

RBE SBI Clerk Live Mock 01, August 24, 2026

Q. 1

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- What is the primary theme and tone of the passage?

- a) Describing the rapid decline of global commodity prices across foreign nations with an indifferent tone.

- b) Critiquing international financial institutions for imposing harsh recovery conditions with an angry tone.
- c) Evaluating historical global monetary policies across developed markets with a nostalgic, relaxed tone.
- d) Analyzing macroeconomic shocks in emerging economies with an analytical, objective, and constructive tone.

The correct answer is: Analyzing macroeconomic shocks in emerging economies with an analytical, objective, and constructive tone.

Explanation:

- The passage discusses **emerging economies** facing **macroeconomic shocks** due to external monetary policy shifts, geopolitical tensions, and commodity volatility.
- It highlights **policy dilemmas** (raising interest rates vs. supporting growth), **structural vulnerabilities** (fiscal deficits, sovereign debt), and the **need for reforms** (tax compliance, export diversification, financial modernization).
- The tone is **objective and analytical**, presenting facts, causes, and consequences without emotional bias.
- It is also **constructive**, as it emphasizes solutions like structural reforms, balanced policy blends, and institutional strength for long-term resilience.

Explanation:

Why other options are incorrect:

- **Describing the rapid decline of global commodity prices with an indifferent tone** → Too narrow; the passage covers broader macroeconomic shocks, not just commodity prices.
- **Critiquing international financial institutions with an angry tone** → Wrong; the passage acknowledges their emphasis on resilience but does not criticize them.
- **Evaluating historical global monetary policies with a nostalgic tone** → Incorrect; the passage is about current challenges, not historical reflection.
- **Advocating immediate reliance on short-term interventionist measures with an urgent tone** → Wrong; the passage stresses that short-term measures alone are insufficient and structural reforms are essential.

Q. 2

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- Which of the following options represents the most accurate SYNONYM for the word 'volatile' as used in Paragraph 1 of the passage?

a) Unpredictable 

b) Consistent 

c) Permanent

d) Negligible

The correct answer is: Unpredictable

Explanation:

- In **Paragraph 1**, the word *volatile* is used in the context of **global commodity markets**.
- *Volatile* here means **unstable, subject to sudden changes, or unpredictable in behavior**.

Let's check each option:

Explanation:

1. **Unpredictable** → ✓ Correct synonym. Matches the meaning of "volatile" (markets that fluctuate suddenly).
2. **Consistent** → ✗ Opposite meaning; consistent means stable and regular.
3. **Permanent** → ✗ Wrong; permanent means lasting forever, not unstable.
4. **Negligible** → ✗ Wrong; negligible means insignificant, not unstable.
5. **Monotonous** → ✗ Wrong; monotonous means dull and repetitive, not unstable.

Q. 3

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- Which of the following options represents the most accurate ANTONYM for the word 'prudent' as used in Paragraph 3 of the passage?

a) Sensible 

b) Reckless 

c) Judicious ✗

d) Strategic ✗

The correct answer is: Reckless

Explanation:

- In **Paragraph 3**, the word *prudent* is used in the phrase: “...building institutional strength and maintaining **prudent fiscal management** will remain paramount...”
- *Prudent* means **careful, wise, sensible, judicious, discreet, and strategic in decision-making**.
- Therefore, its **most accurate antonym** would be **reckless**, which means careless, rash, or lacking caution.

Explanation:

Checking each option:

1. **Sensible** → Synonym of prudent, not antonym.
2. **Reckless** → ✓ Correct antonym; opposite of careful and wise.
3. **Judicious** → Synonym of prudent, meaning showing good judgment.
4. **Strategic** → Synonym/related term, not opposite.
5. **Discreet** → Synonym of prudent, meaning cautious and careful.

Q. 4

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- According to the passage, which of the following statements is/are TRUE regarding the economic challenges faced by emerging markets?

- I. Central bank interest rate hikes in developed nations led to severe capital outflows from developing economies.
- II. Monetary tightening by domestic central banks alone completely eliminated

supply-side disruptions in local industries.

III. Limited fiscal space and depleted foreign exchange reserves constrained the effectiveness of countercyclical fiscal measures.

- a) Only statement I ✗
- b) Only statement II ✗
- c) Both statements I and III ✓
- d) Both statements II and III ✗

The correct answer is: Both statements I and III

Explanation:

- **Statement I:** *Central bank interest rate hikes in developed nations led to severe capital outflows from developing economies.* ✓ True. The passage clearly states that when developed nations raised interest rates, **capital flows swiftly reversed away from developing nations**, causing currency depreciation and imported inflation.
- **Statement II:** *Monetary tightening by domestic central banks alone completely eliminated supply-side disruptions in local industries.* ✗ False. The passage explicitly mentions that **supply-chain disruptions severely burdened local industries**, and that **monetary tightening alone could not effectively rectify supply-side constraints**. So, this statement is incorrect.
- **Statement III:** *Limited fiscal space and depleted foreign exchange reserves constrained the effectiveness of countercyclical fiscal measures.* ✓ True. The passage notes that the **efficacy of policy responses was constrained by diminished foreign exchange reserves and limited fiscal space**.

Explanation:

Q. 5

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- Based on the reading of the passage, which of the following inferences can be logical and validly drawn?

I. Supply-chain disruptions in developing economies can be easily solved without implementing structural reforms.

II. Emerging markets that focus solely on short-term interventionist policies remain vulnerable to future global economic turmoil.

III. High fiscal deficits and unsustainable sovereign debt aggravate the negative impacts of external monetary shifts.

- a) Only inference I ✗
- b) Only inference II ✗
- c) Both inferences I and III ✗
- d) Both inferences II and III ✓

The correct answer is: Both inferences II and III

Explanation:

- **Inference I:** *Supply-chain disruptions in developing economies can be easily solved without implementing structural reforms.* ✗ False. The passage clearly states that **monetary tightening alone could not effectively rectify supply-side constraints**, and emphasizes the need for **structural reforms**. So disruptions cannot be solved easily without reforms.
- **Inference II:** *Emerging markets that focus solely on short-term interventionist policies remain vulnerable to future global economic turmoil.* ✓ True. The passage highlights that **short-term macroeconomic adjustments only provide temporary relief** and that **structural recalibration is indispensable for long-term resilience**. Hence, reliance only on short-term measures leaves economies vulnerable.
- **Inference III:** *High fiscal deficits and unsustainable sovereign debt aggravate the negative impacts of external monetary shifts.* ✓ True. The passage explicitly mentions that external shocks **exposed underlying structural vulnerabilities, particularly fiscal deficits and unsustainable sovereign debt loads**, which worsen the impact of external monetary policy changes.

Explanation:

Q. 6

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- Which of the following words/phrases fits grammatically and contextually into the blank space in Paragraph 3?

a) structural

b) temporary

c) restricting ✗

d) vulnerable ✗

The correct answer is: equitable

Explanation:

- The blank is in the sentence: *"International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and _____ growth strategies."*

Let's test each option:

- structural** → Grammatically possible, but redundant because "structural reforms" are already discussed earlier. Doesn't fit smoothly with "growth strategies."
- temporary** → Illogical; growth strategies are not described as temporary.
- restricting** → Negative and contextually wrong; the passage advocates supportive, not restrictive, strategies.
- vulnerable** → Grammatically incorrect; "vulnerable growth strategies" doesn't make sense.
- equitable** → ✓ Correct. Fits grammatically and contextually. International institutions emphasize **equitable growth strategies** (fair, inclusive, balanced), which aligns with the constructive tone of the passage.

Explanation:

Q. 7

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- According to Paragraph 2 of the passage, which of the following is NOT mentioned as an essential structural reform for long-term economic resilience?

- a) Enhancing tax compliance mechanisms within domestic national economies

- b) Modernizing domestic financial architecture to strengthen banking systems
- c) Fostering export diversification to reduce reliance on single commodities
- d) Artificially inflating foreign currency values to boost national reserves ✓

The correct answer is: Artificially inflating foreign currency values to boost national reserves

Explanation:

In **Paragraph 2**, the passage explicitly lists the following **essential structural reforms** for long-term resilience:

1. Enhancing tax compliance mechanisms
2. Modernizing domestic financial architecture
3. Fostering export diversification

It also emphasizes the need for **comprehensive structural recalibration**.

However, **artificially inflating foreign currency values to boost national reserves** is **not mentioned** in the passage. In fact, such artificial manipulation would contradict the constructive and sustainable reform approach advocated in the text.

Q. 8

Read the following passage carefully and answer the questions given below.

In recent years, emerging economies have encountered severe macroeconomic headwinds triggered by external monetary policy shifts, persistent geopolitical tensions, and volatile global commodity markets. As central banks in developed nations raised interest rates to combat domestic inflation, capital flows swiftly reversed away from developing nations, causing sharp currency depreciations and escalating imported inflation. These external shocks exposed underlying structural vulnerabilities within emerging markets, particularly fiscal deficits and unsustainable sovereign debt loads. Consequently, policymakers in these nations faced an intricate dilemma: whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement.

To mitigate these vulnerabilities, several developing economies attempted to deploy countercyclical fiscal measures alongside targeted foreign exchange interventions. However, the efficacy of such policy responses was frequently constrained by diminished foreign exchange reserves and limited fiscal space. Furthermore, supply-chain disruptions severely burdened local industries, leading to supply-side constraints that monetary tightening alone could not effectively rectify. Structural reforms—such as enhancing tax compliance mechanisms, modernizing domestic financial architecture, and fostering export diversification—emerged as indispensable imperative requirements for long-term resilience. Without comprehensive structural recalibration, short-term macroeconomic interventionist policy adjustments merely offered temporary relief rather than sustainable economic stabilization.

Ultimately, navigating economic shocks requires a balanced policy blend that harmonizes immediate macroeconomic interventions with long-term structural reforms. International financial institutions have increasingly emphasized the necessity of proactive policy frameworks, advocate resilient financial buffers, and ____ growth strategies. Emerging markets that successfully implemented comprehensive structural reforms demonstrated significantly higher resilience against external shocks compared to those relying solely on reactive policy levers. Moving forward, building institutional strength and maintaining prudent fiscal management will remain paramount for developing economies striving to achieve sustained prosperity amidst an increasingly turbulent and unpredictable global economic landscape.

Q- What core dilemma did policymakers in emerging economies encounter when developed nations raised interest rates?

- a) Choosing between raising domestic rates to curb capital flight or maintaining lower rates to support growth.

- b) Choosing between completely abandoning international trade agreements or freezing all domestic central bank operations. ✗
- c) Choosing between expanding government welfare spending rapidly or privatizing all public utility transport sectors. ✗
- d) Choosing between printing unlimited fiat currency notes or shutting down all domestic agricultural credit channels. ✗

The correct answer is: Choosing between raising domestic rates to curb capital flight or maintaining lower rates to support growth.

Explanation:

Explanation:

- The passage clearly states that policymakers in emerging economies faced a dilemma: "...whether to raise domestic interest rates to stabilize exchange rates at the risk of choking nascent domestic economic recovery, or to keep monetary policy accommodative to support growth at the risk of accelerating capital flight and currency debasement."
- This directly matches **Option A**.

Q. 9

Identify the error given in the sentence:

The regulatory board has decided to / advice all financial institutions to / maintain adequate capital buffer reserves / during periods of macroeconomic uncertainty.

