

Guidely IBPS PO Selection Mock 1, August 17, 2026

Reasoning Ability

Q. 1	How many such pairs of letters are there in the word "CHEMISTRY" each of which has as many letters between them in the word as in the English alphabetical series (both forward and backward directions)? A) One  B) Two  C) Three  D) Four  E) None 
Explanation:	Answer: B In the word "CHEMISTRY", the matching pairs in both forward and backward directions are: C – E, S - T Total: 2 pairs.

Q. 2

Study the following information carefully and answer the questions given below:

A certain number of persons are sitting in a linear row such that all of them are facing towards north. Only two persons sit between U and V. Y sits exactly in the middle of X and the one who sits immediate left of W. Only three persons sit to the right of U. The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A. X sits third to the right of W. Four persons sit between V and W. Only three persons sit between Y and Z who sits at one of the extreme ends.

How many persons are sitting in the row?

- A) 12 
- B) 13 
- C) 16 
- D) 14 
- E) 15 

Explanation:**Final Arrangement**

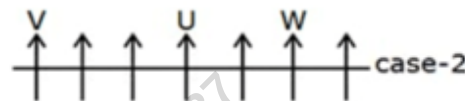

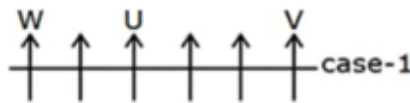

We have,

Only three persons sit to the right of U.

Only two persons sit between U and V.

Four persons sit between V and W.

From the above condition, there are three possibilities.

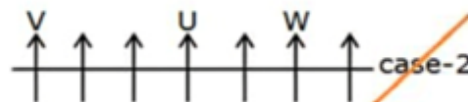

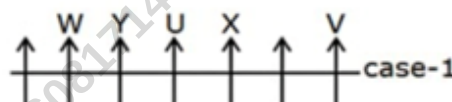

Again we have,

X sits third to the right of W.

Y sits exactly in the middle of X and the one who sits immediate left of W.

From the above condition, case-2 gets eliminated.

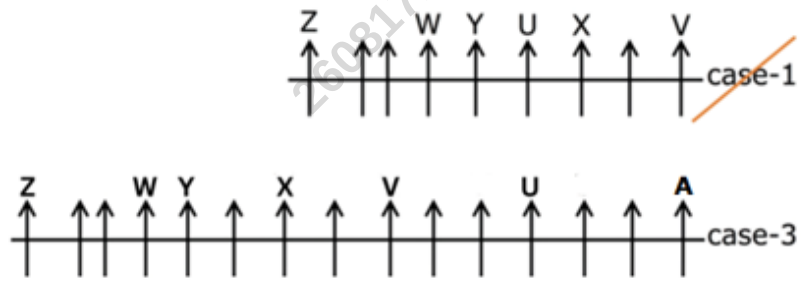

Again we have,

Only three persons sit between Y and Z who sits at one of the extreme ends.

The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A.

From the above condition, case-1 gets eliminated.

Hence, Case 3 shows the final arrangement.

Answer: E

Q. 3

Study the following information carefully and answer the questions given below:

A certain number of persons are sitting in a linear row such that all of them are facing towards north. Only two persons sit between U and V. Y sits exactly in the middle of X and the one who sits immediate left of W. Only three persons sit to the right of U. The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A. X sits third to the right of W. Four persons sit between V and W. Only three persons sit between Y and Z who sits at one of the extreme ends.

If M sits second to the left of A, then who among the following person sits exactly between M and Y?

A) Not known

B) V

C) X

D) W

E) None of these

Explanation:**Final Arrangement**

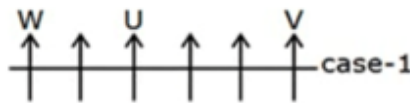

We have,

Only three persons sit to the right of U.

Only two persons sit between U and V.

Four persons sit between V and W.

From the above condition, there are three possibilities.

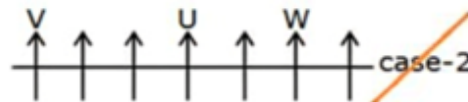

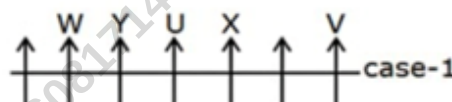

Again we have,

X sits third to the right of W.

Y sits exactly in the middle of X and the one who sits immediate left of W.

From the above condition, case-2 gets eliminated.

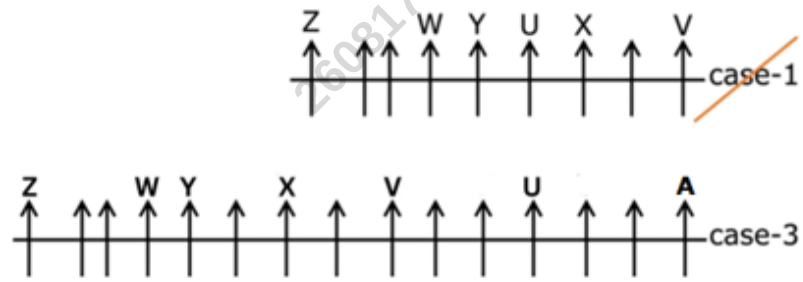

Again we have,

Only three persons sit between Y and Z who sits at one of the extreme ends.

The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A.

From the above condition, case-1 gets eliminated.

Hence, Case 3 shows the final arrangement.

Answer: B

Q. 4

Study the following information carefully and answer the questions given below:

A certain number of persons are sitting in a linear row such that all of them are facing towards north. Only two persons sit between U and V. Y sits exactly in the middle of X and the one who sits immediate left of W. Only three persons sit to the right of U. The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A. X sits third to the right of W. Four persons sit between V and W. Only three persons sit between Y and Z who sits at one of the extreme ends.

What is the position of W with respect to the one who sits fourth to the left of U?

- A) Fourth to the left 
- B) Second to the left 
- C) Immediate right 
- D) Third to the left 
- E) Second to the right 

Explanation:**Final Arrangement**

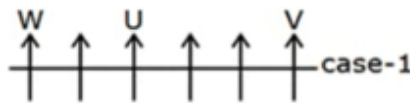

We have,

Only three persons sit to the right of U.

Only two persons sit between U and V.

Four persons sit between V and W.

From the above condition, there are three possibilities.

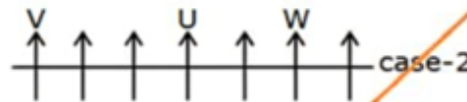

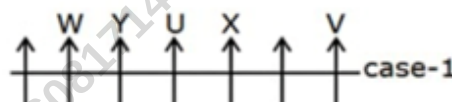

Again we have,

X sits third to the right of W.

Y sits exactly in the middle of X and the one who sits immediate left of W.

From the above condition, case-2 gets eliminated.

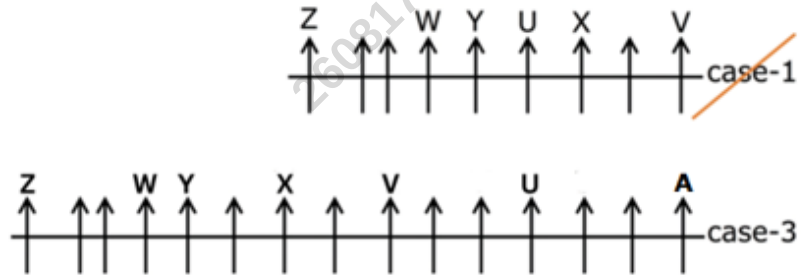

Again we have,

Only three persons sit between Y and Z who sits at one of the extreme ends.

The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A.

From the above condition, case-1 gets eliminated.

Hence, Case 3 shows the final arrangement.

Answer: A

Q. 5

Study the following information carefully and answer the questions given below:

A certain number of persons are sitting in a linear row such that all of them are facing towards north. Only two persons sit between U and V. Y sits exactly in the middle of X and the one who sits immediate left of W. Only three persons sit to the right of U. The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A. X sits third to the right of W. Four persons sit between V and W. Only three persons sit between Y and Z who sits at one of the extreme ends.

Who among the following person sits fourth from the extreme left end of the row?A) V B) The one who sits immediate left of Y C) The one who sits second to the right of Z D) Z E) A 

Explanation:**Final Arrangement**

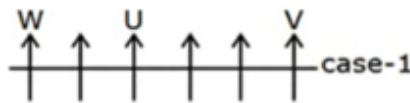

We have,

Only three persons sit to the right of U.

Only two persons sit between U and V.

Four persons sit between V and W.

From the above condition, there are three possibilities.

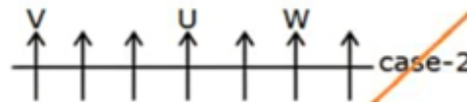

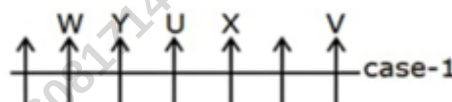

Again we have,

X sits third to the right of W.

Y sits exactly in the middle of X and the one who sits immediate left of W.

From the above condition, case-2 gets eliminated.

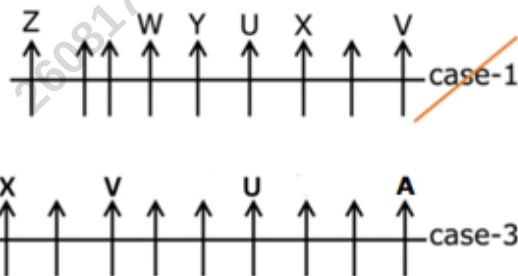

Again we have,

Only three persons sit between Y and Z who sits at one of the extreme ends.

The number of persons sitting to the right of Z is the same as the number of persons sitting to the left of A.

From the above condition, case-1 gets eliminated.

Hence, Case 3 shows the final arrangement.

Answer: B

Q. 6

Study the following information carefully and answer the questions given below.

R has only two children. P is the only sister of Q, who is married to R's only daughter S. V is the granddaughter of R and cousin sister of W. X is the father of W. T is the brother-in-law of Q and he is unmarried. U is the mother-in-law of P.

If Y is the husband of R, then how is Y related to T?

A) Maternal uncle

B) Grandfather

C) Father

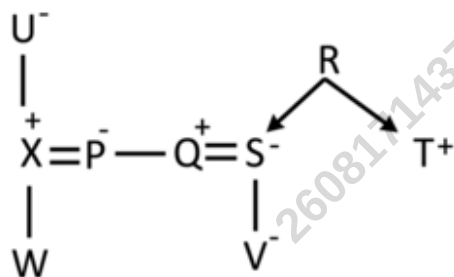

D) Brother-in-law

E) Paternal uncle

Explanation:

Answer: C

Q. 7

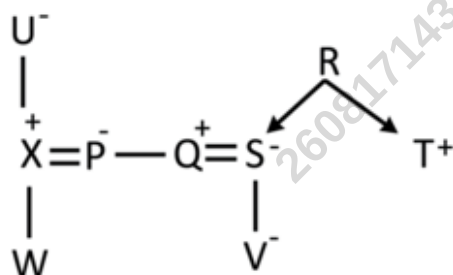

Study the following information carefully and answer the questions given below.

R has only two children. P is the only sister of Q, who is married to R's only daughter S. V is the granddaughter of R and cousin sister of W. X is the father of W. T is the brother-in-law of Q and he is unmarried. U is the mother-in-law of P.

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

A) P ☒B) S ☒C) U ☒D) T ☒E) V ☒

Explanation:

Answer: D (All the persons are female, except option D who is a male)

Q. 8

Study the following information carefully and answer the question given below:

Eight posts - A, B, C, D, E, F, G, and H were uploaded on two different dates either 12th or 27th of any month among May, June, July, and August. No two posts were uploaded on the same date of the same month.

H and E were uploaded on the same date of different months. Only three posts were uploaded between B and A. D was uploaded on the 12th of a month but after June. C was not uploaded in May. As many posts uploaded before D as after B. Only two posts were uploaded between G and H. F was uploaded immediately before A. G was uploaded two months before F.

_____ post was uploaded on 12th June.

A) B 

B) C 

C) A 

D) E 

E) None of these 

Explanation:**Final Arrangement**

We have,

Month / Date	Case-2
May 12	G
May 27	B
June 12	C
June 27	H
July 12	F
July 27	A
August 12	D
August 27	E

D was uploaded on 12th of a month but after June.

As many posts uploaded before D as after B.

From the above condition, there are two possibilities.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	
July 27		
August 12		D
August 27		

Again we have,

Only three posts were uploaded between B and A.

F was uploaded immediately before A.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	F
July 27		A
August 12	F	D
August 27	A	

Again we have,

G was uploaded two months before F.

Only two posts were uploaded between G and H.

Month / Date	Case-1	Case-2
May 12		G
May 27		B
June 12	G	
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	

Again we have,

H and E were uploaded on the same date of different months.

C was not uploaded in May.

From the above condition, case-1 gets eliminated.

Month / Date	Case-1	Case-2
May 12	C	G
May 27	E	B
June 12	G	C
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	E

Answer: B

Q. 9

Study the following information carefully and answer the question given below:

Eight posts - A, B, C, D, E, F, G, and H were uploaded on two different dates either 12th or 27th of any month among May, June, July, and August. No two posts were uploaded on the same date of the same month.

H and E were uploaded on the same date of different months. Only three posts were uploaded between B and A. D was uploaded on the 12th of a month but after June. C was not uploaded in May. As many posts uploaded before D as after B. Only two posts were uploaded between G and H. F was uploaded immediately before A. G was uploaded two months before F.

How many posts were uploaded before G?

A) Same as after E

B) Same as after A

C) Same as between B and H

D) Same as between D and B

E) None of these

Explanation:**Final Arrangement**

We have,

Month / Date	Case-2
May 12	G
May 27	B
June 12	C
June 27	H
July 12	F
July 27	A
August 12	D
August 27	E

D was uploaded on 12th of a month but after June.

As many posts uploaded before D as after B.

From the above condition, there are two possibilities.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	
July 27		
August 12		D
August 27		

Again we have,

Only three posts were uploaded between B and A.

F was uploaded immediately before A.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	F
July 27		A
August 12	F	D
August 27	A	

Again we have,

G was uploaded two months before F.

Only two posts were uploaded between G and H.

Month / Date	Case-1	Case-2
May 12		G
May 27		B
June 12	G	
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	

Again we have,

H and E were uploaded on the same date of different months.

C was not uploaded in May.

From the above condition, case-1 gets eliminated.

Month / Date	Case-1	Case-2
May 12	C	G
May 27	E	B
June 12	G	C
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	E

Answer: A

Q. 10

Study the following information carefully and answer the question given below:

Eight posts - A, B, C, D, E, F, G, and H were uploaded on two different dates either 12th or 27th of any month among May, June, July, and August. No two posts were uploaded on the same date of the same month.

H and E were uploaded on the same date of different months. Only three posts were uploaded between B and A. D was uploaded on the 12th of a month but after June. C was not uploaded in May. As many posts uploaded before D as after B. Only two posts were uploaded between G and H. F was uploaded immediately before A. G was uploaded two months before F.

Find the odd one out?A) B-27th B) F-12th C) A-July D) E-August E) H-12th 

Explanation:**Final Arrangement**

We have,

Month / Date	Case-2
May 12	G
May 27	B
June 12	C
June 27	H
July 12	F
July 27	A
August 12	D
August 27	E

D was uploaded on 12th of a month but after June.

As many posts uploaded before D as after B.

From the above condition, there are two possibilities.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	
July 27		
August 12		D
August 27		

Again we have,

Only three posts were uploaded between B and A.

F was uploaded immediately before A.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	F
July 27		A
August 12	F	D
August 27	A	

Again we have,

G was uploaded two months before F.

Only two posts were uploaded between G and H.

Month / Date	Case-1	Case-2
May 12		G
May 27		B
June 12	G	
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	

Again we have,

H and E were uploaded on the same date of different months.

C was not uploaded in May.

From the above condition, case-1 gets eliminated.

Month / Date	Case-1	Case-2
May 12	C	G
May 27	E	B
June 12	G	C
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	E

Answer: E

Q. 11

Study the following information carefully and answer the question given below:

Eight posts - A, B, C, D, E, F, G, and H were uploaded on two different dates either 12th or 27th of any month among May, June, July, and August. No two posts were uploaded on the same date of the same month.

H and E were uploaded on the same date of different months. Only three posts were uploaded between B and A. D was uploaded on the 12th of a month but after June. C was not uploaded in May. As many posts uploaded before D as after B. Only two posts were uploaded between G and H. F was uploaded immediately before A. G was uploaded two months before F.

_____ was uploaded immediately after D.

- A) B 
- B) E 
- C) H 
- D) F 
- E) C 

Explanation:**Final Arrangement**

We have,

Month / Date	Case-2
May 12	G
May 27	B
June 12	C
June 27	H
July 12	F
July 27	A
August 12	D
August 27	E

D was uploaded on 12th of a month but after June.

As many posts uploaded before D as after B.

From the above condition, there are two possibilities.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	
July 27		
August 12		D
August 27		

Again we have,

Only three posts were uploaded between B and A.

F was uploaded immediately before A.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	F
July 27		A
August 12	F	D
August 27	A	

Again we have,

G was uploaded two months before F.

Only two posts were uploaded between G and H.

Month / Date	Case-1	Case-2
May 12		G
May 27		B
June 12	G	
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	

Again we have,

H and E were uploaded on the same date of different months.

C was not uploaded in May.

From the above condition, case-1 gets eliminated.

Month / Date	Case-1	Case-2
May 12	C	G
May 27	E	B
June 12	G	C
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	E

Answer: B

Q. 12

Study the following information carefully and answer the question given below:

Eight posts - A, B, C, D, E, F, G, and H were uploaded on two different dates either 12th or 27th of any month among May, June, July, and August. No two posts were uploaded on the same date of the same month.

H and E were uploaded on the same date of different months. Only three posts were uploaded between B and A. D was uploaded on the 12th of a month but after June. C was not uploaded in May. As many posts uploaded before D as after B. Only two posts were uploaded between G and H. F was uploaded immediately before A. G was uploaded two months before F.

As many posts uploaded between A and G as after _____

A) B 

B) D 

C) C 

D) F 

E) None of these 

Explanation:**Final Arrangement**

We have,

Month / Date	Case-2
May 12	G
May 27	B
June 12	C
June 27	H
July 12	F
July 27	A
August 12	D
August 27	E

D was uploaded on 12th of a month but after June.

As many posts uploaded before D as after B.

From the above condition, there are two possibilities.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	
July 27		
August 12		D
August 27		

Again we have,

Only three posts were uploaded between B and A.

F was uploaded immediately before A.

Month / Date	Case-1	Case-2
May 12		
May 27		B
June 12		
June 27	B	
July 12	D	F
July 27		A
August 12	F	D
August 27	A	

Again we have,

G was uploaded two months before F.

Only two posts were uploaded between G and H.

Month / Date	Case-1	Case-2
May 12		G
May 27		B
June 12	G	
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	

Again we have,

H and E were uploaded on the same date of different months.

C was not uploaded in May.

From the above condition, case-1 gets eliminated.

