articles M and N is 4 : 5, respectively. The cost price of article O is Rs. 200 more than that of article M. Article M is sold at a profit of 20%. Article N is marked up by 40% above its cost price and then sold at a discount of 10% on the marked price. The selling price of article N is Rs. 1,260. Article O is sold at a loss of 15%.

If article O is marked up by 20% above its cost price, find the ratio of the discount offered to the loss incurred on the same article.

- A) 6 : 1 
- B) 5 : 9 
- C) 2 : 5 
- D) 7 : 3 
- E) 5 : 7 

Let the cost price of the article M = Rs. $4a$

The cost price of the article N = Rs. $5a$

The cost price of the article O = Rs. $4a + 200$

The selling price of the article N = Rs. 1260

According to the question,

$$5a * 140\% * 90\% = 1260$$

$$5a = 1000$$

$$a = 200$$

The cost price of the article M = $4a$ = Rs. 800

The cost price of the article N = $5a$ = Rs. 1000

The marked price of article N = 140% of 1000 = Rs. 1400

The cost price of the article O = $4a + 200$ = Rs. 1000

The selling price of the article M = 120% of 800 = Rs. 960

The selling price of the article N = Rs. 1260

The selling price of the article O = 85% of 1000 = Rs. 850

Let table

Article	The cost price (Rs.)	The marked price (Rs.)	The selling price (Rs.)
M	800	-	960
N	1000	1400	1260
O	1000		850

Answer: D

The marked price of the article O = $1000 * 120/100$ = Rs. 1200

The discount offered on the article O = $1200 - 850$ = Rs. 350

The loss incurred on the article O = Rs. 150

The required ratio = $350 : 150 = 7 : 3$

Hence, the correct answer is option D.

Explanation:

Q. 64

Study the following information carefully and answer the questions given below.

A shopkeeper purchased three different articles, M, N, and O. The ratio of the cost prices of articles M and N is 4 : 5, respectively. The cost price of article O is Rs. 200 more than that of article M. Article M is sold at a profit of 20%. Article N is marked up by 40% above its cost price and then sold at a discount of 10% on the marked price. The selling price of article N is Rs. 1,260. Article O is sold at a loss of 15%.

The selling price of the article N is what percentage more than the cost price of the article M?

A) 62.5% B) 57.5% C) 24.8% D) 33.33% E) 55% 

Let the cost price of the article M = Rs. $4a$

The cost price of the article N = Rs. $5a$

The cost price of the article O = Rs. $4a + 200$

The selling price of the article N = Rs. 1260

According to the question,

$$5a * 140\% * 90\% = 1260$$

$$5a = 1000$$

$$a = 200$$

The cost price of the article M = $4a$ = Rs. 800

The cost price of the article N = $5a$ = Rs. 1000

The marked price of article N = 140% of 1000 = Rs. 1400

The cost price of the article O = $4a + 200$ = Rs. 1000

The selling price of the article M = 120% of 800 = Rs. 960

The selling price of the article N = Rs. 1260

The selling price of the article O = 85% of 1000 = Rs. 850

Let table

Article	The cost price (Rs.)	The marked price (Rs.)	The selling price (Rs.)
M	800	-	960
N	1000	1400	1260
O	1000		850

Answer: B

The selling price of the article N = Rs. 1260

The cost price of the article M = Rs. 800

The required percentage = $(1260 - 800) * 100/800 = 57.5\%$

Hence, the correct answer is option B.

Explanation:

Q. 65

Study the following information carefully and answer the questions given below.

A shopkeeper purchased three different articles, M, N, and O. The ratio of the cost prices of articles M and N is 4 : 5, respectively. The cost price of article O is Rs. 200 more than that of article M. Article M is sold at a profit of 20%. Article N is marked up by 40% above its cost price and then sold at a discount of 10% on the marked price. The selling price of article N is Rs. 1,260. Article O is sold at a loss of 15%.

Find the marked price of the article N.A) Rs. 1500 B) Rs. 1200 C) Rs. 1100 D) Rs. 1300 E) Rs. 1400 

Let the cost price of the article M = Rs. $4a$

The cost price of the article N = Rs. $5a$

The cost price of the article O = Rs. $4a + 200$

The selling price of the article N = Rs. 1260

According to the question,

$$5a * 140\% * 90\% = 1260$$

$$5a = 1000$$

$$a = 200$$

The cost price of the article M = $4a$ = Rs. 800

The cost price of the article N = $5a$ = Rs. 1000

The marked price of article N = 140% of 1000 = Rs. 1400

The cost price of the article O = $4a + 200$ = Rs. 1000

The selling price of the article M = 120% of 800 = Rs. 960

The selling price of the article N = Rs. 1260

The selling price of the article O = 85% of 1000 = Rs. 850

Let table

Article	The cost price (Rs.)	The marked price (Rs.)	The selling price (Rs.)
M	800	-	960
N	1000	1400	1260
O	1000		850

Answer: E

The marked price of the article N = Rs. 1400

Hence, the correct answer is option E.

Explanation:

Reasoning Ability

Q. 66	In the given questions, the relationship between different elements is shown in the statements followed by conclusions. Find the conclusion which is definitely true. Statements: $A > B = C = D \leq E; F \geq G > H = I < A$ Conclusions: A) $D < I$  B) $F > I$  C) $B > H$  D) $E < B$  E) $G < A$ 
Explanation:	Answer: B a) $D < I$ ($D = C = B < A > I$) $\rightarrow$ False b) $F > I$ ($F \geq G > H = I$) $\rightarrow$ True c) $B > H$ ($B < A > I = H$) $\rightarrow$ False d) $E < B$ ($E \geq D = C = B$) $\rightarrow$ False e) $G < A$ ($G > H = I < A$) $\rightarrow$ False

Q. 67	In the given questions, the relationship between different elements is shown in the statements followed by conclusions. Find the conclusion which is definitely true. Statements: $A > B = C = D > I; E < F \geq G > H = I$ Conclusions: A) $D < A$ ✓ B) $F \leq D$ ✗ C) $B < H$ ✗ D) $E \geq G$ ✗ E) $G < A$ ✗
Explanation:	Answer: A a) $D < A$ ($D = C = B < A$) ---> True b) $F \leq D$ ($F \geq G > H = I < D$) ---> False c) $B < H$ ($B = C = D > I = H$)---> False d) $E \geq G$ ($E < F \geq G$) ---> False e) $G < A$ ($G > H = I < D = C = B < A$) ---> False

Q. 68	In the given questions, the relationship between different elements is shown in the statements followed by conclusions. Find the conclusion which is definitely true. Statements: $P > Q = R \geq S; T \geq U > V = W < P$ Conclusions A) $S < W$  B) $T > W$  C) $Q > U$  D) $R \geq V$  E) $U < P$ 
Explanation:	Answer: B a) $S < W$ ($W < P > Q = R \geq S$) ---> False b) $T > W$ ($T \geq U > V = W$) ---> True c) $Q > U$ ($Q < P > W = V < U$) ---> False d) $R \geq V$ ($R = Q < P > W = V$) ---> False e) $U < P$ ($U > V = W < P$) ---> False

Q. 69

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements

Only a few Benz are Audi

Only a few Audi are BMW

No Ferrari is BMW

Some Ferrari is kiwi

Conclusions

I. Some Benz are not BMW.

II. All Ferrari are Audi

III. All kiwi are BMW is not a possibility

A) Only conclusion II follows ✗

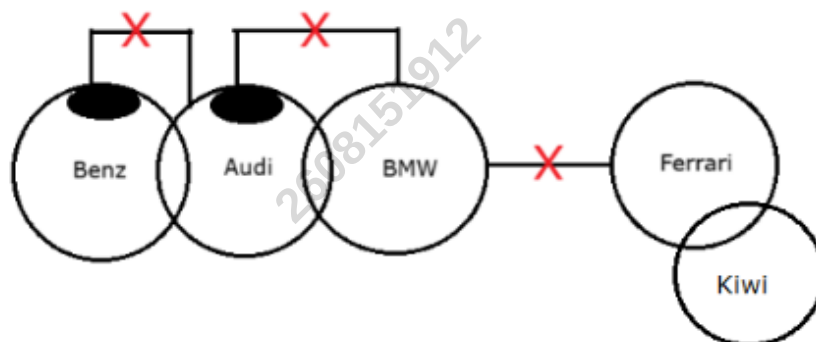

B) Only conclusion I follows ✗

C) Both conclusions I and III follow ✗

D) Both conclusions I and II follow ✗

E) Only conclusion III follows ✓

Answer: E

Explanation:

I. Some Benz are not Bmw- Here, there is no direct relation between Benz and BMW. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II. All Ferrari are Audi- Here, there is no direct relation between Ferrari and Audi. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

III. All kiwi are BMW is not a possibility- Since some Ferrari are Kiwi and no Ferrari is BMW, those Kiwi (which are Ferrari) cannot be BMW. Therefore, it is impossible for all Kiwi to be BMW, because at least some Kiwi are definitely not BMW. Hence, "All Kiwi are BMW" is not a possibility. Therefore, the conclusion follows.

Q. 70

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements

Some Iphone are Samsung

All Samsung are Oneplus

No Oneplus is Nokia

Some Oppo are Samsung

Conclusions:

I. Some Nokia can be Iphone

II. Some Iphone are not Nokia

III. Some oppo are not iphone is a possibility.

A) Only conclusion II follows

B) Only conclusion I follows

C) Both conclusions I and III follow

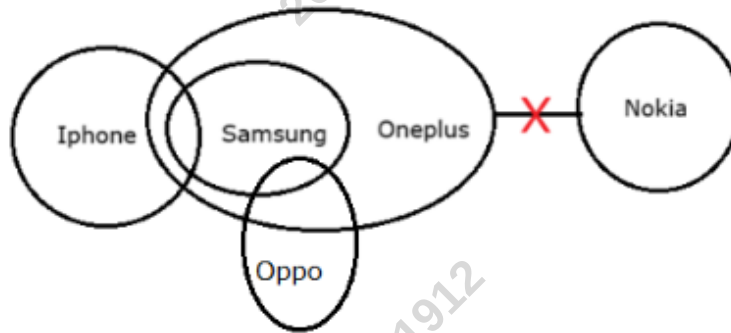

D) Both conclusions I and II follow

E) All conclusion follow

Answer: E

Explanation:

I. Some Nokia can be Iphone- Here, there is no direct relation between Nokia and Iphone. So, all the possible conclusions between them are true.. Hence, the conclusion follows.

II. Some Iphone are not Nokia- Here, some oneplus is iphone and no oneplus is nokia. So, the part of Iphone with are associated with Oneplus cannot be Nokia. Hence, the conclusion follows.

III. Some oppo are not iphone is a possibility- There is no definite relation between Oppo and iPhone. Although some Oppo are Samsung and some iPhone are Samsung, it is not necessary that the Oppo and iPhone are the same elements. Hence, it is possible that some Oppo are not iPhone. Therefore, the conclusion follows.