- a) The regulatory board has decided to ✗
- b) advice all financial institutions to ✓
- c) maintain adequate capital buffer reserves ✗
- d) during periods of macroeconomic uncertainty. ✗

The correct answer is: **advice all financial institutions to**

Explanation:

Explanation:

- The sentence is: *The regulatory board has decided to / advice all financial institutions to / maintain adequate capital buffer reserves / during periods of macroeconomic uncertainty.*
- The error lies in the word "**advice**".
 - Advice** (with c) is a **noun** meaning recommendation.
 - The correct word here should be "**advise**" (with s), which is a **verb** meaning to recommend or suggest.
- Since the sentence requires a **verb** after "decided to", the correct usage is: "...decided to **advise** all financial institutions to maintain adequate capital buffer reserves..."

Q. 10	Identify the error given in the sentence: Despite the sudden downfall in quarterly revenue, / the chief executive officer spoke reassuring / about the long-term solvency of the corporate enterprise / to all international equity investors. a) No Error  b) Despite the sudden downfall in quarterly revenue,  c) the chief executive officer spoke reassuring  d) about the long-term solvency of the corporate enterprise 
Explanation:	The correct answer is: the chief executive officer spoke reassuring Explanation: - The sentence is: <i>Despite the sudden downfall in quarterly revenue, / the chief executive officer spoke reassuring / about the long-term solvency of the corporate enterprise / to all international equity investors.</i> - The error lies in the phrase “spoke reassuring”. Reassuring is an adjective/participle, not an adverb. - After the verb <i>spoke</i>, we need an adverb to describe <i>how</i> the CEO spoke. - The correct form is “spoke reassuringly”. - Corrected sentence: <i>Despite the sudden downfall in quarterly revenue, the chief executive officer spoke reassuringly about the long-term solvency of the corporate enterprise to all international equity investors.</i>

Q. 11

In the following question, a sentence is given with a blank. Below the sentence, three words are provided. Choose the combination of words that can contextually and grammatically fit into the blank to make the sentence meaningful.

The investigative panel found that the firm had utilized _____ bookkeeping methods to conceal massive outstanding debts from its regulatory auditors.

(I) Fraudulent

(II) Deceptive

(III) Transparent

a) Only I ✗

b) Only II ✗

c) Both I and II ✓

d) Both II and III ✗

✓ The correct answer is: Both I and II

Explanation of "Fraudulent / Deceptive / Transparent"

- **Sentence:** "The investigative panel found that the firm had utilized _____ bookkeeping methods to conceal massive outstanding debts from its regulatory auditors."
- **Word meanings:**
 - **Fraudulent** → involving fraud, dishonest, illegal. ✓ Fits perfectly.
 - **Deceptive** → misleading, intended to trick. ✓ Also fits the concealment context.
 - **Transparent** → open, clear, easily understood. ✗ Opposite of concealment, so incorrect.

Analysis:

1. **Fraudulent bookkeeping methods** → Correct, because concealment of debts is fraudulent.
2. **Deceptive bookkeeping methods** → Correct, because concealment is deceptive.
3. **Transparent bookkeeping methods** → Wrong, because transparency means openness, not hiding.

Explanation:

Q. 12	Identify the error given in the sentence: The committee of financial analysts, along with government officials, / have recommended policy measures / to curb skyrocketing consumer inflation / and stabilize currency markets / prior to the annual budget session. a) The committee of financial analysts, along with government officials, ✗ b) have recommended policy measures ✓ c) to curb skyrocketing consumer inflation ✗ d) and stabilize currency markets ✗
Explanation:	The correct answer is: have recommended policy measures Explanation: - The sentence is: <i>The committee of financial analysts, along with government officials, / have recommended policy measures / to curb skyrocketing consumer inflation / and stabilize currency markets / prior to the annual budget session.</i> - The subject of the sentence is "The committee of financial analysts", which is singular (a collective noun). - Even though the phrase "along with government officials" is present, it is parenthetical and does not change the number of the subject. - Therefore, the verb must agree with the singular subject committee. - The verb used is "have recommended" (plural), which is incorrect. - The correct verb should be "has recommended" (singular). - Corrected sentence: <i>The committee of financial analysts, along with government officials, has recommended policy measures to curb skyrocketing consumer inflation and stabilize currency markets prior to the annual budget session.</i>

Q. 13	Identify the error given in the sentence: Neither the Reserve Bank Governor nor the MPC members / were expecting such a sharp surge in food inflation / over the second quarter of the current fiscal year / despite earlier optimistic forecasts. a) No Error ✓ b) Neither the Reserve Bank Governor nor the MPC members ✗ c) were expecting such a sharp surge in food inflation ✗ d) during the second quarter of the current fiscal year ✗
Explanation:	The correct answer is: No Error Explanation: - The sentence is: <i>Neither the Reserve Bank Governor nor the MPC members / were expecting such a sharp surge in food inflation / over the second quarter of the current fiscal year / despite earlier optimistic forecasts.</i> - Rule: With neither...nor, the verb agrees with the subject closest to the verb (proximity rule). - Here, the subject nearest to the verb is "MPC members" (plural). - Therefore, the plural verb "were" is correct. - Let's check each segment: Neither the Reserve Bank Governor nor the MPC members → Correct subject phrase. were expecting such a sharp surge in food inflation → Correct verb form, matches plural subject "members." over the second quarter of the current fiscal year → Grammatically fine. despite earlier optimistic forecasts. → Correct phrase. - Since all parts are grammatically correct, there is no error in the sentence.

Q. 14

Rearrange the following sentences and answer the given questions respectively:

(A) However, these technological advancements also bring forth significant risks regarding data privacy and algorithmic bias.

(B) Consequently, regulatory bodies across the world are racing to establish robust legal frameworks for oversight.

(C) Artificial Intelligence has experienced exponential growth over the past decade, transforming traditional industries.

(D) Without effective regulatory guardrails, public trust in autonomous systems could erode rapidly.

(E) For instance, automated decision-making in healthcare and finance has drastically improved operational efficiency.

(F) Balancing innovation with strict public safeguards remains the central challenge for future governance.

Q- Which of the following should be the FIRST sentence after rearrangement?

a) F 

b) D 

c) B 

d) A 

 The correct answer is: e) C

Correct Rearrangement: CEABDF

- C – Introduces the topic: AI's exponential growth.
- E – Provides an example (healthcare, finance efficiency).
- A – Highlights risks (privacy, bias).
- B – Shows regulatory response (legal frameworks).
- D – Warns of consequences (loss of public trust).
- F – Concludes with the central challenge (balancing innovation vs safeguards).

Explanation:

Q. 15

Rearrange the following sentences and answer the given questions respectively:

- (A) However, these technological advancements also bring forth significant risks regarding data privacy and algorithmic bias.
- (B) Consequently, regulatory bodies across the world are racing to establish robust legal frameworks for oversight.
- (C) Artificial Intelligence has experienced exponential growth over the past decade, transforming traditional industries.
- (D) Without effective regulatory guardrails, public trust in autonomous systems could erode rapidly.
- (E) For instance, automated decision-making in healthcare and finance has drastically improved operational efficiency.
- (F) Balancing innovation with strict public safeguards remains the central challenge for future governance.

Q- Which of the following should be the SECOND sentence after rearrangement?

- a) B 
- b) C 
- c) D 
- d) E 

Explanation:

 The correct answer is: d) E

Correct Rearrangement: CEABDF

- C – Introduces the topic: AI's exponential growth.
- E – Provides an example (healthcare, finance efficiency).
- A – Highlights risks (privacy, bias).
- B – Shows regulatory response (legal frameworks).
- D – Warns of consequences (loss of public trust).
- F – Concludes with the central challenge (balancing innovation vs safeguards).

Q. 16

Rearrange the following sentences and answer the given questions respectively:

(A) However, these technological advancements also bring forth significant risks regarding data privacy and algorithmic bias.

(B) Consequently, regulatory bodies across the world are racing to establish robust legal frameworks for oversight.

(C) Artificial Intelligence has experienced exponential growth over the past decade, transforming traditional industries.

(D) Without effective regulatory guardrails, public trust in autonomous systems could erode rapidly.

(E) For instance, automated decision-making in healthcare and finance has drastically improved operational efficiency.

(F) Balancing innovation with strict public safeguards remains the central challenge for future governance.

Q- Which of the following should be the THIRD sentence after rearrangement?

a) D 

b) B 

c) A 

d) E 

 The correct answer is: c) A

Correct Rearrangement: CEABDF

- C – Introduces the topic: AI's exponential growth.
- E – Provides an example (healthcare, finance efficiency).
- A – Highlights risks (privacy, bias).
- B – Shows regulatory response (legal frameworks).
- D – Warns of consequences (loss of public trust).
- F – Concludes with the central challenge (balancing innovation vs safeguards).

Explanation:

Q. 17	Rearrange the following sentences and answer the given questions respectively: (A) However, these technological advancements also bring forth significant risks regarding data privacy and algorithmic bias. (B) Consequently, regulatory bodies across the world are racing to establish robust legal frameworks for oversight. (C) Artificial Intelligence has experienced exponential growth over the past decade, transforming traditional industries. (D) Without effective regulatory guardrails, public trust in autonomous systems could erode rapidly. (E) For instance, automated decision-making in healthcare and finance has drastically improved operational efficiency. (F) Balancing innovation with strict public safeguards remains the central challenge for future governance. Q- Which of the following should be the FIFTH sentence after rearrangement? a) A  b) D  c) C  d) E 
Explanation:	 The correct answer is: b) D Correct Rearrangement: CEABDF • C – Introduces the topic: AI's exponential growth. • E – Provides an example (healthcare, finance efficiency). • A – Highlights risks (privacy, bias). • B – Shows regulatory response (legal frameworks). • D – Warns of consequences (loss of public trust). • F – Concludes with the central challenge (balancing innovation vs safeguards).

Q. 18

Rearrange the following sentences and answer the given questions respectively:

- (A) However, these technological advancements also bring forth significant risks regarding data privacy and algorithmic bias.
- (B) Consequently, regulatory bodies across the world are racing to establish robust legal frameworks for oversight.
- (C) Artificial Intelligence has experienced exponential growth over the past decade, transforming traditional industries.
- (D) Without effective regulatory guardrails, public trust in autonomous systems could erode rapidly.
- (E) For instance, automated decision-making in healthcare and finance has drastically improved operational efficiency.
- (F) Balancing innovation with strict public safeguards remains the central challenge for future governance.

Q- Which of the following should be the SIXTH (LAST) sentence after rearrangement?

- a) F 
- b) D 
- c) E 
- d) C 

Explanation:

 The correct answer is: a) F

Correct Rearrangement: CEABDF

- C – Introduces the topic: AI's exponential growth.
- E – Provides an example (healthcare, finance efficiency).
- A – Highlights risks (privacy, bias).
- B – Shows regulatory response (legal frameworks).
- D – Warns of consequences (loss of public trust).
- F – Concludes with the central challenge (balancing innovation vs safeguards).

Q. 19

In the following passage, there are blanks, each of which has been numbered. Read the passage carefully and choose the correct answer to fill in each blank from the given options.

The rapid expansion of renewable energy infrastructure is essential to __ (1) global climate change mitigation goals. However, transition strategies must be carefully designed so as not to __ (2) existing socio-economic inequalities. Policymakers must adopt a __ (3) approach that incorporates green investment alongside social safety nets. Failing to address energy equity could lead to widespread public opposition, thereby __ (4) the momentum of sustainable development. Ultimately, achieving a clean energy future requires a harmonized effort between government institutions, private enterprises, and community stakeholders to ensure that benefits are __ (5) distributed across all socio-economic strata.