Month / Date	Case-1	Case-2
May 12	C	G
May 27	E	B
June 12	G	C
June 27	B	H
July 12	D	F
July 27	H	A
August 12	F	D
August 27	A	E

Answer: E

Q. 13

Study the following information carefully and answer the given questions. ²⁶⁰⁸¹⁷¹⁴³⁷

R # P 4 M % L K 8 2 \$ D & A N F Y 5 9 * N B C @ 7 !

If the first ten elements are reversed, then which of the following element is twelfth to the left of the sixth element from the right end?

- A) K 
- B) # 
- C) L 
- D) 4 
- E) M 

Answer: B

Original Series: R # P 4 M % L K 8 2 \$ D & A N F Y 5 9 * N B C @ 7 !

After reversing the first 10 elements: 2 8 K L % M 4 P # R \$ D & A N F Y 5 9 * N B C @ 7 !

Explanation:

12th to the left of the 6th from the right end is the 18th element from the right end (or the 9th element from the left end), since total no. of elements in series is 26.

The 9th element from the left end is #.

Q. 14

Study the following information carefully and answer the given questions.

R # P 4 M % L K 8 2 \$ D & A N F Y 5 9 * N B C @ 7 !

Every second element from the left end is removed from the given series, then how many symbols are there in the newly formed series?

- A) Three 
- B) None 
- C) One 
- D) Two 
- E) More than three 

Explanation:

Answer: D

Remaining elements (odd positions): R, P, M, L, 8, \$, &, N, Y, 9, N, C, 7.

There are two symbols: \$ and &.

Q. 15

Study the following information carefully and answer the given questions.

R # P 4 M % L K 8 2 \$ D & A N F Y 5 9 * N B C @ 7 !

What is the product of the numbers which are between the 8th element from the left end and the 10th element from the right end in the given series?

- A) 21 
- B) 18 
- C) 12 
- D) 14 
- E) 16 

Explanation:

Answer: E

R # P 4 M % L K 8 2 \$ D & A N F Y 5 9 * N B C @ 7 !

8th from the left is K. 10th from the right is Y.

Numbers between them: 8 and 2. Product = $8 * 2 = 16$.

Q. 16

Study the following information carefully and answer the given questions.

R # P 4 M % L K 8 2 \$ D & A N F Y 5 9 * N B C @ 7 !

If we replace the segment "& A N" with "@ I R" and "* N B C" with "% E B C" in a series, then how many vowels are present in the series which are immediately preceded by a symbol and immediately followed by a consonant?

A) None B) One C) Two D) Three E) More than three **Answer: C**

R # P 4 M % L K 8 2 \$ D & A N F Y 5 9 * N B C @ 7 !

Explanation:

After replacing,

R # P 4 M % L K 8 2 \$ D @ I R F Y 5 9 % E B C @ 7 !

R # P 4 M % L K 8 2 \$ D @ I R F Y 5 9 % E B C @ 7 !

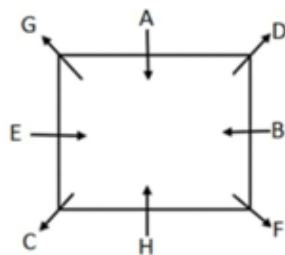

Q. 17

Study the following information carefully and answer the questions below:

Eight persons - A, B, C, D, E, F, G, and H are sitting around a square table in such a way that four of them are sitting at the corners and facing away from the centre while four of them are sitting in the middle of the sides and facing the centre.

Two persons sit between H and D, who doesn't sit in the middle of the side. F sits second to the right of D. G sits second to the right of C and neither of them is an immediate neighbour of D. B sits immediate left of F. A sits second to the left of E.

How many persons sit between B and the one who sits opposite to F?A) Two B) One C) Three D) Four E) Both A and D 

Final Arrangement:

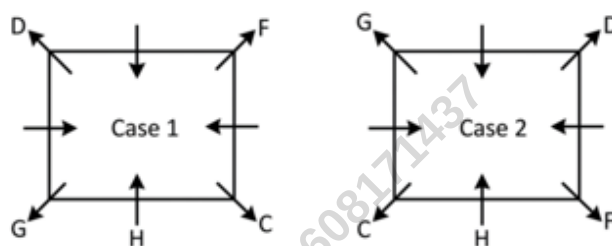

We have,

Two persons sit between H and D who doesn't sit in the middle of the side.

F sits second to the right of D.

G sits second to the right of C and neither of them is an immediate neighbour of D.

From these conditions, there are two possibilities:

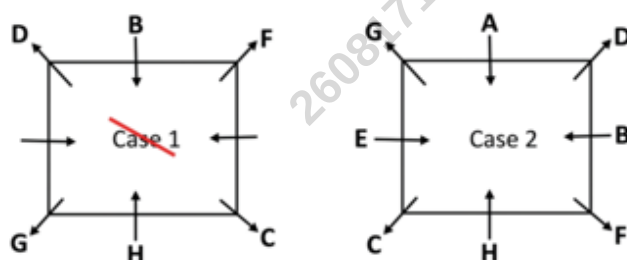

**Explanation:**

Again, we have

B sits immediate left of F.

A sits second to the left of E.

From these conditions, Case 2 gives the final arrangement because Case 1 gets eliminated.

Answer: E

Q. 18

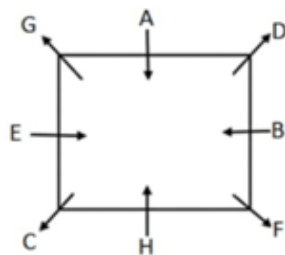

Study the following information carefully and answer the questions below:

Eight persons - A, B, C, D, E, F, G, and H are sitting around a square table in such a way that four of them are sitting at the corners and facing away from the centre while four of them are sitting in the middle of the sides and facing the centre.

Two persons sit between H and D, who doesn't sit in the middle of the side. F sits second to the right of D. G sits second to the right of C and neither of them is an immediate neighbour of D. B sits immediate left of F. A sits second to the left of E.

Who among the following person sits third to the right of the one who sits fourth to the left of C?

A) G B) D C) H D) B E) A 

Final Arrangement:

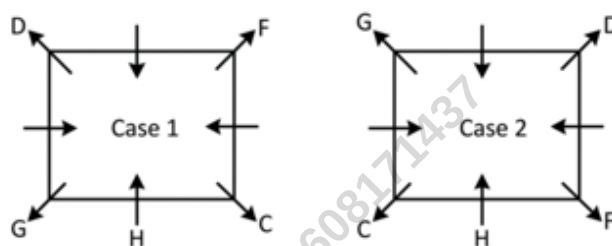

We have,

Two persons sit between H and D who doesn't sit in the middle of the side.

F sits second to the right of D.

G sits second to the right of C and neither of them is an immediate neighbour of D.

From these conditions, there are two possibilities:

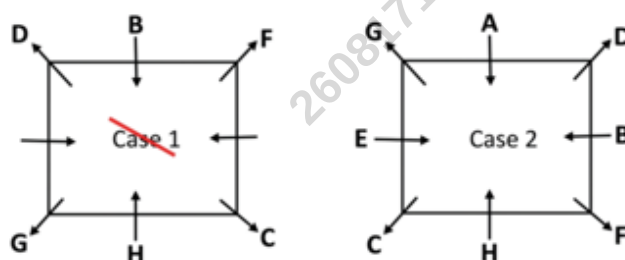

**Explanation:**

Again, we have

B sits immediate left of F.

A sits second to the left of E.

From these conditions, Case 2 gives the final arrangement because Case 1 gets eliminated.

Answer: C

Q. 19

Study the following information carefully and answer the questions below:

Eight persons - A, B, C, D, E, F, G, and H are sitting around a square table in such a way that four of them are sitting at the corners and facing away from the centre while four of them are sitting in the middle of the sides and facing the centre.

Two persons sit between H and D, who doesn't sit in the middle of the side. F sits second to the right of D. G sits second to the right of C and neither of them is an immediate neighbour of D. B sits immediate left of F. A sits second to the left of E.

Who among the following person is an immediate neighbour of E?

A) The one who sits opposite to D

B) F

C) The one who sits opposite to H

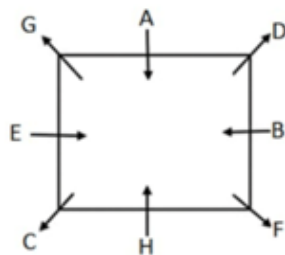

D) G

E) Both A and D

Final Arrangement:

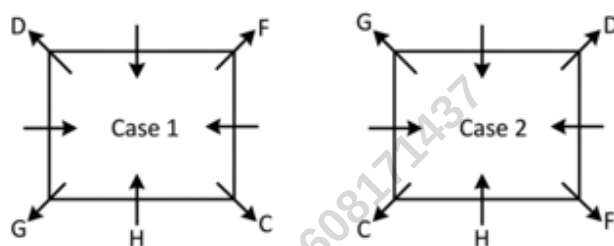

We have,

Two persons sit between H and D who doesn't sit in the middle of the side.

F sits second to the right of D.

G sits second to the right of C and neither of them is an immediate neighbour of D.

From these conditions, there are two possibilities:

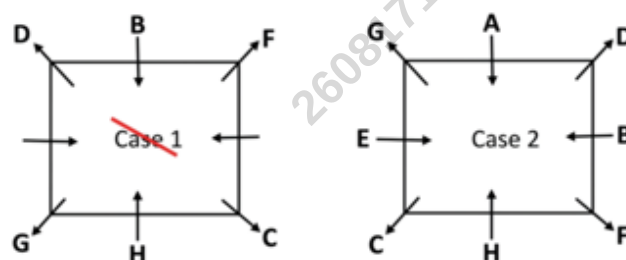

**Explanation:**

Again, we have

B sits immediate left of F.

A sits second to the left of E.

From these conditions, Case 2 gives the final arrangement because Case 1 gets eliminated.

Answer: E

Q. 20

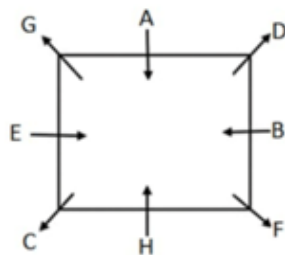

Study the following information carefully and answer the questions below:

Eight persons - A, B, C, D, E, F, G, and H are sitting around a square table in such a way that four of them are sitting at the corners and facing away from the centre while four of them are sitting in the middle of the sides and facing the centre.

Two persons sit between H and D, who doesn't sit in the middle of the side. F sits second to the right of D. G sits second to the right of C and neither of them is an immediate neighbour of D. B sits immediate left of F. A sits second to the left of E.

Who among the following person sits third to the right of B?

- A) The one who sits opposite to H 
- B) The one who sits opposite to D 
- C) The one who sits opposite to B 
- D) The one who sits opposite to A 
- E) The one who sits opposite to F 

Final Arrangement:

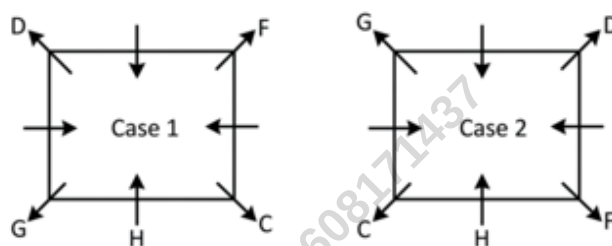

We have,

Two persons sit between H and D who doesn't sit in the middle of the side.

F sits second to the right of D.

G sits second to the right of C and neither of them is an immediate neighbour of D.

From these conditions, there are two possibilities:

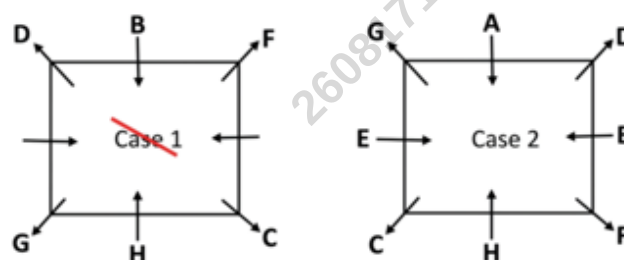

**Explanation:**

Again, we have

B sits immediate left of F.

A sits second to the left of E.

From these conditions, Case 2 gives the final arrangement because Case 1 gets eliminated.

Answer: E

Q. 21

If in the number '84629571364', alternate digits starting from the first digit are extracted, and then these extracted digits are arranged in descending order from left to right, what will be the sum of the digits which are second from the left end and third from the right end?

A) 12 B) 16 C) 15 D) 14 E) 13 **Explanation:****Answer: D**

84629571364 -> Extracted alternate digits starting from the first: 8, 6, 9, 7, 3, 4.

Arranged in descending order: 9, 8, 7, 6, 4, 3.

Second from left = 8. Third from right = 6.

Sum = 8 + 6 = 14.

Q. 22

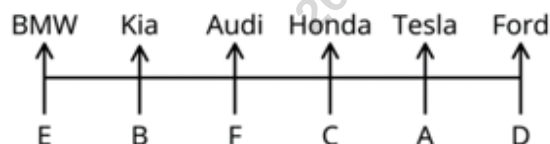

Study the following information carefully and answer the given questions.

Six persons - A, B, C, D, E, and F are sitting in a linear row facing towards the north direction. They use different brands of cars viz., Ford, Audi, BMW, Tesla, Kia, and Honda.

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end. Only one person sits between B and C. As many persons sit to the right of F as to the left of C, who is an immediate neighbour of the one who uses Audi. D sits three places away from the one who uses Audi. A does not sit at the extreme end. The one who uses Honda sits third to the right of the one who uses BMW. D does not use Kia. The one who uses Ford is not an immediate neighbour of the one who uses Honda.

How many persons sit between E and the one who uses Tesla?

- A) One 
- B) Two 
- C) As many persons sit between B and D 
- D) Four 
- E) As many persons sit to the right of D 

Explanation:**Final arrangement:**

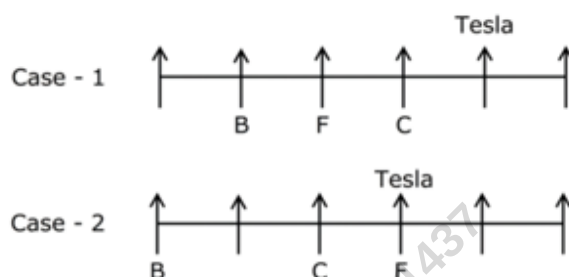

We have,

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end.

Only one person sits between B and C.

As many persons sit to the right of F as to the left of C.

From the above conditions, we have two possibilities:

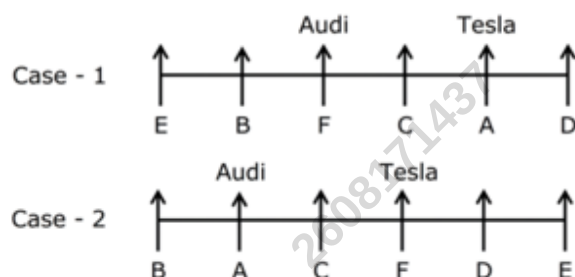

Again we have,

C is an immediate neighbour of the one who uses Audi.

D sits three places away from the one who uses Audi.

A does not sit at the extreme end.

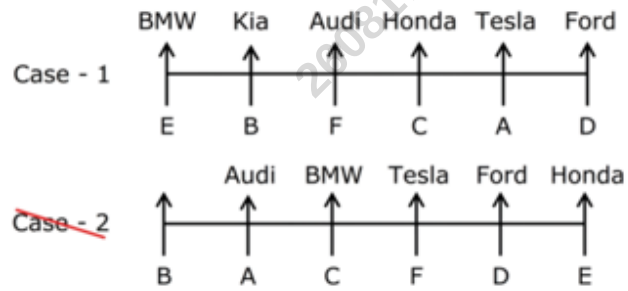

Again we have,

The one who uses Honda sits third to the right of the one who uses BMW.

D does not use Kia.

The one who uses Ford is not an immediate neighbour of the one who uses Honda.

From the above conditions, Case 2 gets eliminated because the one who uses Ford becomes an immediate neighbour of the one who uses Honda. Hence Case 1 shows the final arrangement.

Answer: C

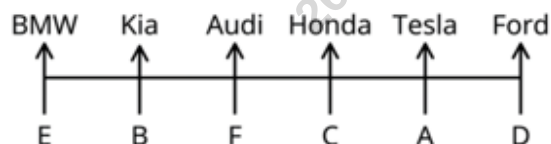

Q. 23

Study the following information carefully and answer the given questions.

Six persons - A, B, C, D, E, and F are sitting in a linear row facing towards the north direction. They use different brands of cars viz., Ford, Audi, BMW, Tesla, Kia, and Honda.

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end. Only one person sits between B and C. As many persons sit to the right of F as to the left of C, who is an immediate neighbour of the one who uses Audi. D sits three places away from the one who uses Audi. A does not sit at the extreme end. The one who uses Honda sits third to the right of the one who uses BMW. D does not use Kia. The one who uses Ford is not an immediate neighbour of the one who uses Honda.

Who among the following person sits at the extreme end of the row?A) A B) The one who uses Kia C) F D) The one who uses Ford E) Both B and D 

Explanation:**Final arrangement:**

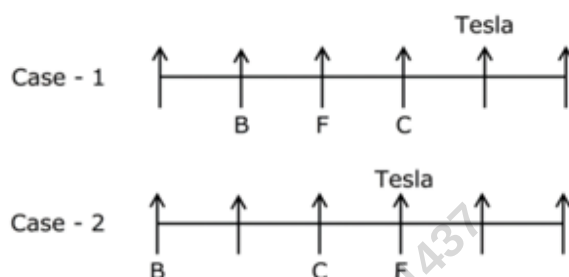

We have,

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end.

Only one person sits between B and C.

As many persons sit to the right of F as to the left of C.

From the above conditions, we have two possibilities:

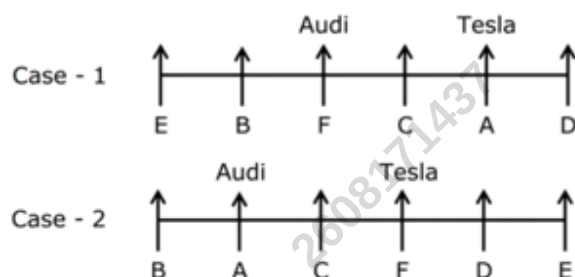

Again we have,

C is an immediate neighbour of the one who uses Audi.

D sits three places away from the one who uses Audi.

A does not sit at the extreme end.

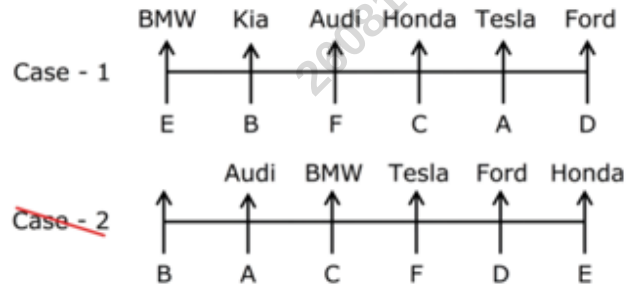

Again we have,

The one who uses Honda sits third to the right of the one who uses BMW.