Q. 71

Study the following information carefully and answer the given questions.

A certain number of persons are sitting in a linear row such that all of them are facing towards the north. The number of persons who sit in the row is more than 15 but not more than 30.

J sits exactly in the middle of the row. Only five persons sit between J and K. L sits five persons away from K and sits third to the right of M, who sits sixth from one of the extreme ends. As many persons sit to the left of M as to the right of H, who sits fourth to the left of N. E sits exactly between J and M. The number of persons who sit to the left as well as to the right of E is a prime number.

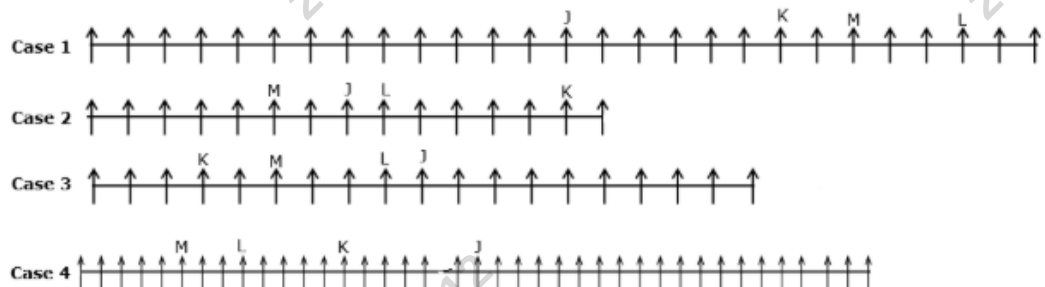

How many persons are sitting in the row with respect to the final arrangement?A) 19 B) 21 C) 23 D) 20 E) 22 

Explanation:**Final arrangement:**

We have,

- J sits exactly in the middle of the row.
- Only five persons sit between J and K.
- L sits five persons away from K and sits third to the right of M who sits sixth from one of the extreme ends.

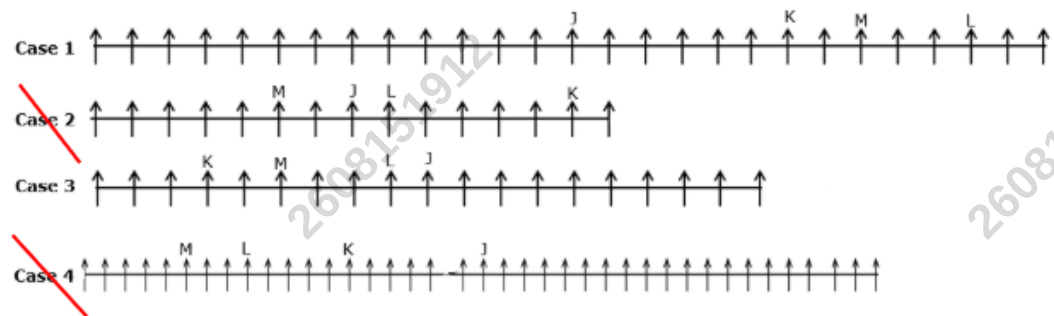

From the above conditions, there are four possibilities.

Again, we have

- The number of persons who sit in the row is **more than 15** but not more than 30.

From the above condition, Case 2 and Case 4 get eliminated, because the number of persons who sit in the row is **more than 15** but not more than 30, which is not satisfied.

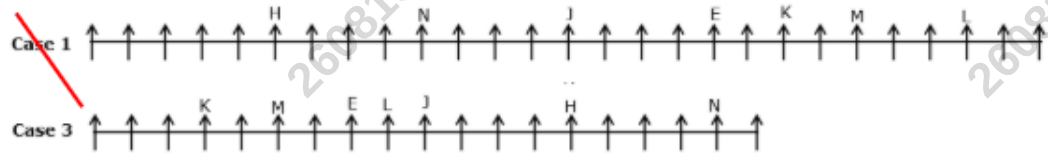

Again, we have

- As many persons sit to the left of M as to the right of H, who sits fourth to the left of N.
- E sits exactly between M and J.
- The number of persons who sit to the left as well as to the right of E is a prime number.

From the above conditions, case-1 gets eliminated because the number of persons who sit to the left as well as to the right of E is a prime number, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: A

Q. 72

Study the following information carefully and answer the given questions.

A certain number of persons are sitting in a linear row such that all of them are facing towards the north. The number of persons who sit in the row is more than 15 but not more than 30.

J sits exactly in the middle of the row. Only five persons sit between J and K. L sits five persons away from K and sits third to the right of M, who sits sixth from one of the extreme ends. As many persons sit to the left of M as to the right of H, who sits fourth to the left of N. E sits exactly between J and M. The number of persons who sit to the left as well as to the right of E is a prime number.

What is the position of H with respect to E with respect to the final arrangement?

A) Second to the right

B) Fifth to the left

C) Third to the right

D) Ninth to the left

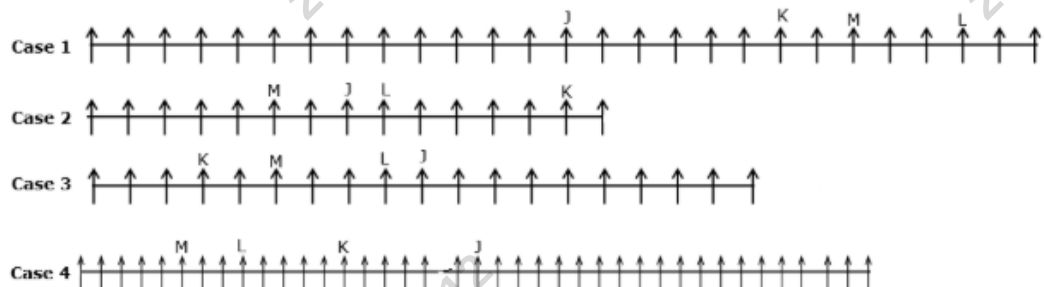

E) Sixth to the right

Explanation:**Final arrangement:**

We have,

- J sits exactly in the middle of the row.
- Only five persons sit between J and K.
- L sits five persons away from K and sits third to the right of M who sits sixth from one of the extreme ends.

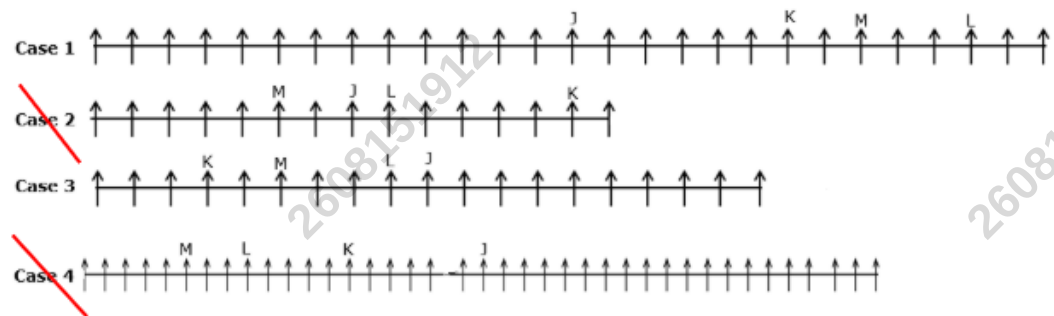

From the above conditions, there are four possibilities.

Again, we have

- The number of persons who sit in the row is **more than 15** but not more than 30.

From the above condition, Case 2 and Case 4 get eliminated, because the number of persons who sit in the row is **more than 15** but not more than 30, which is not satisfied.

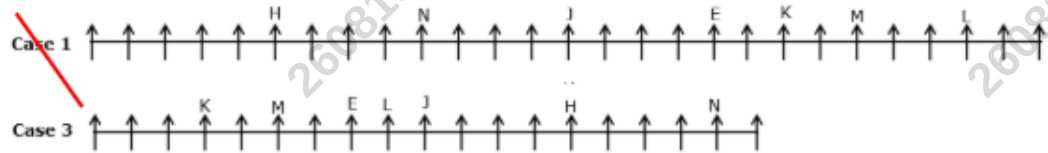

Again, we have

- As many persons sit to the left of M as to the right of H, who sits fourth to the left of N.
- E sits exactly between M and J.
- The number of persons who sit to the left as well as to the right of E is a prime number.

From the above conditions, case-1 gets eliminated because the number of persons who sit to the left as well as to the right of E is a prime number, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: E

Q. 73

Study the following information carefully and answer the given questions.

A certain number of persons are sitting in a linear row such that all of them are facing towards the north. The number of persons who sit in the row is more than 15 but not more than 30.

J sits exactly in the middle of the row. Only five persons sit between J and K. L sits five persons away from K and sits third to the right of M, who sits sixth from one of the extreme ends. As many persons sit to the left of M as to the right of H, who sits fourth to the left of N. E sits exactly between J and M. The number of persons who sit to the left as well as to the right of E is a prime number.

If all the persons have the number of balls, which is equal to the position of the person, when counted from left to right, then what will be the number of balls with L?

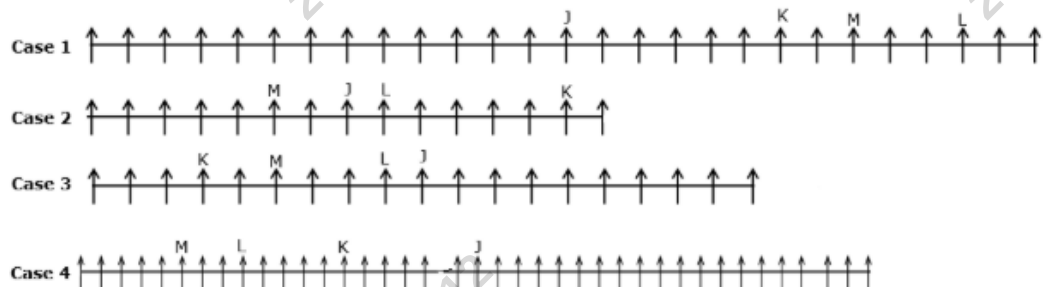

A) 22 balls B) 9 balls C) 12 balls D) 23 balls E) 10 balls 

Explanation:**Final arrangement:**

We have,

- J sits exactly in the middle of the row.
- Only five persons sit between J and K.
- L sits five persons away from K and sits third to the right of M who sits sixth from one of the extreme ends.

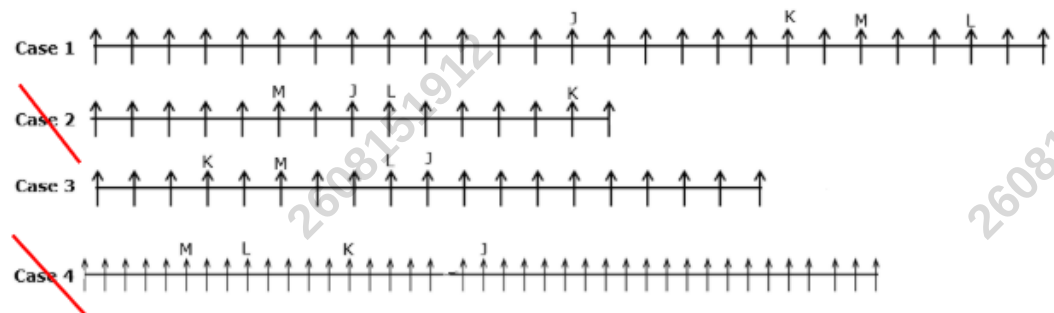

From the above conditions, there are four possibilities.