Q- Find out the appropriate word for blank (1).

a) attain 

b) dismantle 

c) procrastinate 

d) relinquish 

The correct answer is: **Option – attain**

Explanation:

- The sentence is: *"The rapid expansion of renewable energy infrastructure is essential to __ (1) global climate change mitigation goals."*

Let's test each option:

Explanation:

- attain** →  Correct. Means achieve or accomplish. Fits perfectly with the idea of meeting climate change mitigation goals.
- dismantle** → Means break down or destroy. Opposite of the intended meaning.
- procrastinate** → Means delay. Illogical in this context.
- relinquish** → Means give up. Wrong in this context.
- undermine** → Means weaken. Again, opposite of the intended meaning.

Q. 20

In the following passage, there are blanks, each of which has been numbered. Read the passage carefully and choose the correct answer to fill in each blank from the given options.

The rapid expansion of renewable energy infrastructure is essential to __ (1) global climate change mitigation goals. However, transition strategies must be carefully designed so as not to __ (2) existing socio-economic inequalities. Policymakers must adopt a __ (3) approach that incorporates green investment alongside social safety nets. Failing to address energy equity could lead to widespread public opposition, thereby __ (4) the momentum of sustainable development. Ultimately, achieving a clean energy future requires a harmonized effort between government institutions, private enterprises, and community stakeholders to ensure that benefits are __ (5) distributed across all socio-economic strata.

Q- Find out the appropriate word for blank (2).

- a) ameliorate 
- b) exacerbate 
- c) alleviate 
- d) maciate 

The correct answer is: exacerbate

Explanation:

- The sentence is: *"However, transition strategies must be carefully designed so as not to __ (2) existing socio-economic inequalities."*

Let's test each option:

1. **ameliorate** → Means improve. The sentence is about avoiding harm, not improving.
2. **exacerbate** →  Correct. Means worsen or intensify. Fits perfectly: strategies must avoid worsening inequalities.
3. **alleviate** → Means reduce or ease. Wrong, because the sentence is about a negative possibility, not easing.
4. **maciate** → Not a valid word (likely a distractor).
5. **mitigate** → Means reduce. Again, doesn't fit the "so as not to" construction.

Explanation:

Q. 21

In the following passage, there are blanks, each of which has been numbered. Read the passage carefully and choose the correct answer to fill in each blank from the given options.

The rapid expansion of renewable energy infrastructure is essential to __ (1) global climate change mitigation goals. However, transition strategies must be carefully designed so as not to __ (2) existing socio-economic inequalities. Policymakers must adopt a __ (3) approach that incorporates green investment alongside social safety nets. Failing to address energy equity could lead to widespread public opposition, thereby __ (4) the momentum of sustainable development. Ultimately, achieving a clean energy future requires a harmonized effort between government institutions, private enterprises, and community stakeholders to ensure that benefits are __ (5) distributed across all socio-economic strata.

Q- Find out the appropriate word for blank (3).

- a) fragmented 
- b) superficial 
- c) comprehensive 
- d) cursory 

The correct answer is: comprehensive

Explanation:

- The sentence is: *"Policymakers must adopt a __ (3) approach that incorporates green investment alongside social safety nets."*

Let's test each option:

1. **fragmented** → Means broken or incomplete. This would contradict the idea of a unified approach.
2. **superficial** → Means shallow, lacking depth. Not suitable for serious policymaking.
3. **comprehensive** →  Correct. Means complete, all-inclusive, covering all aspects. Fits perfectly with the idea of combining green investment and social safety nets.
4. **cursory** → Means hasty, not thorough. Wrong in this context.
5. **negligent** → Means careless. Clearly inappropriate.

Explanation:

Q. 22

In the following passage, there are blanks, each of which has been numbered. Read the passage carefully and choose the correct answer to fill in each blank from the given options.

The rapid expansion of renewable energy infrastructure is essential to __ (1) global climate change mitigation goals. However, transition strategies must be carefully designed so as not to __ (2) existing socio-economic inequalities. Policymakers must adopt a __ (3) approach that incorporates green investment alongside social safety nets. Failing to address energy equity could lead to widespread public opposition, thereby __ (4) the momentum of sustainable development. Ultimately, achieving a clean energy future requires a harmonized effort between government institutions, private enterprises, and community stakeholders to ensure that benefits are __ (5) distributed across all socio-economic strata.

Q- Find out the appropriate word for blank (4).

- a) bolstering 
- b) catalyzing 
- c) expediting 
- d) impeding 

The correct answer is: impeding

Explanation:

- The sentence is: *"Failing to address energy equity could lead to widespread public opposition, thereby __ (4) the momentum of sustainable development."*

Let's test each option:

1. **bolstering** → Means strengthening. This contradicts the negative consequence described.
2. **catalyzing** → Means accelerating or triggering. Again, opposite of the intended meaning.
3. **expediting** → Means speeding up. Doesn't fit the context of opposition slowing progress.
4. **impeding** →  Correct. Means obstructing or slowing down. Fits perfectly with the idea that public opposition would hinder sustainable development momentum.
5. **accelerating** → Means increasing speed. Wrong in this context.

Explanation:

Q. 23

In the following passage, there are blanks, each of which has been numbered. Read the passage carefully and choose the correct answer to fill in each blank from the given options.

The rapid expansion of renewable energy infrastructure is essential to __ (1) global climate change mitigation goals. However, transition strategies must be carefully designed so as not to __ (2) existing socio-economic inequalities. Policymakers must adopt a __ (3) approach that incorporates green investment alongside social safety nets. Failing to address energy equity could lead to widespread public opposition, thereby __ (4) the momentum of sustainable development. Ultimately, achieving a clean energy future requires a harmonized effort between government institutions, private enterprises, and community stakeholders to ensure that benefits are __ (5) distributed across all socio-economic strata.

Q- Find out the appropriate word for blank (5).

- a) scarcely 
- b) disproportionately 
- c) sparingly 
- d) arbitrarily 

The correct answer is: equitably

Explanation:

- The sentence is: "...to ensure that benefits are __ (5) distributed across all socio-economic strata."

Let's test each option:

1. **scarcely** → Means "barely" or "hardly." This would make the sentence illogical.
2. **disproportionately** → Means "unevenly." This contradicts the intended fairness of distribution.
3. **sparingly** → Means "in small amounts." Again, contextually wrong.
4. **arbitrarily** → Means "randomly, without fairness." Incorrect in this context.
5. **equitably** →  Correct. Means "fairly and justly." Fits perfectly with the idea of ensuring benefits are fairly distributed across all socio-economic strata.

Explanation:

Q. 24

In the following question, a word has been given in bold followed by three sentences. Choose the option that contains the sentence(s) in which the word is used CORRECTLY.

BENEFICENT

I. He was convicted for his **beneficent** actions in orchestrating a major corporate fraud scheme.

II. The new tax law had a **beneficent** effect on low-income families, providing much-needed relief.

III. The billionaire's **beneficent** donations helped fund three new public hospitals in rural districts.

a) Only I

b) Only II

c) Both I and II

d) Both II and III

The correct answer is: Option – Both II and III

Explanation of "Beneficent"

- **Meaning:** *Beneficent* = doing good, charitable, producing benefits, generous, kind. It is always used in a **positive sense**.

Analysis:

1. I. He was convicted for his **beneficent** actions in orchestrating a major corporate fraud scheme. Wrong usage. Fraud cannot be "beneficent." The word contradicts the negative context.
2. II. The new tax law had a **beneficent** effect on low-income families, providing much-needed relief. Correct usage. The law produced a beneficial, charitable effect.
3. III. The billionaire's **beneficent** donations helped fund three new public hospitals in rural districts. Correct usage. Donations that help society are beneficent.

Explanation:

Q. 25

In the following question, a word has been given in bold followed by three sentences. Choose the option that contains the sentence(s) in which the word is used CORRECTLY.

LETHAL

I. The regulatory body warned that ignoring the new compliance guidelines could have a lethal impact on the bank's operational liquidity.

II. Medical investigators confirmed that the factory workers had been exposed to a lethal dose of chemical radiation over several months.

III. After three days of rigorous trekking up the mountain, she felt completely lethal and slept for twelve straight hours.

a) Only I ✗

b) Both I and II ✓

c) Both II and III ✗

d) Only III ✗

✓ The correct answer is: Both I and II

Explanation of "Lethal"

- **Meaning:** *Lethal* = deadly, fatal, capable of causing death. It is used in contexts involving physical harm, danger, or destruction — not for feelings of tiredness or exhaustion.

Analysis:

1. **I. The regulatory body warned that ignoring the new compliance guidelines could have a lethal impact on the bank's operational liquidity.** ✓ Acceptable usage in a figurative sense. "Lethal impact" here means extremely destructive or fatal to the bank's functioning.
2. **II. Medical investigators confirmed that the factory workers had been exposed to a lethal dose of chemical radiation over several months.** ✓ Correct usage. "Lethal dose" is a standard phrase meaning deadly amount.
3. **III. After three days of rigorous trekking up the mountain, she felt completely lethal and slept for twelve straight hours.** ✗ Wrong usage. A person cannot "feel lethal." The intended meaning was probably "exhausted" or "lethargic."

Explanation:

Q. 26

In the following question, a word has been given in bold followed by three sentences. Choose the option that contains the sentence(s) in which the word is used CORRECTLY.

TAKE OVER

I. The newly appointed Managing Director will officially take over the operations of the stressed asset division from next Monday.

II. With inflation rising rapidly, the central bank decided to take over its strict hawkish stance and slashed the repo rate by 50 basis points.

III. It took the tech startup nearly three years to completely take over its primary competitor's market share in the digital payments sector.

- a) Only I 
- b) Only II 
- c) Both I and II 
- d) Both I and III 

 The correct answer is: Both I and III

Explanation of "Take Over"

- Meaning:** *Take over* = assume control, gain dominance, or acquire authority/ownership. It is used in contexts of management, operations, or market control.

Analysis:

- I. The newly appointed Managing Director will officially take over the operations of the stressed asset division from next Monday.  Correct usage. "Take over" = assume control of operations.
- II. With inflation rising rapidly, the central bank decided to take over its strict hawkish stance and slashed the repo rate by 50 basis points.  Incorrect usage. "Take over" does not mean "change" or "abandon." The sentence misuses the phrasal verb.
- III. It took the tech startup nearly three years to completely take over its primary competitor's market share in the digital payments sector.  Correct usage. "Take over" = gain dominance/control of competitor's market share.

Explanation:

Q. 27	Identify the incorrect spelling in the given sentence: The financial committee expressed unanimous satisfaction with the bureaucratic reform manouver executed by the central authority. a) committee ✗ b) unanimous ✗ c) bureaucratic ✗ d) manouver ✓
Explanation:	The incorrect spelling in the sentence is: manouver Explanation: • committee → Correct spelling. • unanimous → Correct spelling. • bureaucratic → Correct spelling. • manouver → ✗ Incorrect spelling. The correct spelling is “manoeuvre” (British English) or “maneuver” (American English). • All are correct → Wrong, because one spelling error exists.
Q. 28	Identify the incorrect spelling in the given sentence: The corporate entrepreneur demonstrated extraordinary resilience during the unprecedented financial embarassment faced by the firm. a) embarassment ✓ b) extraordinary ✗ c) unprecedented ✗ d) entrepreneur ✗
Explanation:	The incorrect spelling in the sentence is: embarassment Explanation: • committee → Correct spelling. • extraordinary → Correct spelling. • unprecedented → Correct spelling. • entrepreneur → Correct spelling. • embarassment → ✗ Incorrect spelling. The correct form is “embarrassment” (with double “r”).