D does not use Kia.

The one who uses Ford is not an immediate neighbour of the one who uses Honda.

From the above conditions, Case 2 gets eliminated because the one who uses Ford becomes an immediate neighbour of the one who uses Honda. Hence Case 1 shows the final arrangement.

Answer: D

Q. 24

Study the following information carefully and answer the given questions.

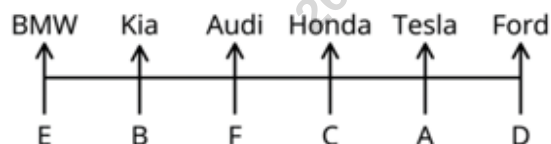

Six persons - A, B, C, D, E, and F are sitting in a linear row facing towards the north direction. They use different brands of cars viz., Ford, Audi, BMW, Tesla, Kia, and Honda.

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end.

Only one person sits between B and C. As many persons sit to the right of F as to the left of C, who is an immediate neighbour of the one who uses Audi. D sits three places away from the one who uses Audi. A does not sit at the extreme end. The one who uses Honda sits third to the right of the one who uses BMW. D does not use Kia. The one who uses Ford is not an immediate neighbour of the one who uses Honda.

Who among the following person sits second to the right of the one who uses Audi car?

A) C B) E C) A D) D E) B 

Explanation:**Final arrangement:**

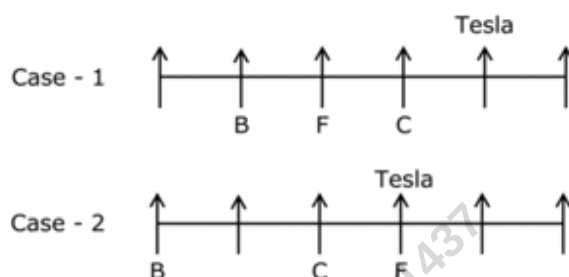

We have,

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end.

Only one person sits between B and C.

As many persons sit to the right of F as to the left of C.

From the above conditions, we have two possibilities:

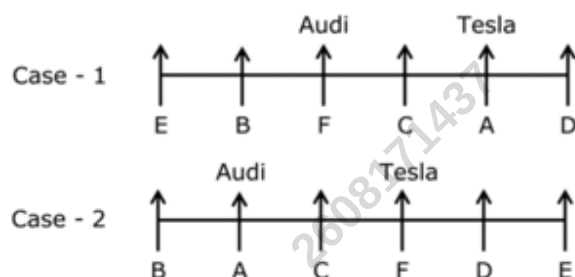

Again we have,

C is an immediate neighbour of the one who uses Audi.

D sits three places away from the one who uses Audi.

A does not sit at the extreme end.

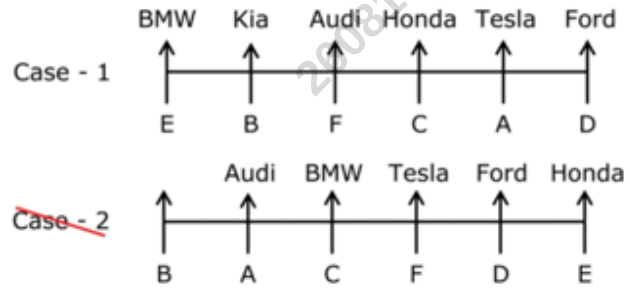

Again we have,

The one who uses Honda sits third to the right of the one who uses BMW.

D does not use Kia.

The one who uses Ford is not an immediate neighbour of the one who uses Honda.

From the above conditions, Case 2 gets eliminated because the one who uses Ford becomes an immediate neighbour of the one who uses Honda. Hence Case 1 shows the final arrangement.

Answer: C

Q. 25

Study the following information carefully and answer the given questions.

Six persons - A, B, C, D, E, and F are sitting in a linear row facing towards the north direction. They use different brands of cars viz., Ford, Audi, BMW, Tesla, Kia, and Honda.

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end. Only one person sits between B and C. As many persons sit to the right of F as to the left of C, who is an immediate neighbour of the one who uses Audi. D sits three places away from the one who uses Audi. A does not sit at the extreme end. The one who uses Honda sits third to the right of the one who uses BMW. D does not use Kia. The one who uses Ford is not an immediate neighbour of the one who uses Honda.

What is the position of E with respect to C?

A) Immediate right

B) Third to the right

C) Second to the right

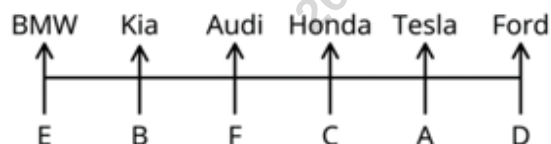

D) Second to the left

E) Third to the left

Explanation:**Final arrangement:**

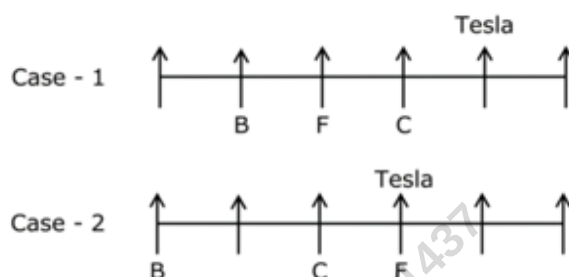

We have,

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end.

Only one person sits between B and C.

As many persons sit to the right of F as to the left of C.

From the above conditions, we have two possibilities:

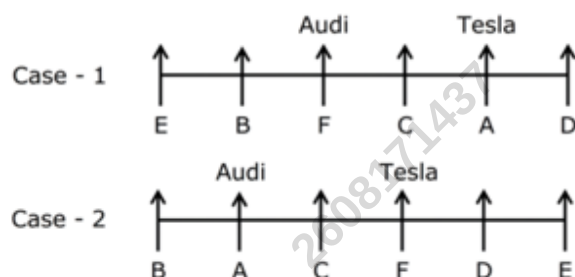

Again we have,

C is an immediate neighbour of the one who uses Audi.

D sits three places away from the one who uses Audi.

A does not sit at the extreme end.

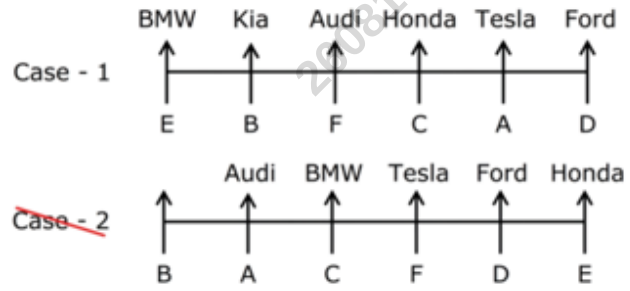

Again we have,

The one who uses Honda sits third to the right of the one who uses BMW.

D does not use Kia.

The one who uses Ford is not an immediate neighbour of the one who uses Honda.

From the above conditions, Case 2 gets eliminated because the one who uses Ford becomes an immediate neighbour of the one who uses Honda. Hence Case 1 shows the final arrangement.

Answer: E

Q. 26

Study the following information carefully and answer the given questions.

Six persons - A, B, C, D, E, and F are sitting in a linear row facing towards the north direction. They use different brands of cars viz., Ford, Audi, BMW, Tesla, Kia, and Honda.

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end. Only one person sits between B and C. As many persons sit to the right of F as to the left of C, who is an immediate neighbour of the one who uses Audi. D sits three places away from the one who uses Audi. A does not sit at the extreme end. The one who uses Honda sits third to the right of the one who uses BMW. D does not use Kia. The one who uses Ford is not an immediate neighbour of the one who uses Honda.

Which of the following statements is/are not false as per the given arrangement?

- I). B uses Kia car.
- II). C sits at the end of the row.
- III). F sits third to the left of D.

A) Only I

B) Only II

C) Only I and III

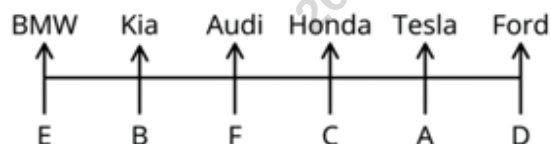

D) Only I and II

E) Only II and III

Explanation:**Final arrangement:**

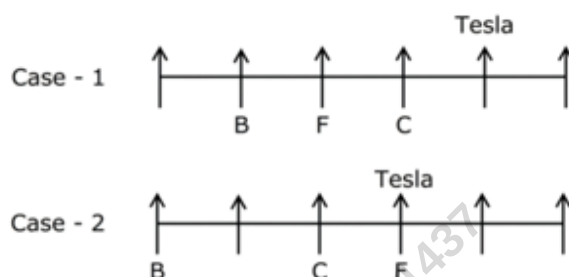

We have,

B sits third to the left of the one who uses Tesla, who does not sit at the extreme end.

Only one person sits between B and C.

As many persons sit to the right of F as to the left of C.

From the above conditions, we have two possibilities:

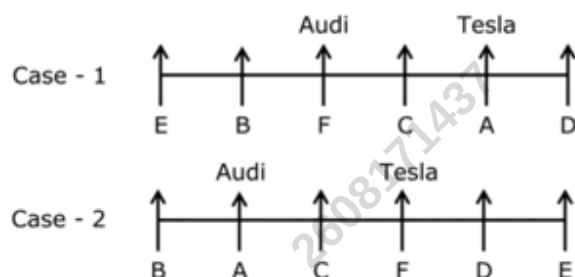

Again we have,

C is an immediate neighbour of the one who uses Audi.

D sits three places away from the one who uses Audi.

A does not sit at the extreme end.

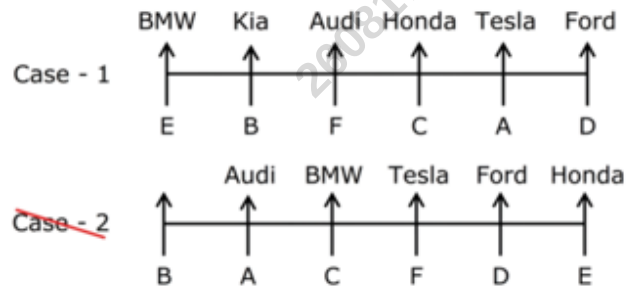

Again we have,

The one who uses Honda sits third to the right of the one who uses BMW.

D does not use Kia.

The one who uses Ford is not an immediate neighbour of the one who uses Honda.

From the above conditions, Case 2 gets eliminated because the one who uses Ford becomes an immediate neighbour of the one who uses Honda. Hence Case 1 shows the final arrangement.

Answer: C

Q. 27

If it is possible to make a meaningful word with the first, fifth, eighth and eleventh letters from the left end of the word "SPECULATION" then which would be the second letter of the meaningful word (using each letter once only)? If more than one such word can be formed give X as the answer. If no such word can be formed give Y as your answer.

- A) S 
- B) U 
- C) T 
- D) X 
- E) Y 

Answer: D

SPECULATION -> 1st(S), 5th(U), 8th(T), 11th(N).

Extracted letters: S, U, T, N.

Words formed: NUTS, STUN, TUNS.

Since more than one word can be formed, the answer is X.

Explanation:

Q. 28

Study the following statements and then decide which of the given conclusions logically follows from the given statements disregarding the commonly known facts.

Statements:

Only a few laptops are monitors

All laptops are printers

At least some speakers are monitors

No speaker is a scanner

Conclusions:

I). Some printers are definitely not monitors

II). All monitors are scanners is a possibility

A) Only conclusion I follows ✓

B) Only conclusion II follows ✗

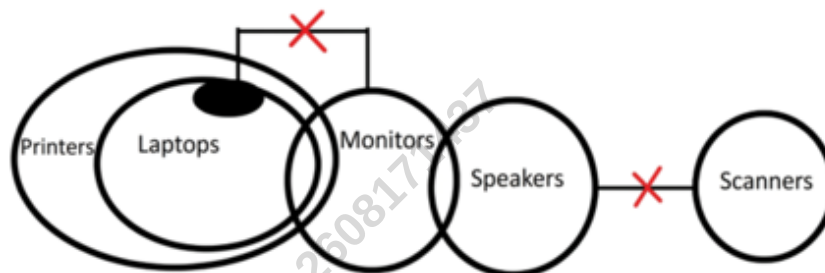

C) Either conclusion I or II follows ✗

D) Neither conclusion I nor II follows ✗

E) Both conclusions I and II follow ✗

Answer: A

Explanation:

Q. 29

Study the following statements and then decide which of the given conclusions logically follows from the given statements disregarding the commonly known facts.

Statements:

Only a few cups are plates

Only a few bowls are cup

All bowls are spoons

At least some spoons are forks

Conclusions:

I). Some plates are bowls

II). All cups can never be spoons

A) Only conclusion I follows

B) Only conclusion II follows

C) Either conclusion I or II follows

D) Neither conclusion I nor II follows

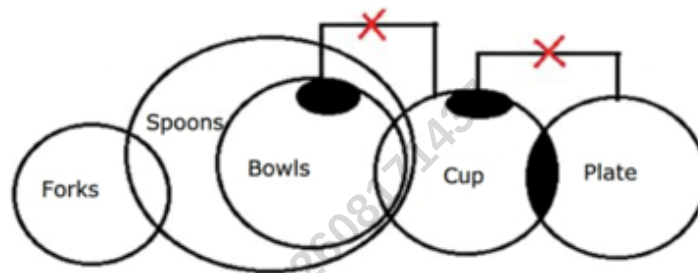

E) Both conclusions I and II follow

Answer: D

Explanation:

Q. 30

Study the following statements and then decide which of the given conclusions logically follows from the given statements disregarding the commonly known facts.

Statements:

Only pen is a marker

Some pens are erasers

No eraser is a ruler

All rulers are pencils

Conclusions:

I). All pens can never be erasers

II). Some pencils are not erasers

A) Only conclusion I follows

B) Only conclusion II follows

C) Either conclusion I or II follows

D) Neither conclusion I nor II follows

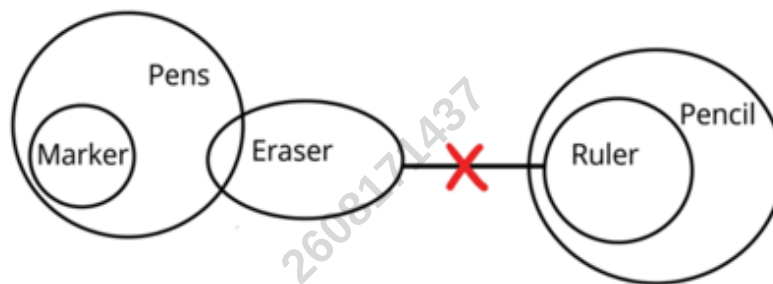

E) Both conclusions I and II follow

Answer: E

Explanation:

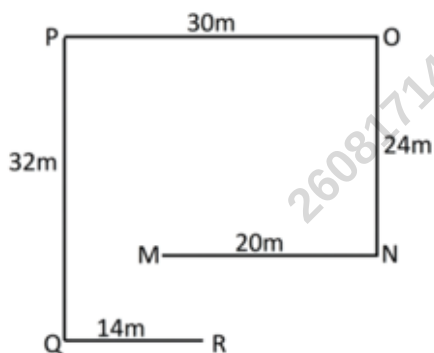

Q. 31

Study the following information carefully and answer the questions given below.

A man starts walking from point M towards the east for 20m to reach point N. Then he takes two consecutive left turns and walks for 24m and 30m to reach point O and point P respectively. Then he turns towards the south and walks for 32m to reach point Q. Then again he takes a left turn and walks for 14m to reach point R.

What is the shortest distance between point P and point M?

- A) 22 m ☒
- B) 24 m ☒
- C) 26 m ☒
- D) 28 m ☒
- E) 30 m ☒

Explanation:**Answer: C**

Shortest distance between P and M = $\sqrt{(10)^2 + (24)^2} = \sqrt{(100 + 576)} = \sqrt{676} = 26\text{m}$.

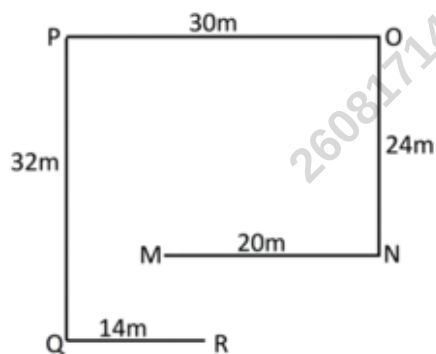

Q. 32

Study the following information carefully and answer the questions given below.

A man starts walking from point M towards the east for 20m to reach point N. Then he takes two consecutive left turns and walks for 24m and 30m to reach point O and point P respectively. Then he turns towards the south and walks for 32m to reach point Q. Then again he takes a left turn and walks for 14m to reach point R.

If Point S is 8m north of point Q, then what is the distance between point S and point M?

- A) 8 m ☒
- B) 10 m ☒
- C) 12 m ☒
- D) 14 m ☒
- E) 16 m ☒

Explanation:**Answer: B**

Q. 33

Study the following information carefully and answer the given questions

Eight persons have –W, G, K, C, S, P, L and O different number of stamp.

K has more stamps than P but less stamps than C and L. W has more stamps than O but less stamps than G and K. G has thrice the number of stamps with P, who has less stamps than S. S has less stamps than O. As many persons has more stamps than S as less than G. The one who has the least number of stamps has 11 stamps and L has 3 stamps more than G.

If K has 8 stamps less than L, then what may be the number of stamps with C?

- A) 25 
- B) 10 
- C) 35 
- D) 38 
- E) 30 

Explanation:

$L(36) > G(33) > C > K > W > O > S > P(11)$

Answer: E

P has 11 stamps, so $G = 33$ and $L = 36$.

Then, $K = 28$, so C must have stamps between 29 and 33

Q. 34

Study the following information carefully and answer the given questions

Eight persons have –W, G, K, C, S, P, L and O different number of stamp.

K has more stamps than P but less stamps than C and L. W has more stamps than O but less stamps than G and K. G has thrice the number of stamps with P, who has less stamps than S. S has less stamps than O. As many persons has more stamps than S as less than G. The one who has the least number of stamps has 11 stamps and L has 3 stamps more than G.

If the rate per stamp is Rs.2, then what is the sum of the rate of stamp with G and O, if O has 5 stamps more than P?

A) Rs.120 

B) Rs. 90 

C) Rs. 98 

D) Rs. 100 

E) Rs. 114 

Explanation:

$L(36) > G(33) > C > K > W > O > S > P(11)$

Answer: C

$G = 33 \times 2 = 66$; $O = 11 + 5 = 16 \times 2 = 32$; $G + O = \text{Rs.}98$

Q. 35

Study the following information carefully and answer the given questions

Eight persons have –W, G, K, C, S, P, L and O different number of stamp.

K has more stamps than P but less stamps than C and L. W has more stamps than O but less stamps than G and K. G has thrice the number of stamps with P, who has less stamps than S. S has less stamps than O. As many persons has more stamps than S as less than G. The one who has the least number of stamps has 11 stamps and L has 3 stamps more than G.

How many persons have more stamps than W?