Again, we have

- The number of persons who sit in the row is **more than 15** but not more than 30.

From the above condition, Case 2 and Case 4 get eliminated, because the number of persons who sit in the row is **more than 15** but not more than 30, which is not satisfied.

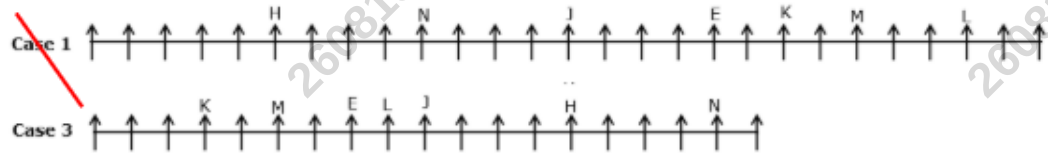

Again, we have

- As many persons sit to the left of M as to the right of H, who sits fourth to the left of N.
- E sits exactly between M and J.
- The number of persons who sit to the left as well as to the right of E is a prime number.

From the above conditions, case-1 gets eliminated because the number of persons who sit to the left as well as to the right of E is a prime number, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: B

Q. 74

Study the following information carefully and answer the given questions.

Ten persons – A, B, C, D, E, F, G, H, I and J are working in a tech firm designated at different posts, viz., Chief Executive Officer (CEO), Chief Operating Officer (COO), Chief Financial Officer (CFO), Chief Technology Officer (CTO), Vice President (VP), Director, Senior Manager, Manager, Team Lead and Associate but not necessarily in the same order. The designations are given in decreasing order such that CEO is the seniormost designation whereas Associate is the juniormost designation.

F is four persons senior to J. As many persons are senior to A as junior to I. C is the CTO. D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D. J is neither a Team Lead nor an Associate. A is designated senior to the Director but junior to COO. E is immediately senior to B, who is not the juniormost designated person.

Who among the following persons is designated as CEO with respect to the final arrangement?

- A) G 
- B) E 
- C) F 
- D) I 
- E) B 

Explanation:**Final arrangement:**

Designations	Persons
CEO	F
COO	H
CFO	A
CTO	C
VP	J
Director	E
Senior Manager	B
Manager	I
Team Lead	D
Associate	G

We have,

- A is designated senior to the Director but junior to COO.
- As many persons are senior to A as junior to I.
- C is the CTO.

From the above conditions, there are two possibilities.

Designations	Case 1	Case 2
	Persons	Persons
CEO		
COO		
CFO		A
CTO	C	C
VP	A	
Director	I	
Senior Manager		
Manager		I
Team Lead		
Associate		

Again, we have

- F is four persons senior to J.
- J is neither a Team Lead nor an Associate.
- E is immediately senior to B who is not the juniormost person.

From the above conditions, case 2 gets eliminated because E is immediately senior to B who is not the juniormost person, which is not satisfied.

But two more possibilities are added. i.e., Case 1(a) and Case 2(a).

Designations	Case 1	Case 1(a)	Case 2	Case 2a
	Persons	Persons	Persons	Persons
CEO		E		F
COO		B	F	
CFO	F	F	A	A
CTO	C	C	C	C
VP	A	A		J
Director	I	I	J	E
Senior Manager	J	J		B
Manager	E		I	I
Team Lead	B		E	
Associate			B	

Again, we have

- D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D.

From the above conditions, Case-1 and Case 1a get eliminated because D is senior to G but junior to H who is neither a CEO nor the immediate senior to D, which is not satisfied.

Hence, Case-2a shows the final arrangement.

Designations	Case 1	Case 1(a)	Case 2a
	Persons	Persons	Persons
CEO	H	E	F
COO	D	B	H
CFO	F	F	A
CTO	C	C	C
VP	A	A	J
Director	I	I	E
Senior Manager	J	J	B
Manager	E	H	I
Team Lead	B	D	D
Associate	G	G	G

Answer: C

Q. 75

Study the following information carefully and answer the given questions.

Ten persons – A, B, C, D, E, F, G, H, I and J are working in a tech firm designated at different posts, viz., Chief Executive Officer (CEO), Chief Operating Officer (COO), Chief Financial Officer (CFO), Chief Technology Officer (CTO), Vice President (VP), Director, Senior Manager, Manager, Team Lead and Associate but not necessarily in the same order. The designations are given in decreasing order such that CEO is the seniormost designation whereas Associate is the juniormost designation.

F is four persons senior to J. As many persons are senior to A as junior to I. C is the CTO. D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D. J is neither a Team Lead nor an Associate. A is designated senior to the Director but junior to COO. E is immediately senior to B, who is not the juniormost designated person.

How many persons are designated between B and the one who is immediately senior to the CTO?

A) One B) Three C) Two D) More than three E) None 

Explanation:**Final arrangement:**

Designations	Persons
CEO	F
COO	H
CFO	A
CTO	C
VP	J
Director	E
Senior Manager	B
Manager	I
Team Lead	D
Associate	G

We have,

- A is designated senior to the Director but junior to COO.
- As many persons are senior to A as junior to I.
- C is the CTO.

From the above conditions, there are two possibilities.

Designations	Case 1	Case 2
	Persons	Persons
CEO		
COO		
CFO		A
CTO	C	C
VP	A	
Director	I	
Senior Manager		
Manager		I
Team Lead		
Associate		

Again, we have

- F is four persons senior to J.
- J is neither a Team Lead nor an Associate.
- E is immediately senior to B who is not the juniormost person.

From the above conditions, case 2 gets eliminated because E is immediately senior to B who is not the juniormost person, which is not satisfied.

But two more possibilities are added. i.e., Case 1(a) and Case 2(a).

Designations	Case 1	Case 1(a)	Case 2	Case 2a
	Persons	Persons	Persons	Persons
CEO		E		F
COO		B	F	
CFO	F	F	A	A
CTO	C	C	C	C
VP	A	A		J
Director	I	I	J	E
Senior Manager	J	J		B
Manager	E		I	I
Team Lead	B		E	
Associate			B	

Again, we have

- D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D.

From the above conditions, Case-1 and Case 1a get eliminated because D is senior to G but junior to H who is neither a CEO nor the immediate senior to D, which is not satisfied.

Hence, Case-2a shows the final arrangement.

Designations	Case 1	Case 1(a)	Case 2a
	Persons	Persons	Persons
CEO	H	E	F
COO	D	B	H
CFO	F	F	A
CTO	C	C	C
VP	A	A	J
Director	I	I	E
Senior Manager	J	J	B
Manager	E	H	I
Team Lead	B	D	D
Associate	G	G	G

Answer: B

Q. 76

Study the following information carefully and answer the given questions.

Ten persons – A, B, C, D, E, F, G, H, I and J are working in a tech firm designated at different posts, viz., Chief Executive Officer (CEO), Chief Operating Officer (COO), Chief Financial Officer (CFO), Chief Technology Officer (CTO), Vice President (VP), Director, Senior Manager, Manager, Team Lead and Associate but not necessarily in the same order. The designations are given in decreasing order such that CEO is the seniormost designation whereas Associate is the juniormost designation.

F is four persons senior to J. As many persons are senior to A as junior to I. C is the CTO. D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D. J is neither a Team Lead nor an Associate. A is designated senior to the Director but junior to COO. E is immediately senior to B, who is not the juniormost designated person.

Four of the following five are alike in a certain way and form a group. Who among the following one does not belong to the group?

A) HJ B) CE C) JB D) IG E) AJ 

Explanation:**Final arrangement:**

Designations	Persons
CEO	F
COO	H
CFO	A
CTO	C
VP	J
Director	E
Senior Manager	B
Manager	I
Team Lead	D
Associate	G

We have,

- A is designated senior to the Director but junior to COO.
- As many persons are senior to A as junior to I.
- C is the CTO.

From the above conditions, there are two possibilities.

Designations	Case 1	Case 2
	Persons	Persons
CEO		
COO		
CFO		A
CTO	C	C
VP	A	
Director	I	
Senior Manager		
Manager		I
Team Lead		
Associate		

Again, we have

- F is four persons senior to J.
- J is neither a Team Lead nor an Associate.
- E is immediately senior to B who is not the juniormost person.

From the above conditions, case 2 gets eliminated because E is immediately senior to B who is not the juniormost person, which is not satisfied.

But two more possibilities are added. i.e., Case 1(a) and Case 2(a).

Designations	Case 1	Case 1(a)	Case 2	Case 2a
	Persons	Persons	Persons	Persons
CEO		E		F
COO		B	F	
CFO	F	F	A	A
CTO	C	C	C	C
VP	A	A		J
Director	I	I	J	E
Senior Manager	J	J		B
Manager	E		I	I
Team Lead	B		E	
Associate			B	

Again, we have

- D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D.

From the above conditions, Case-1 and Case 1a get eliminated because D is senior to G but junior to H who is neither a CEO nor the immediate senior to D, which is not satisfied.

Hence, Case-2a shows the final arrangement.

Designations	Case 1	Case 1(a)	Case 2a
	Persons	Persons	Persons
CEO	H	E	F
COO	D	B	H
CFO	F	F	A
CTO	C	C	C
VP	A	A	J
Director	I	I	E
Senior Manager	J	J	B
Manager	E	H	I
Team Lead	B	D	D
Associate	G	G	G

Answer: A (In all other options, one person is designated between them, except option a)

Q. 77

Study the following information carefully and answer the given questions.

Ten persons – A, B, C, D, E, F, G, H, I and J are working in a tech firm designated at different posts, viz., Chief Executive Officer (CEO), Chief Operating Officer (COO), Chief Financial Officer (CFO), Chief Technology Officer (CTO), Vice President (VP), Director, Senior Manager, Manager, Team Lead and Associate but not necessarily in the same order. The designations are given in decreasing order such that CEO is the seniormost designation whereas Associate is the juniormost designation.

F is four persons senior to J. As many persons are senior to A as junior to I. C is the CTO. D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D. J is neither a Team Lead nor an Associate. A is designated senior to the Director but junior to COO. E is immediately senior to B, who is not the juniormost designated person.

How many persons are senior to J with respect to the final arrangement?

- A) As many persons junior to F 
- B) As many persons designated between A and E 
- C) Three 
- D) As many persons junior to E 
- E) None of these 

Explanation:**Final arrangement:**

Designations	Persons
CEO	F
COO	H
CFO	A
CTO	C
VP	J
Director	E
Senior Manager	B
Manager	I
Team Lead	D
Associate	G

We have,

- A is designated senior to the Director but junior to COO.
- As many persons are senior to A as junior to I.
- C is the CTO.