Q. 29	In the following sentence, five words are given in bold. These words may or may not be in their correct positions. Choose the option that represents the correct rearrangement of these words to make the sentence grammatically correct and contextually meaningful. Digital security (A) has become paramount (B) for businesses as cyber threats sophisticated (C), requiring more evolve (D) measures to protect sensitive data (E). a) B-C and A-D  b) C-D only  c) A-B and C-E  d) B-D and C-E 
Explanation:	Correct option: C-D only Explanation: After swapping C (sophisticated) and D (evolve), the sentence becomes: Digital security has become paramount for businesses as cyber threats evolve, requiring more sophisticated measures to protect sensitive data. • “cyber threats evolve” is grammatically correct. • “more sophisticated measures” is the correct adjective + noun combination. All other swap options produce ungrammatical or meaningless sentences.

Q. 30

In the following sentence, five words are given in bold. These words may or may not be in their correct positions. Choose the option that represents the correct rearrangement of these words to make the sentence grammatically correct and contextually meaningful.

The regulatory protect (A) introduced stricter norms to authority (B) investor interests and ensure (C) that financial institutions compliance (D) with global safety maintain (E).

a) No rearrangement required

b) B-C and D-E

c) A-B and D-E

d) A-C and B-D

Correct option: A-B and D-E

Explanation:

Original sentence:

The regulatory **protect** (A) introduced stricter norms to **authority** (B) investor interests and **ensure** (C) that financial institutions **compliance** (D) with global safety **maintain** (E).

We need a meaningful, grammatically correct sentence. The intended structure is:

The regulatory **authority** introduced stricter norms to **protect** investor interests and **ensure** that financial institutions **maintain compliance** with global safety.

So:

- “regulatory **authority**” → A and B must swap: **A ↔ B**
- “financial institutions **maintain compliance**” → D and E must swap: **D ↔ E**

After swapping A-B and D-E, the sentence becomes:

The regulatory **authority** introduced stricter norms to **protect** investor interests and **ensure** that financial institutions **maintain compliance** with global safety.

Explanation:

Q. 31

By selling 60 oranges for ₹48, a man loses 20%. How many oranges should he sell for ₹30 to gain 25% in the transaction?

- a) 20 
- b) 24 
- c) 25 
- d) 30 

Explanation:**Explanation:**

60 oranges SP = ₹48

20% Loss $\Rightarrow$ CP = $48 \times 100/80 = ₹60$

CP of 60 oranges = ₹60

$\Rightarrow$ CP of 1 orange = ₹1

25% Gain $\Rightarrow$ SP of 1 orange = ₹1.25

No. of oranges = $30/1.25 = 24$

Answer: (b) 24

Q. 32

Two trains of lengths 180 m and 220 m are running in opposite directions at speeds of 54 km/h and 72 km/h respectively. In how many seconds will they completely cross each other?

a) $10\frac{2}{7}$ 

b) $11\frac{2}{7}$ 

c) $12\frac{5}{7}$ 

d) $11\frac{3}{7}$ 

Explanation:

$$\text{Relative speed} = 54 + 72 = 126 \text{ km/h}$$

$$= 126 \times 5/18$$

$$= 35 \text{ m/s}$$

Explanation:

$$\text{Total distance} = 180 + 220$$

$$= 400 \text{ m}$$

$$\text{Time} = 400/35$$

$$= 80/7 \text{ sec} = 11\frac{3}{7}$$

Q. 33

A man invested a total sum of ₹24,000 in two parts at simple interest. He invested one part at 12% per annum and the remaining part at 15% per annum. If he received interest at an overall rate of 13% per annum, what amount was invested at 12% and 15% respectively?

a) ₹16,000 and ₹8,000 ✓

b) ₹8,000 and ₹16,000 ✗

c) ₹12,000 and ₹12,000 ✗

d) ₹18,000 and ₹6,000 ✗

Explanation:

12% 15%

\ /

13%

/ \

2 : 1

Explanation:

12% : 15% investment

= (15 - 13) : (13 - 12)

= 2 : 1

Total = ₹24,000

12% part = $24,000 \times \frac{2}{3} = ₹16,000$

15% part = $24,000 \times \frac{1}{3} = ₹8,000$

Answer: (a) ₹16,000 and ₹8,000

Q. 34

A number P is selected from the set {12, 18, 24, 30, 36}.

Quantity I: 25% of P + 6

Quantity II: 40% of P

a) Quantity I < Quantity II

b) Quantity I = Quantity II or the relationship cannot be established

c) Quantity I ≤ Quantity II

d) Quantity I > Quantity II

Explanation:

$$\text{Quantity I} = \frac{P}{4} + 6$$

$$\text{Quantity II} = \frac{2P}{5}$$

Difference:

$$Q.I - Q.II$$

$$\begin{aligned} &= \frac{P}{4} + 6 - \frac{2P}{5} \\ &= 6 - \frac{3P}{20} \end{aligned}$$

$$\text{For } P = 12 \rightarrow Q.I > Q.II$$

$$\text{For } P = 36 \rightarrow Q.I > Q.II$$

$$\text{For } P = 24 \rightarrow Q.I > Q.II$$

$$\text{For } P = 36 \rightarrow Q.I > Q.II$$

∴ Answer: (d) Quantity I > Quantity II

Q. 35

In the following question, compare Quantity I and Quantity II and choose the correct option.

Quantity I: A sum of money amounts to ₹13,200 in 2 years at 10% per annum simple interest. Find the principal.

Quantity II: ₹10,500

a) Quantity I < Quantity II

b) Quantity I = Quantity II or the relationship cannot be established

c) Quantity I ≤ Quantity II

d) Quantity I > Quantity II

Explanation:

Explanation:

$$2 \text{ years SI} = 10\% \times 2 = 20\%$$

$$\text{Amount} = 120\%$$

$$120\% = ₹13,200$$

$$100\% = 13200 \times 100/120 \\ = ₹11,000$$

$$\text{Quantity I} = ₹11,000$$

$$\text{Quantity II} = ₹10,500$$

$$\therefore \text{Quantity I} > \text{Quantity II}$$

Q. 36

Directions: In the following questions, two equations I and II are given. Solve both equations and establish the correct relationship between x and y.

I. $x^2 - 17x + 72 = 0$

II. $y^2 - 13y + 40 = 0$

a) $x > y$ 

b) $x < y$ 

c) $x \geq y$ 

d) $x \leq y$ 

Explanation:

$$x^2 - 17x + 72 = 0$$

$$(x - 8)(x - 9) = 0$$

$$x = 8, 9$$

Explanation:

$$y^2 - 13y + 40 = 0$$

$$(y - 5)(y - 8) = 0$$

$$y = 5, 8$$

$$\therefore x \geq y$$

Q. 37

Directions: In the following questions, two equations I and II are given. Solve both equations and establish the correct relationship between x and y.

I. $x^2 - 9x + 20 = 0$

II. $y^2 - 15y + 56 = 0$

a) $x > y$ 

b) $x < y$ 

c) $x \geq y$ 

d) $x \leq y$ 

Explanation:

$$(x - 4)(x - 5) = 0$$

$$x = 4, 5$$

Explanation:

$$(y - 7)(y - 8) = 0$$

$$y = 7, 8$$

$$\therefore x < y$$

Answer: B

Q. 38

Directions: In the following questions, two equations I and II are given. Solve both equations and establish the correct relationship between x and y.

I. $x^2 + 9x + 20 = 0$

II. $y^2 - 11y + 24 = 0$

a) $x > y$ 

b) $x < y$ 

c) $x \geq y$ 

d) $x \leq y$ 

Explanation:

$$(x + 4)(x + 5) = 0$$

$$x = -4, -5$$

Explanation:

$$(y - 3)(y - 8) = 0$$

$$y = 3, 8$$

$$\therefore x < y$$

Answer: B

Q. 39

Directions: In the following questions, two equations I and II are given. Solve both equations and establish the correct relationship between x and y.

I. $x^2 - 7x - 18 = 0$

II. $y^2 + 5y - 24 = 0$

a) $x > y$ 

b) $x < y$ 

c) $x \geq y$ 

d) $x \leq y$ 

Explanation:

$$(x - 9)(x + 2) = 0$$

$$x = 9, -2$$

Explanation:

$$(y + 8)(y - 3) = 0$$

$$y = -8, 3$$

$\therefore$ Relationship cannot be established

Answer: E

Q. 40

Directions: In the following questions, two equations I and II are given. Solve both equations and establish the correct relationship between x and y.

I. $2x^2 - 13x + 20 = 0$

II. $3y^2 - 17y + 10 = 0$

a) $x > y$ 

b) $x < y$ 

c) $x \geq y$ 

d) $x \leq y$ 

Explanation:

$$2x^2 - 8x - 5x + 20 = 0$$

$$2x(x - 4) - 5(x - 4) = 0$$

$$(2x - 5)(x - 4) = 0$$

$$x = 5/2, 4$$

Explanation:

$$3y^2 - 15y - 2y + 10 = 0$$

$$3y(y - 5) - 2(y - 5) = 0$$

$$(3y - 2)(y - 5) = 0$$

$$y = 2/3, 5$$

$\therefore$ Relationship cannot be established

Answer: E

Q. 41

Directions: The following pie chart shows the distribution of 720 employees working in five different departments of a company. Study the data and answer the questions.

What is the ratio of employees in Department NIA to Department RAW?

- a) 1 : 2 ✗
- b) 2 : 3 ✓
- c) 3 : 4 ✗
- d) 4 : 5 ✗

Explanation:

Explanation:

$$\begin{aligned} \text{NIA : RAW} &= 72 : 108 \\ &= 2 : 3 \end{aligned}$$

Answer: B) 2 : 3

Q. 42

Directions: The following pie chart shows the distribution of 720 employees working in five different departments of a company. Study the data and answer the questions.

The number of employees in Department IB is what percent more than the number of employees in Department CBI?

- a) 50% ✗
- b) $55\frac{1}{3}\%$ ✗
- c) 60% ✗
- d) $66\frac{2}{3}\%$ ✓

Explanation:

$$IB = 720 \times 90/360 = 180$$

$$CBI = 720 \times 54/360 = 108$$

Explanation:

$$\text{Required \%} = (180 - 108)/108 \times 100$$

$$= 72/108 \times 100$$

$$= 66\frac{2}{3}\%$$

Answer: D) $66\frac{2}{3}\%$

Q. 43

Directions: The following pie chart shows the distribution of 720 employees working in five different departments of a company. Study the data and answer the questions.

Find the total number of employees working in Departments NIA and SPG together.

- a) 198 ✗
- b) 204 ✗
- c) 210 ✗
- d) 216 ✓

Explanation:

$$\text{NIA} + \text{SPG} = 72^\circ + 36^\circ = 108^\circ$$

Explanation:

$$\text{Required employees} = 720 \times 108/360$$

$$= 216$$

Answer: D) 216

Q. 44

Directions: The following pie chart shows the distribution of 720 employees working in five different departments of a company. Study the data and answer the questions.

If 25% of the employees working in Department RAW are females, find the number of male employees in Department RAW.

- a) 144 ☒
- b) 150 ☒
- c) 156 ☒
- d) 162 ☒

Explanation:

$$\text{Employees in D} = 720 \times 108/360$$

$$= 216$$

$$\text{Male employees} = 75\% \text{ of } 216$$

$$= 216 \times 3/4$$

$$= 162$$

Answer: D) 162

Explanation:

Q. 45

Directions: The following pie chart shows the distribution of 720 employees working in five different departments of a company. Study the data and answer the questions.

The number of employees in Department CBI is what percentage of the total number of employees?