- A) Three 
- B) Two 
- C) One 
- D) Four 
- E) Five 

Explanation:

$$L(36) > G(33) > C > K > W > O > S > P(11)$$
Answer: D**English Language**

Q. 36

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

According to the passage, what is the primary driver behind the emergence of the "Silver Economy"?

- A) A sudden, global increase in fertility rates among young adults. 
- B) Declining fertility rates coupled with remarkable advancements in medical science. 
- C) The complete collapse of national pension systems in Western countries. 
- D) A global decrease in consumer purchasing power. 
- E) The invention of the world's first AI companion robot in Japan. 

Answer: B

The passage states that the Silver Economy has emerged because **people are living longer due to medical advancements** while **birth rates are declining**. As a result, the elderly population is growing rapidly, creating new economic opportunities.

Explanation:

- **A)** Incorrect – The passage mentions **declining**, not increasing, fertility rates.
- **B)** Correct – Exactly matches the passage.
- **C)** Incorrect – Pension systems are discussed as a challenge, not the cause.
- **D)** Incorrect – The passage highlights the purchasing power of older adults, not a decrease in consumer spending.
- **E)** Incorrect – AI companion robots are examples of products developed later, not the reason for the Silver Economy

Q. 37

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

How are Japanese corporations responding to their nation's demographic shift?

A) By refusing to hire anyone over the age of 65 to cut healthcare costs.

B) By drastically increasing the production of acute, infectious disease medicines.

C) By pivoting to develop products specifically tailored to the elderly, such as easy-to-chew foods and mobility robotics.

D) By relocating their manufacturing headquarters to countries with younger populations.

E) By lobbying the government to lower the statutory retirement age.

Answer: C

Japan has adapted to its aging population by producing **elder-friendly products**, including nutrient-rich foods that are easy to chew, mobility robots, wearable health devices, and AI companion robots.

Explanation:

- **A)** Incorrect – The passage never mentions refusing to hire older people.
- **B)** Incorrect – It discusses chronic disease management, not increasing production of infectious disease medicines.
- **C)** Correct – Directly supported by the passage.
- **D)** Incorrect – No relocation of manufacturing is mentioned.
- **E)** Incorrect – Governments are **raising**, not lowering, retirement age.

Q. 38

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

What major structural challenge does the inverted demographic pyramid pose for national governments?

A) There is a massive surplus of tax revenue with nothing to spend it on. 

B) The dependency ratio skyrockets as fewer active workers must support a larger cohort of retirees. 

C) Smart-home sensors are becoming too expensive for average citizens to afford. 

D) The healthcare system is overwhelmed by acute, infectious diseases among the youth. 

E) The stock market is crashing due to a lack of investment in tech startups.

Answer: B

As the population ages, the number of retirees increases while the working population decreases. Consequently, **fewer taxpayers must financially support more retired individuals**, causing the dependency ratio to rise sharply.

Explanation:

- **A)** Incorrect – The problem is reduced financial support, not excess tax revenue.
- **B)** Correct – Exactly stated in the passage.
- **C)** Incorrect – Smart-home sensor costs are not presented as a government challenge.
- **D)** Incorrect – The healthcare concern is chronic diseases, not infectious diseases among youth.
- **E)** Incorrect – Stock market crashes are never discussed.

Q. 39

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

Which of the following words is most nearly the SAME in meaning to the highlighted word "lucrative" as used in the passage?

- A) Destructive 
- B) Unprofitable 
- C) Profitable 
- D) Stagnant 
- E) Temporary 

Answer: C

Lucrative = producing a large profit; highly profitable.

The passage describes gerontechnology as one of the most **lucrative** sectors, meaning it generates **high profits**.

Explanation:

- **A) Destructive** – Means causing damage.
- **B) Unprofitable** – Opposite of lucrative.
- **C) Profitable** – Exact synonym.
- **D) Stagnant** – Means showing little or no growth.
- **E) Temporary** – Means lasting only for a short time.

Q. 40

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

Which of the following words is most nearly the OPPOSITE in meaning to the highlighted word "alleviate" as used in the passage?

- A) Relieve 
- B) Exacerbate 
- C) Comfort 
- D) Diagnose 
- E) Conceal 

Answer: B

Alleviate = make less severe or easier to bear.

The passage says AI companion robots help **alleviate** loneliness, meaning **reduce or ease** it. The opposite is **exacerbate**, which means **to make a problem worse**.

Explanation:

- **A) Relieve** – Synonym of alleviate.
- **B) Exacerbate** – Correct antonym.
- **C) Comfort** – Means console or soothe.
- **D) Diagnose** – Means identify a disease or problem.
- **E) Conceal** – Means hide.

Q. 41

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

What does the term "gerontechnology" refer to in the context of the passage?

- A) The study of ancient economic models. 
- B) The legal framework surrounding pension reform. 
- C) The intersection of technology and aging, focusing on products that assist older adults. 
- D) The specific programming language used to code AI robots. 
- E) The shift from chronic to acute disease management. 

Answer: C

The passage defines **gerontechnology** as the combination of **technology and aging**, where technological innovations are designed to improve the lives of elderly people.

Explanation:

- **A)** Incorrect – Not related to ancient economies.
- **B)** Incorrect – Not a legal framework.
- **C)** Correct – Direct definition from the passage.
- **D)** Incorrect – It is not a programming language.
- **E)** Incorrect – This refers to healthcare policy, not gerontechnology.

Q. 42

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

How must the healthcare industry change to adapt to the Silver Economy, according to the text?

- A) It must stop researching treatments for Alzheimer's entirely. 
- B) It must pivot its focus from acute, infectious diseases to managing chronic, long-term conditions. 
- C) It must prioritize free healthcare for children under the age of five. 
- D) It must rely entirely on robotic surgeons to lower overhead costs. 
- E) It must restrict medical care to only those currently employed in the workforce. 

Answer: B

Since older adults are more likely to suffer from chronic illnesses such as Alzheimer's, arthritis, and diabetes, healthcare systems must shift their focus from treating infectious diseases to managing long-term conditions.

Explanation:

- **A)** Incorrect – Alzheimer's treatment remains essential.
- **B)** Correct – Clearly stated in the passage.
- **C)** Incorrect – Free healthcare for children is not discussed.
- **D)** Incorrect – Robotic surgeons are never mentioned.
- **E)** Incorrect – The passage does not suggest restricting healthcare.

Q. 43

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

Which of the following statements is TRUE according to the passage?

- A) The number of children under five currently vastly outnumbers individuals over 65. 
- B) Traditional economic models rely on a small, youthful workforce supporting a massive retiree population. 
- C) Governments are lowering the statutory retirement age to create jobs for younger people. 
- D) A successful 21st-century nation will integrate its elderly citizens into the active economic ecosystem. 

E) Japan has successfully avoided the economic impacts of an aging population by banning AI.

Answer: D

The passage concludes that countries will prosper if they continue to engage older adults in economic activities, treating longevity as an advantage rather than a burden.

Explanation:

- **A)** Incorrect – The passage says people aged 65+ are expected to outnumber children under five.
- **B)** Incorrect – Traditional models depend on a **large** working population supporting a **smaller** retired population.
- **C)** Incorrect – Governments are **raising**, not lowering, the retirement age.
- **D)** Correct – This is the main conclusion of the passage.
- **E)** Incorrect – The passage never mentions banning AI in Japan.

Q. 44

Read the following passage carefully and answer the questions that follow based on the information provided in the text.

The global demographic landscape is undergoing a profound and unprecedented shift. For the first time in human history, the number of individuals aged 65 and older is poised to outnumber children under the age of five. This phenomenon, driven by declining fertility rates and remarkable advancements in medical science, has birthed a new economic paradigm known as the "Silver Economy." Rather than viewing an aging population merely as a drain on national pension systems and healthcare resources, visionary economists are now recognizing the immense purchasing power and unique consumer needs of older adults as a formidable engine for economic growth.

Japan, a nation where nearly a third of the population is over 65, serves as the pioneer of the Silver Economy. Japanese corporations have rapidly pivoted to cater to this demographic, developing products ranging from nutrient-dense, easy-to-chew foods to advanced robotics designed to assist with mobility and daily chores. This burgeoning intersection of technology and aging, widely referred to as "gerontechnology," is currently one of the most **lucrative** sectors for venture capital investment globally. Startups are designing smart-home sensors that can detect a fall, wearable health monitors that predict cardiac events, and even AI-driven companion robots that alleviate the acute loneliness often experienced by the elderly.

However, the transition to a Silver Economy presents massive structural challenges for national governments. Traditional economic models were built on a pyramidal demographic structure, where a large, youthful workforce generated sufficient tax revenue to support a smaller cohort of retirees. As this pyramid inverts, the dependency ratio—the number of non-working individuals compared to working-age individuals—skyrockets. Governments are being forced to implement highly unpopular policy reforms, such as progressively raising the statutory retirement age, encouraging private wealth accumulation for late-life care, and incentivizing companies to hire and retain senior workers through flexible, part-time employment models.

Furthermore, the healthcare industry must undergo a systemic realignment. The medical focus must pivot from treating acute, infectious diseases—the primary threat to younger populations—to managing chronic, long-term conditions like Alzheimer's, arthritis, and diabetes. Ultimately, the nations that will thrive in the 21st century are those that seamlessly integrate their elderly citizens into the active economic ecosystem, transforming the challenge of longevity into an asset of experience and sustained consumption.

Which of the following best serves as a concise, accurate title for the passage?

A) The Collapse of the Japanese Tech Industry ❌

B) The Silver Economy: Navigating the Economics of an Aging Global Population ✅

C) Gerontechnology: Why Robots Will Replace Doctors ❌

D) The End of the Youth Workforce ❌

E) How to Avoid Chronic Diseases in Old Age ❌

Answer: B

The passage revolves around the concept of the **Silver Economy**, explaining how the world's aging population is creating both **economic opportunities** and **structural challenges**. It discusses Japan's role as a pioneer, the rise of gerontechnology, government policy reforms, healthcare changes, and the importance of integrating older adults into the economy. Therefore, Option **B** best captures the central theme and overall scope of the passage.

Explanation:

- **A) The Collapse of the Japanese Tech Industry** – Incorrect. The passage does not discuss the decline of Japan's technology sector; instead, it highlights Japan's leadership in developing products and technologies for the elderly.
- **B) The Silver Economy: Navigating the Economics of an Aging Global Population** – **Correct**. It accurately summarizes the passage by covering both the Silver Economy and the economic implications of an aging population.
- **C) Gerontechnology: Why Robots Will Replace Doctors** – Incorrect. Gerontechnology is only one aspect of the passage, and there is no claim that robots will replace doctors.
- **D) The End of the Youth Workforce** – Incorrect. The passage discusses demographic changes but does not suggest that the youth workforce will disappear.
- **E) How to Avoid Chronic Diseases in Old Age** – Incorrect. The passage focuses on economic and demographic changes, not on disease prevention or healthcare advice.

Q. 45

In the following passage, there are blanks, each of which has been denoted by a number/letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately, both contextually and grammatically.

The commercial aviation industry is currently responsible for roughly 2.5% of all global carbon emissions. Unlike the automotive sector, which is rapidly transitioning to battery-electric power, aviation faces a unique physics problem: current battery technology is simply too heavy and lacks the energy density required for long-haul commercial flights. Consequently, the industry is increasingly looking toward Sustainable Aviation Fuel (SAF) as the only highly (45) near-term solution for decarbonization. SAF is produced from renewable resources such as agricultural waste, used cooking oil, and captured carbon, and can be blended directly with traditional jet fuel without requiring any modifications to existing aircraft engines.

However, the widespread adoption of SAF is severely constrained by economic and supply chain realities. Currently, SAF accounts for less than 0.1% of global jet fuel consumption. This tiny (46) is primarily due to production costs; SAF is often three to five times more expensive to refine than standard kerosene. Without significant government subsidies and aggressive tax incentives, airlines are incredibly reluctant to absorb this massive price (47), as fuel is already their largest operating expense. To overcome this hurdle, experts emphasize that (48) up SAF production capacity is essential. If governments can stimulate investment in biofuel refineries and mandate gradual blending quotas, the aviation sector might finally begin its much-needed (49) toward net-zero skies.

Which of the following word CAN FIT Blank (45)?

A) fragile 

B) nominal 

C) viable 

D) obsolete 

E) superficial 

Answer: C

The sentence is:

"Consequently, the industry is increasingly looking toward Sustainable Aviation Fuel (SAF) as the only highly (45) _____ near-term solution for decarbonization."

We are looking for a word that means **practical, feasible, and capable of being successfully implemented** in the near future.

Explanation:

a) **fragile** → Means weak or easily broken → Does not describe the practicality or effectiveness of a solution.

b) **nominal** → Means existing in name only or very small → Does not convey the idea of a workable solution.

c) **viable** → Means feasible, practical, and capable of succeeding → **Perfect fit; SAF is presented as the only practical near-term solution for reducing aviation emissions.**

d) **obsolete** → Means outdated or no longer useful → Opposite of the intended meaning.

e) **superficial** → Means shallow or not thorough → Does not describe the effectiveness of a solution.

Q. 46

In the following passage, there are blanks, each of which has been denoted by a number/letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately, both contextually and grammatically.

The commercial aviation industry is currently responsible for roughly 2.5% of all global carbon emissions. Unlike the automotive sector, which is rapidly transitioning to battery-electric power, aviation faces a unique physics problem: current battery technology is simply too heavy and lacks the energy density required for long-haul commercial flights. Consequently, the industry is increasingly looking toward Sustainable Aviation Fuel (SAF) as the only highly (45) near-term solution for decarbonization. SAF is produced from renewable resources such as agricultural waste, used cooking oil, and captured carbon, and can be blended directly with traditional jet fuel without requiring any modifications to existing aircraft engines.

However, the widespread adoption of SAF is severely constrained by economic and supply chain realities. Currently, SAF accounts for less than 0.1% of global jet fuel consumption. This tiny (46) is primarily due to production costs; SAF is often three to five times more expensive to refine than standard kerosene. Without significant government subsidies and aggressive tax incentives, airlines are incredibly reluctant to absorb this massive price (47), as fuel is already their largest operating expense. To overcome this hurdle, experts emphasize that (48) up SAF production capacity is essential. If governments can stimulate investment in biofuel refineries and mandate gradual blending quotas, the aviation sector might finally begin its much-needed (49) toward net-zero skies.

Which of the following word CAN FIT Blank (46)?

A) fraction 

B) surplus 

C) abundance 

D) excess 

E) illusion 

Answer: A

The sentence is:

"Currently, SAF accounts for less than 0.1% of global jet fuel consumption. This tiny (46) _____ is primarily due to production costs..."

We are looking for a word that refers to a **very small part or proportion** of the total.

Explanation:

a) **fraction** → Means a small part or proportion of a whole → **Perfect fit; less than 0.1% represents only a tiny fraction of global jet fuel consumption.**

b) **surplus** → Means an excess or extra amount → Opposite of the intended meaning.

c) **abundance** → Means a large quantity or plenty → Contradicts the idea of "less than 0.1%."

d) **excess** → Means an amount beyond what is necessary or usual → Incorrect because the passage describes scarcity/limited adoption, not an excessive quantity.

e) **illusion** → Means a false perception or appearance → Completely unrelated to fuel consumption.

Q. 47

In the following passage, there are blanks, each of which has been denoted by a number/letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately, both contextually and grammatically.

The commercial aviation industry is currently responsible for roughly 2.5% of all global carbon emissions. Unlike the automotive sector, which is rapidly transitioning to battery-electric power, aviation faces a unique physics problem: current battery technology is simply too heavy and lacks the energy density required for long-haul commercial flights. Consequently, the industry is increasingly looking toward Sustainable Aviation Fuel (SAF) as the only highly (45) near-term solution for decarbonization. SAF is produced from renewable resources such as agricultural waste, used cooking oil, and captured carbon, and can be blended directly with traditional jet fuel without requiring any modifications to existing aircraft engines.

However, the widespread adoption of SAF is severely constrained by economic and supply chain realities. Currently, SAF accounts for less than 0.1% of global jet fuel consumption. This tiny (46) is primarily due to production costs; SAF is often three to five times more expensive to refine than standard kerosene. Without significant government subsidies and aggressive tax incentives, airlines are incredibly reluctant to absorb this massive price (47), as fuel is already their largest operating expense. To overcome this hurdle, experts emphasize that (48) up SAF production capacity is essential. If governments can stimulate investment in biofuel refineries and mandate gradual blending quotas, the aviation sector might finally begin its much-needed (49) toward net-zero skies.

Which of the following word CAN FIT Blank (47)?

- A) reduction 
- B) premium 
- C) discount 
- D) anomaly 
- E) liability 

Answer: B

The sentence is:

"...airlines are incredibly reluctant to absorb this massive price (47) _____, as fuel is already their largest operating expense."

We are looking for a word that means **an additional amount paid above the normal price**.

Explanation:

a) **reduction** → Means a decrease in price → Opposite of the passage, which discusses higher costs.

b) **premium** → Means an extra amount paid above the standard price → **Perfect fit; SAF is significantly more expensive than conventional jet fuel, creating a price premium.**

c) **discount** → Means a lower or reduced price → Opposite of the intended meaning.

d) **anomaly** → Means something unusual or irregular → Does not naturally fit after "price" in this context.

e) **liability** → Means a responsibility or financial obligation → Does not form the correct expression with "price."

Q. 48

In the following passage, there are blanks, each of which has been denoted by a number/letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately, both contextually and grammatically.

The commercial aviation industry is currently responsible for roughly 2.5% of all global carbon emissions. Unlike the automotive sector, which is rapidly transitioning to battery-electric power, aviation faces a unique physics problem: current battery technology is simply too heavy and lacks the energy density required for long-haul commercial flights. Consequently, the industry is increasingly looking toward Sustainable Aviation Fuel (SAF) as the only highly (45) near-term solution for decarbonization. SAF is produced from renewable resources such as agricultural waste, used cooking oil, and captured carbon, and can be blended directly with traditional jet fuel without requiring any modifications to existing aircraft engines.

However, the widespread adoption of SAF is severely constrained by economic and supply chain realities. Currently, SAF accounts for less than 0.1% of global jet fuel consumption. This tiny (46) is primarily due to production costs; SAF is often three to five times more expensive to refine than standard kerosene. Without significant government subsidies and aggressive tax incentives, airlines are incredibly reluctant to absorb this massive price (47), as fuel is already their largest operating expense. To overcome this hurdle, experts emphasize that (48) up SAF production capacity is essential. If governments can stimulate investment in biofuel refineries and mandate gradual blending quotas, the aviation sector might finally begin its much-needed (49) toward net-zero skies.

Which of the following word CAN FIT Blank (48)?

A) dialing 

B) scaling 

C) tearing 

D) breaking 

E) locking 

Answer: B

The sentence is:

"To overcome this hurdle, experts emphasize that (48) _____ up SAF production capacity is essential."

We are looking for a word that forms the standard expression meaning **to increase production capacity**.