From the above conditions, there are two possibilities.

Designations	Case 1	Case 2
	Persons	Persons
CEO		
COO		
CFO		A
CTO	C	C
VP	A	
Director	I	
Senior Manager		
Manager		I
Team Lead		
Associate		

Again, we have

- F is four persons senior to J.
- J is neither a Team Lead nor an Associate.
- E is immediately senior to B who is not the juniormost person.

From the above conditions, case 2 gets eliminated because E is immediately senior to B who is not the juniormost person, which is not satisfied.

But two more possibilities are added. i.e., Case 1(a) and Case 2(a).

Designations	Case 1	Case 1(a)	Case 2	Case 2a
	Persons	Persons	Persons	Persons
CEO		E		F
COO		B	F	
CFO	F	F	A	A
CTO	C	C	C	C
VP	A	A		J
Director	I	I	J	E
Senior Manager	J	J		B
Manager	E		I	I
Team Lead	B		E	
Associate			B	

Again, we have

- D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D.

From the above conditions, Case-1 and Case 1a get eliminated because D is senior to G but junior to H who is neither a CEO nor the immediate senior to D, which is not satisfied.

Hence, Case-2a shows the final arrangement.

Designations	Case 1	Case 1(a)	Case 2a
	Persons	Persons	Persons
CEO	H	E	F
COO	D	B	H
CFO	F	F	A
CTO	C	C	C
VP	A	A	J
Director	I	I	E
Senior Manager	J	J	B
Manager	E	H	I
Team Lead	B	D	D
Associate	G	G	G

Answer: D

Q. 78

Study the following information carefully and answer the given questions.

Ten persons – A, B, C, D, E, F, G, H, I and J are working in a tech firm designated at different posts, viz., Chief Executive Officer (CEO), Chief Operating Officer (COO), Chief Financial Officer (CFO), Chief Technology Officer (CTO), Vice President (VP), Director, Senior Manager, Manager, Team Lead and Associate but not necessarily in the same order. The designations are given in decreasing order such that CEO is the seniormost designation whereas Associate is the juniormost designation.

F is four persons senior to J. As many persons are senior to A as junior to I. C is the CTO. D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D. J is neither a Team Lead nor an Associate. A is designated senior to the Director but junior to COO. E is immediately senior to B, who is not the juniormost designated person.

Who among the following persons is senior to the Manager but junior to CTO?

I. J

II. H

III. B

A) Only I

B) Only III

C) Only II and III

D) Only I and III

E) Only I and II

Explanation:**Final arrangement:**

Designations	Persons
CEO	F
COO	H
CFO	A
CTO	C
VP	J
Director	E
Senior Manager	B
Manager	I
Team Lead	D
Associate	G

We have,

- A is designated senior to the Director but junior to COO.
- As many persons are senior to A as junior to I.
- C is the CTO.

From the above conditions, there are two possibilities.

Designations	Case 1	Case 2
	Persons	Persons
CEO		
COO		
CFO		A
CTO	C	C
VP	A	
Director	I	
Senior Manager		
Manager		I
Team Lead		
Associate		

Again, we have

- F is four persons senior to J.
- J is neither a Team Lead nor an Associate.
- E is immediately senior to B who is not the juniormost person.

From the above conditions, case 2 gets eliminated because E is immediately senior to B who is not the juniormost person, which is not satisfied.

But two more possibilities are added. i.e., Case 1(a) and Case 2(a).

Designations	Case 1	Case 1(a)	Case 2	Case 2a
	Persons	Persons	Persons	Persons
CEO		E		F
COO		B	F	
CFO	F	F	A	A
CTO	C	C	C	C
VP	A	A		J
Director	I	I	J	E
Senior Manager	J	J		B
Manager	E		I	I
Team Lead	B		E	
Associate			B	

Again, we have

- D is senior to G but junior to H, who is neither a CEO nor is the immediate senior of D.

From the above conditions, Case-1 and Case 1a get eliminated because D is senior to G but junior to H who is neither a CEO nor the immediate senior to D, which is not satisfied.

Hence, Case-2a shows the final arrangement.

Designations	Case 1	Case 1(a)	Case 2a
	Persons	Persons	Persons
CEO	H	E	F
COO	D	B	H
CFO	F	F	A
CTO	C	C	C
VP	A	A	J
Director	I	I	E
Senior Manager	J	J	B
Manager	E	H	I
Team Lead	B	D	D
Associate	G	G	G

Answer: D

Q. 79

How many such pairs of letters are in the word "PACKAGES" which have as many letters between them as there are in the English alphabetical series (both forward and backward)?

- A) One 
- B) Two 
- C) Three 
- D) More Than Three 
- E) None 

Answer: A

Explanation:

P A C K A G E S

Only one pair of letters.

Q. 80

If a four-letter meaningful word can be formed by using the third and fifth letters from the left end of the word "SWEET" and the second and fourth letters from the left end of the word "CANDY" then what is the first letter from the left end of the newly formed word? Mark X as your answer if more than one word is formed. Mark Z if no meaningful word can be formed.

- A) T 
B) E 
C) D 
D) X 
E) Z 

Explanation:**Answer: C**

Given word: S W E E T

The third and fifth letter from the left end are E and T

Given Word: C A N D Y

The second and fourth letter from the left end are A and D

So, only one meaningful word can be formed, i.e., DATE.

So, the first letter from the left end of the meaningful word is D.

Q. 81

Study the following information carefully and answer the given questions.

Twelve persons, viz., A, B, C, D, E, F, G, H, I, J, K and L sit on the circumference of the hexagonal platform such that six persons sit at the corners and are facing away from the centre while six persons sit on the sides and are facing towards the centre.

Three persons sit between F and L, who sits opposite to A. A sits to the immediate left of C, who does not sit at the corner. The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I. B and H are immediate neighbours of I. D sits two places away from H and opposite to E, who is not sitting adjacent to A. As many persons sit between D and B as between G and D. G is not an immediate neighbour of K.

What is the position of B with respect to J with respect to the final arrangement?

A) Third to the left

B) Third to the right

C) Fourth to the left

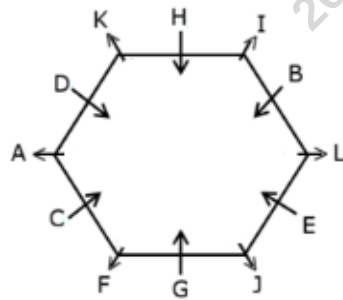

D) Fourth to the right

E) None of these

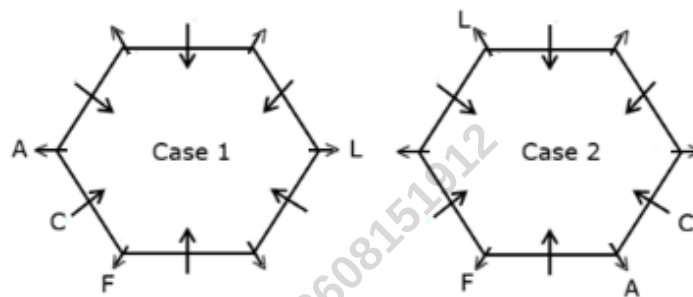

Explanation:**Final arrangement**

We have,

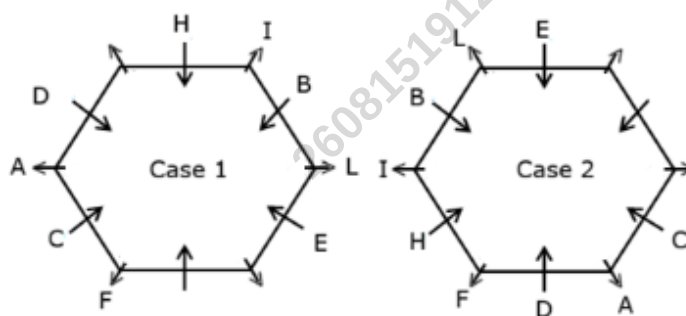

- Three persons sit between F and L, who sit opposite to A.
- A sits to the immediate left of C, who does not sit at the corner.

From the above conditions, there are two possibilities:

Again, we have

- The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I.
- B and H are immediate neighbours of I.
- D sits two places away from H and opposite to E, who is not adjacent to A.

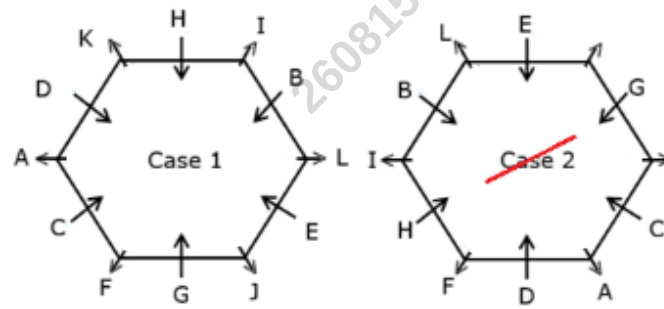

Again, we have

- As many persons sit between D and B as between G and D.
- G is not an immediate neighbour of K.

From the above conditions Case-2 gets eliminated because G is not an immediate neighbour of K, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: A

Q. 82

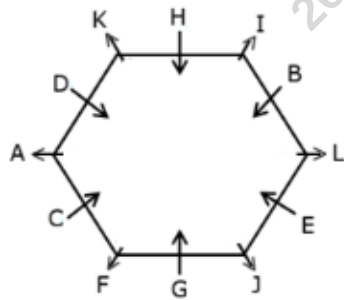

Study the following information carefully and answer the given questions.

Twelve persons, viz., A, B, C, D, E, F, G, H, I, J, K and L sit on the circumference of the hexagonal platform such that six persons sit at the corners and are facing away from the centre while six persons sit on the sides and are facing towards the centre.

Three persons sit between F and L, who sits opposite to A. A sits to the immediate left of C, who does not sit at the corner. The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I. B and H are immediate neighbours of I. D sits two places away from H and opposite to E, who is not sitting adjacent to A. As many persons sit between D and B as between G and D. G is not an immediate neighbour of K.

If G interchanges the position with H and A interchanges the position with L, then how many persons are sitting between G and A when counted from the right of A?