- a) 10 % ☐
- b) 12 % ☐
- c) 15 % ☒
- d) 18 % ☐

Explanation:

$$\text{Employees in A} = 720 \times \frac{54}{360}$$

$$= 108$$

$$\text{Required \%} = \frac{108}{720} \times 100$$

$$= 15\%$$

Answer: C) 15%

Explanation:

Q. 46

Direction: Read the given information carefully and answer the following questions.

There are two colleges P and Q. Students in both colleges study three different subjects, i.e., Mathematics, English and Reasoning. College P has a total of 800 students. College Q has 25% more students than College P. 30% of the students of College P study Mathematics and 45% study English. The remaining students of College P study Reasoning. The total number of students studying Reasoning in both colleges together is 500. The ratio of students of College Q studying English to Mathematics is 3 : 4.

What is the ratio of the number of students studying English in College P to those studying Mathematics in College Q?

a) 7 : 9 

b) 8 : 9 

c) 9 : 10 

d) 10 : 11 

Explanation:

Explanation: Basic Data:

College P:

Mathematics = 240

English = 360

Reasoning = 200

College Q:

Total = 1000

Reasoning = 300

English = 300

Mathematics = 400

English in P : Mathematics in Q

= 360 : 400

= 9 : 10

Answer: C) 9 : 10

Q. 47

Direction: Read the given information carefully and answer the following questions.

There are two colleges P and Q. Students in both colleges study three different subjects, i.e., Mathematics, English and Reasoning. College P has a total of 800 students. College Q has 25% more students than College P. 30% of the students of College P study Mathematics and 45% study English. The remaining students of College P study Reasoning. The total number of students studying Reasoning in both colleges together is 500. The ratio of students of College Q studying English to Mathematics is 3 : 4.

The number of students studying Reasoning in College Q is what percent more than those studying Reasoning in College P?

- a) 40% 
- b) 50% 
- c) 45% 
- d) 55% 

Explanation:

Explanation: Basic Data:

College P:

Mathematics = 240

English = 360

Reasoning = 200

College Q:

Total = 1000

Reasoning = 300

English = 300

Mathematics = 400

Required % = $(300 - 200)/200 \times 100$

= $100/200 \times 100$

= 50%

Answer: B) 50%

Q. 48

Direction: Read the given information carefully and answer the following questions.

There are two colleges P and Q. Students in both colleges study three different subjects, i.e., Mathematics, English and Reasoning. College P has a total of 800 students. College Q has 25% more students than College P. 30% of the students of College P study Mathematics and 45% study English. The remaining students of College P study Reasoning. The total number of students studying Reasoning in both colleges together is 500. The ratio of students of College Q studying English to Mathematics is 3 : 4.

Find the average number of students studying Mathematics in Colleges P and Q together.

- a) 300 
b) 310 
c) 320 
d) 330 

Explanation:

Explanation: Basic Data:

College P:

Mathematics = 240

English = 360

Reasoning = 200

College Q:

Total = 1000

Reasoning = 300

English = 300

Mathematics = 400

Average = $(240 + 400)/2$

= $640/2$

= 320

Answer: C) 320

Q. 49

Direction: Read the given information carefully and answer the following questions.

There are two colleges P and Q. Students in both colleges study three different subjects, i.e., Mathematics, English and Reasoning. College P has a total of 800 students. College Q has 25% more students than College P. 30% of the students of College P study Mathematics and 45% study English. The remaining students of College P study Reasoning. The total number of students studying Reasoning in both colleges together is 500. The ratio of students of College Q studying English to Mathematics is 3 : 4.

If 10% of the students studying English in College P shift to Mathematics in the same college, what will be the new ratio of Mathematics students to English students in College P?

- a) 21 : 25 
- b) 23 : 27 
- c) 25 : 27 
- d) 27 : 29 

Explanation: Basic Data:

College P:

Mathematics = 240

English = 360

Reasoning = 200

College Q:

Total = 1000

Reasoning = 300

English = 300

Explanation:

Mathematics = 400

10% of 360 = 36

New Mathematics students = $240 + 36 = 276$

New English students = $360 - 36 = 324$

Required ratio = 276 : 324

= 23 : 27

Answer: B) 23 : 27

Q. 50

Direction: Read the given information carefully and answer the following questions.

There are two colleges P and Q. Students in both colleges study three different subjects, i.e., Mathematics, English and Reasoning. College P has a total of 800 students. College Q has 25% more students than College P. 30% of the students of College P study Mathematics and 45% study English. The remaining students of College P study Reasoning. The total number of students studying Reasoning in both colleges together is 500. The ratio of students of College Q studying English to Mathematics is 3 : 4.

If the number of students studying Mathematics in College Q increases by 20%, while the number of students studying Mathematics in College P remains unchanged, find the difference between the Mathematics students of the two colleges.

- a) 220 
- b) 230 
- c) 240 
- d) 250 

Explanation: Basic Data:

College P:

Mathematics = 240

English = 360

Reasoning = 200

College Q:

Total = 1000

Reasoning = 300

English = 300

Mathematics = 400

Explanation:

Mathematics in Q = 400

After 20% increase:

$$= 400 \times 120/100$$

$$= 480$$

Mathematics in P = 240

Required difference = $480 - 240$

$$= 240$$

Answer: C) 240

Q. 51

Find the wrong number in the following number series.

28, 45, 79, 130, 196, 283

a) 196 ✓

b) 130 ✗

c) 283 ✗

d) 79 ✗

**Wrong Number = 196****Explanation:**

28 → 45 → 79 → 130 → 198 → 283

Differences: 17, 34, 51, 68, 85

Pattern: Differences increase by 17.

So,

130 + 68 = 198 (not 196)

∴ Wrong number = 196

Q. 52

Find the wrong number in the following number series.

99, 91, 101, 89, 103, 88

a) 99 ✗

b) 89 ✗

c) 101 ✗

d) 88 ✓

Explanation:

99, 91, 101, 89, 103, 88

Pattern:

99 → 101 → 103 (+2)

91 → 89 → 87 (-2)

So, 88 should be 87.

Wrong Number = 88

Correct Number = 87

Q. 53

Find the wrong number in the following number series.

436, 119, 218, 54.5, 109, 27.25

a) 436 ✗

b) 109 ✗

c) 119 ✓

d) 54.5 ✗

Explanation:

436 , 109 , 218 , 54.5 , 109 , 27.25

Q. 54

Find the wrong number in the following number series.

5, 2.5, 2.5, 3.75, 7.5, 15

a) 5 b) 2.5 c) 3.75 d) 7.5 

Pattern:

$$5 \times 0.5 = 2.5$$

$$2.5 \times 1 = 2.5$$

$$2.5 \times 1.5 = 3.75$$

$$3.75 \times 2 = 7.5$$

$$7.5 \times 2.5 = 18.75$$

Explanation:

Multipliers:

$$\times 0.5, \times 1, \times 1.5, \times 2, \times 2.5$$

So, 15 should be 18.75.

 $\therefore$ Wrong number = 15

Q. 55

Find the wrong number in the following number series.

0, 2, 3, 5, 8, 10, 15, 17, 24, 27

a) 27 ✓

b) 24 ✗

c) 17 ✗

d) 15 ✗

Pattern:

 $+2, +1, +2, +3, +2, +5, +2, +7, +2$

Alternate pattern:

 $0 \rightarrow 3 \rightarrow 8 \rightarrow 15 \rightarrow 24$ $+3, +5, +7, +9$

Explanation:

 $2 \rightarrow 5 \rightarrow 10 \rightarrow 17 \rightarrow 27$ ✗ $+3, +5, +7, +9$

So,

 $17 + 9 = 26$ $\therefore$ Wrong number = 27

Correct number = 26

Q. 56

Find the simplified value of:

$$48 \div 64 \times 4 - \{36 - (19 - 23) \times 3\} \div 12 + 12 \div 3 \text{ of } 4$$

a) -2 b) -1 c) 1 d) 0 

Explanation:

Explanation:

$$= 48/64 \times 4 - \{36 - (-4) \times 3\} \div 12 + 12 \div (3 \times 4)$$

$$= 3 - \{36 + 12\} \div 12 + 12 \div 12$$

$$= 3 - 48/12 + 1$$

$$= 3 - 4 + 1$$

$$= 0$$

Q. 57

Find the value of (?) in the following equation:

$$1\frac{3}{17} \times 72\frac{1}{4} - \sqrt[4]{8^8} = ?^2 - \sqrt{225}$$

a) 4

b) 5

c) 6

d) 7

**Explanation:**

$$= 20/17 \times 289/4 - 64 = ?^2 - 15$$

$$= 5 \times 17 - 64 = ?^2 - 15$$

$$= 85 - 64 = ?^2 - 15$$

$$21 = ?^2 - 15$$

$$?^2 = 36$$

$$? = 6$$

Answer: C) 6

Explanation:

Q. 58

Find the value of (?) in the following equation:

$$18\frac{1}{3} \text{ of } 18 + 19\frac{1}{4} \text{ of } 28 = 5.5 \times ?$$

a) 158 b) 160 c) 156 d) 159 **Explanation:**

$$18\frac{1}{3} \text{ of } 18 + 19\frac{1}{4} \text{ of } 28 = 5.5 \times ?$$

$$= 55/3 \times 18 + 77/4 \times 28 = 11/2 \times ?$$

$$= 55 \times 6 + 77 \times 7 = 11/2 \times ?$$

$$= 330 + 539 = 11/2 \times ?$$

$$869 = 11/2 \times ?$$

$$? = 869 \times 2/11$$

$$? = 158$$

$$\text{Answer} = 158$$

Q. 59

Find the value of (?) in the following equation:

$$? = \sqrt{72\% \text{ of } 1250 + 45\% \text{ of } 800 - 127 \times 5}$$

a) 23 b) 25 c) 21 d) 28 

Explanation:

Explanation:

$$? = \sqrt{(900 + 360 - 635)}$$

$$= \sqrt{625}$$

$$= 25$$

Answer: B) 25

Q. 60

Find the value of (?) in the following equation:

$$\frac{20\% \text{ of } 27}{12.5\% \text{ of } 18} = \frac{40\% \text{ of } 135}{25\% \text{ of } ?}$$

- a) 72 
b) 80 
c) 84 
d) 90 

Explanation:

$$[(1/5) \times 27]/[(1/8) \times 18] = [(2/5) \times 135]/[(1/4) \times ?]$$

$$= (27 \times 8)/(5 \times 18) = (2 \times 135 \times 4)/(5 \times ?)$$

$$= 12/5 = 216/(?)$$

$$12? = 1080$$

$$? = 90$$

Answer: D) 90

Q. 61

The average marks of 30 students in a class is 72. The average marks of the first 18 students is 68 and the average marks of the last 15 students is 76. Find the average marks of the 3 students who are common in both groups.

- a) 63 
- b) 62 
- c) 65 
- d) 66 

Explanation:

Total marks of 30 students

$$= 30 \times 72$$
$$= 2160$$

Marks of first 18 students

$$= 18 \times 68$$
$$= 1224$$

Explanation:

Marks of last 15 students

$$= 15 \times 76$$
$$= 1140$$

Common 3 students' marks

$$= 1224 + 1140 - 2160$$
$$= 204$$

Average = $204/3$

$$= 68$$

Q. 62

The present age of A is 25% more than the present age of B. Eight years ago, the ratio of their ages was 3 : 2. Find the present age of A.

- a) 16 years 
- b) 18 years 
- c) 20 years 
- d) 22 years 

Explanation:

$$A : B = 5 : 4$$

$$\text{Let } A = 5x, B = 4x$$

$$(5x - 8)/(4x - 8) = 3/2$$

$$10x - 16 = 12x - 24$$

$$2x = 8$$

$$x = 4$$

$$\text{Present age of A} = 5 \times 4 = 20 \text{ years}$$

Explanation:

Q. 63

A man spends 40% of his monthly income on household expenses, 20% of the remaining on travelling and 25% of the amount left on other expenses. If he saves ₹18,000, find his monthly income.