Explanation:

- a) **dialing** → Means adjusting a setting or making a phone call → Does not collocate with production capacity.
- b) **scaling** → Means increasing or expanding to a larger level → **Perfect fit; "scaling up production" is the standard business expression for increasing production capacity.**
- c) **tearing** → Means ripping apart → Opposite of the intended meaning.
- d) **breaking** → Means damaging or separating → Does not fit the context.
- e) **locking** → Means securing or fastening → Does not relate to increasing production.

Q. 49

In the following passage, there are blanks, each of which has been denoted by a number/letter. For each blank, five options are given. Choose the most appropriate word from the options that fits the blank appropriately, both contextually and grammatically.

The commercial aviation industry is currently responsible for roughly 2.5% of all global carbon emissions. Unlike the automotive sector, which is rapidly transitioning to battery-electric power, aviation faces a unique physics problem: current battery technology is simply too heavy and lacks the energy density required for long-haul commercial flights. Consequently, the industry is increasingly looking toward Sustainable Aviation Fuel (SAF) as the only highly (45) near-term solution for decarbonization. SAF is produced from renewable resources such as agricultural waste, used cooking oil, and captured carbon, and can be blended directly with traditional jet fuel without requiring any modifications to existing aircraft engines.

However, the widespread adoption of SAF is severely constrained by economic and supply chain realities. Currently, SAF accounts for less than 0.1% of global jet fuel consumption. This tiny (46) is primarily due to production costs; SAF is often three to five times more expensive to refine than standard kerosene. Without significant government subsidies and aggressive tax incentives, airlines are incredibly reluctant to absorb this massive price (47), as fuel is already their largest operating expense. To overcome this hurdle, experts emphasize that (48) up SAF production capacity is essential. If governments can stimulate investment in biofuel refineries and mandate gradual blending quotas, the aviation sector might finally begin its much-needed (49) toward net-zero skies.

Which of the following word CAN FIT Blank (49)?

- A) resistance 
- B) stagnation 
- C) transition 
- D) obedience 
- E) collapse 

Answer: C

The sentence is:

"...the aviation sector might finally begin its much-needed (49) _____ toward net-zero skies."

We are looking for a word that means **a gradual shift from one state to another**.

Explanation:

a) **resistance** → Means opposition to change → Opposite of the intended meaning.

b) **stagnation** → Means lack of progress or development → Contradicts the passage, which discusses advancement.

c) **transition** → Means a gradual change from one condition or system to another → **Perfect fit; the aviation industry aims to transition toward net-zero emissions.**

d) **obedience** → Means compliance with rules or authority → Unrelated to environmental progress.

e) **collapse** → Means sudden failure or breakdown → Opposite of the intended meaning.

Q. 50	The following sentence has been divided into parts. One of them may contain a grammatical error. Select the part that contains the error and mark that as your answer. If the sentence is free from error, select 'No error'. Ignore errors of punctuation, if any. One must consistently (A) / strive to perform (B) / one's professional duties (C) / with absolute integrities. (D) / No error (E) A) One must consistently  B) strive to perform  C) one's professional duties  D) with absolute integrities  E) No error 
Explanation:	Answer: D • Grammar Rule: The noun “integrity”, when used to mean honesty, moral uprightness, or adherence to strong moral principles, is generally uncountable. Therefore, it does not normally take the plural form “integrities” in this context. • Application to Question: In the given sentence, the error lies in Part D. The phrase “with absolute integrities” is incorrect because “integrity” is being used in its uncountable sense of moral uprightness. The correct expression is “with absolute integrity.” • The Correction: To rectify this error, “with absolute integrities” must be replaced with “with absolute integrity.” Corrected Sentence: One must consistently strive to perform one's professional duties with absolute integrity. • PRO TIP: When “integrity” refers to honesty, moral character, or ethical principles, use it as an uncountable noun: act with integrity, demonstrate integrity, maintain professional integrity. Therefore, option D is the correct answer.

Q. 51

The following sentence has been divided into parts. One of them may contain a grammatical error. Select the part that contains the error and mark that as your answer. If the sentence is free from error, select 'No error'. Ignore errors of punctuation, if any.

The board of directors (A) / met yesterday morning (B) / to thoroughly discuss about (C) / the impending corporate merger. (D) / No error (E)

A) The board of directors

B) met yesterday morning

C) to thoroughly discuss about

D) the impending corporate merger

E) No error

Answer: C

Explanation:

- **Grammar Rule:** The verb “**discuss**” is a **transitive verb** and takes its object directly. Therefore, it should **not** be followed by the preposition “**about.**”
- **Application to Question:** In the given sentence, the error lies in **Part C**. The usage of “**to thoroughly discuss about**” is incorrect because “**discuss**” directly takes the object “**the impending corporate merger**” without the preposition “**about.**”
- **The Correction:** To rectify this error, “**to thoroughly discuss about**” must be replaced with “**to thoroughly discuss.**”

Corrected Sentence: The board of directors met yesterday morning to thoroughly **discuss** the impending corporate merger.

- **PRO TIP:** Remember: **discuss something** , not **discuss about something** . Similarly, use **describe something**, not **describe about something**.

Therefore, option C is the correct answer.

Q. 52	The following sentence has been divided into parts. One of them may contain a grammatical error. Select the part that contains the error and mark that as your answer. If the sentence is free from error, select 'No error'. Ignore errors of punctuation, if any. Unless the federal government (A) / does not intervene swiftly, (B) / the fragile housing market (C) / will likely collapse by December. (D) / No error (E) A) Unless the federal government ✗ B) does not intervene swiftly, ✓ C) the fragile housing market ✗ D) will likely collapse by December ✗ E) No error ✗
Explanation:	Answer: B • Grammar Rule: After the conjunction “unless,” the condition is normally expressed in the affirmative form because unless already carries the meaning “if not.” Therefore, a negative verb such as “does not” should not normally follow unless in this construction. • Application to Question: In the given sentence, the error lies in Part B. The usage of “does not intervene swiftly” is incorrect because “unless” already expresses a negative condition. The intended meaning is if the federal government does not intervene swiftly. • The Correction: To rectify this error, “does not intervene swiftly” must be replaced with “intervenes swiftly.” Corrected Sentence: Unless the federal government intervenes swiftly, the fragile housing market will likely collapse by December. • PRO TIP: Unless + affirmative clause = if + negative clause. For example: Unless you study, you will not pass = If you do not study, you will not pass. Therefore, option B is the correct answer.

Q. 53	The following sentence has been divided into parts. One of them may contain a grammatical error. Select the part that contains the error and mark that as your answer. If the sentence is free from error, select 'No error'. Ignore errors of punctuation, if any. If I was the regional (A) / manager, I would immediately (B) / approve the budget for (C) / the new marketing campaign. (D) / No error (E) A) If I was the regional  B) manager, I would immediately  C) approve the budget for  D) the new marketing campaign  E) No error 
Explanation:	Answer: A • Grammar Rule: In a hypothetical or unreal condition referring to the present, the subjunctive form “were” is used with all subjects, including “I.” The standard structure is If + subject + were + ..., subject + would + base verb. • Application to Question: In the given sentence, the error lies in Part A. The usage of “If I was the regional” is incorrect because the sentence describes a hypothetical situation. With the subject “I,” the correct form is “If I were the regional manager.” • The Correction: To rectify this error, “If I was the regional” must be replaced with “If I were the regional.” Corrected Sentence: If I were the regional manager, I would immediately approve the budget for the new marketing campaign. • PRO TIP: For unreal or hypothetical present situations, use were rather than was: If I were you, If he were here, If she were the manager. Therefore, option A is the correct answer.

Q. 54

Rearrange the following sentences (A, B, C, D, E, F) in the proper sequence to form a meaningful and coherent paragraph; then answer the questions given below them.

A. Instead of relying on what a user knows—such as a static password or PIN—this technology focuses on how a user physically behaves.

B. For instance, the software meticulously analyzes the specific angle at which a customer holds their phone, their typing speed, and even their touchscreen pressure.

C. If these nuanced, subconscious physical patterns suddenly deviate from the established user profile, the transaction is instantly flagged for fraud.

D. Traditional passwords and standard two-factor authentication methods are increasingly falling prey to sophisticated phishing attacks.

E. Ultimately, this invisible layer of security provides highly robust account protection without adding any frustrating friction to the customer experience.

F. To aggressively counter this escalating threat, financial institutions are rapidly adopting behavioral biometrics.

Which of the following will be the FIRST sentence after rearrangement?

A) A 

B) F 

C) D 

D) C 

E) E 

Answer: C

Logical Sequence:

D introduces the core problem facing the banking sector: traditional passwords are failing due to phishing attacks.

F provides the direct response to the problem introduced in D. "To aggressively counter this escalating threat" points back to the phishing attacks. It introduces the solution: behavioral biometrics.

A defines the new technology mentioned in F. It contrasts traditional methods ("what a user knows") with the new method ("how a user physically behaves").

B gives concrete, physical examples of the behavior mentioned in A ("For instance... angle... typing speed... touchscreen pressure").

C explains what the software does with the data collected in B ("If these nuanced, subconscious physical patterns suddenly deviate...").

E serves as the concluding statement, summarizing the ultimate benefit of the entire process described in C ("Ultimately, this invisible layer of security...").

Final Sequence: **D - F - A - B - C - E**

Explanation:

Q. 55

Rearrange the following sentences (A, B, C, D, E, F) in the proper sequence to form a meaningful and coherent paragraph; then answer the questions given below them.

A. Instead of relying on what a user knows—such as a static password or PIN—this technology focuses on how a user physically behaves.

B. For instance, the software meticulously analyzes the specific angle at which a customer holds their phone, their typing speed, and even their touchscreen pressure.

C. If these nuanced, subconscious physical patterns suddenly deviate from the established user profile, the transaction is instantly flagged for fraud.

D. Traditional passwords and standard two-factor authentication methods are increasingly falling prey to sophisticated phishing attacks.

E. Ultimately, this invisible layer of security provides highly robust account protection without adding any frustrating friction to the customer experience.

F. To aggressively counter this escalating threat, financial institutions are rapidly adopting behavioral biometrics.

Which of the following will be the SECOND sentence after rearrangement?

A) B 

B) A 

C) E 

D) F 

E) C 

Answer: D

Logical Sequence:

D introduces the core problem facing the banking sector: traditional passwords are failing due to phishing attacks.

F provides the direct response to the problem introduced in D. "To aggressively counter this escalating threat" points back to the phishing attacks. It introduces the solution: behavioral biometrics.

A defines the new technology mentioned in F. It contrasts traditional methods ("what a user knows") with the new method ("how a user physically behaves").

B gives concrete, physical examples of the behavior mentioned in A ("For instance... angle... typing speed... touchscreen pressure").

C explains what the software does with the data collected in B ("If these nuanced, subconscious physical patterns suddenly deviate...").

E serves as the concluding statement, summarizing the ultimate benefit of the entire process described in C ("Ultimately, this invisible layer of security...").

Final Sequence: **D - F - A - B - C - E**

Explanation:

Q. 56

Rearrange the following sentences (A, B, C, D, E, F) in the proper sequence to form a meaningful and coherent paragraph; then answer the questions given below them.

A. Instead of relying on what a user knows—such as a static password or PIN—this technology focuses on how a user physically behaves.

B. For instance, the software meticulously analyzes the specific angle at which a customer holds their phone, their typing speed, and even their touchscreen pressure.

C. If these nuanced, subconscious physical patterns suddenly deviate from the established user profile, the transaction is instantly flagged for fraud.

D. Traditional passwords and standard two-factor authentication methods are increasingly falling prey to sophisticated phishing attacks.

E. Ultimately, this invisible layer of security provides highly robust account protection without adding any frustrating friction to the customer experience.

F. To aggressively counter this escalating threat, financial institutions are rapidly adopting behavioral biometrics.

Which of the following will be the THIRD sentence after rearrangement?

A) A 

B) C 

C) B 

D) E 

E) F 

Answer: A

Logical Sequence:

D introduces the core problem facing the banking sector: traditional passwords are failing due to phishing attacks.

F provides the direct response to the problem introduced in D. "To aggressively counter this escalating threat" points back to the phishing attacks. It introduces the solution: behavioral biometrics.

Explanation:

A defines the new technology mentioned in F. It contrasts traditional methods ("what a user knows") with the new method ("how a user physically behaves").

B gives concrete, physical examples of the behavior mentioned in A ("For instance... angle... typing speed... touchscreen pressure").

C explains what the software does with the data collected in B ("If these nuanced, subconscious physical patterns suddenly deviate...").

E serves as the concluding statement, summarizing the ultimate benefit of the entire process described in C ("Ultimately, this invisible layer of security...").

Final Sequence: **D - F - A - B - C - E**

Q. 57

Rearrange the following sentences (A, B, C, D, E, F) in the proper sequence to form a meaningful and coherent paragraph; then answer the questions given below them.

A. Instead of relying on what a user knows—such as a static password or PIN—this technology focuses on how a user physically behaves.

B. For instance, the software meticulously analyzes the specific angle at which a customer holds their phone, their typing speed, and even their touchscreen pressure.

C. If these nuanced, subconscious physical patterns suddenly deviate from the established user profile, the transaction is instantly flagged for fraud.

D. Traditional passwords and standard two-factor authentication methods are increasingly falling prey to sophisticated phishing attacks.

E. Ultimately, this invisible layer of security provides highly robust account protection without adding any frustrating friction to the customer experience.

F. To aggressively counter this escalating threat, financial institutions are rapidly adopting behavioral biometrics.

Which of the following will be the FIFTH sentence after rearrangement?

A) B 

B) E 

C) C 

D) D 

E) A 

Answer: C

Logical Sequence:

D introduces the core problem facing the banking sector: traditional passwords are failing due to phishing attacks.

F provides the direct response to the problem introduced in D. "To aggressively counter this escalating threat" points back to the phishing attacks. It introduces the solution: behavioral biometrics.

A defines the new technology mentioned in F. It contrasts traditional methods ("what a user knows") with the new method ("how a user physically behaves").

B gives concrete, physical examples of the behavior mentioned in A ("For instance... angle... typing speed... touchscreen pressure").

C explains what the software does with the data collected in B ("If these nuanced, subconscious physical patterns suddenly deviate...").

E serves as the concluding statement, summarizing the ultimate benefit of the entire process described in C ("Ultimately, this invisible layer of security...").

Final Sequence: **D - F - A - B - C - E**

Explanation:

Q. 58

Rearrange the following sentences (A, B, C, D, E, F) in the proper sequence to form a meaningful and coherent paragraph; then answer the questions given below them.

A. Instead of relying on what a user knows—such as a static password or PIN—this technology focuses on how a user physically behaves.

B. For instance, the software meticulously analyzes the specific angle at which a customer holds their phone, their typing speed, and even their touchscreen pressure.

C. If these nuanced, subconscious physical patterns suddenly deviate from the established user profile, the transaction is instantly flagged for fraud.

D. Traditional passwords and standard two-factor authentication methods are increasingly falling prey to sophisticated phishing attacks.

E. Ultimately, this invisible layer of security provides highly robust account protection without adding any frustrating friction to the customer experience.

F. To aggressively counter this escalating threat, financial institutions are rapidly adopting behavioral biometrics.

Which of the following will be the SIXTH (LAST) sentence after rearrangement?

A) C 

B) F 

C) E 

D) B 

E) A 

Answer: C

Logical Sequence:

D introduces the core problem facing the banking sector: traditional passwords are failing due to phishing attacks.

F provides the direct response to the problem introduced in D. "To aggressively counter this escalating threat" points back to the phishing attacks. It introduces the solution: behavioral biometrics.

A defines the new technology mentioned in F. It contrasts traditional methods ("what a user knows") with the new method ("how a user physically behaves").

B gives concrete, physical examples of the behavior mentioned in A ("For instance... angle... typing speed... touchscreen pressure").

C explains what the software does with the data collected in B ("If these nuanced, subconscious physical patterns suddenly deviate...").

E serves as the concluding statement, summarizing the ultimate benefit of the entire process described in C ("Ultimately, this invisible layer of security...").

Final Sequence: **D - F - A - B - C - E**

Explanation:

Q. 59	In the given question, a word has been given and there are three ways in which the word has been used, in similar or different forms (I, II, and III). You need to identify which of the sentences has/have correctly used the highlighted word contextually and grammatically, and mark that as your answer. Forge I. The master blacksmith used the intense heat of the furnace to forge a magnificent steel broadsword. II. The cunning criminal managed to expertly forge the CEO's signature on the massive bank transfer document. III. The exhausted hikers decided to forge the sunset before returning to camp. A) Only I  B) Only I and II  C) Only II and III  D) All I, II, and III  E) None of these 
Explanation:	Answer: B • Sentence I is correct: Forge means to shape or make a metal object by heating and hammering it. Since a blacksmith uses intense heat to shape steel into a sword, forge is perfectly appropriate here. • Sentence II is correct: Forge also means to create a false copy of something, especially a signature, document, or work of art, in order to deceive. Hence, forge the CEO's signature is grammatically and contextually correct. • Sentence III is incorrect: Forge does not mean watch, enjoy, wait for, or experience. The phrase "forge the sunset" has no established contextual meaning. If the intended meaning is that they wanted to watch the sunset, the sentence could say "The exhausted hikers decided to watch the sunset..."

Q. 60	In the given question, a word has been given and there are three ways in which the word has been used, in similar or different forms (I, II, and III). You need to identify which of the sentences has/have correctly used the highlighted word contextually and grammatically, and mark that as your answer. Pitch I. The ambitious entrepreneur had only five minutes to pitch her innovative software startup to the angel investors. II. The exhausted campers struggled to pitch their heavy canvas tent in the howling wind and driving rain. III. The detective shone his flashlight on the floor, illuminating a large pitch of blood near the doorway. A) Only I and III  B) Only II and III  C) Only I and II  D) All I, II, and III  E) Only I 
Explanation:	Answer: C • Sentence I is correct: "Pitch" is used as a verb meaning to make a bid to obtain business or investment (a sales pitch). • Sentence II is correct: "Pitch" is used as a verb meaning to set up and fix in a definite position (pitch a tent). • Sentence III is incorrect: You cannot have a "pitch" of blood. The contextually correct noun is a pool or patch. (Pitch as a noun refers to a sticky dark substance like tar, a sports field, or musical tone).

Q. 61	In the question given below, a sentence is given with two blanks, followed by five options. Choose the option that provides the correct word(s) to fill in the blanks, ensuring the sentence is contextually and grammatically complete. The senior management team was completely _____ to the growing resentment among the assembly line workers, an oversight which ultimately led to a _____ drop in overall factory productivity. A) sensitive, trivial ✗ B) oblivious, catastrophic ✓ C) attentive, drastic ✗ D) indifferent, nominal ✗ E) aware, profound ✗
Explanation:	Answer: B The sentence describes management failing to notice the growing resentment, and this failure eventually caused a very serious decline in productivity. • Oblivious: unaware of or not noticing something — “oblivious to the growing resentment” is the correct expression. • Catastrophic: causing or involving a disaster; extremely serious — a “catastrophic drop” indicates a severe decline in factory productivity. Why the other options do not fit: • Sensitive, trivial — Sensitive to contradicts the idea of an oversight; trivial drop is too insignificant. • Attentive, drastic — Attentive to contradicts the management's failure to notice the resentment. • Indifferent, nominal — Indifferent to is possible grammatically but means lacking concern rather than being unaware; nominal means very small/insignificant. • Aware, profound — the correct construction is “aware of,” not “aware to.”