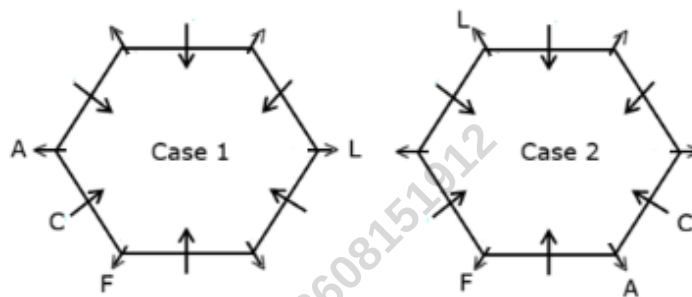

A) Five B) Six C) Seven D) Eight E) None 

Explanation:**Final arrangement**

We have,

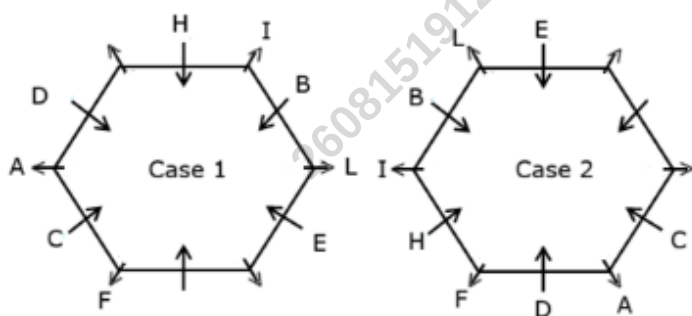

- Three persons sit between F and L, who sit opposite to A.
- A sits to the immediate left of C, who does not sit at the corner.

From the above conditions, there are two possibilities:

Again, we have

- The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I.
- B and H are immediate neighbours of I.
- D sits two places away from H and opposite to E, who is not adjacent to A.

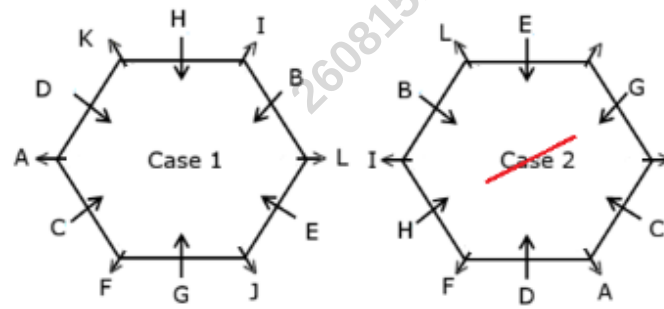

Again, we have

- As many persons sit between D and B as between G and D.
- G is not an immediate neighbour of K.

From the above conditions Case-2 gets eliminated because G is not an immediate neighbour of K, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: D

Q. 83

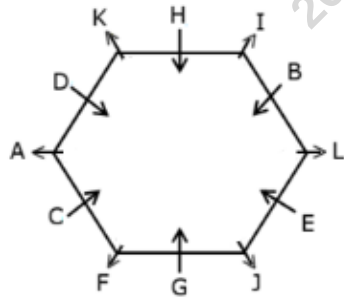

Study the following information carefully and answer the given questions.

Twelve persons, viz., A, B, C, D, E, F, G, H, I, J, K and L sit on the circumference of the hexagonal platform such that six persons sit at the corners and are facing away from the centre while six persons sit on the sides and are facing towards the centre.

Three persons sit between F and L, who sits opposite to A. A sits to the immediate left of C, who does not sit at the corner. The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I. B and H are immediate neighbours of I. D sits two places away from H and opposite to E, who is not sitting adjacent to A. As many persons sit between D and B as between G and D. G is not an immediate neighbour of K.

Who among the following person sits third to the left of the one who sits exactly opposite to F?

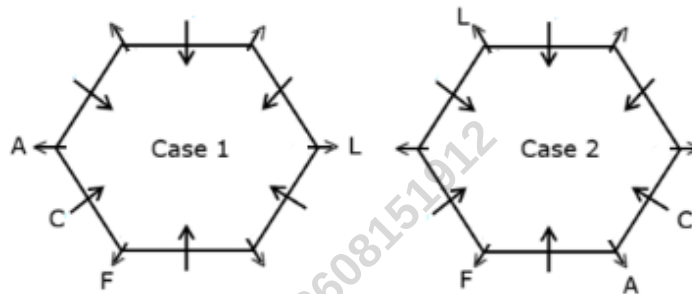

- A) E 
- B) D 
- C) A 
- D) L 
- E) None of these 

Explanation:**Final arrangement**

We have,

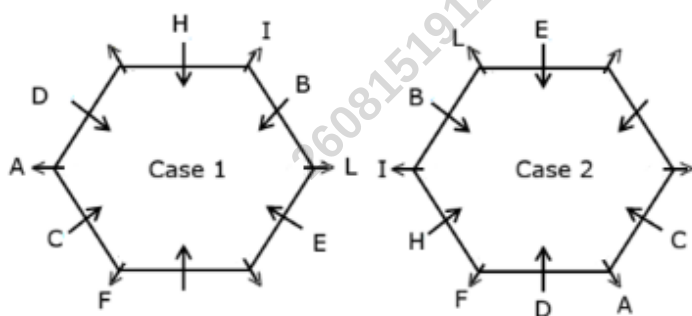

- Three persons sit between F and L, who sit opposite to A.
- A sits to the immediate left of C, who does not sit at the corner.

From the above conditions, there are two possibilities:

Again, we have

- The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I.
- B and H are immediate neighbours of I.
- D sits two places away from H and opposite to E, who is not adjacent to A.

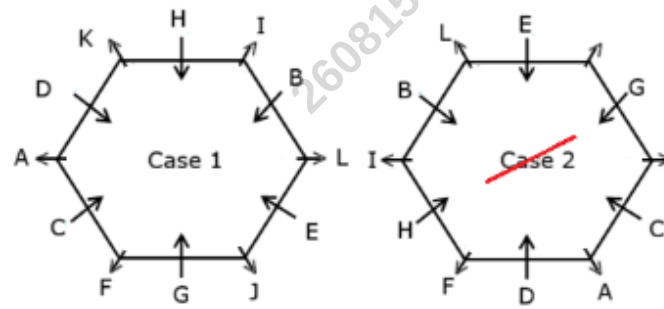

Again, we have

- As many persons sit between D and B as between G and D.
- G is not an immediate neighbour of K.

From the above conditions Case-2 gets eliminated because G is not an immediate neighbour of K, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: B

Q. 84

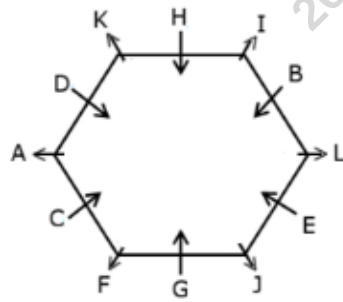

Study the following information carefully and answer the given questions.

Twelve persons, viz., A, B, C, D, E, F, G, H, I, J, K and L sit on the circumference of the hexagonal platform such that six persons sit at the corners and are facing away from the centre while six persons sit on the sides and are facing towards the centre.

Three persons sit between F and L, who sits opposite to A. A sits to the immediate left of C, who does not sit at the corner. The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I. B and H are immediate neighbours of I. D sits two places away from H and opposite to E, who is not sitting adjacent to A. As many persons sit between D and B as between G and D. G is not an immediate neighbour of K.

If one of the neighbours of K is D, then who among the following person is another neighbour?

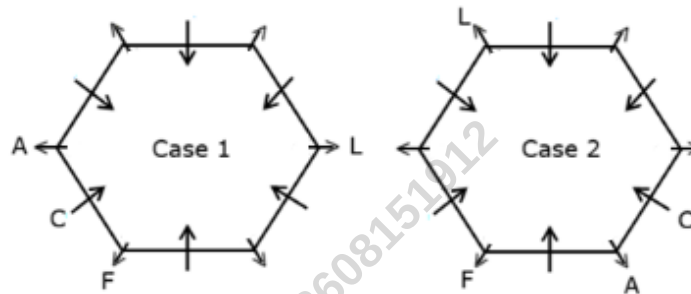

- A) A 
- B) L 
- C) B 
- D) I 
- E) H 

Explanation:**Final arrangement**

We have,

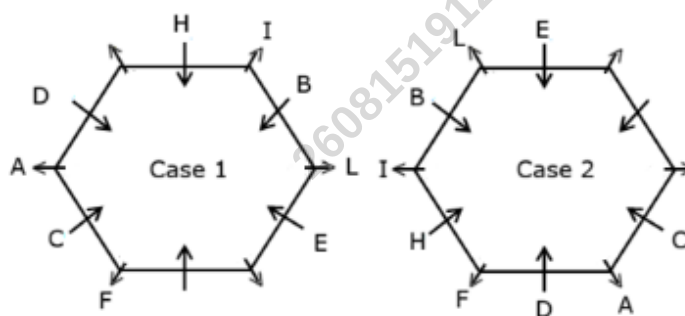

- Three persons sit between F and L, who sit opposite to A.
- A sits to the immediate left of C, who does not sit at the corner.

From the above conditions, there are two possibilities:

Again, we have

- The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I.
- B and H are immediate neighbours of I.
- D sits two places away from H and opposite to E, who is not adjacent to A.

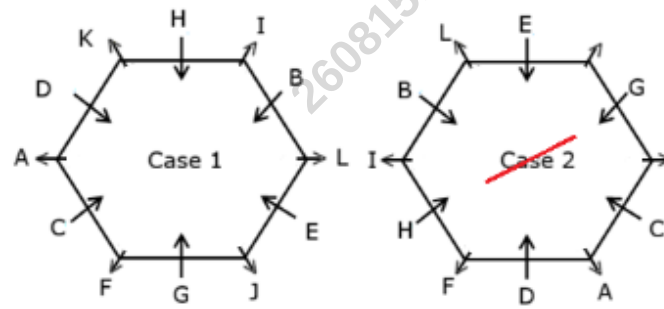

Again, we have

- As many persons sit between D and B as between G and D.
- G is not an immediate neighbour of K.

From the above conditions Case-2 gets eliminated because G is not an immediate neighbour of K, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: E

Q. 85

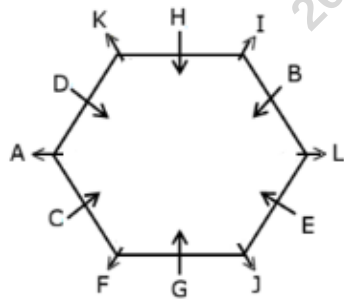

Study the following information carefully and answer the given questions.

Twelve persons, viz., A, B, C, D, E, F, G, H, I, J, K and L sit on the circumference of the hexagonal platform such that six persons sit at the corners and are facing away from the centre while six persons sit on the sides and are facing towards the centre.

Three persons sit between F and L, who sits opposite to A. A sits to the immediate left of C, who does not sit at the corner. The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I. B and H are immediate neighbours of I. D sits two places away from H and opposite to E, who is not sitting adjacent to A. As many persons sit between D and B as between G and D. G is not an immediate neighbour of K.

Four of the following five are alike in a certain way. Who among the following one does not belong to the group?