- a) ₹45,000 
- b) ₹48,000 
- c) ₹50,000 
- d) ₹52,000 

Explanation:

Let monthly income = ₹100

Household expenses = 40

Remaining = 60

Travelling = 20% of 60 = 12

Remaining = 48

Other expenses = 25% of 48 = 12

Savings = 48 - 12 = 36

36% = ₹18,000

100% = $18000 \times 100/36$

= ₹50,000

Answer: C) ₹50,000

Explanation:

Q. 64

A can complete a work in 12 days and B can complete the same work in 18 days. They work on alternate days, starting with A. In how many days will the work be completed?

- a) 13 
- b) 14 
- c) $14\frac{1}{3}$ 
- d) 15 

Explanation:

LCM of 12, 18 = 36 units

A's 1 day work = $36/12 = 3$ units

B's 1 day work = $36/18 = 2$ units

Work done in 2 days = $3 + 2 = 5$ units

In 14 days = $7 \times 5 = 35$ units

Explanation:

Remaining work = $36 - 35 = 1$ unit

A completes 3 units in 1 day

1 unit = $1/3$ day

Total time = $14 + 1/3$

= $14\frac{1}{3}$ days

Answer: C) $14\frac{1}{3}$ days

Q. 65

A sum of ₹12,000 is invested at 12% per annum. Find the difference between compound interest and simple interest for 2 years.

- a) 148.60 
b) 182.80 
c) 155.40 
d) 172.80 

Explanation:

SI for 2 years = $12000 \times 12 \times 2 / 100$
= ₹2880

CI for 2 years:

Amount = $12000 \times (112/100)^2$
= ₹15052.80

CI = 15052.80 – 12000
= ₹3052.80

Difference = 3052.80 – 2880
= ₹172.80

Answer: D) ₹172.80

Q. 66

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table. Not more than two adjacent persons face the same direction. C sits second to the left of A and vice versa. Two persons sit between C and F, who is not adjacent to A. The immediate neighbors of both F and A faces the same direction i.e., if one person faces inside then the other faces inside and vice versa. F faces the center. H sits second to the right of F whereas G sits second to the right of H. Two persons sit between D and E where both face the same direction. B sits to the immediate left of E but not second to the right of C.

Who among the following sits second to the right of F?

- a) A 
- b) G 
- c) H 
- d) C 

Explanation:

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table.

1. C sits second to the left of A and vice versa (A faces inside or outside both)
2. Two persons sit between C and F, who is not adjacent to A.
3. F faces the center.

4. H sits second to the right of F whereas G sits second to the right of H. (H faces inside)
5. C sits second to the left of A and vice versa.

6. Two persons sit between D and E where both face the same direction.
7. B sits to the immediate left of E but not second to the right of C. (E faces outside) because of this case 2 gets
8. The immediate neighbors of both F and A faces the same direction
9. Not more than two adjacent persons face the same direction.

Final Arrangement :

H sits second to the right of F.

Q. 67

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table. Not more than two adjacent persons face the same direction. C sits second to the left of A and vice versa. Two persons sit between C and F, who is not adjacent to A. The immediate neighbors of both F and A faces the same direction i.e., if one person faces inside then the other faces inside and vice versa. F faces the center. H sits second to the right of F whereas G sits second to the right of H. Two persons sit between D and E where both face the same direction. B sits to the immediate left of E but not second to the right of C.

Who among the following sits immediate left of E?

- a) B 
- b) D 
- c) G 
- d) H 

Explanation:

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table.

1. C sits second to the left of A and vice versa (A faces inside or outside both)
2. Two persons sit between C and F, who is not adjacent to A.
3. F faces the center.

4. H sits second to the right of F whereas G sits second to the right of H. (H faces inside)
5. C sits second to the left of A and vice versa.

6. Two persons sit between D and E where both face the same direction.
7. B sits to the immediate left of E but not second to the right of C. (E faces outside) because of this case 2 gets
8. The immediate neighbors of both F and A faces the same direction
9. Not more than two adjacent persons face the same direction.

Final Arrangement :

B sits immediate left of E.

Q. 68

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table. Not more than two adjacent persons face the same direction. C sits second to the left of A and vice versa. Two persons sit between C and F, who is not adjacent to A. The immediate neighbors of both F and A faces the same direction i.e., if one person faces inside then the other faces inside and vice versa. F faces the center. H sits second to the right of F whereas G sits second to the right of H. Two persons sit between D and E where both face the same direction. B sits to the immediate left of E but not second to the right of C.

How many persons sit between C and G when counted from the left of C?

- a) 1 ☒
- b) 2 ☒
- c) 3 ☒
- d) 4 ☒

Explanation:

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table.

1. C sits second to the left of A and vice versa (A faces inside or outside both)
2. Two persons sit between C and F, who is not adjacent to A.
3. F faces the center.

4. H sits second to the right of F whereas G sits second to the right of H. (H faces inside)
5. C sits second to the left of A and vice versa.

6. Two persons sit between D and E where both face the same direction.
7. B sits to the immediate left of E but not second to the right of C. (E faces outside) because of this case 2 gets
8. The immediate neighbors of both F and A faces the same direction
9. Not more than two adjacent persons face the same direction.

Final Arrangement :

No person sit between C and G when counted from the left of C. hence none will be ans.

Q. 69

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table. Not more than two adjacent persons face the same direction. C sits second to the left of A and vice versa. Two persons sit between C and F, who is not adjacent to A. The immediate neighbors of both F and A face the same direction i.e., if one person faces inside then the other faces inside and vice versa. F faces the center. H sits second to the right of F whereas G sits second to the right of H. Two persons sit between D and E where both face the same direction. B sits to the immediate left of E but not second to the right of C.

Which of the following statements is true?

- a) E sits immediate right of A 
- b) F sits second to the right of B 
- c) D sits immediate left of F 
- d) A sits second to the left of G 

Explanation:

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table.

1. C sits second to the left of A and vice versa (A faces inside or outside both)
2. Two persons sit between C and F, who is not adjacent to A.
3. F faces the center.

4. H sits second to the right of F whereas G sits second to the right of H. (H faces inside)
5. C sits second to the left of A and vice versa.

6. Two persons sit between D and E where both face the same direction.
7. B sits to the immediate left of E but not second to the right of C. (E faces outside) because of this case 2 gets
8. The immediate neighbors of both F and A faces the same direction
9. Not more than two adjacent persons face the same direction.

Final Arrangement :

E sits immediate right of A is the only correct statement among them.

Q. 70

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table. Not more than two adjacent persons face the same direction. C sits second to the left of A and vice versa. Two persons sit between C and F, who is not adjacent to A. The immediate neighbors of both F and A faces the same direction i.e., if one person faces inside then the other faces inside and vice versa. F faces the center. H sits second to the right of F whereas G sits second to the right of H. Two persons sit between D and E where both face the same direction. B sits to the immediate left of E but not second to the right of C.

If A is related to H and C is related to B in a certain way, then E is related to whom following the same pattern?

- a) A ☒
- b) F ☒
- c) None ☒
- d) H ☒

Explanation:

Eight persons viz. A, B, C, D, E, F, G, and H are seated on a circular table such that some of them are facing inside the table while some are facing outside the table.

1. C sits second to the left of A and vice versa (A faces inside or outside both)
2. Two persons sit between C and F, who is not adjacent to A.
3. F faces the center.

4. H sits second to the right of F whereas G sits second to the right of H. (H faces inside)
5. C sits second to the left of A and vice versa.

6. Two persons sit between D and E where both face the same direction.
7. B sits to the immediate left of E but not second to the right of C. (E faces outside) because of this case 2 gets
8. The immediate neighbors of both F and A faces the same direction
9. Not more than two adjacent persons face the same direction.

Final Arrangement :

If A is related to H and C is related to B based on same direction, then E is related to G.

Q. 71

Six persons- P, Q, R, S, T and U bought the car in different months-January, April, June, August, October and November of the same year. They bought different brand CARS- KIA, TATA, SUZUKI, BMW, BENZ and HONDA. The one who bought BMW buys in the month has an even number of days. Only two persons bought between R and the one who bought BMW. Q bought the CAR two months before the one who bought HONDA. Q neither bought the CAR in April nor August. The number of persons bought between Q and R is the same as the number of persons bought between the one who bought HONDA and P. P bought KIA and bought it before T who does not buy HONDA. U bought immediately before the one who bought TATA. U neither bought HONDA nor BENZ.

Who bought the car in the month of August?

- a) P 
- b) Q 
- c) R 
- d) S 

Six persons- P, Q, R, S, T and U bought the car in different months-January, April, June, August, October and November of the same year. They bought different brand CARS- KIA, TATA, SUZUKI, BMW, BENZ and HONDA. The one who bought BMW buys in the month has an even number of days.

1. Only two persons bought between R and the one who bought BMW.

MONTHS	Case 1	Case 2	Case 3
	Persons	Persons	Persons
JANUARY	()		
APRIL	(BMW)		
JUNE	()	(BMW)	R
AUGUST	()		
OCTOBER	R	()	
NOVEMBER	()	R	(BMW)

2. Q bought the CAR two months before the one who bought HONDA. Q neither bought the CAR in April nor August. (Q bought the car in June only) because of this statement case 3 gets eliminated.
3. P bought KIA and bought it before T who does not buy HONDA.

MONTHS	Case 1	Case 2	Case 1.1	Case 2.1
	Persons	Persons	Persons	Persons
JANUARY	P (KIA)	P (KIA)	()	
APRIL	(BMW)		(BMW)	P (KIA)
JUNE	Q (HONDA)	Q (BMW)	Q ()	Q (BMW)
AUGUST	()	(HONDA)	P (KIA)	
OCTOBER	R ()		R ()	(HONDA)
NOVEMBER	()	R	(HONDA)	R

Explanation:

4. U bought immediately before the one who bought TATA. U neither bought HONDA nor BENZ. All the statement except 2 get eliminated.

Final arrangement :

MONTHS	Case 2
	Persons
JANUARY	P (KIA)
APRIL	T (BENZ)
JUNE	Q (BMW)
AUGUST	S (HONDA)
OCTOBER	U (SUZUKI)
NOVEMBER	R (TATA)

Q. 72

Six persons- P, Q, R, S, T and U bought the car in different months-January, April, June, August, October and November of the same year. They bought different brand CARS- KIA, TATA, SUZUKI, BMW, BENZ and HONDA. The one who bought BMW buys in the month has an even number of days. Only two persons bought between R and the one who bought BMW. Q bought the CAR two months before the one who bought HONDA. Q neither bought the CAR in April nor August. The number of persons bought between Q and R is the same as the number of persons bought between the one who bought HONDA and P. P bought KIA and bought it before T who does not buy HONDA. U bought immediately before the one who bought TATA. U neither bought HONDA nor BENZ.

How many persons bought the car between S and the one who bought HONDA?

- a) 0 
- b) 1 
- c) 2 
- d) 3 

Six persons- P, Q, R, S, T and U bought the car in different months-January, April, June, August, October and November of the same year. They bought different brand CARS- KIA, TATA, SUZUKI, BMW, BENZ and HONDA. The one who bought BMW buys in the month has an even number of days.