Q. 62

In the question given below, a sentence is given with two blanks, followed by five options. Choose the option that provides the correct word(s) to fill in the blanks, ensuring the sentence is contextually and grammatically complete.

Despite facing _____ criticism from global environmental watchdog groups, the multinational mining corporation refused to _____ its highly controversial deep-sea drilling operations.

- A) sparse, expand 
- B) mild, accelerate 
- C) fierce, halt 
- D) nominal, modify 
- E) harsh, promote 

Answer: C

The sentence describes the corporation receiving **strong criticism** but refusing to **stop** its controversial drilling operations.

- **Fierce**: intense, strong, or vehement — “**fierce criticism**” is a natural collocation.
- **Halt**: to stop or bring something to an end — “**halt its operations**” fits the context precisely.

Explanation:

Why the other options do not fit:

- **Sparse, expand** — sparse criticism means limited/infrequent criticism, while expand contradicts the context.
- **Mild, accelerate** — mild criticism is too weak, and accelerate operations does not fit the intended contrast.
- **Nominal, modify** — nominal criticism suggests insignificant criticism; modify means change rather than stop.
- **Harsh, promote** — harsh criticism fits, but promote its operations is inappropriate in this context.

Q. 63	In the questions given below, four words are given in bold. These four words may or may not be in their correct position. Find the correct combination of the words that will need to be interchanged to make the sentence meaningful. If the sentence is correct as it is, then select option (E) 'No interchange required' as your choice. The sheer prevalence (A) of highly convincing counterfeit luxury goods in the digital marketplace (B) has forced reputable fashion brands to aggressively adopt stringent (C) authentication measures (D) to protect their customers. A) A and B  B) C and D  C) B and C  D) A and D  E) No interchange required 
Explanation:	Answer: E • A — prevalence: Correctly placed. "The prevalence of counterfeit goods" is grammatically and contextually appropriate. • B — marketplace: Correctly placed. "Digital marketplace" is a natural phrase. • C — stringent: Correctly placed. "Stringent authentication measures" is the correct combination. • D — measures: Correctly placed. "Authentication measures" correctly completes the phrase. The sentence is already meaningful and grammatically correct.

Q. 64

In the questions given below, four words are given in bold. These four words may or may not be in their correct position. Find the correct combination of the words that will need to be interchanged to make the sentence meaningful. If the sentence is correct as it is, then select option (E) 'No interchange required' as your choice.

The severe economic recession (A) caused a massive spike (B) in structural unemployment, prompting the federal government to welfare (C) the eligibility criteria for all major broaden (D) programs.

A) A and C

B) B and C

C) C and D

D) A and D

E) No interchange required

**Answer: C**

The sentence contains two misplaced words:

The severe economic recession (A) caused a massive spike (B) in structural unemployment, prompting the federal government to **welfare (C)** the eligibility criteria for all major **broaden (D)** programs.

Explanation:

- **A — recession:** Correctly placed. "Severe economic recession" is meaningful.
- **B — spike:** Correctly placed. "A massive spike in structural unemployment" is appropriate.
- **C — welfare:** Incorrectly placed. "Welfare" is a noun/adjective, but the sentence requires a **verb** after "to".
- **D — broaden:** Incorrectly placed. "Broaden" is a verb, but the position before "programs" requires a noun/adjective.

Required interchange: C ↔ D

After interchange:

The severe economic recession caused a massive spike in structural unemployment, prompting the federal government to **broaden** the eligibility criteria for all major **welfare** programs.

Q. 65

In the following question, a sentence is given with a phrase highlighted in bold. Select the option given below that can replace the phrase in bold to make the sentence grammatically and contextually correct, and mark that as your answer. If the sentence is correct as it is, mark 'No correction required' as the answer.

The exhausted commuters declared they would rather to stand in the incredibly crowded subway car than wait another forty-five minutes in the freezing rain for the next train.

A) would rather standing

B) would rather stand

C) would rather stood

D) will rather to stand

E) No correction required

Answer: B

The phrase “**would rather to stand**” is grammatically incorrect because **would rather** is followed directly by the **base form of the verb (V1)**, without “**to**.” Therefore, “**would rather stand**” is correct. The sentence also uses “**than wait**”, which correctly maintains the parallel structure: **would rather + stand + than + wait**.

Explanation:

- **A) would rather standing** — would rather is not followed by the -ing form.
- **B) would rather stand** — Correct: would rather + V1.
- **C) would rather stood** — stood is the past form.
- **D) will rather to stand** — incorrect construction; rather does not take to + verb here.
- **E) No correction required** — the original phrase is grammatically incorrect.

Quantitative Aptitude

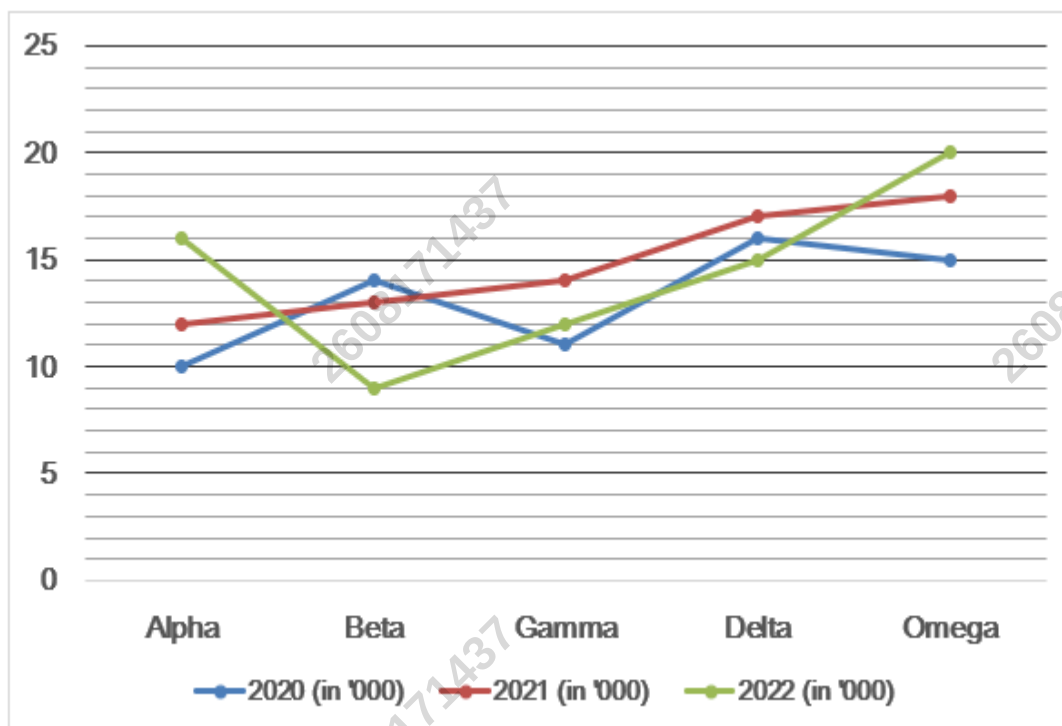

Q. 66	What value should come in the place of (?) in the following number series? 15.5, 42, 136, 281, 851, ? A) 1705  B) 1709  C) 1715  D) 1720  E) 1719 
Explanation:	Answer: B $15.5 * 2 + 11 = 42$ $42 * 3 + 10 = 136$ $136 * 2 + 9 = 281$ $281 * 3 + 8 = 851$ $851 * 2 + 7 = 1709$
Q. 67	What value should come in the place of (?) in the following number series? 5, 149, ?, 313, 349, 365, 369 A) 249  B) 255  C) 239  D) 261  E) 245 
Explanation:	Answer: A $5 + 12^2 = 149$ $149 + 10^2 = 249$ $249 + 8^2 = 313$ $313 + 6^2 = 349$ $349 + 4^2 = 365$ $365 + 2^2 = 369$

Q. 68	What value should come in the place of (?) in the following number series? 20, 27, 39, 54, 70, ? A) 90  B) 82  C) 85  D) 88  E) 95 
Explanation:	Answer: C $20 + (7 * 1) = 27$ $27 + (6 * 2) = 39$ $39 + (5 * 3) = 54$ $54 + (4 * 4) = 70$ $70 + (3 * 5) = 85$
Q. 69	What value should come in the place of (?) in the following number series? 25, 56, 114, 183, 259, ? A) 344  B) 352  C) 338  D) 360  E) 340 
Explanation:	Answer: A $25 + (31 * 1) = 56$ $56 + (29 * 2) = 114$ $114 + (23 * 3) = 183$ $183 + (19 * 4) = 259$ $259 + (17 * 5) = 344$

Q. 70

Study the following information carefully and answer the given questions.

The line graph given below shows the total number of employees (In thousands) working in 5 different software companies in 3 different years.

Find the ratio between the total number of employees working in Delta and Omega together in the year 2021 to the total number of employees working in Alpha and Beta in the year 2021.

- A) 5: 7 ☒
- B) 7: 5 ☒
- C) 5: 9 ☒
- D) 7: 4 ☒
- E) None of these ☒

Explanation:

Companies/Year	2020	2021	2022
Alpha	10,000	12,000	16,000
Beta	14,000	13,000	9,000
Gamma	11,000	14,000	12,000
Delta	16,000	17,000	15,000
Omega	15,000	18,000	20,000

Answer: B

The total number of employees working in Delta and Omega together in the year 2021 is $17000 + 18000 = 35000$

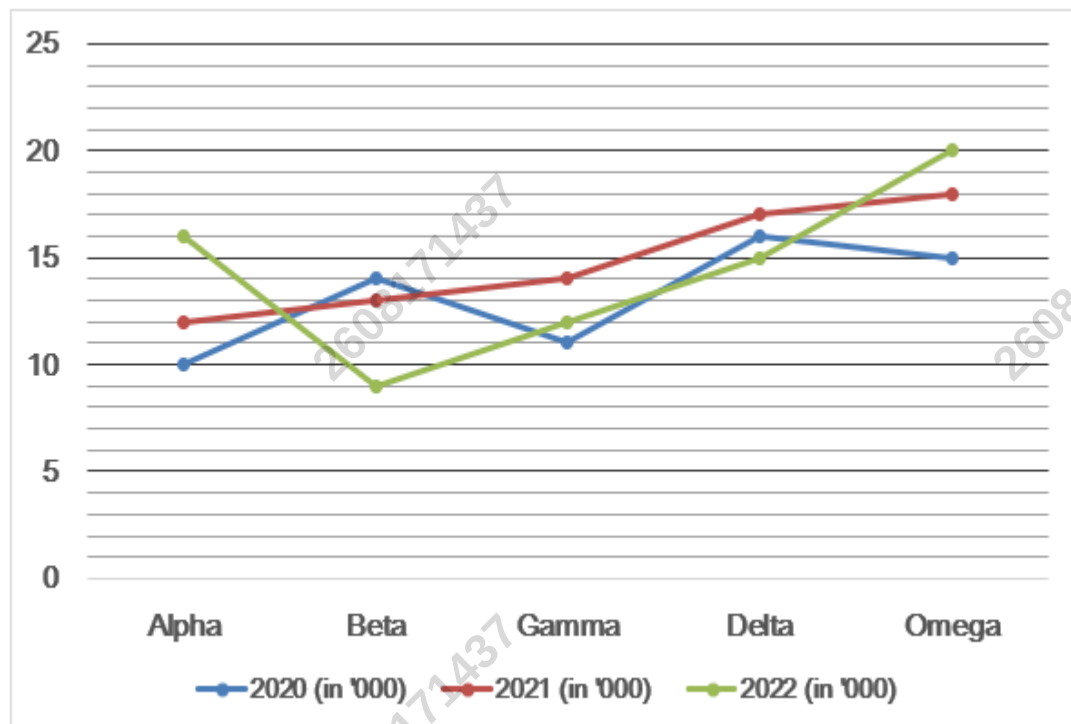

The total number of employees working in Alpha and Beta together in the year 2021 is $12000 + 13000 = 25000$

Required ratio = $35000 : 25000 = 7 : 5$

Q. 71

Study the following information carefully and answer the given questions.

The line graph given below shows the total number of employees (In thousands) working in 5 different software companies in 3 different years.

If the ratio between the total number of male to that of female employees working in Beta in the year 2020 and that in Gamma in the year 2022 is 3:4 and 5:1 respectively, then find the sum of the total number of female employees working in Beta in the year 2020 and the total number of male employees working in Gamma in the year 2022.

- A) 22000 ☒
- B) 20000 ☒
- C) 24000 ☒
- D) 18000 ☒
- E) None of these ☒

Explanation:

Companies/Year	2020	2021	2022
Alpha	10,000	12,000	16,000
Beta	14,000	13,000	9,000
Gamma	11,000	14,000	12,000
Delta	16,000	17,000	15,000
Omega	15,000	18,000	20,000

Answer: D

The total number of female employees working in Beta in the year 2020 is $14000 \times \frac{4}{7} = 8000$

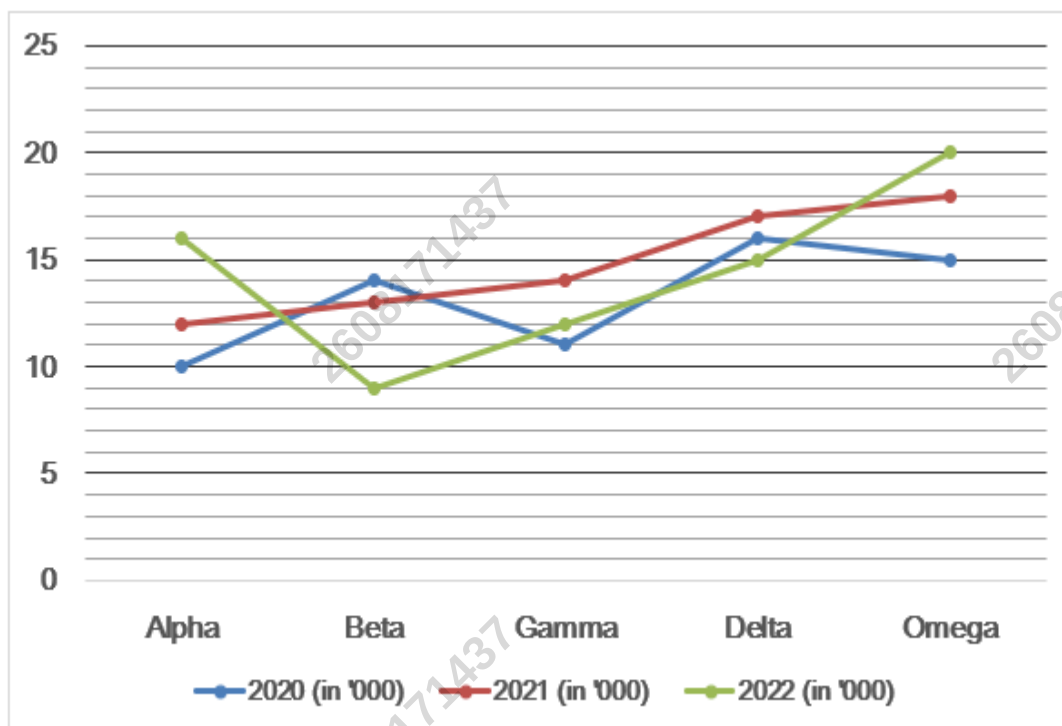

The total number of male employees working in Gamma in the year 2022 is $12000 \times \frac{5}{6} = 10000$

Required sum = $8000 + 10000 = 18000$

Q. 72

Study the following information carefully and answer the given questions.

The line graph given below shows the total number of employees (In thousands) working in 5 different software companies in 3 different years.

Find the difference between the average number of employees working in Beta to that of Delta in all the given years together.

- A) 5000 ☒
- B) 4000 ☒
- C) 3000 ☒
- D) 6000 ☒
- E) None of these ☒

Explanation:

Companies/Year	2020	2021	2022
Alpha	10,000	12,000	16,000
Beta	14,000	13,000	9,000
Gamma	11,000	14,000	12,000
Delta	16,000	17,000	15,000
Omega	15,000	18,000	20,000

Answer: B

The average number of employees working in Beta in all the given years together is
 $(14000 + 13000 + 9000) / 3 = 36000 / 3 = 12000$

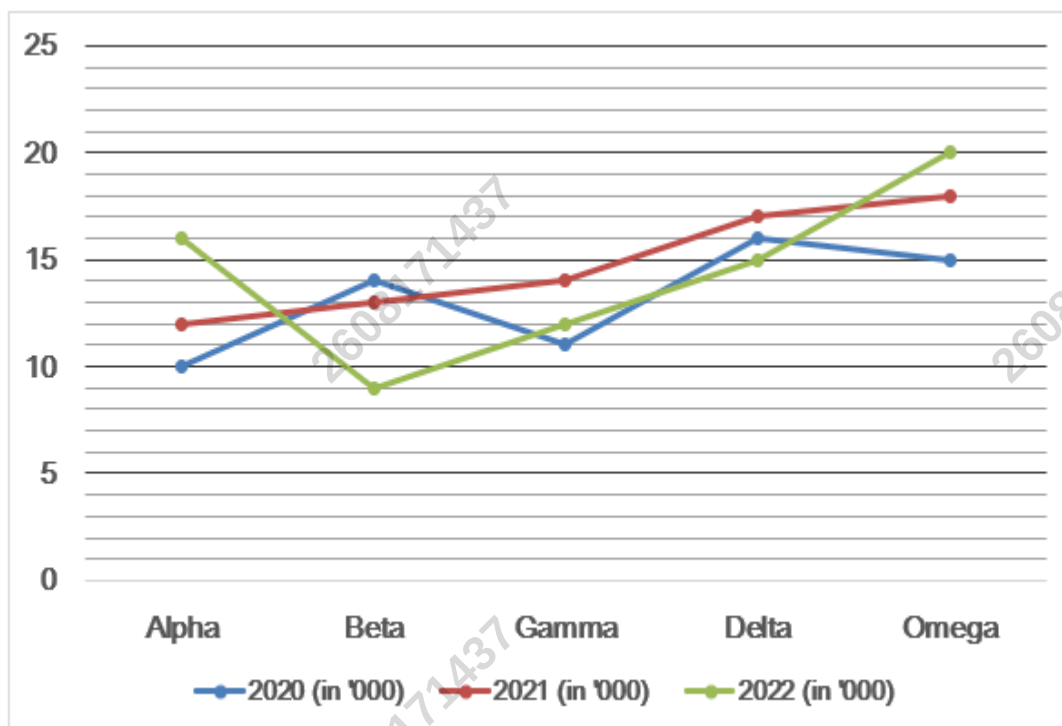

The average number of employees working in Delta in all the given years together is
 $(16000 + 17000 + 15000) / 3 = 48000 / 3 = 16000$

Required difference = $16000 - 12000 = 4000$

Q. 73

Study the following information carefully and answer the given questions.