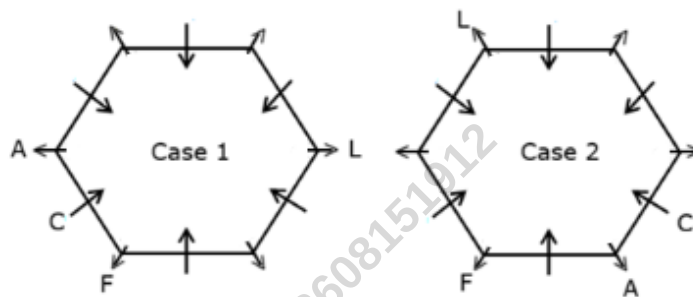

A) IF B) LD C) BC D) JK E) AL 

Explanation:**Final arrangement**

We have,

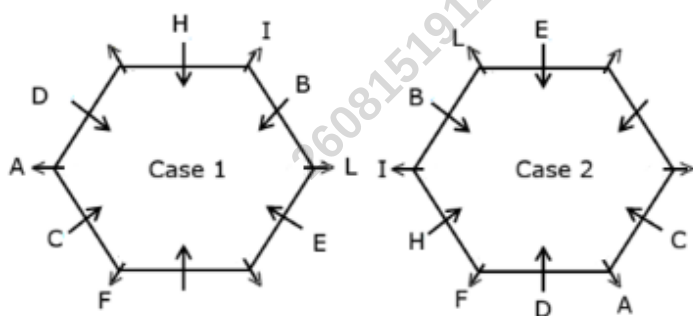

- Three persons sit between F and L, who sit opposite to A.
- A sits to the immediate left of C, who does not sit at the corner.

From the above conditions, there are two possibilities:

Again, we have

- The one who sits second to the right of C sits opposite to the one who sits to the immediate left of I.
- B and H are immediate neighbours of I.
- D sits two places away from H and opposite to E, who is not adjacent to A.

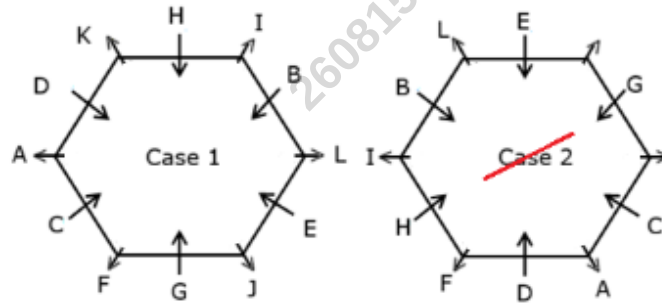

Again, we have

- As many persons sit between D and B as between G and D.
- G is not an immediate neighbour of K.

From the above conditions Case-2 gets eliminated because G is not an immediate neighbour of K, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: B (In all other options, the two persons are sitting opposite to each other.)

Q. 86

Find the odd one out.

A) BDFG ✗

B) JKMQ ✓

C) UWYZ ✗

D) DFHI ✗

E) NPRS ✗

Answer: B

Explanation:

In every word, the combination of first three letters is the second succeeding letter of each letter in the word. The last letter is the immediate next letter of the third letter. Hence, JKM is the odd one among others.

Q. 87	Study the following information carefully and answer the given questions. If all the digits of the given number “6192435087” are arranged in the ascending order from the left end, then what is the sum of the digits, which remain unchanged in their positions? A) 11  B) 12  C) 13  D) 10  E) 9 
Explanation:	Answer: C Given number: 6192435087 Required number: 0123456789 The unchanged digits are 1, 4 and 8 Required sum=1 + 4 + 8 =13

Q. 88

Study the following information carefully and answer the given questions.

Seven people – P, Q, R, S, T, U, and V went to the movie on seven different days of the same week, starting from Monday to Sunday. Only one person went to the movie on each day.

Only two persons went between Q and T, who went before Wednesday. R went two days after Q. As many persons went before R as after P. S went before V but after U. V did not go on Saturday.

Who went immediately before S with respect to the final arrangement?

A) Q 

B) T 

C) V 

D) P 

E) None of these 

Explanation:

Final Arrangement:

Days	Persons
Monday	T
Tuesday	P
Wednesday	U
Thursday	Q
Friday	S
Saturday	R
Sunday	V

Answer: A

Q. 89

Study the following information carefully and answer the given questions.

M is the sister of E, who is married to P. P is the daughter-in-law of V, who has only one daughter. S is the brother-in-law of E and the father of T. G is the grandfather of T. U is the son-in-law of G and he is not the father of H. U's wife is the daughter of Q, who has only two children. J is the daughter of Q and mother of H.

If J has only two sons, then how is H related to P?

A) Son 

B) Brother 

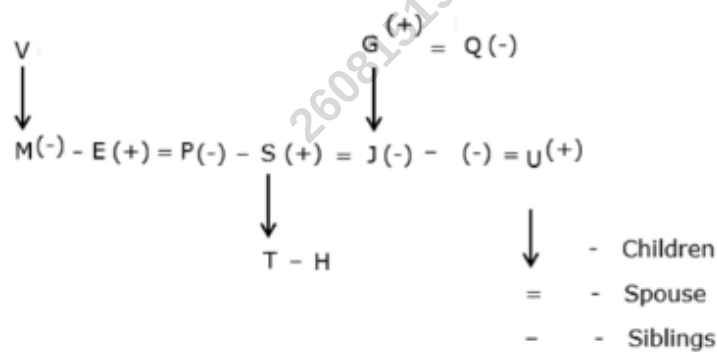

C) Nephew 

D) Brother-in-law 

E) Son-in-law 

Explanation:

Final arrangement

Answer: C

Q. 90

Study the following information carefully and answer the given questions.

M is the sister of E, who is married to P. P is the daughter-in-law of V, who has only one daughter. S is the brother-in-law of E and the father of T. G is the grandfather of T. U is the son-in-law of G and he is not the father of H. U's wife is the daughter of Q, who has only two children. J is the daughter of Q and mother of H.

How is U related to J?

A) Husband

B) Son-in-law

C) Nephew

D) Cousin brother

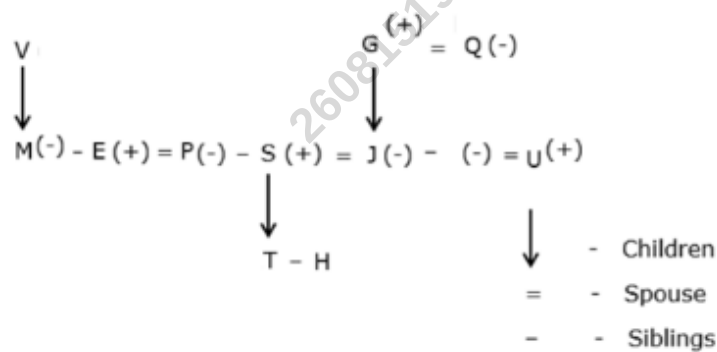

E) Brother-in-law

Explanation:

Final arrangement

Answer: E

Q. 92

Study the following information carefully and answer the given questions

Aaron starts walking from point A towards the north for 6km to reach point B. From point B, he takes a right and walks 8km in the same direction to reach point C. Then he walks 3km south to reach point D. From point D he walks 8km after turning left to reach point E. From point E, he walks 3km south to reach F. Then he takes two consecutive turns, first left and then right turns of 4km and 6km to reach points G and H respectively. From point H he turns right and walks for 16km to reach point I. And finally he walks 3km north to reach point J and stops.

Which of the following statements is not true with respect to the final arrangement?

I. point C is northwest of point G

II. point A is to the west of point F

III. Point E is southeast of point B

A) Only I

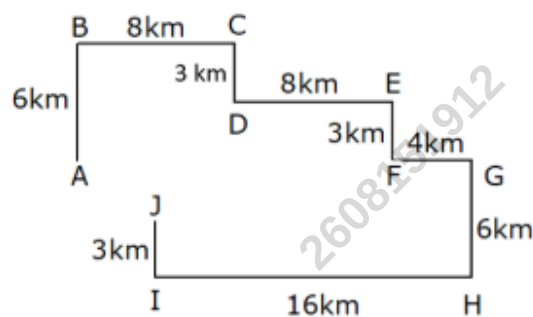

B) Only III

C) Only II and III

D) Only I and III

E) All the statements are true

Final arrangement

Explanation:

Answer: E

Q. 93

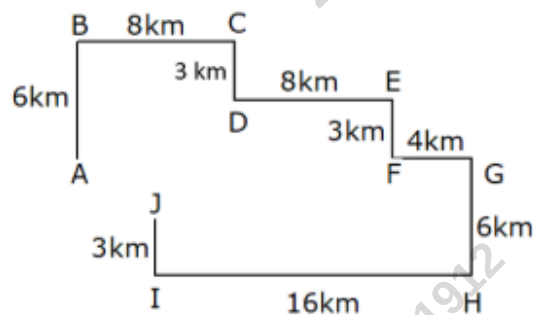

Study the following information carefully and answer the given questions

Aaron starts walking from point A towards the north for 6km to reach point B. From point B, he takes a right and walks 8km in the same direction to reach point C. Then he walks 3km south to reach point D. From point D he walks 8km after turning left to reach point E. From point E, he walks 3km south to reach F. Then he takes two consecutive turns, first left and then right turns of 4km and 6km to reach points G and H respectively. From point H he turns right and walks for 16km to reach point I. And finally he walks 3km north to reach point J and stops.

Four of the following five are alike in a certain way and hence form a group. Which of the following does not belong to that group?

- A) AH 
- B) JB 
- C) CG 
- D) DH 
- E) BI 

Final arrangement

Explanation:

Answer: B (In all other options, the second point is in south-east of the first point except in option b)

Q. 94

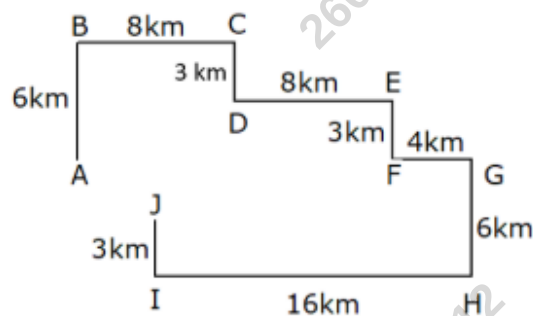

Study the following information carefully and answer the given questions

Aaron starts walking from point A towards the north for 6km to reach point B. From point B, he takes a right and walks 8km in the same direction to reach point C. Then he walks 3km south to reach point D. From point D he walks 8km after turning left to reach point E. From point E, he walks 3km south to reach F. Then he takes two consecutive turns, first left and then right turns of 4km and 6km to reach points G and H respectively. From point H he turns right and walks for 16km to reach point I. And finally he walks 3km north to reach point J and stops.

What is the shortest distance between A and J?

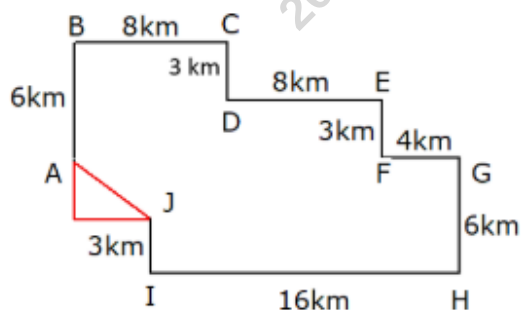

- A) 6km ☒
- B) 4km ☒
- C) 5km ☒
- D) 7km ☒
- E) 9km ☒

Final arrangement

Answer: C

Explanation:

$$AJ^2 = 4^2 + 3^2$$

$$AJ = \sqrt{25} = 5\text{km}$$

Q. 95	Study the following information carefully and answer the given questions. If 'BEAT' is coded as 'DCYV' and 'SING' is coded as 'UGPI'. In the same way, 'PLAYLIST' is coded as? A) AYNANGUV  B) RNYRNGUV  C) RNYANGUV  D) NARYNGUV  E) YARNNGUV 
Explanation:	Answer: C In the given words, the codes are : consonants = +2, vowels = -2 So, PLAYLIST is coded as RNYANGUV.