1. Only two persons bought between R and the one who bought BMW.

Q. 76

Statements:

$$A < Z \leq U = R \leq P = G > I > W$$

Conclusions:I). $Z < G$ II). $Z = P$

a) If only conclusion I follows.

b) If only conclusion II follows.

c) If either conclusion I or II follows.

d) If neither conclusion I nor II follows.

Step 1 — Combine the chain for Z and G:

$$Z \leq U = R \leq P = G$$

So we get: $Z \leq G$ **Step 2 — Check each conclusion:**I. $Z < G \rightarrow$ Not 100% certain (Z could be equal to G too) $\rightarrow$ False aloneII. $Z = P \rightarrow$ Since $P = G$, this means $Z = G \rightarrow$ Not certain either (Z could be less than G) $\rightarrow$ False alone**Step 3 — Either/Or check:** $Z \leq G$ means only two cases are possible: $Z < G$ OR $Z = G$ **Explanation:**

- Conclusion I covers the "<" case
- Conclusion II covers the "=" case

Since these two conclusions together cover **all possibilities** of $Z \leq G$, one of them must definitely be true.

Answer: Either I or II follows**Rule to remember:**

Rule to remember:

When two conclusions have a combined relation like " $\leq$ " or " $\geq$ " (not strict), and the two conclusions represent the "<" and "=" cases of the relation, then either one follows.

Q. 77

Statements:

$$P \leq Q > R > S = T \geq U; V = W \leq S > X < Y$$

Conclusions:

I. $T > V$

II. $V > Q$

III. $W = S$

a) If only conclusion III follows. b) If only conclusion II follows. c) If either conclusion I or III follows. d) None is true **Statements:** $P \leq Q > R > S = T \geq U; V = W \leq S > X < Y$

Step 1 — Combine the chain (link via S): From Statement 1: $S = T$, and $Q > R > S \rightarrow$ so $Q > S = T$ From Statement 2: $V = W \leq S \rightarrow$ so $V \leq S$

Combined: $Q > S = T \geq V$ (and $V = W$)

Step 2 — Check each conclusion:I. $T > V \rightarrow$ We have $T = S \geq V$, so $T \geq V$ (equality possible) $\rightarrow$ **Not definite**II. $V > Q \rightarrow$ We have $Q > S \geq V$, so actually $Q > V$ (opposite) $\rightarrow$ **False**III. $W = S \rightarrow$ We only know $W \leq S$ (could be less or equal) $\rightarrow$ **Not definite**

Step 3 — Either/Or check: I ($T > V$) and its opposite would be $T \leq V$ — but we don't have " $T \leq V$ " as a conclusion here, we have $T \geq V$ as the derived fact. Since I only claims strict " $>$ ", and actual relation is " $\geq$ ", I is not fully covered by any paired conclusion (II is unrelated to T-V, III is unrelated to K/D-type pairing here). No exhaustive pair exists among I, II, III.

Answer: None of the conclusions follows**Explanation:**

Q. 78

Statements: $Z > R < T \leq A = K; O < W \geq P \leq T; S > P \leq D$ **Conclusions:**I. $K < D$ II. $K \geq D$ a) If only conclusion I follows. b) If only conclusion II follows. c) If either conclusion I or II follows. d) If neither conclusion I nor II follows. **Explanation:****Statements:** $Z > R < T \leq A = K; O < W \geq P \leq T; S > P \leq D$ **Step 1 — Combine the chain:** From Statement 1: $T \leq A = K \rightarrow$ so $K \geq T$ From Statement 2: $P \leq T$ From Statement 3: $P \leq D$ **Step 2 — Try to link K and D:** $K \geq T \geq P$, and $D \geq P$ Both K and D are connected to P, but only from the same side (both $\geq P$) $\rightarrow$ **no direct chain between K and D****Step 3 — Check each conclusion:**I. $K < D \rightarrow$ Cannot be determined $\rightarrow$ **Not definite** II. $K \geq D \rightarrow$ Cannot be determined $\rightarrow$ **Not definite****Step 4 — Either/Or check:** I says $K < D$ II says $K \geq D$ (i.e., $K > D$ or $K = D$)Together, I and II cover **all possible cases** ($<$, $=$, $>$) between K and D — this is an exhaustive pair.**Answer:** Either I or II follows**Rule to remember:** When there is no direct relation formed between two elements, then check whether the conclusions are exhaustive.If a pair ($\leq$, $\geq$) is not formed, then it will be either conclusion follows.

Q. 79

Statement:

Point A is 15m north of point B. Point C is 20m east of point A. Point D is east of point B and south of point C. Point E is 15m east of point D and 20m south of point F. Point F is 27m west of point G.

What is the shortest distance between point B and point C?

- a) 12 ☐
- b) 25 ☒
- c) 18 ☐
- d) 20 ☐

**Explanation:**

Using Pythagoras theorem:

$$BC^2 = AB^2 + AC^2$$

$$BC^2 = 15^2 + 20^2$$

$$BC^2 = 225 + 400$$

$$BC^2 = 625$$

$$BC = \sqrt{625}$$

$$BC = 25 \text{ m}$$

Answer: 25 m

Q. 80

What is the direction of point E with respect to point B?

a) SOUTH EAST

b) SOUTH WEST

c) EAST

d) WEST

Since C is 20 m east of A and D is east of B and south of C:

D will be at the same horizontal level as B.

So:

$B \rightarrow D = 20 \text{ m east}$

E is 15 m east of D.

Therefore:

$B \rightarrow E = 20 + 15 = 35 \text{ m east}$

Explanation:

Hence, point E is in the:

Answer: East direction of point B. ✓

Q. 81

What is the shortest distance between point D and point F?

- a) 12 ☐
- b) 25 ☒
- c) 18 ☐
- d) 20 ☐

Using Pythagoras:

$$DF^2 = 15^2 + 20^2$$

$$DF^2 = 225 + 400$$

$$DF^2 = 625$$

$$DF = \sqrt{625}$$

$$DF = 25 \text{ m}$$

Explanation:Answer: 25 m ☒

Q. 82

Eight STATES viz. BIHAR, DELHI, RAJASTHAN, HARYANA, UP, UK, BENGAL, and PUNJAB are awarded the best in different months from April to November. BIHAR was awarded in the month having 30 days and four months before PUNJAB. The number of months before PUNJAB is the same as after HARYANA. Only two months are there between HARYANA and UK. UP was awarded in the month immediately after UK. The number of months between BIHAR and UP is one more than the number of months between UP and DELHI which was not awarded before PUNJAB. BENGAL was awarded in the month having 31 days.

Which of the following site was awarded in the month of June?

a) BIHAR 

b) DELHI 

c) RAJASTHAN 

d) HARYANA 

Explanation:

Eight STATES viz. BIHAR, DELHI, RAJASTHAN, HARYANA, UP, UK, BENGAL, and PUNJAB are awarded the best in different months from April to November.

1. BIHAR was awarded in the month having 30 days and four months before PUNJAB.
2. The number of months before PUNJAB is the same as after HARYANA.
3. Only two months are there between HARYANA and UK.

MONTHS	Case 1	Case 2
	STATES	STATES
APRIL	BIHAR	
MAY		HARYANA
JUNE		BIHAR

Q. 87

There are ten members in a family of three generations in which there are three married couples. Each couple has two children. Sunita is the mother-in-law of Rakesh. Rakesh is the father of Priya. Vijay who is the spouse of Meena is the son-in-law of Suresh. Suresh is the maternal grandfather of Kavita. Ravi is the sibling of Kavita. Sarita is the mother of Arjun who is the only son of Sarita. Ravi is the only nephew of Sarita.

How is Rakesh related to Suresh?

a) Father-in-law

b) Son-in-law

c) Brother-in-law

d) Grandfather

Explanation:

Rakesh married Sarita (Suresh's daughter) → **Rakesh is Son-in-law of Suresh**

Q. 88

There are ten members in a family of three generations in which there are three married couples. Each couple has two children. Sunita is the mother-in-law of Rakesh. Rakesh is the father of Priya. Vijay who is the spouse of Meena is the son-in-law of Suresh. Suresh is the maternal grandfather of Kavita. Ravi is the sibling of Kavita. Sarita is the mother of Arjun who is the only son of Sarita. Ravi is the only nephew of Sarita.

How is Priya related to Kavita?

- a) Sister ☒
- b) Aunt ☒
- c) Cousin ☒
- d) Niece ☒

Explanation:

(Rakesh-Sarita's daughter) and Kavita (Vijay-Meena's daughter) are children of two sisters → **Priya is Cousin of Kavita**

Q. 89

There are ten members in a family of three generations in which there are three married couples. Each couple has two children. Sunita is the mother-in-law of Rakesh. Rakesh is the father of Priya. Vijay who is the spouse of Meena is the son-in-law of Suresh. Suresh is the maternal grandfather of Kavita. Ravi is the sibling of Kavita. Sarita is the mother of Arjun who is the only son of Sarita. Ravi is the only nephew of Sarita.

How is Sunita related to Arjun?

a) Mother ☒

b) Grandmother ☒

c) Aunt ☒

d) Sister ☒

Explanation:

Couple =

Male +

Female -

Suresh's wife, and Arjun is Sarita's son (Sarita is Sunita's daughter) → **Sunita is Grandmother of Arjun**

Q. 90

Statements:

1. All balls are rounds.
2. All grounds are green.
3. Some rounds are hollow.
4. Only a few hollows are ground.
- 5.

Conclusions:

I. Some hollows are green is a possibility

II. No hollow are green is a possibility

a) If only conclusion I follows. ✓

b) If only conclusion II follows. ✗

c) If either conclusion I or II follows. ✗

d) If neither conclusion I nor II follows. ✗

I. "Some hollows are green is a possibility" → Since it is already proven as definite, it automatically satisfies as a possibility too → **Follows**

II. "No hollow are green is a possibility" → This contradicts the definite fact that some hollows ARE green → **Does not follow**

Answer: Only Conclusion I follows**Rule to remember:**

Some A are B + All B are C → **Some A are C (definite)**. When a relation is proven definite, it always satisfies as a "possibility" too — so any conclusion claiming the opposite ("No... is a possibility") is automatically rejected.

Explanation:

Q. 91

Statements:**All buses are vehicles.****Only a few motors are vehicles.****All motors are Iron.****Conclusions:****I. All motors are buses****II. Some motors are not buses****a) If only conclusion I follows.****b) If only conclusion II follows.****c) If either conclusion I or II follows.****d) If neither conclusion I nor II follows.**

Conclusions:

I. All motors are buses.

Motor $\rightarrow$ Bus

No direct relation is given between Motor and Bus.

Also, some motors are not vehicles, but all buses are vehicles.

So, motors cannot be all buses.

Conclusion I does not follow. ✗

II. Some motors are not buses.

Some motors are not vehicles.

Explanation:

Since all buses are vehicles, anything which is not a vehicle cannot be a bus.

Therefore, some motors are definitely not buses.

Conclusion II follows. ✓

Final Answer:

Only conclusion II follows.

Q. 92

Statements:**Some Pens are Markers.****No Marker is Permanent.****Only a few Permanent are Useful.****Conclusions:****I. Some Useful are not Markers.****II. Some Markers are pen is a possibility.****a) If only conclusion I follows.****b) If only conclusion II follows.****c) If either conclusion I or II follows.****d) If neither conclusion I nor II follows.**

Solution

Step 1 — Check Conclusion I (Useful and Markers):

Statement 2: No Marker is Permanent $\rightarrow$ reverses to $\rightarrow$ No Permanent is Marker

Statement 3: Some Permanent are Useful

Combine: Some Permanent are Useful + No Permanent is Marker

Rule: Some A are B + No A is C $\rightarrow$ Some B are not C

Applying: Those "Permanent" which are Useful, are definitely NOT Markers

$\rightarrow$ **Some Useful are not Markers (DEFINITE FACT)**

I. Follows ✓

Step 2 — Check Conclusion II (Markers and Pen):

Explanation:

Statement 1: "Some Pens are Markers" is **already given directly** in the statements.