The line graph given below shows the total number of employees (In thousands) working in 5 different software companies in 3 different years.

Total number of employees working in Beta, Gamma and Omega together in the year 2021 is approximately what percentage of total number of employees working in Alpha in all the given years together?

- A) 130 % ☒
- B) 142 % ☒
- C) 118 % ☒
- D) 115 % ☒
- E) 158 % ☒

Explanation:

Companies/Year	2020	2021	2022
Alpha	10,000	12,000	16,000
Beta	14,000	13,000	9,000
Gamma	11,000	14,000	12,000
Delta	16,000	17,000	15,000
Omega	15,000	18,000	20,000

Answer: C

Total number of employees working in Beta, Gamma and Omega together in the year 2021 is $13000 + 14000 + 18000 = 45000$

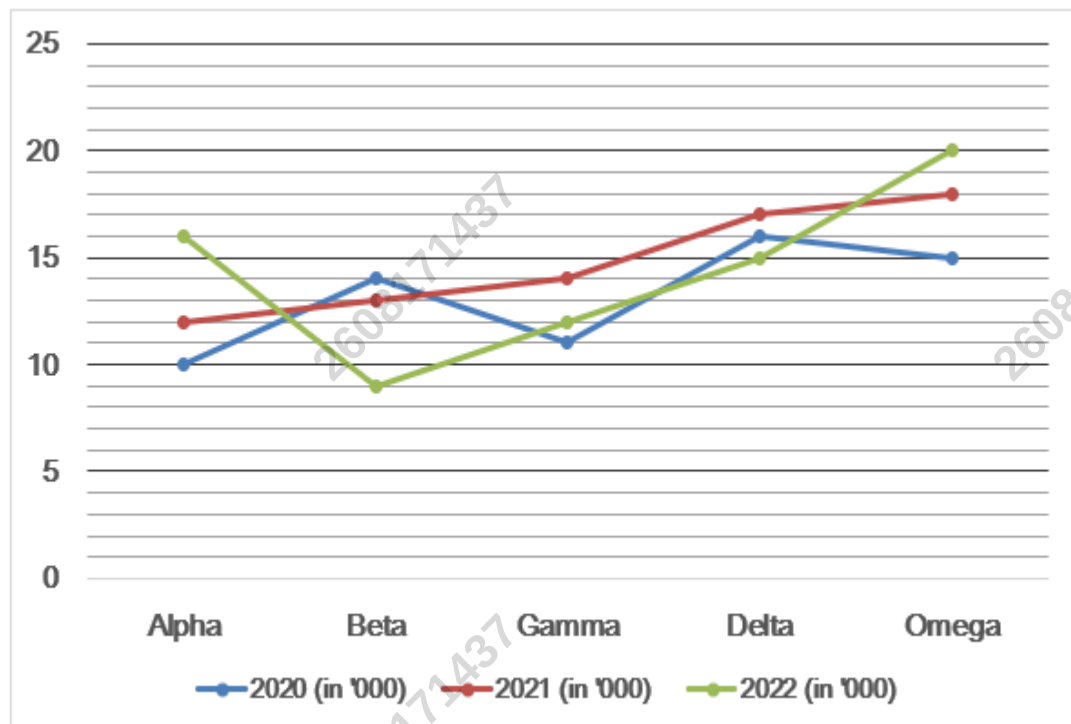

Total number of employees working in Alpha in all the given years together is $10000 + 12000 + 16000 = 38000$

Required percentage = $(45000 / 38000) * 100 = 118.42 \% \approx 118 \%$

Q. 74

Study the following information carefully and answer the given questions.

The line graph given below shows the total number of employees (In thousands) working in 5 different software companies in 3 different years.

The total number of employees (in thousands) in Alpha in 2020 and Gamma in 2021 together is x . The number of employees (in thousands) in a new company Zeta in 2022 is $x + y$. If the ratio of the number of employees in Zeta in 2022 to that in Delta in 2020 is 7:4, find the value of y .

- A) 2 ☐
- B) 3 ☐
- C) 4 ☒
- D) 5 ☐
- E) 6 ☐

Companies/Year	2020	2021	2022
Alpha	10,000	12,000	16,000
Beta	14,000	13,000	9,000
Gamma	11,000	14,000	12,000
Delta	16,000	17,000	15,000
Omega	15,000	18,000	20,000

Answer: C

Explanation:

The number of employees in Alpha in 2020 is 10

The number of employees in Gamma in 2021 is 14

The value of x is $10 + 14 = 24$

The number of employees in Delta in 2020 is 16

The ratio of Zeta in 2022 to Delta in 2020 is 7 : 4

The number of employees in Zeta in 2022 is $16 * 7/4 = 28$

We know that Zeta in 2022 is $x + y$

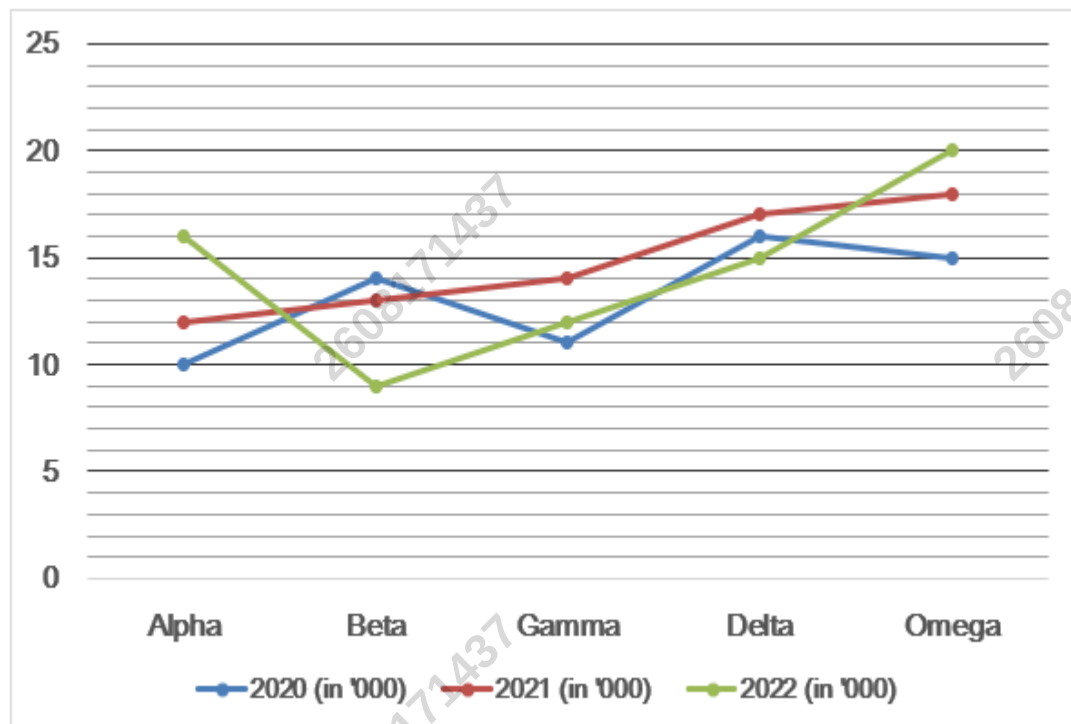

$$24 + y = 28$$

$$y = 4$$

Q. 75

Study the following information carefully and answer the given questions.

The line graph given below shows the total number of employees (In thousands) working in 5 different software companies in 3 different years.

The number of employees (in thousands) in Beta in 2020 is A and in Delta in 2021 is B. The average number of employees (in thousands) in Beta, Delta, and Omega in the year 2021 is $A + B - k$. Find the value of k.

- A) 12 ☒
- B) 15 ☒
- C) 10 ☒
- D) 18 ☒
- E) 14 ☒

Companies/Year	2020	2021	2022
Alpha	10,000	12,000	16,000
Beta	14,000	13,000	9,000
Gamma	11,000	14,000	12,000
Delta	16,000	17,000	15,000
Omega	15,000	18,000	20,000

Answer: B

Explanation:

The number of employees in Beta in 2020 is 14 so $A = 14$

The number of employees in Delta in 2021 is 17 so $B = 17$

The number of employees in 2021 for Beta is 13, Delta is 17 and Omega is 18

The average number of employees in 2021 for Beta, Delta and Omega =
 $(13+17+18)/3 = 16$

We are given $A + B - k = 16$

$14 + 17 - k = 16$

$31 - k = 16$

$k = 15$

Q. 76	In each of the following questions, two equations are given. You have to solve both the equations to find the relation between x and y. I) $x^2 + 18x + 80 = 0$ II) $y^2 + 25y + 156 = 0$ A) $x > y$ ✓ B) $x < y$ ✗ C) $x \geq y$ ✗ D) $x \leq y$ ✗ E) Relationship between x and y cannot be established. ✗
Explanation:	Answer: A I) $x^2 + 10x + 8x + 80 = 0$ $x(x + 10) + 8(x + 10) = 0$ $x = -10, -8$ II) $y^2 + 13y + 12y + 156 = 0$ $y(y + 13) + 12(y + 13) = 0$ $y = -13, -12$ $x > y$

Q. 77	In each of the following questions, two equations are given. You have to solve both the equations to find the relation between x and y. I) $2x^2 + 13x + 21 = 0$ II) $3y^2 + 14y + 15 = 0$ A) $x > y$ ✗ B) $x < y$ ✗ C) $x \geq y$ ✗ D) $x \leq y$ ✓ E) Relationship between x and y cannot be established. ✗
Explanation:	Answer: D I) $2x^2 + 6x + 7x + 21 = 0$ $2x(x + 3) + 7(x + 3) = 0$ $x = -3, -3.5$ II) $3y^2 + 9y + 5y + 15 = 0$ $3y(y + 3) + 5(y + 3) = 0$ $y = -3, -1.66$ $x \leq y$

Q. 78	In each of the following questions, two equations are given. You have to solve both the equations to find the relation between x and y. I) $x^2 - 36 = 0$ II) $y^2 - 12y + 36 = 0$ A) $x > y$  B) $x < y$  C) $x \geq y$  D) $x \leq y$  E) Relationship between x and y cannot be established. 
Explanation:	Answer: D I) $x^2 = 36$ $x = 6, -6$ II) $y^2 - 6y - 6y + 36 = 0$ $y(y - 6) - 6(y - 6) = 0$ $y = 6, 6$ $x \leq y$

Q. 79

Study the following information carefully and answer the given questions.

The given table shows the number of analysts (Data and Financial) working in four different zones N, S, E and W in 2023 and also given the ratio of the number of male to female analysts in the respective domains in these four zones in 2023.

Zone	Data Analysts	Male : Female (Data)	Financial Analysts	Male : Female (Financial)
N	720	5 : 3	600	2 : 1
S	800	3 : 2	400	3 : 2
E	800	5 : 3	480	5 : 3
W	880	5 : 3	720	7 : 5

Among the number of male Data analysts in Zone N, 20% are involved in Machine Learning which is equivalent to the number of male Data analysts who are involved in AI in Zone E. What is the percentage of the number of male AI Data analysts in Zone E, out of the total number of male Data analysts in Zone E?

A) 12 % B) 18 % C) 15 % D) 22 % E) None of these **Answer: B**

According to the question

Number of male Data analysts in Zone N = $720 \times \frac{5}{8} = 450$ Number of male ML Data analysts in Zone N = $450 \times \frac{20}{100} = 90$ Number of male Data analysts from Zone E = $800 \times \frac{5}{8} = 500$

Number of male AI Data analysts from Zone E = 90

Required percentage = $\frac{90}{500} \times 100 = 18\%$ **Explanation:**

Q. 80

Study the following information carefully and answer the given questions.

The given table shows the number of analysts (Data and Financial) working in four different zones N, S, E and W in 2023 and also given the ratio of the number of male to female analysts in the respective domains in these four zones in 2023.

Zone	Data Analysts	Male : Female (Data)	Financial Analysts	Male : Female (Financial)
N	720	5 : 3	600	2 : 1
S	800	3 : 2	400	3 : 2
E	800	5 : 3	480	5 : 3
W	880	5 : 3	720	7 : 5

If the total salaries of the Financial analysts and Data analysts in Zone S are found to be 240 L per month and 560 L per month respectively. What is the difference between the total salaries of male Data analysts and male Financial analysts in Zone S?

A) Rs. 254.4 L

B) Rs. 192 L

C) Rs. 260.5 L

D) Rs. 198.8 L

E) None of these

**Answer: B**

According to the question

Total salary of Financial analysts in Zone S = Rs. 24000000

Number of Financial analysts in Zone S = 400

Salary of each Financial analyst per month in Zone S = $24000000 / 400 = \text{Rs. } 60000$ Number of male Financial analysts in Zone S = $400 * 3 / 5 = 240$ Total salary of male Financial analysts in Zone S = $240 * 60000 = 144 \text{ L}$

Total salary of Data analysts in Zone S = Rs. 56000000

Number of Data analysts in Zone S = 800

Salary of each Data analyst per month in Zone S = $56000000 / 800 = \text{Rs. } 70000$ Number of male Data analysts in Zone S = $800 * 3 / 5 = 480$ Total salary of male Data analysts in Zone S = $480 * 70000 = 336 \text{ L}$ Required difference = $336 \text{ L} - 144 \text{ L} = 192 \text{ L}$ **Explanation:**

Q. 81

Study the following information carefully and answer the given questions.

The given table shows the number of analysts (Data and Financial) working in four different zones N, S, E and W in 2023 and also given the ratio of the number of male to female analysts in the respective domains in these four zones in 2023.

Zone	Data Analysts	Male : Female (Data)	Financial Analysts	Male : Female (Financial)
N	720	5 : 3	600	2 : 1
S	800	3 : 2	400	3 : 2
E	800	5 : 3	480	5 : 3
W	880	5 : 3	720	7 : 5

What is the ratio of the total number of female Data analysts in all zones together to the total number of male Financial analysts in all zones together?

A) 65 : 54 

B) 61 : 68 

C) 85 : 43 

D) 25 : 42 

E) None of these 

Answer: B

According to the question

Total number of female Data analysts = $720 \times \frac{3}{8} + 800 \times \frac{2}{5} + 800 \times \frac{3}{8} + 880 \times \frac{3}{8}$

Total number of female Data analysts = $270 + 320 + 300 + 330 = 1220$

Total number of male Financial analysts = $600 \times \frac{2}{3} + 400 \times \frac{3}{5} + 480 \times \frac{5}{8} + 720 \times \frac{7}{12}$

Total number of male Financial analysts = $400 + 240 + 300 + 420 = 1360$

Required ratio = $1220 : 1360 = 61 : 68$

Explanation:

Q. 82

Study the following information carefully and answer the given questions.

The given table shows the number of analysts (Data and Financial) working in four different zones N, S, E and W in 2023 and also given the ratio of the number of male to female analysts in the respective domains in these four zones in 2023.

Zone	Data Analysts	Male : Female (Data)	Financial Analysts	Male : Female (Financial)
N	720	5 : 3	600	2 : 1
S	800	3 : 2	400	3 : 2
E	800	5 : 3	480	5 : 3
W	880	5 : 3	720	7 : 5

The total number of female Financial analysts in zones E and W together is what percentage of the total number of Data analysts in zones S and E together?

A) 23.25 % 

B) 13.5 % 

C) 16.25 % 

D) 30 % 

E) None of these 

Answer: D

According to the question

Total number of Data analysts from Zone S and E = $800 + 800 = 1600$

Total number of female Financial analysts from Zone E and W = $480 \times \frac{3}{8} + 720 \times \frac{5}{12} = 180 + 300 = 480$

Required percentage = $480 / 1600 \times 100 = 30 \%$

Explanation:

Q. 83

Study the following information carefully and answer the given questions.

The given table shows the number of analysts (Data and Financial) working in four different zones N, S, E and W in 2023 and also given the ratio of the number of male to female analysts in the respective domains in these four zones in 2023.

Zone	Data Analysts	Male : Female (Data)	Financial Analysts	Male : Female (Financial)
N	720	5 : 3	600	2 : 1
S	800	3 : 2	400	3 : 2
E	800	5 : 3	480	5 : 3
W	880	5 : 3	720	7 : 5

The number of male Data analysts in Zone S is P and the number of female Financial analysts in Zone W is Q. If a new Zone M has $P + Q - 260$ female Data analysts and the ratio of male to female Data analysts in Zone M is 5:4, find the total number of Data analysts in Zone M.

- A) 1170 ✓
- B) 1080 ✗
- C) 1260 ✗
- D) 1350 ✗
- E) 1150 ✗

Explanation:

Answer: A

Total Data analysts in Zone S is 800

The number of male Data analysts in Zone S is $P = 800 \times \frac{3}{5}$

$P = 480$

Total Financial analysts in Zone W is 720

The number of female Financial analysts in Zone W is $Q = 720 \times \frac{5}{12}$

$Q = 300$

The number of female Data analysts in Zone M is P plus Q minus 260

Female Data analysts in Zone M = $480 + 300 - 260 = 520$

The ratio of male to female Data analysts in Zone M is 5 : 4

Total Data analysts in Zone M = $520 \times \frac{9}{4} = 1170$

Q. 84

Study the following information carefully and answer the given questions.

The given table shows the number of analysts (Data and Financial) working in four different zones N, S, E and W in 2023 and also given the ratio of the number of male to female analysts in the respective domains in these four zones in 2023.

Zone	Data Analysts	Male : Female (Data)	Financial Analysts	Male : Female (Financial)
N	720	5 : 3	600	2 : 1
S	800	3 : 2	400	3 : 2
E	800	5 : 3	480	5 : 3
W	880	5 : 3	720	7 : 5

The difference between the number of male and female Data analysts in Zone N is x. The sum of male and female Financial analysts in Zone E is y. The value of z is exactly 20% of $y - x$. Find the value of z.

- A) 50 
- B) 60 
- C) 70 
- D) 80 
- E) 90 

Answer: B

Total Data analysts in Zone N is 720

The difference between the number of male and female Data analysts in Zone N is $x = 720 \times \frac{2}{8} = 180$

The sum of male and female Financial analysts in Zone E is $y = 480$

The value of $y - x = 480 - 180 = 300$

The value of z is 20 % of 300

$z = 60$

Explanation:

Q. 85

Jar P contains a mixture of mango juice and sugar in the ratio of 5:1. Another jar Q contains a mixture of pineapple juice and sugar in the ratio of 4:1. The mixtures from jars P and Q are mixed in the ratio of 3:2 respectively. Find the percentage of pineapple juice in the final mixture.

A) 25% B) 20% C) 32% D) 30% E) 55% **Answer: C**

According to the question

In mango mixture, the ratio of mango to sugar = 5 : 1

In pineapple mixture, the ratio of pineapple to sugar = 4 : 1

Making a total quantity of both mixtures to allow a 3 : 2 ratio

Jar P total is 6 parts, Jar Q total is 5 parts.

Explanation:

Take 90 liters of Jar P and 60 liters of Jar Q. This respects the 3 : 2 ratio.