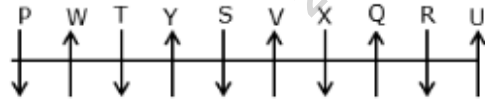

Q. 96

Study the following information carefully and answer the given questions.

Ten persons – P, Q, R, S, T, U, V, W, X and Y are sitting in a straight line equidistant from each other, but not necessarily in the same order. Some of them are facing south while some are facing north. No two adjacent persons face the same direction.

P sits fourth to the right of S, where either of them sits at an extreme end. As many persons sit to the right of P as to the right of U. U sits fourth to the right of V, who does not sit at an extreme end. W sits second to the left of Y, who neither sits adjacent to V nor faces the same direction as S. T sits adjacent to W. The number of persons who sit between T and Q is a perfect square but greater than 1. R sits to the immediate right of Q and faces south.

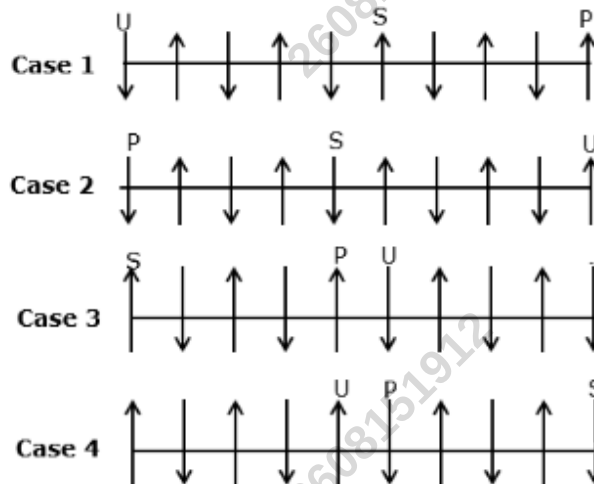

Who among the following person sits second to the right of R?A) V B) P C) X D) S E) None of these 

Explanation:**Final arrangement:**

We have,

- P sits fourth to the right of S, where either of them sits at an extreme end.
- As many persons sit to the right of P as to the right of U.

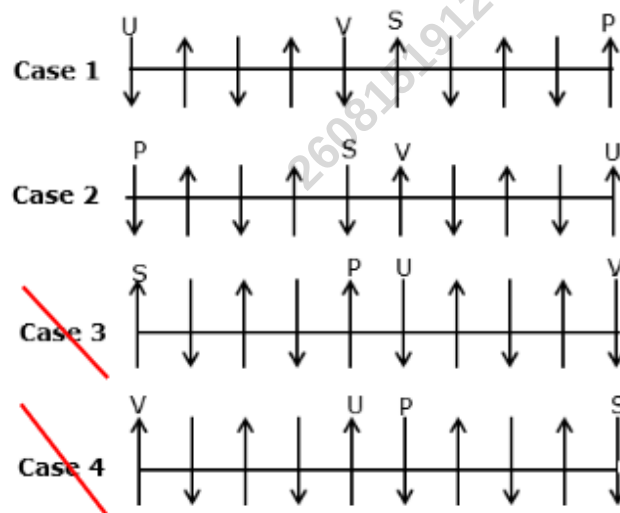

From the above conditions, there are four possibilities:

Again, we have

- U sits fourth to the right of V who does not sit at an extreme end.

From the above condition, Case 3 and Case 4 get eliminated because U sits fourth to the right of V who does not sit at an extreme end, which is not satisfied.

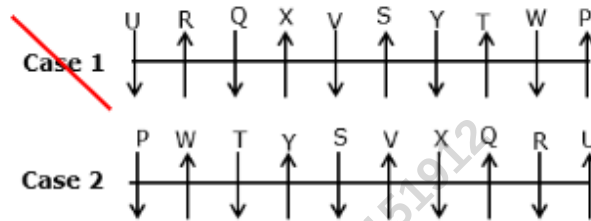

Again, we have

- W sits second to the left of Y who neither sits adjacent to V nor faces the same direction as S.
- T sits adjacent to W.
- The number of persons who sit between T and Q is a perfect square but greater than 1.

- R sits to the immediate right of Q and faces south.

From the above conditions, case-1 gets eliminated because R sits to the immediate right of Q and faces south, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: C

Q. 97

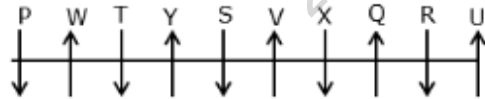

Study the following information carefully and answer the given questions.

Ten persons – P, Q, R, S, T, U, V, W, X and Y are sitting in a straight line equidistant from each other, but not necessarily in the same order. Some of them are facing south while some are facing north. No two adjacent persons face the same direction.

P sits fourth to the right of S, where either of them sits at an extreme end. As many persons sit to the right of P as to the right of U. U sits fourth to the right of V, who does not sit at an extreme end. W sits second to the left of Y, who neither sits adjacent to V nor faces the same direction as S. T sits adjacent to W. The number of persons who sit between T and Q is a perfect square but greater than 1. R sits to the immediate right of Q and faces south.

If one of the immediate neighbours of S is V, then who among the following persons is the other neighbour?

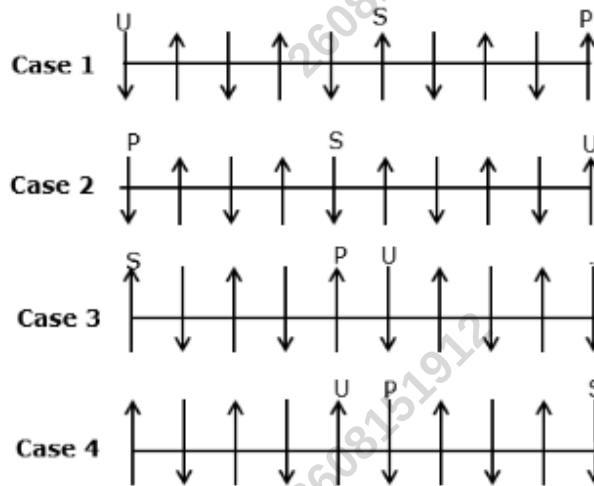

- A) P 
- B) R 
- C) X 
- D) Y 
- E) Q 

Explanation:**Final arrangement:**

We have,

- P sits fourth to the right of S, where either of them sits at an extreme end.
- As many persons sit to the right of P as to the right of U.

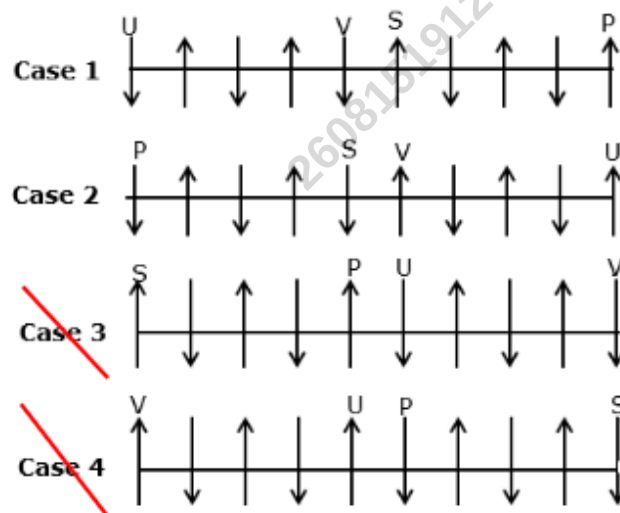

From the above conditions, there are four possibilities:

Again, we have

- U sits fourth to the right of V who does not sit at an extreme end.

From the above condition, Case 3 and Case 4 get eliminated because U sits fourth to the right of V who does not sit at an extreme end, which is not satisfied.

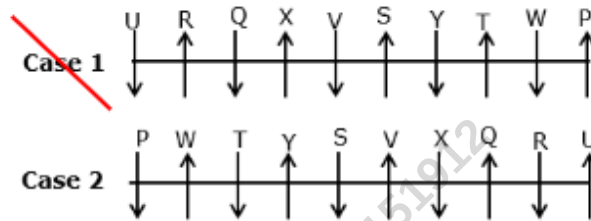

Again, we have

- W sits second to the left of Y who neither sits adjacent to V nor faces the same direction as S.
- T sits adjacent to W.
- The number of persons who sit between T and Q is a perfect square but greater than 1.

- R sits to the immediate right of Q and faces south.

From the above conditions, case-1 gets eliminated because R sits to the immediate right of Q and faces south, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: D

Q. 98

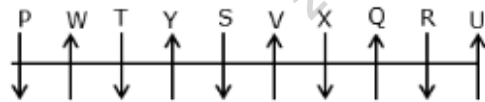

Study the following information carefully and answer the given questions.

Ten persons – P, Q, R, S, T, U, V, W, X and Y are sitting in a straight line equidistant from each other, but not necessarily in the same order. Some of them are facing south while some are facing north. No two adjacent persons face the same direction.

P sits fourth to the right of S, where either of them sits at an extreme end. As many persons sit to the right of P as to the right of U. U sits fourth to the right of V, who does not sit at an extreme end. W sits second to the left of Y, who neither sits adjacent to V nor faces the same direction as S. T sits adjacent to W. The number of persons who sit between T and Q is a perfect square but greater than 1. R sits to the immediate right of Q and faces south.

Four of the following five are similar in such a way that they form a group. Which one of the following doesn't belong to the group?

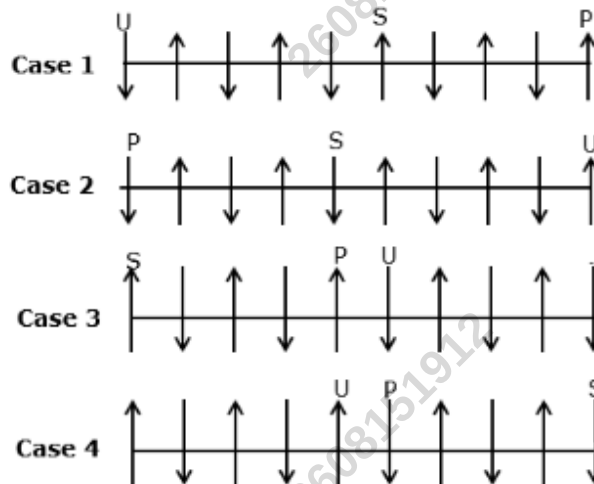

A) W B) P C) V D) U E) Y 

Explanation:**Final arrangement:**

We have,

- P sits fourth to the right of S, where either of them sits at an extreme end.
- As many persons sit to the right of P as to the right of U.