Its reverse conversion — "Some Markers are Pens" — is therefore **already a definite, proven fact**, not something uncertain.

Key point: A "possibility" conclusion is only relevant when the relationship **cannot** be determined definitely from the statements. Here, since the relationship is already 100% certain, framing it as a mere "possibility" is treated as **not following** — the conclusion undersells a fact that's already established.

II. Does not follow ✗

Q. 93

If all the letters in the word 'EDUCATION' are arranged in alphabetical order from left to right such that the vowels are arranged first, followed by the consonants, how many letters are there between D and T after the arrangement?

- a) 1 
- b) 2 
- c) 3 
- d) 4 

Solution:

Word: EDUCATION

Vowels: E, U, A, I, O

Alphabetical order of vowels:

A E I O U

Consonants: D, C, T, N

Alphabetical order of consonants:

C D N T

Final arrangement:

A E I O U C D N T

Position of D = 7

Position of T = 9

Letters between D and T:

N = 1 letter

Answer: (a) One

Explanation:

Q. 94

If all the letters in the word 'COMPETITION' are arranged in alphabetical order from left to right such that the vowels are arranged first, followed by the consonants, how many letters are there between C and P after the arrangement?

- a) 2 
- b) 3 
- c) 4 
- d) 5 

Solution:

Word: COMPETITION

Vowels: O, E, I, I, O

Alphabetical order:

E I I O O

Consonants: C, M, P, T, T, N

Alphabetical order:

C M N P T T

Final arrangement:

E I I O O C M N P T T

Position of C = 6

Position of P = 9

Letters between C and P:

M, N, = 2 letters

Answer: (a) Two

Explanation:

Q. 95

Statements

'pit na ko sim' means 'flowers are very red'

'na ju la' means 'red and yellow'

'ko sim ru' means 'flowers are fresh'

'ju mo sim la' means 'yellow and bright are'

What is the code for 'flowers'?

a) ko b) sim c) na d) ru 

Explanation:

Step 1: Common in S1 & S3 → 'ko' and 'sim' = flowers, are (order unclear yet)**Step 2:** Common in S2 & S4 → 'ju' and 'la' = yellow, and (order unclear yet)**Step 3:** Common in S1 & S2 → 'na' = red**Step 4:** From S2, remaining word (ju/la) besides 'na' → since S4 also has 'la', and S4's common word with S2 is 'la' → **la = and**, so **ju = yellow****Step 5:** S4 remaining → 'mo' = bright**Step 6:** S3 remaining (besides ko, sim) → 'ru' = fresh**Step 7:** From S1, remaining (besides na, ko, sim) → 'pit' = very**Step 8:** Between ko/sim → S3 = "flowers are fresh" → 'ru' = fresh already fixed; ko/sim map to flowers/are — since S1 also has same pair, direct match confirms: **ko = flowers, sim = are****Final Code Table:**

pit = very

na = red

ko = flowers

sim = are

ju = yellow

la = and

mo = bright

ru = fresh

Q. 96	Statements 'pit na ko sim' means 'flowers are very red' 'na ju la' means 'red and yellow' 'ko sim ru' means 'flowers are fresh' 'ju mo, sim, la' means 'yellow and bright are' What is the code for 'and'? a) na  b) ju  c) la  d) mo 
Explanation:	Step 1: Common in S1 & S3 → 'ko' and 'sim' = flowers, are (order unclear yet) Step 2: Common in S2 & S4 → 'ju' and 'la' = yellow, and (order unclear yet) Step 3: Common in S1 & S2 → 'na' = red Step 4: From S2, remaining word (ju/la) besides 'na' → since S4 also has 'la', and S4's common word with S2 is 'la' → la = and, so ju = yellow Step 5: S4 remaining → 'mo' = bright Step 6: S3 remaining (besides ko, sim) → 'ru' = fresh Step 7: From S1, remaining (besides na, ko, sim) → 'pit' = very Step 8: Between ko/sim → S3 = "flowers are fresh" → 'ru' = fresh already fixed; ko/sim map to flowers/are — since S1 also has same pair, direct match confirms: ko = flowers, sim = are Final Code Table: pit = very na = red ko = flowers sim = are ju = yellow la = and mo = bright ru = fresh

Q. 97	Statements 'pit na ko sim' means 'flowers are very red' 'na ju la' means 'red and yellow' 'ko sim ru' means 'flowers are fresh' 'ju mo, sim, la' means 'yellow and bright are ' What is the code for 'bright'? a) ju  b) la  c) mo  d) na 
Explanation:	Step 1: Common in S1 & S3 → 'ko' and 'sim' = flowers, are (order unclear yet) Step 2: Common in S2 & S4 → 'ju' and 'la' = yellow, and (order unclear yet) Step 3: Common in S1 & S2 → 'na' = red Step 4: From S2, remaining word (ju/la) besides 'na' → since S4 also has 'la', and S4's common word with S2 is 'la' → la = and, so ju = yellow Step 5: S4 remaining → 'mo' = bright Step 6: S3 remaining (besides ko, sim) → 'ru' = fresh Step 7: From S1, remaining (besides na, ko, sim) → 'pit' = very Step 8: Between ko/sim → S3 = "flowers are fresh" → 'ru' = fresh already fixed; ko/sim map to flowers/are — since S1 also has same pair, direct match confirms: ko = flowers, sim = are Final Code Table: pit = very na = red ko = flowers sim = are ju = yellow la = and mo = bright ru = fresh

Q. 98

Seven people i.e. Faiz, Rajababu, Shubham, Rishabh, Abhishek, Laxmi, and Tanay are born in seven different years i.e., 1964, 1966, 1973, 1980, 1989, 1995 and 2001 but not necessarily in the same order. The age is calculated according to the present year i.e., 2023. Difference between the age of Faiz and Rishabh is 9. Faiz is older than Rishabh. Rajababu is younger than Rishabh. Difference between the age of Rajababu and Tanay is 29. Abhishek is 9 years younger than Laxmi. More than two people were born between Abhishek and Shubham.

What is the age difference between Tanay and Rishabh in 2023?

- a) 28 
- b) 29 
- c) 26 
- d) 23 

Explanation:

1. Difference between the age of Faiz and Rishabh is 9.
2. Faiz is older than Rishabh.

Possible pairs:

1964 → 1973

1980 → 1989

	Case 1	Case 2
1964	<u>Faiz</u>	
1966		
1973	<u>Rishabh</u>	
1980		Faiz
1989		<u>Rishabh</u>
1995		
2001		

3. Difference between the age of Rajababu and Tanay is 29.

Only possible pair:

1966 → 1995

4. Rajababu is younger than Rishabh.

	Case 1	Case 2
1964	<u>Faiz</u>	<u>Laxmi</u>
1966	<u>Tanay</u>	<u>Tanay</u>
1973	<u>Rishabh</u>	<u>Abhishek</u>
1980	<u>Laxmi</u>	Faiz
1989	<u>Abhishek</u>	<u>Rishabh</u>
1995	<u>Rajababu</u>	<u>Rajababu</u>
2001		

5. More than two people were born between Abhishek and Shubham. Because of this statement case 1 gets eliminated.

Final Arrangement :

Case 1

1964	<u>Laxmi</u>
1966	<u>Tanav</u>
1973	<u>Abhishek</u>
1980	<u>Faiz</u>
1989	<u>Rishabh</u>
1995	<u>Rajababu</u>
2001	<u>Shubham</u>

Q. 99

Seven people i.e. Faiz, Rajababu, Shubham, Rishabh, Abhishek, Laxmi, and Tanay are born in seven different years i.e., 1964, 1966, 1973, 1980, 1989, 1995 and 2001 but not necessarily in the same order. The age is calculated according to the present year i.e., 2023. Difference between the age of Faiz and Rishabh is 9. Faiz is older than Rishabh. Rajababu is younger than Rishabh. Difference between the age of Rajababu and Tanay is 29. Abhishek is 9 years younger than Laxmi. More than two people were born between Abhishek and Shubham.

Who among the following was born in 1989?

a) Rishabh 

b) Faiz 

c) Shubham 

d) Laxmi 

Explanation:

6. Difference between the age of Faiz and Rishabh is 9.
7. Faiz is older than Rishabh.

Possible pairs:

1964 → 1973

1980 → 1989

	Case 1	Case 2
1964	<u>Faiz</u>	
1966		
1973	<u>Rishabh</u>	
1980		Faiz
1989		<u>Rishabh</u>
1995		
2001		

8. Difference between the age of Rajababu and Tanay is 29.

Only possible pair:

1966 → 1995

9. Rajababu is younger than Rishabh.

	Case 1	Case 2
1964	<u>Faiz</u>	<u>Laxmi</u>
1966	<u>Tanay</u>	<u>Tanay</u>
1973	<u>Rishabh</u>	<u>Abhishek</u>
1980	<u>Laxmi</u>	Faiz
1989	<u>Abhishek</u>	<u>Rishabh</u>
1995	<u>Rajababu</u>	<u>Rajababu</u>
2001		

10. More than two people were born between Abhishek and Shubham. Because of this statement case 1 gets eliminated.

Final Arrangement :

Case 1

1964	<u>Laxmi</u>
1966	<u>Tanav</u>
1973	<u>Abhishek</u>
1980	<u>Faiz</u>
1989	<u>Rishabh</u>
1995	<u>Rajababu</u>
2001	<u>Shubham</u>

Q. 100

Seven people i.e. Faiz, Rajababu, Shubham, Rishabh, Abhishek, Laxmi, and Tanay are born in seven different years i.e., 1964, 1966, 1973, 1980, 1989, 1995 and 2001 but not necessarily in the same order. The age is calculated according to the present year i.e., 2023. Difference between the age of Faiz and Rishabh is 9. Faiz is older than Rishabh. Rajababu is younger than Rishabh. Difference between the age of Rajababu and Tanay is 29. Abhishek is 9 years younger than Laxmi. More than two people were born between Abhishek and Shubham.

How many people were born between Laxmi and Faiz?

- a) 0 
- b) 1 
- c) 2 
- d) 3 

Explanation:

1. Difference between the age of Faiz and Rishabh is 9.
2. Faiz is older than Rishabh.

Possible pairs:

1964 → 1973

1980 → 1989

	Case 1	Case 2
1964	<u>Faiz</u>	
1966		
1973	<u>Rishabh</u>	
1980		Faiz
1989		<u>Rishabh</u>
1995		
2001		

3. Difference between the age of Rajababu and Tanay is 29.

Only possible pair:

1966 → 1995

4. Rajababu is younger than Rishabh.

	Case 1	Case 2
1964	<u>Faiz</u>	<u>Laxmi</u>
1966	<u>Tanay</u>	<u>Tanay</u>
1973	<u>Rishabh</u>	<u>Abhishek</u>
1980	<u>Laxmi</u>	Faiz
1989	<u>Abhishek</u>	<u>Rishabh</u>
1995	<u>Rajababu</u>	<u>Rajababu</u>
2001		

5. More than two people were born between Abhishek and Shubham. Because of this statement case 1 gets eliminated.

Final Arrangement :

Case 1

1964	<u>Laxmi</u>
1966	<u>Tanav</u>
1973	<u>Abhishek</u>
1980	<u>Faiz</u>
1989	<u>Rishabh</u>
1995	<u>Rajababu</u>
2001	<u>Shubham</u>