In Jar P, mango = $90 \times \frac{5}{6} = 75$, sugar = 15

In Jar Q, pineapple = $60 \times \frac{4}{5} = 48$, sugar = 12

After mixing, total quantity = $90 + 60 = 150$ liters

Quantity of pineapple = 48 liters

Required percentage = $(48 / 150) \times 100 = 32 \%$

Q. 86

12 men and 6 women working 10 hours per day can complete a piece of work in 4 days and 8 men and 12 women working 8 hours per day can complete the same work in 5 days. The efficiency of a boy is $\frac{1}{3}$ rd of the efficiency of a man. In how many days required for 4 men, 8 women and 4 boys working 8 hours per day to complete the work?

A) 9 days B) 8.5 days C) 12 days D) 7.5 days E) 15 days **Answer: D**

According to the question

$$(12m + 6w) * 4 * 10 = (8m + 12w) * 5 * 8$$

$$(12m + 6w) * 40 = (8m + 12w) * 40$$

$$12m + 6w = 8m + 12w$$

$$4m = 6w$$

$$m / w = 3 / 2$$

So, $m = 3$ units, $w = 2$ units

$$b = m / 3 = 1 \text{ unit}$$

$$\text{Total work} = (12 * 3 + 6 * 2) * 40 = 48 * 40 = 1920 \text{ units}$$

$$\text{New group efficiency per hour} = 4 * 3 + 8 * 2 + 4 * 1 = 12 + 16 + 4 = 32 \text{ units}$$

$$\text{Daily work of new group} = 32 * 8 = 256 \text{ units}$$

$$\text{Time taken} = 1920 / 256 = 7.5 \text{ days}$$

Explanation:

Q. 87

X, Y and Z started a business with investments in the ratio of 4:5:3 respectively. After 4 months, X increased his investment by 25% and after 2 more months, Y and Z increased their investment by Rs. 500 and Rs. 400 respectively. At the end of one year, the profit share of Y and Z is in the ratio of 10:7. Find the initial investment amount of X.

- A) Rs. 550 
- B) Rs. 125 
- C) Rs. 100 
- D) Rs. 200 
- E) Rs. 250 

Answer: D

According to the question

The profit share ratio of X, Y and Z

$$X's \text{ share} = 4a * 4 + 5a * 8 = 16a + 40a = 56a$$

$$Y's \text{ share} = 5a * 6 + (5a + 500) * 6 = 30a + 30a + 3000 = 60a + 3000$$

$$Z's \text{ share} = 3a * 6 + (3a + 400) * 6 = 18a + 18a + 2400 = 36a + 2400$$

$$(60a + 3000) / (36a + 2400) = 10 / 7$$

$$420a + 21000 = 360a + 24000$$

$$60a = 3000$$

$$a = 50$$

$$\text{The initial investment of X} = 4 * 50 = \text{Rs. 200}$$

Explanation:

Q. 88

The distance between a police officer and a thief is 20 km and they are walking towards each other at the speed of 4 km/hr and 2 km/hr respectively. After travelling for 2 hours, the police officer spots the thief. As a result, the thief takes a U-turn, so the police officer starts chasing him, and at the same time both increase their speed by 2 km/hr. Find the time taken by the police officer to catch the thief.

- A) 5 hours 
B) 4 hours 
C) 3 hours 
D) 6 hours 
E) 8 hours 

Answer: B

According to the question

The initial distance = 20 km

After 2 hours

The distance travelled by police officer = $4 \times 2 = 8$ km

The distance travelled by thief = $2 \times 2 = 4$ km

Remaining distance between them = $20 - 12 = 8$ km

After increasing speed and changing direction

The speed of police officer = $4 + 2 = 6$ km/hr

The speed of thief = $2 + 2 = 4$ km/hr

Both are now moving in the same direction

Relative speed = $6 - 4 = 2$ km/hr

Time taken = $8 / 2 = 4$ hours

Explanation:

Q. 89

The perimeter of a rhombus is 120 cm and diagonal 2 of the rhombus is $\frac{4}{5}$ th of its diagonal 1 which is equal to the side of the rhombus. If an iron sheet is required to prepare a cylinder of radius 14 cm and the height is $\frac{5}{8}$ th of diagonal 2, then find the volume of the cylinder.

A) 9240 cm³B) 7700 cm³C) 8000 cm³D) 5600 cm³E) 2400 cm³**Explanation:****Answer: A**

According to the question

The perimeter of the rhombus = 4 * side

120 = 4 * side

side = 30 cm

Diagonal 1 = side = 30 cm

Diagonal 2 = $30 * \frac{4}{5} = 24$ cm

Radius of the cylinder = 14 cm

Height of the cylinder = $24 * \frac{5}{8} = 15$ cmVolume of the cylinder = $\frac{22}{7} * r^2 h$ Volume = $\frac{22}{7} * 14 * 14 * 15 = 22 * 2 * 14 * 15 = 9240$ cm³

Q. 90

A store sold article U at Rs. 5440 after allowing two successive discounts of 20% and 15% respectively. If the marked price of article V is $\frac{3}{4}$ th of the marked price of article U and the store offers a discount of $y\%$ on article V. The selling price of article V is Rs. 1440 less than that of article U. Find the value of y .

- A) 11.11% 
- B) 33.33% 
- C) 23.54% 
- D) 14.28% 
- E) 25.68% 

Answer: B

According to the question

The selling price of article U = Rs. 5440

The marked price of article U, $SP = MP * (80 / 100) * (85 / 100)$

$$5440 = MP * 0.8 * 0.85$$

$$5440 = MP * 0.68$$

$$\text{Marked Price of article U} = 5440 / 0.68 = \text{Rs. } 8000$$

$$\text{The marked price of article V} = 8000 * \frac{3}{4} = \text{Rs. } 6000$$

$$\text{The selling price of article V} = 5440 - 1440 = \text{Rs. } 4000$$

$$4000 = 6000 * (100 - y) / 100$$

$$4000 / 60 = 100 - y$$

$$66.66 = 100 - y$$

$$y = 33.33$$

$$\text{Discount} = 33.33\%$$

Explanation:

Q. 91

John invested Rs. x in two different schemes U and V. 60% of the total amount is invested in scheme U at a rate of 10% per annum in SI for 3 years and the remaining amount is invested in scheme V at a rate of 20% per annum in CI for 2 years. The interest received from both schemes is Rs. 1780. Find the value of x.

A) Rs. 2500 B) Rs. 5000 C) Rs. 4500 D) Rs. 3500 E) Rs. 1500 **Answer: B**

According to the question

The total amount invested by John in scheme U is = $60x / 100 = 0.6x$ The total amount invested by John in scheme V is = $40x / 100 = 0.4x$ **Explanation:**Interest from U = $0.6x * 10 * 3 / 100 = 0.18x$ Interest from V = $0.4x * ((1.2 * 1.2) - 1) = 0.4x * 0.44 = 0.176x$ Total interest = $0.18x + 0.176x = 0.356x$ $0.356x = 1780$ $x = \text{Rs. } 5000$

Q. 92

The downstream and upstream speed of a boat is 10 km/hr and x km/hr respectively. The distance travelled by the boat upstream in 10 hours is 4 km more than the distance travelled by the boat in still water in 7 hours. Find the time taken by the boat to cover 90 km upstream.

A) 20 hours B) 15 hours C) 18 hours D) 12 hours E) 34 hours **Explanation:****Answer: B**

According to the question

The downstream speed = 10 km/hr

The upstream speed = x km/hr

Still water speed = $(10 + x) / 2$

$$10x - ((10 + x) / 2) * 7 = 4$$

$$20x - 70 - 7x = 8$$

$$13x = 78$$

$$x = 6 \text{ km/hr}$$

$$\text{Time taken to cover 90 km upstream} = 90 / 6 = 15 \text{ hours}$$

Q. 93

In a club, there are 4000 members. The ratio of the number of males to females in the club is 5:3. Among them, 25% of members play Cricket, 45% play Football and the remaining play Tennis. The ratio of the number of males who play Cricket, Football and Tennis is 6:10:9. Find the total number of females who play Cricket and Tennis.

- A) 300 
B) 350 
C) 250 
D) 700 
E) 500 

Answer: D

According to the question

The total number of members in the club = 4000

The total number of females in the club = $4000 \times \frac{3}{8} = 1500$

The total number of males in the club = $4000 \times \frac{5}{8} = 2500$

The total number of members who play Cricket = $4000 \times \frac{25}{100} = 1000$

The total number of members who play Football = $4000 \times \frac{45}{100} = 1800$

The total number of members who play Tennis = $4000 - 1000 - 1800 = 1200$

Explanation:

Let male distribution be 6a, 10a, 9a

$6a + 10a + 9a = 2500$

$25a = 2500$

$a = 100$

The total number of males who play Cricket = 600

The total number of females who play Cricket = $1000 - 600 = 400$

The total number of males who play Tennis = 900

The total number of females who play Tennis = $1200 - 900 = 300$

Required sum = $400 + 300 = 700$

Q. 94

The present age of B is 3 times the age of A 15 years ago. The age of B after 5 years is twice the present age of A. If C's age is n times the present age of A, and the average of the present ages of A, B and C is 65. Find the value of n.

A) 1 B) 2 C) 3 D) 4 E) 5 **Answer: B**

According to the question

$$(A - 15) * 3 = B$$

$$3A - B = 45 \text{ --- (1)}$$

$$B + 5 = 2A$$

$$2A - B = 5 \text{ --- (2)}$$

By subtracting the equations (1) and (2), we get $A = 40$ years

$$B = 2 * 40 - 5 = 75 \text{ years}$$

$$\text{The total age of A, B and C} = 65 * 3 = 195$$

$$40 + 75 + C = 195$$

$$115 + C = 195$$

$$C = 80$$

C's present age is n times A's present age

$$80 = n * 40$$

$$n = 2$$

Explanation:

Q. 95

Read the following information carefully and answer the questions.

There are a certain number of laptops of four different brands Dell, HP, Lenovo and Asus sold in three different years i.e. 2020, 2021 and 2022.

2020: The ratio of the number of Dell, HP and Asus laptops sold is 4:3:6 respectively. The sum of the number of HP and Lenovo laptops sold is 200 and the number of HP laptops sold is 20 less than that of Lenovo laptops.

2021: The average number of Dell and Asus laptops sold is 90 and the number of Asus laptops sold is 80% of the number of Dell laptops sold. The number of HP and Lenovo laptops sold is 45 and 55 more than that of Asus laptops respectively.

2022: The number of Lenovo laptops sold is half of the number of Asus laptops sold and the number of Dell laptops sold is four times the number of HP laptops sold. The number of HP and Lenovo laptops sold is 50 and 60 respectively.

Find the ratio of the total number of Lenovo laptops sold in 2020 and 2021 together to the number of Dell laptops sold in 2020?

A) 25:32 B) 71:29 C) 49:24 D) 12:50 E) None of these 

Explanation:

2020: The sum of the number of HP and Lenovo laptops sold = 200

The difference between the number of HP and Lenovo laptops sold = 20

The number of Lenovo laptops sold = $(200 + 20) / 2 = 110$

The number of HP laptops sold = $200 - 110 = 90$

The number of Dell laptops sold = $90 * 4 / 3 = 120$

The number of Asus laptops sold = $90 * 6 / 3 = 180$

2021: The sum of the number of Dell and Asus laptops sold = $90 * 2 = 180$

The ratio of the number of Dell and Asus laptops sold = $100 : 80 = 5 : 4$

The number of Dell laptops sold = $180 * 5 / 9 = 100$

The number of Asus laptops sold = $180 - 100 = 80$

The number of HP laptops sold = $80 + 45 = 125$

The number of Lenovo laptops sold = $80 + 55 = 135$

2022: The number of HP laptops sold = 50

The number of Lenovo laptops sold = 60

The number of Asus laptops sold = $60 * 2 = 120$

The number of Dell laptops sold = $50 * 4 = 200$

Laptop/year	HP	Lenovo	Asus	Dell
2020	90	110	180	120
2021	125	135	80	100
2022	50	60	120	200

Answer: C

The number of Lenovo laptops sold in 2020 and 2021 = $110 + 135 = 245$

The number of Dell laptops sold in 2020 = 120

Required ratio = $245 : 120 = 49 : 24$

Q. 96

Read the following information carefully and answer the questions.

There are a certain number of laptops of four different brands Dell, HP, Lenovo and Asus sold in three different years i.e. 2020, 2021 and 2022.

2020: The ratio of the number of Dell, HP and Asus laptops sold is 4:3:6 respectively. The sum of the number of HP and Lenovo laptops sold is 200 and the number of HP laptops sold is 20 less than that of Lenovo laptops.

2021: The average number of Dell and Asus laptops sold is 90 and the number of Asus laptops sold is 80% of the number of Dell laptops sold. The number of HP and Lenovo laptops sold is 45 and 55 more than that of Asus laptops respectively.

2022: The number of Lenovo laptops sold is half of the number of Asus laptops sold and the number of Dell laptops sold is four times the number of HP laptops sold. The number of HP and Lenovo laptops sold is 50 and 60 respectively.

If the average number of Dell laptops sold in 2022 and 2023 is 220 and the ratio of the number of Dell and Lenovo laptops sold in 2023 is 4:5, then find the number of Lenovo laptops sold in 2023.

A) 270 B) 240 C) 300 D) 210 E) None of these 

Explanation:

2020: The sum of the number of HP and Lenovo laptops sold = 200

The difference between the number of HP and Lenovo laptops sold = 20

The number of Lenovo laptops sold = $(200 + 20) / 2 = 110$

The number of HP laptops sold = $200 - 110 = 90$

The number of Dell laptops sold = $90 * 4 / 3 = 120$

The number of Asus laptops sold = $90 * 6 / 3 = 180$

2021: The sum of the number of Dell and Asus laptops sold = $90 * 2 = 180$

The ratio of the number of Dell and Asus laptops sold = $100 : 80 = 5 : 4$

The number of Dell laptops sold = $180 * 5 / 9 = 100$

The number of Asus laptops sold = $180 - 100 = 80$

The number of HP laptops sold = $80 + 45 = 125$

The number of Lenovo laptops sold = $80 + 55 = 135$

2022: The number of HP laptops sold = 50

The number of Lenovo laptops sold = 60

The number of Asus laptops sold = $60 * 2 = 120$

The number of Dell laptops sold = $50 * 4 = 200$

Laptop/year	HP	Lenovo	Asus	Dell
2020	90	110	180	120
2021	125	135	80	100
2022	50	60	120	200

Answer: C

The sum of the number of Dell laptops sold in 2022 and 2023 = $220 * 2 = 440$

The number of Dell laptops sold in 2023 = $440 - 200 = 240$

The number of Lenovo laptops sold in 2023 = $240 * 5 / 4 = 300$

Q. 97

Read the following information carefully and answer the questions.

There are a certain number of laptops of four different brands Dell, HP, Lenovo and Asus sold in three different years i.e. 2020, 2021 and 2022.

2020: The ratio of the number of Dell, HP and Asus laptops sold is 4:3:6 respectively. The sum of the number of HP and Lenovo laptops sold is 200 and the number of HP laptops sold is 20 less than that of Lenovo laptops.

2021: The average number of Dell and Asus laptops sold is 90 and the number of Asus laptops sold is 80% of the number of Dell laptops sold. The number of HP and Lenovo laptops sold is 45 and 55 more than that of Asus laptops respectively.

2022: The number of Lenovo laptops sold is half of the number of Asus laptops sold and the number of Dell laptops sold is four times the number of HP laptops sold. The number of HP and Lenovo laptops sold is 50 and 60 respectively.

If the number of Asus laptops unsold in 2020, 2021 and 2022 is 40, 20 and 10 respectively, then find the ratio of the total number of Asus laptops manufactured in 2020 to the number of Asus laptops manufactured in 2021 and 2022 together.

A) 15:14 B) 22:23 C) 19:18 D) 21:12 E) None of these 

2020: The sum of the number of HP and Lenovo laptops sold = 200

The difference between the number of HP and Lenovo laptops sold = 20

The number of Lenovo laptops sold = $(200 + 20) / 2 = 110$

The number of HP laptops sold = $200 - 110 = 90$

The number of Dell laptops sold = $90 * 4 / 3 = 120$

The number of Asus laptops sold = $90 * 6 / 3 = 180$

2021: The sum of the number of Dell and Asus laptops sold = $90 * 2 = 180$

The ratio of the number of Dell and Asus laptops sold = $100 : 80 = 5 : 4$

The number of Dell laptops sold = $180 * 5 / 9 = 100$

The number of Asus laptops sold = $180 - 100 = 80$

The number of HP laptops sold = $80 + 45 = 125$

The number of Lenovo laptops sold = $80 + 55 = 135$

2022: The number of HP laptops sold = 50

The number of Lenovo laptops sold = 60

The number of Asus laptops sold = $60 * 2 = 120$

The number of Dell laptops sold = $50 * 4 = 200$

Explanation:

Laptop/year	HP	Lenovo	Asus	Dell
2020	90	110	180	120
2021	125	135	80	100
2022	50	60	120	200

Answer: B

The number of Asus laptops manufactured in 2020 = $180 + 40 = 220$

The number of Asus laptops sold in 2021 and 2022 = $80 + 120 = 200$

The number of Asus laptops manufactured in 2021 and 2022 = $200 + 20 + 10 = 230$

Required ratio = $220 : 230 = 22 : 23$

Q. 98	What approximate value should come in the place of (?) in the following questions $11.99^3 \div (9.03 * 3.97) + 120.99^3 \div 11.02^3 = ?$ A) 1399  B) 1259  C) 1379  D) 1349  E) 1289 
Explanation:	Answer: C $11.99^3 \div (9.03 * 3.97) + 120.99^3 \div 11.02^3 = ?$ $12^3 \div (9 * 4) + 121^3 \div 11^3 = ?$ $1728 \div 36 + 11^3 = ?$ $48 + 1331 = ?$ $? = 1379$
Q. 99	What approximate value should come in the place of (?) in the following questions $\sqrt{675.87 * ?} + 254.99\% \text{ of } 20.01 = 20.99^2$ A) 20  B) 15  C) 25  D) 10  E) 30 
Explanation:	Answer: B $\sqrt{675.87 * ?} + 254.99\% \text{ of } 20.01 = 20.99^2$ $\sqrt{676 * ?} + 255\% \text{ of } 20 = 21^2$ $26 * ? + 51 = 441$ $26 * ? = 390$ $? = 15$

Q. 100	What approximate value should come in the place of (?) in the following questions $640.01\% \text{ of } 24.99 + 240.03\% \text{ of } 44.98 - 399.95\% \text{ of } ? = 5.99^3$ A) 13 ✓ B) 26 ✗ C) 6.5 ✗ D) 20 ✗ E) 39 ✗
Explanation:	Answer: A $640.01\% \text{ of } 24.99 + 240.03\% \text{ of } 44.98 - 399.95\% \text{ of } ? = 5.99^3$ $640\% \text{ of } 25 + 240\% \text{ of } 45 - 400\% \text{ of } ? = 6^3$ $160 + 108 - 400\% \text{ of } ? = 216$ $400\% \text{ of } ? = 52$ $? = 13$