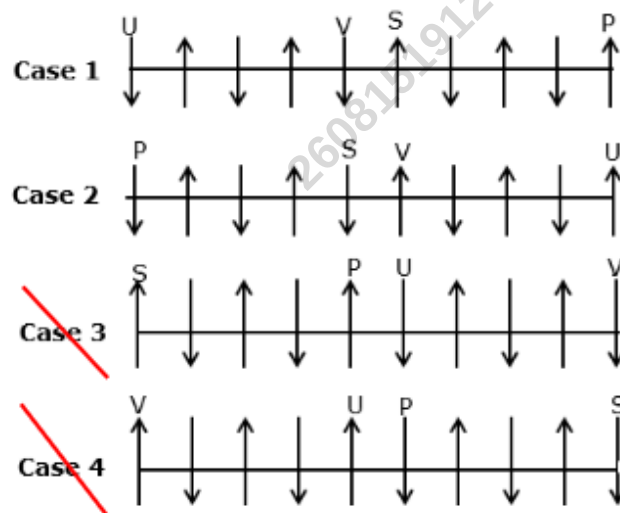

From the above conditions, there are four possibilities:

Again, we have

- U sits fourth to the right of V who does not sit at an extreme end.

From the above condition, Case 3 and Case 4 get eliminated because U sits fourth to the right of V who does not sit at an extreme end, which is not satisfied.

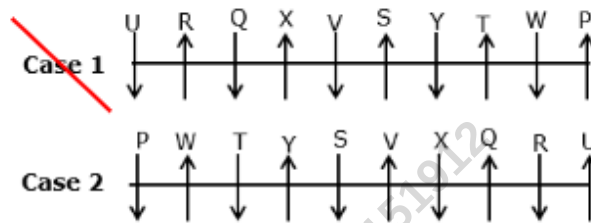

Again, we have

- W sits second to the left of Y who neither sits adjacent to V nor faces the same direction as S.
- T sits adjacent to W.
- The number of persons who sit between T and Q is a perfect square but greater than 1.

- R sits to the immediate right of Q and faces south.

From the above conditions, case-1 gets eliminated because R sits to the immediate right of Q and faces south, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: B (In all other options, the persons are facing north direction, except option b)

Q. 99

Study the following information carefully and answer the given questions.

Ten persons – P, Q, R, S, T, U, V, W, X and Y are sitting in a straight line equidistant from each other, but not necessarily in the same order. Some of them are facing south while some are facing north. No two adjacent persons face the same direction.

P sits fourth to the right of S, where either of them sits at an extreme end. As many persons sit to the right of P as to the right of U. U sits fourth to the right of V, who does not sit at an extreme end. W sits second to the left of Y, who neither sits adjacent to V nor faces the same direction as S. T sits adjacent to W. The number of persons who sit between T and Q is a perfect square but greater than 1. R sits to the immediate right of Q and faces south.

What is the position of U with respect to X with respect to the final arrangement?

A) Third to the left

B) Fourth to the left

C) Third to the right

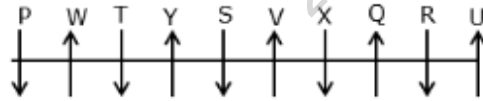

D) Immediate right

E) None of these

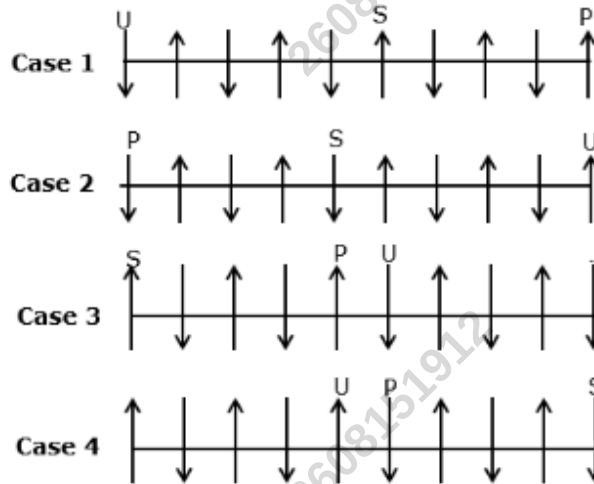

Explanation:**Final arrangement:**

We have,

- P sits fourth to the right of S, where either of them sits at an extreme end.
- As many persons sit to the right of P as to the right of U.

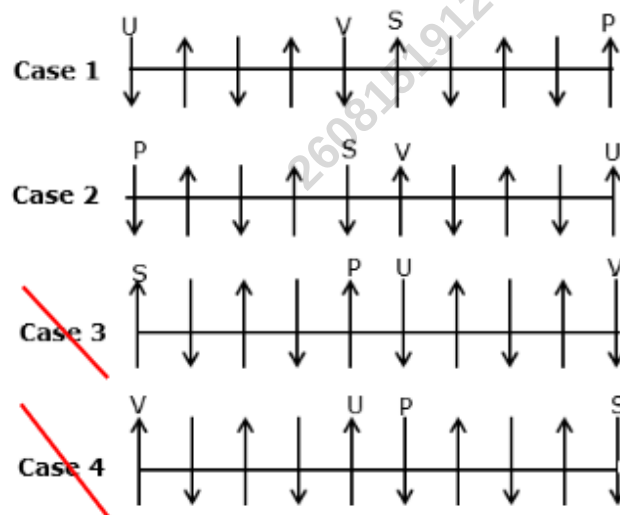

From the above conditions, there are four possibilities:

Again, we have

- U sits fourth to the right of V who does not sit at an extreme end.

From the above condition, Case 3 and Case 4 get eliminated because U sits fourth to the right of V who does not sit at an extreme end, which is not satisfied.

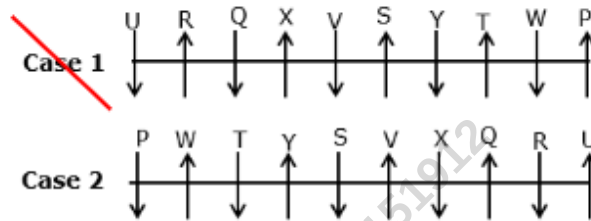

Again, we have

- W sits second to the left of Y who neither sits adjacent to V nor faces the same direction as S.
- T sits adjacent to W.
- The number of persons who sit between T and Q is a perfect square but greater than 1.

- R sits to the immediate right of Q and faces south.

From the above conditions, case-1 gets eliminated because R sits to the immediate right of Q and faces south, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: A

Q. 100

Study the following information carefully and answer the given questions.

Ten persons – P, Q, R, S, T, U, V, W, X and Y are sitting in a straight line equidistant from each other, but not necessarily in the same order. Some of them are facing south while some are facing north. No two adjacent persons face the same direction.

P sits fourth to the right of S, where either of them sits at an extreme end. As many persons sit to the right of P as to the right of U. U sits fourth to the right of V, who does not sit at an extreme end. W sits second to the left of Y, who neither sits adjacent to V nor faces the same direction as S. T sits adjacent to W. The number of persons who sit between T and Q is a perfect square but greater than 1. R sits to the immediate right of Q and faces south.

Which of the following statement(s) is / are TRUE as per the final arrangement?

A) P and R sits at an extreme end

B) Q sits second to the right of U

C) R sits to the immediate left of X

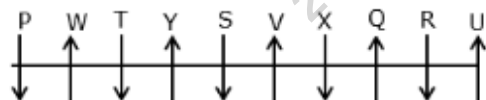

D) T faces the same direction as Y

E) Only two persons sits between T and V

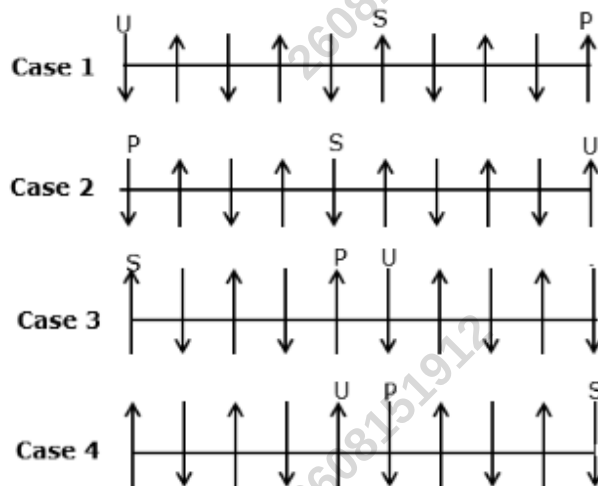

Explanation:**Final arrangement:**

We have,

- P sits fourth to the right of S, where either of them sits at an extreme end.
- As many persons sit to the right of P as to the right of U.

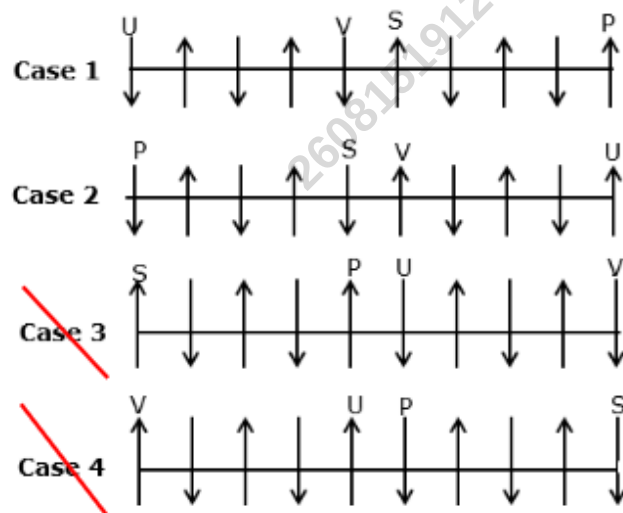

From the above conditions, there are four possibilities:

Again, we have

- U sits fourth to the right of V who does not sit at an extreme end.

From the above condition, Case 3 and Case 4 get eliminated because U sits fourth to the right of V who does not sit at an extreme end, which is not satisfied.

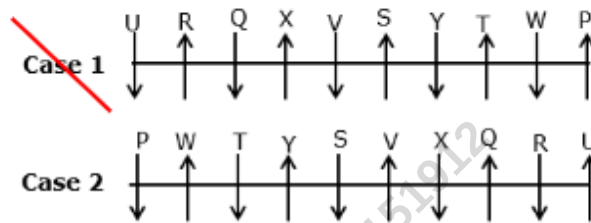

Again, we have

- W sits second to the left of Y who neither sits adjacent to V nor faces the same direction as S.
- T sits adjacent to W.
- The number of persons who sit between T and Q is a perfect square but greater than 1.

- R sits to the immediate right of Q and faces south.

From the above conditions, case-1 gets eliminated because R sits to the immediate right of Q and faces south, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: E
